AN UPDATED ANALYSIS OF
STATEWIDE AND DISTRICT-LEVEL
K-12 EDUCATION SPENDING
IN CALIFORNIA

FY 2003–04 to FY 2008–09

(This page left intentionally blank)

Preface

This study expands the analysis provided in our study published in June 2010 entitled *An Analysis of K-12 Education Expenditures in California: FY 2003-04 to FY 2008-09*. This report expands on the 52 school districts included in that preliminary analysis to include every school district in the State of California for which the necessary financial expenditure data are available using the most recent data available. One brief note is warranted regarding that report and this analysis. Some commentators mistakenly claimed that our June 2010 report recommended substantial cuts in public school expenditures. Neither that report nor this report does any such thing. They both provide specific expenditure data about public school finance in California and put those data in context. The only recommendations made in the initial study involved data-related issues, specifically clarifying bonded indebtedness reporting (recommending that expenditures to service pension obligation bonds should be clearly and separately distinguished from expenditures to service other bonded debt) and precisely separating expenditures for teachers benefits from the benefit expenditures for other credentialed personnel who are not teaching (typically administrative personnel who have teaching credentials).

Like the June 2010 report, the intent of this study is to provide citizens, taxpayers, and especially parents with clear, detailed information about public school finances in California. With this report in hand, parents, taxpayers, and the public can better evaluate the spending priorities of the both the State Legislature and also the spending priorities of individual School Boards, especially regarding the relative spending on Administrative Salaries and Benefits as compared to spending on Teacher Salaries and Benefits.

(This page left intentionally blank)

INTRODUCTION

This report is one in an ongoing series of periodic analyses of public policy issues by the Davenport Institute. This report builds on and amplifies our earlier report (June 2010) which analyzed public, K-12 education expenditure patterns in California from fiscal year (FY) 2003-04 to FY 2008-09 (the most recent year for which comprehensive data are available). The June 2010 report analyzed statewide K-12 expenditure patterns, and examined in detail the expenditure patterns of 52 selected public school districts in California. This updated report analyzes the expenditure patterns of all public school districts in California for which data are available, and thereby provides a more detailed picture of these expenditure patterns both in individual districts and statewide.

Like the June 2010 report, the first section of this report looks at K-12 education expenditure patterns statewide. While the summary statewide expenditure data remain the same, readers will note some relatively minor differences between this report and the June 2010 report regarding statewide per student expenditures. This is due to the fact that the Average Daily Attendance (ADA) figures posted by the State Department of Education do not include all of the children in charter schools. Some school districts do include their charter school enrollment in their ADA, while other school districts do not. (It should be noted that simply adding the statewide charter school ADA to the Department of Education statewide ADA number would result in an overstated calculated total ADA. This analysis calculated the correct net charter ADA and then added this net charter ADA to the State Department of Education ADA to arrive at an accurate net total ADA. See Methodology for a precise description of this calculation). As in the June 2010 report, the second section of this report analyzes special education demographics and expenditures. Section 3 puts the expenditure patterns of all K-12 school districts in California in comparative context, and is therefore a substantial expansion over Section 3 in the June 2010 report in which 52 selected school districts were compared. Section 4 presents profiles for each of the public school districts in California for which data are available (950+ districts), and is therefore much longer than Section 4 in the June 2010 report which profiled only the 52 selected districts.

Partial funding for this report was provided by the Small Business Action Committee.

The authors are solely responsible for the content of this report.

EXECUTIVE SUMMARY

Overview

This report, like our previous report of June 2010, examines K-12 public school district finances in California. Like the June 2010 report, the focus of this report is on how much money is spent by these public school districts and how that money has been allocated from Fiscal Year (FY) 2003-04 through FY 2008-09. Like the June 2010 report, there are four sections. Section 1 analyzes total school district expenditures statewide. The total expenditure patterns in Section 1 have not changed. Statewide, total administrative expenditures increased much more rapidly than total statewide expenditures for teacher salaries and benefits. Per student expenditures were changed because the State Department of Education Average Daily attendance (ADA) numbers, which were utilized to calculate per student expenditures in the June 2010 report, do not include all of the children enrolled in charter schools statewide. As noted in the introduction, some K-12 school districts do include charter school enrollment in their ADA number, other K-12 school districts do not. Simply adding the statewide total charter school ADA to the Department of Education promulgated ADA would, therefore, overstate the total ADA statewide. That error was avoided by carefully calculating the net number of children in charter schools who were not already included in the State Department of Education promulgated ADA, and then calculating a estimated total ADA, which is used in this report. A more detailed discussion of this calculation can be found in Methodology, on page xii. Section 2 analyzes expenditures for Special Education statewide, and there are no changes from the June 2010 report. Section 3 of this report is substantially different than Section 3 in the June 2010 report. Section 3 analyzes the expenditure patterns for all public school districts in California for which data are available. Section 3 of the June 2010 report only analyzed and compared 52 selected public school districts. Section 4 presents detailed expenditure profiles for all public school districts in California. Section 4 of the June 2010 report provided detailed expenditure reports for only the 52 selected school districts mentioned in Section 3 of that report. So, Section 4 of this report is much longer and also contains additional comparative data about each of the public school districts in California.

As stated in the June 2010 report, over the last several years, the expression “budget cuts” has been heard often regarding K-12 public school district expenditures in California. In reality, total expenditures (excluding Capital Expenditures) have increased every year from FY 2003-04 through FY 2007-08, before leveling off in FY 2008-09. (If Capital expenditures are included, the Total Expenditures have increased every Fiscal Year).

And again, as stated in the June 2010 report, Total Expenditures (excluding Capital Expenditures) increased from \$45,603,379,048 to \$55,601,177,318 during this period, an increase of 22 percent. To put this 22 percent increase in perspective, it was notably greater than the 15 percent increase in Per Capita Personal Income (PCPI) for all Californians during this period. It was also greater than the increase in inflation or the consumer price index during this period (See Table 1-2, pp. 4-5 for a comparison of the increases in each of these indices). Throughout this report, expenditure increases are compared to the corresponding change in California PCPI. This is done for two reasons. First, PCPI gives the most precise measure of the ability of Californians to pay for all goods and services – everything from groceries, transportation, and housing to police protection, parks, and K-12 public education. Second, the change in PCPI during this period was greater than the change in inflation. Therefore, the difference between K-12 expenditures and PCPI is less than the difference between K-12 expenditure growth and inflation.

As in the June 2010 report, when comparing the changes in K-12 school district expenditures to the changes in PCPI in the Section I of this report, PCPI growth was set at zero for the last year analyzed (FY08-09) In reality, PCPI actually declined that year. Note, however, that in Section 4, which examines every public school district in California in more detail, a graph showing the percentage growth in district Total Expenditures (excluding Capital Expenditures) compared to the growth (or in the last year, decline) in PCPI for each year is provided. Nevertheless, all calculations for any annual savings associated with reducing annual expenditure growth to the same rate as PCPI in FY 08-09 are based on a PCPI growth rate of zero, in part to avoid the more harsh policy suggestion of “negative growth” in education spending.

In every year examined, except for FY 08-09, total expenditures for K-12 public education increased, but even in FY 08-09 many expenditure categories increased significantly. Section 1 analyzes these changes in each category of expenditure, and calculates potential savings if expenditures had not increased more rapidly than PCPI from FY 06-07 to FY 07-08 and from FY 07-08 to FY 08-09.

Average Daily Attendance (ADA) (including the net ADA in charter schools, see paragraph one above) actually declined from 5,896,402 in FY03-04, to 5,757,830 in FY 08-09. During this period, Total Expenditures per student (excluding Capital Expenditures) increased from \$7,734 in FY 03-04 to \$9,673 in FY 07-08, before declining by \$16 dollars, to \$9,657 in FY 08-09. This was an increase of \$1,923 (or 24.9 percent) in Total Expenditures per student from FY 03-04 through FY 08-09. This 24.9 percent increase was substantially greater than the 15 percent increase in California PCPI over this same period. When Capital Expenditures are included, Total Expenditures per student increased from \$9,653 in FY03-04 to \$11,865 in FY 08-09, an increase of 22.9 percent.

Because there is frequently much discussion about how much money actually “goes directly to classroom education”, this issue is addressed at the end of Section 1. Direct classroom expenditures are commonly understood to include teacher salary and benefits, instructional aide salary and benefits, and classroom textbooks, materials, and supplies. In this analysis the specific expenditure categories used to calculate what constitutes direct classroom expenditures are:

- Total Certificated Teacher Salaries (Accounting Object 1100) & Estimated Benefits
- Total Instructional Aide Salaries (Accounting Object 2100) & Estimated Benefits
- Approved Textbooks and Books (Accounting Objects 4100 & 4200)
- Materials and Supplies expenditures (Accounting Object 4300) that pertain to Instructional or Special Education Functions (Accounting Functions 1000, 1110, 1120, 1130, 1180 and 1190)
- Professional/Consulting Services/Subagreements for Services (Accounting Objects 5100 and 5800) that pertain to Instructional or Special Education Functions (Accounting Functions 1000, 1110, 1120, 1130, 1180, 1190)

Using these categories, direct classroom expenditures statewide went from 59 percent of Total Expenditures (excluding Capital Expenditures) in FY 03-04 to 57.8 percent of Total Expenditures (excluding Capital Expenditures) in FY 08-09. It should be kept in mind, however, that there is a wide range among all the public school districts in California, regarding “In the Classroom” spending. Statewide, in FY 08-09, Classified and Certificated Administrators/Supervisors Total Salaries and Estimated Benefits amounted to approximately 6.7 percent of Total Expenditures (excluding Capital Expenditures) statewide. There are also wide variations among the districts in the percentage of spending allocated to classified and certificated administrators, which are shown in the detailed profile pages of each district .These issues are analyzed in Section 3 and Section 4.

Special education, analyzed in Section 2, receives attention because it constitutes a significant portion of K-12 Total Expenditures and because it is useful to understand the scope of special education expenditures and the nature of services involved. The total Full Time Equivalent (FTE) Special Education ADA statewide remained fairly constant at approximately 3 percent of Total statewide ADA, from FY 03-04 (182,822 ADA) to FY 08-09 (183,032 ADA). (See Table 2-1, pp. 84-85) The total number of children receiving at least some sort of special education attention also remained fairly constant from FY 03-04 (678,105) to FY 08-09 (681,980). Most of these children received some special attention each week addressing a speech or language impairment, or a specific learning disability regarding, for example, mathematics or reading. (See Table 2-2, pp. 86-87)

Section 3 puts the expenditure patterns of the public school districts in California in context. Notably, in 695 (or approximately 73 percent) of the public school districts in California the expenditures for Administrative Salaries increased more rapidly than the change in PCPI during from FY 03-04 to FY 08-09. In 195 (or approximately 21 percent) of the public school districts in California expenditures for Administrative Salaries increased more rapidly than PCPI for this period while expenditures for Teachers Salaries increased less than the change in PCPI. By way of comparison, in 247 public school districts expenditures for Administrative Salaries increased less rapidly than the change in PCPI over this same period, and in 104 school district expenditures for both expenditures for both Administrative Salaries and Teacher Salaries increased less rapidly than the change in PCPI. The remaining 143 (15 percent of all districts) showed Teacher Salaries increasing faster than PCPI while Administrator Salaries increased slower than PCPI.

Section 3 also provides the rank order quartiles for various expenditure data, including Total Expenditures per student, Teacher Salary and Benefits as a Percent of Total Expenditures, Administrative Salaries as a Percent of Teacher Salaries, and Estimated Percentage of Total Expenditures “In the Classroom”, and Estimated Percentage of FTE Teachers Not Contributing to Report Average Class Size. With this information, readers can quickly get some sense of the relative standing of any particular district they might be interested in by comparing the expenditure data provided for each district in Section 4 to these rank order quartiles.

Total Expenditures (excluding Capital Expenditures) per student varied substantially among the public school districts in California, with those in the top quartile of this category of expenditure spending at least \$10,744 per student in FY 08-09, while those districts in the lowest quartile spent less than \$8,297 per student (Section 4 shows the expenditure patterns for each school district in California for which data are available). Teacher Salary and Benefit expenditures as a percentage of Total Expenditures (excluding Capital Expenditures) varied widely as well. Districts in the top quartile of this category spent at least 53 percent of their Total Expenditures (excluding Capital Expenditures) on Teacher Salary and Benefits, while those in the lowest quartile spent less than 43 percent of their Total Expenditures for the same purpose.

The relationship between expenditures for Administrative Salaries and Teachers Salaries is analyzed in Section 3. Expenditures for Administrative Salaries amounted to over 19 percent (or more) of the expenditures for Teachers Salaries for the 25 percent of the districts in the first quartile of this metric. By way of comparison, expenditures for Administrative Salaries amounted to 13 percent (or less) of the spending for Teachers Salaries for those districts in the lowest quartile of this metric. A similar ranking of the percentage of Total Expenditures (excluding Capital Expenditures) that are spent directly “In the Classroom” shows that the 25 percent of the districts in the first quartile allocated 63 percent (or more)

of their Total Expenditures directly “In the Classroom” while districts in the lowest quartile of this metric only allocated 54 percent (or less) directly “In the Classroom”.

Section 3 also analyzes the difference between the number of FTE (Full Time Equivalent) teachers not contributing to reported average classroom size. This metric compares the reported average classroom size to the ratio of FTE Teachers to ADA (Average Daily Enrollment). In highest quartile of this metric (containing 25 percent of the districts) the number of FTE teachers was over 28 percent higher than the number required to meet the districts reported average classroom size. Those districts in the lowest quartile of this metric had an FTE teacher population less than 18 percent above the number required to meet their average reported classroom size.

Section 4 provides detailed profiles of each individual public school district in California for which data are available. Notably, readers can easily see the change from FY 03-04 through FY 08-09 in the percentage of district expenditures going to Teacher Salaries and Benefits, as well reported average class size, ADA, number of FTE teachers, the percentage of Total Expenditures (excluding Capital Expenditures) going in to the classroom as well as the annual dollar savings that could have been realized had all expenditures, except Teacher Salaries and Benefits, been held constant for one year from FY 07-08 through FY 08-09, and the number of teachers that could have been employed from the savings realized.

A brief note regarding the state’s accounting system:

Readers of this report will notice that two methodological issues involving the state’s accounting system, Standardized Account Code Structure (SACS), had to be addressed in the course of this analysis.

First, benefit expenditures for all credentialed personnel, teacher and administrator alike, are lumped together. The benefit expenditures for teachers and the benefit expenditures for other credentialed personnel should be separately designated as such.

Second, clearly separating capital debt payments and debt payments for pension obligation bonds would allow a more precise evaluation of the actual cost related to salary and benefit expenditures.

These two improvements would allow parents and taxpayers to have a clearer, more precise picture of public school finances in California.

Section 1: Statewide Summary Data

1. Statewide expenditures for Teacher Salaries and Benefits declined from 50 percent of Total Statewide expenditures (excluding capital expenditures) in FY 03-04 to 49 percent in FY 05-06, and declined further to 48 percent in FY08-09. In other words, by FY 05-06, less than half of the K-12 operating expenditures statewide were for teacher salaries and benefits. (See Table 1-8, pp. 16-17)
2. Statewide, Average Daily Attendance (ADA) decreased from 5,896,402 in FY 03-04, to 5,757,830 in FY 08-09, or a 2.4 percent decrease. (See Table 1-1, pp. 2-3)

3. Statewide, per student expenditures for 22 out of 26 operating expenditure categories increased at a faster rate from FY 03-04 to FY 08-09 than Per Capita Personal Income (PCPI) in California, which increased 15 percent during the same period. Notably, per student expenditures for Classified Supervisors' and Administrators' (those not holding a teaching credential) salaries increased 43 percent, per student expenditures for Certificated Supervisors' and Administrators' (those holding a teaching credential) increased 27 percent, and per student expenditures for staff travel and conference attendance increased 21 percent, from FY03-04 to FY 08-09. By way of comparison, per student expenditures for Certificated Teachers' Salaries increased 20 percent during this same period. (See Table 1-9B, pp. 20-21).
4. In FY 07-08, holding the increase in Total Expenditures per student, except expenditures for Teacher Salaries and Benefits and Capital Expenditures, to the same increase as the PCPI would have freed up well over \$1.7 billion, enough money to employ an additional 21,034 teachers. To put that in perspective, there are approximately 300,361 FTE teachers employed statewide. In FY 08-09, holding the increase in each operating category of spending per student, excluding Teacher Salaries and Benefits (e.g. Certified Supervisors and Administrators, Travel and Conferences, etc. – see # 3 above) would have freed up well over \$816 million, enough to employ an additional 9,747 teachers statewide. (See Tables 1-4A and 1-4B, pp. 8-9)
5. Statewide, Total Expenditures per student (excluding capital expenditures) increased from \$7,734 in FY03-04 to \$9,673 in FY 07-08, before declining to \$9,657 in FY 08-09. This was an increase of 24.9 percent in Total Expenditures per student from FY 03-04 through FY 08-09. This 24.9 percent increase was substantially greater than the 15 percent increase in California PCPI over this same period. What this means is that, although Total Expenditures per student increased much faster than California PCPI, relatively less of this increased revenue per student has been going to Teacher Salaries and Benefits (see #1 above) and relatively more has been going to other expenditures, notably Administrator salaries and benefits. (See Table 1-5, pp. 10-11)
6. Statewide, Total Expenditures, including Capital Expenditures, per student increased from \$9,653 in FY 03-04 to \$11,865 in FY 08-09. (See Table 1-38, pp. 78-79)
7. Direct "In the Classroom" expenditures statewide went from 59 percent of Total Expenditures (excluding Capital Expenditures) in FY 03-04 to 57.8 percent of Total Expenditures (excluding Capital Expenditures) in FY 08-09. (See Table 1-39, pp. 80-81)

Section 2: Special Education

8. The total Full Time Equivalent (FTE) Special Education ADA statewide remained fairly constant at approximately 3 percent of Total statewide ADA, from FY 03-04 (182,822 ADA) to FY 08-09 (183,032 ADA). (See Table 2-1, pp. 82-83). The total number of children receiving at least some sort of special education attention also remained fairly constant from FY 03-04 (678,105) to FY 08-09 (681,980). Most of these children received some special attention each week addressing a speech or language impairment, or a specific learning disability regarding, for example, mathematics or reading. (See Table 2-2, pp. 86-87)

Section 3: Quadrant and Quartile Analysis

9. Total Expenditures per student exceeded \$10,744 for the school districts in the highest quartile of all districts in the Total Expenditure per student rankings. School districts in the lowest quartile of this metric had per student Total Expenditures of \$8,297 or less. (See Chart 3-1, pp. 94-95)
10. School districts in the highest quartile on the ranking measuring Teacher Salary and Benefit Expenditures as a percentage of Total Expenditures (excluding Capital Expenditures) spent 53 percent or more of their Total Expenditures on Teacher Salaries and Benefits. School districts in the lowest quartile of this metric spent 43 percent or less of their Total Expenditures on Teacher Salaries and Benefits. (See Chart 3-2, pp. 96-97)
11. In almost all school districts, the number of FTE (Full Time Equivalent) Teachers exceeded the number of teachers necessary to meet the districts reported average class size. (See Chart 3-5, pp. 102-103)
12. In 195 school districts, expenditures for Administrative Salaries and Benefits increased faster than the increase in PCPI from FY 03-04 through FY 08-09, while expenditures for Teacher Salaries and Benefits increased less rapidly than the increase in PCPI during this period. (See Chart 3-6, pp. 104-105)

Section 4: Statewide School District Profiles

Section 4 provides a detailed profile of each district's expenditures and relative rank in select expenditure and staffing variables for over 950 individual school districts in California.

METHODOLOGY

The data utilized in this report were obtained from several sources. The data about California Per Capita Personal Income (PCPI) were obtained from the United States Bureau of Economic Analysis, and the data source for rates of change to the Consumer Price Index and Gross Domestic Product was the Economic Research Unit of the Federal Reserve Bank of St. Louis. In order to most effectively and cleanly estimate the changes in PCPI, this study uses the year-to-year changes for PCPI, reflecting the changes for the midpoints of the described fiscal years. Some have called for using extrapolated values from the prior year, or even two years prior arguing that the covered period should capture the budget cycles instead of the spending cycles involved. Just as actual expenditures are reconciled annually under the state's apportionment formulas, the best approach is to compare the expenditures to the actual economic environment in which they are made—much as households consider their spending in the context of their actual income, not what they had hoped it might be.

All school expenditure data came from two sets of data provided by the California Department of Education: the Standardized Account Code Structure (SACS) files and the J-90 Certificated Salary and Benefit files.

In developing the counts for the Average Daily Attendance (ADA) used in this analysis, an important issue arose that required specific review and adjustment in order to ensure that the totals used in the study's computations corresponded appropriately to the spending data provided. The largest issue was related to charter schools. The dataset includes specific data on charter school expenditures in some instances. The SACS dataset provides a table of the Local Educational Agencies (LEAs) for which data are provided in the SACS expenditure data. In many instances, however, these LEAs do not include the enrollments associated with these charter school enterprises. While the impact of this omission was minimal at the state level, it did raise the possibility of creating undesired distortions at the district-detail level. To address this limitation of the SACS data (a limitation which the Department of Education should move to correct), the study team manually reviewed each charter for which expenditure data was included in the SACS data to ensure that the appropriate enrollments were incorporated into the study totals. In instances where the SACS was missing the appropriate information, data were obtained from the latest data tables (usually the Second Principal Apportionment P-2) in the Funding Exhibits from the Finance and Grants section of the California Department of Education's data systems. This allows this study to have the most accurate estimates of the ADA included in each district as possible.

All school expenditures data were rinsed in the following fashion in order to remove data that do not pertain to K-12 Operating costs:

- Function codes 5000-5900 were removed to exclude Community/Civic Service-related expenditures
- Goal codes 4110, 4610-4630, 8100, ADLT, and CAFE were removed to exclude Adult Education, Community Service, and Cafeteria-related costs.
- Fund codes 11, 13, 61, and 95 were removed to exclude Adult Education, Student Body Fund, and Cafeteria-related costs.

Unless otherwise noted in the report, all individual objects of expenditure and totals exclude capital-related spending. In order to exclude this information, the following Funds were excluded:

- 14: Deferred Maintenance Fund
- 21: Building Fund
- 25: Capital Facilities Fund
- 30: State School Building Lease-Purchase Fund
- 35: County School Facilities Fund
- 40: Special Reserve Fund for Capital Outlay
- 49: Capital Project Fund for Blended Component Units

The statewide sections of this report do not include Local Education Agencies (LEAs) that are of either Joint-Powers Authorities (JPAs) or County Offices of Education (COEs). Expenditures for charter schools were included if the district reported those expenditures according to the SACS methodology.

Additionally, for the purposes of calculating Total Expenditures, specific objects of expenditure were excluded to again ensure that the data reflected operating costs, not capital-related costs or inter-fund expenditures. These expenditure objects are as follows: 7611-7651, 7299-7380, 7280, and 5710-5750. It should be noted that all debt-service related expenditures (7432-7434 and 7438-7439) were removed in order to ensure that no capital-related costs were included; however, it is likely that there are multiple debt obligations outstanding that have little or nothing to do with capital-spending, such as pension obligation bonds. In this regard, the total operating expenditures included herein are conservative estimates. It should also be noted that for the statewide totals, inter-district expenditures were also excluded in order to prevent double-counting; these objects include: 7281, 7221, 7211, and 7141.

With respect to Certificated Teacher Benefits, benefit costs are not reported by the California Department of Education for certificated teachers alone, but rather for all certificated staff combined. Thus, a benefit multiplier (Total Certificated Benefits as a % of Total Certificated Salaries) was developed and applied in order to estimate Certificated Teacher Salary and Benefit Costs. This most likely results in a slight overstatement of the expenditures for teacher benefits, because Certificated Supervisors and Administrators almost certainly have more expensive benefits.

In order to estimate the percentage of expenditures being spent “In the Classroom,” the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

- Total Certificated Teacher Salaries (Object 1100) & Estimated Benefits
- Total Instructional Aide Salaries (Object 2100) & Estimated Benefits
- Approved Textbooks and Books (Objects 4100 & 4200)
- Materials and Supplies expenditures (Object 4300) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180 and 1190)
- Professional/Consulting Services/Subagreements for Services (Objects 5100 and 5800) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180, 1190)

(This page left intentionally blank)

SECTION 1: STATEWIDE SUMMARY DATA

Table 1-1 and Chart 1-1 show data about Average Daily Attendance (ADA) in K-12 public schools in California from Fiscal Year (FY) 03-04 through FY 08-09. Note that there was a slight decrease in the ADA during this period, from 5,896,402 in FY 03-04 to 5,757,830 in FY 08-09.

TABLE 1-1: Statewide Average Daily Attendance, FY 03-04 to FY 08-09

Fiscal Year	Average Daily Attendance (ADA)
FY 03-04	5,896,402
FY 04-05	5,906,249
FY 05-06	5,796,591
FY 06-07	5,850,296
FY 07-08	5,844,593
FY 08-09	5,757,830

CHART 1-1: Statewide Average Daily Attendance, FY 03-04 to FY 08-09

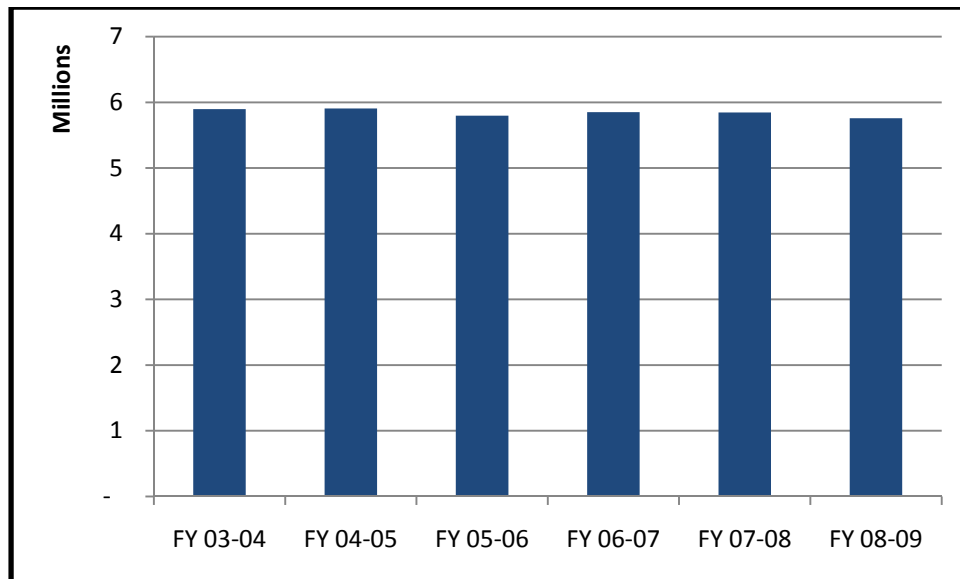

Table 1-2 and Chart 1-2 show data about changes in per capita personal income (PCPI) in California, changes in the gross domestic product (GDP) of the United States, and changes in the consumer price index (CPI) of the United States from FY 04-05 through FY 08-09. Note that the change in PCPI for California substantially exceeded the other two indexes in FY 04-05, FY 05-06, and FY06-07. In FY07-08 the U.S. GDP and the U.S. CPI both increased more rapidly than PCPI in California. In FY 08-09 PCPI in California declined, as did the U.S. CPI (although not as steeply as PCPI in California) while the U.S. GDP continued to increase. These indexes are based on the calendar year. So, for example, the three indexes listed for FY 04-05 are based on the changes that occurred from January 04 through January 05. As such, they reflect their respective values as of January 05, which is the midpoint of the 04-05 Fiscal Year, and therefore are an appropriate gauge by which to evaluate the expenditures for that Fiscal Year.

These data offer some perspective on the relative health of the California economy compared to the overall U. S. economy during this period. In this report K-12 education expenditures are compared to the PCPI in California. This is done because the PCPI in California is the most precise measure of the economic well being of Californians, and also it is the most precise measure of the income Californians have available to pay for food, clothing, shelter, transportation and many other goods and services, including K-12 public education. Cumulatively from FY 03-04 to FY 08-09, the increase in PCPI and U.S. GDP were both at approximately 14.7 percent, while the increase in U.S. CPI was approximately 13.8 percent.

TABLE 1-2: % Changes in PCPI, GDP, and CPI, FY 04-05 to FY 08-09

Fiscal Year	% Change in CA PCPI	% Change in U.S. GDP	% Change in U.S. CPI
FY 04-05	5.0%	3.28%	2.84%
FY 05-06	7.2%	3.35%	3.97%
FY 06-07	4.4%	3.17%	2.09%
FY 07-08	1.0%	2.11%	4.35%
FY 08-09	-3.5%	2.01%	-0.13%

Table 1-3 and Chart 1-3 show K-12 public school district Total Expenditures in California, excluding Capital Expenditures, from FY 03-04 through FY 08-09. This represents a 21.9 percent change over this period, which is substantially greater than the corresponding 15 percent change in California PCPI. As noted elsewhere in this report, the per student expenditures increased by 24.9 percent, an even larger amount.

TABLE 1-3: Statewide Total Expenditures, Excluding Capital, FY 03-04 to FY 08-09

Fiscal Year	Total Expenditures (excl. Capital)
FY 03-04	\$45,603,379,048
FY 04-05	\$47,510,716,420
FY 05-06	\$50,176,289,609
FY 06-07	\$53,465,071,010
FY 07-08	\$56,533,557,037
FY 08-09	\$55,601,177,318

CHART 1-3: Statewide Total Expenditures, Excluding Capital, FY 03-04 to FY 08-09

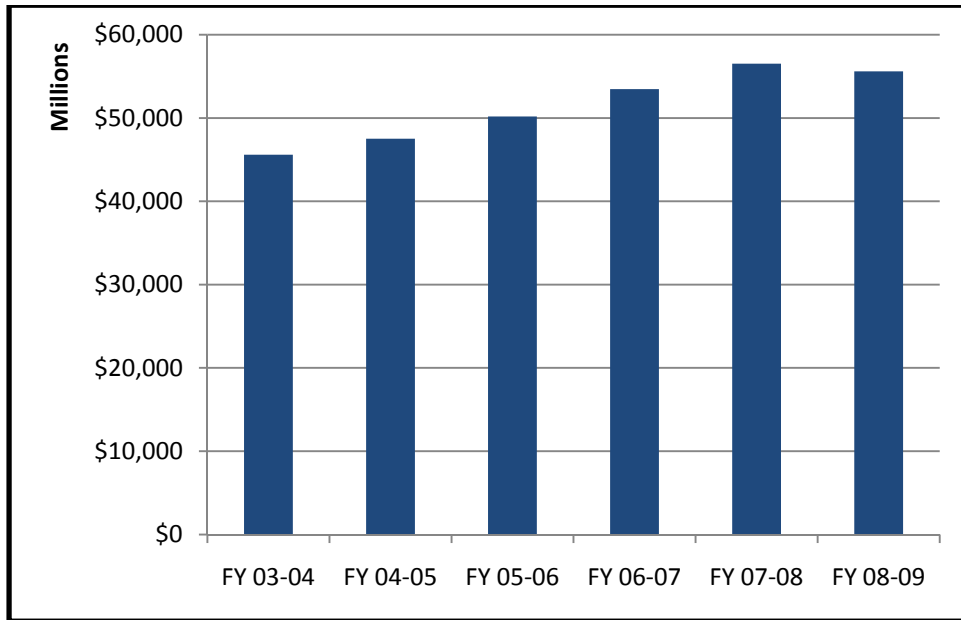

Table 1-4A shows potential savings from restricting growth in Total Expenditures (excluding capital and teacher salaries & benefits, and debt payments) per student to the percent change in PCPI from FY 07-08 to FY 08-09. Holding total expenditures, excepting expenditures for teacher salaries and benefits and capital expenditures, to the same increase as the PCPI in FY 07-08 would have freed up well over \$1.8 billion, enough money to employ an additional 21,034 teachers. To put this in perspective there were 300,361 FTE teachers statewide in FY 08-09.

Table 1-4B is a slightly more granular method for calculating savings in that each object of expenditure was restricted to growth in PCPI, rather than just total expenditure per student, as was the case in Table 1-4A.

TABLE 1-4A: Potential Savings from PCPI Growth Restriction: Total Expenditures per Student, FY 07-08 and FY 08-09

Fiscal Year	Total Expenditures (excl. capital and teacher sal&benefits)-Savings	Add'l Teachers
FY 07-08	\$1,730,276,693	21,034
FY 08-09	\$0	-

TABLE 1-4B: Sum of Potential Savings from PCPI Growth Restriction: All Expenditure Objects FY 07-08 and FY 08-09

Fiscal Year	Sum of Savings (excl. capital, teacher sal& benefits)	Add'l Teachers
FY 07-08	\$2,115,017,691	25,711
FY 08-09	\$816,261,548	9,747

Table 1-5 and Chart 1-5 show state wide K-12 public school district Total Expenditures per student, excluding Capital Expenditures, from FY 03-04 through FY 08-09. Total expenditures per student increased from \$7,734 in FY 03-04, to \$9,657 in FY 08-09, an increase of 24.9 percent. This 24.9 percent increase was substantially greater than the 15 percent increase in California PCPI over this same period.

TABLE 1-5: Statewide Total Expenditures per Student, excluding capital, FY 03-04 to FY 08-09

Fiscal Year	Total Expenditures
FY 03-04	\$7,734
FY 04-05	\$8,044
FY 05-06	\$8,656
FY 06-07	\$9,139
FY 07-08	\$9,673
FY 08-09	\$9,657

CHART 1-5: Statewide Total Expenditures per Student, excluding capital, FY 03-04 to FY 08-09

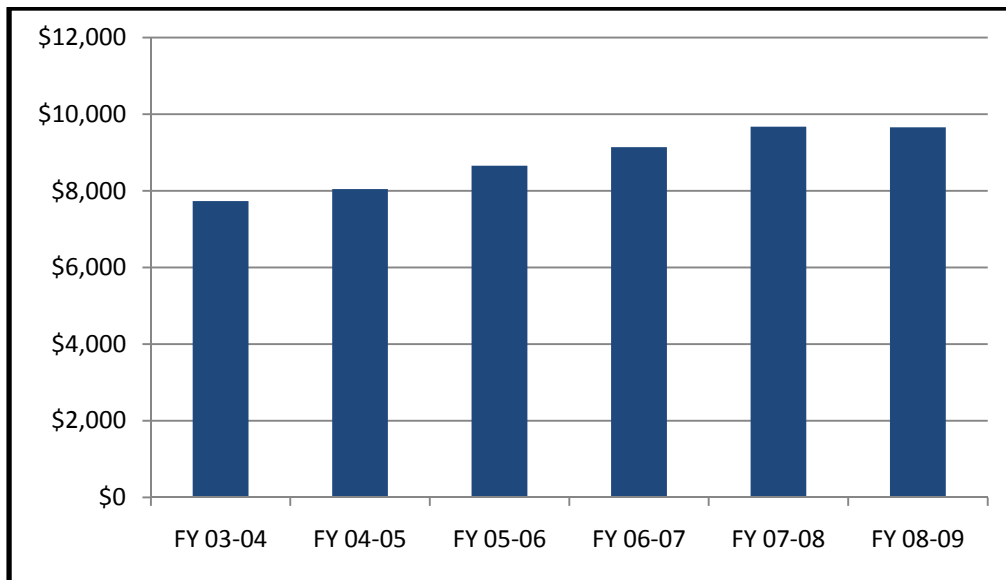

Table 1-6 and Chart 1-6 show expenditures for K-12 public school teacher salaries in California from FY 2003-04 through FY 2008-09. These expenditures increased from \$18,278,186,189 in FY 03-04 to \$21,403,302,688 in FY 08-09. Note that these are teacher salaries only, not salaries and benefits.

TABLE 1-6: Statewide Teacher Salaries Expenditures, FY 03-04 to FY 08-09

Fiscal Year	Certificated Teacher Salaries
FY 03-04	\$18,278,186,189
FY 04-05	\$18,675,762,680
FY 05-06	\$19,342,200,463
FY 06-07	\$20,610,332,056
FY 07-08	\$21,460,730,791
FY 08-09	\$21,403,302,688

CHART 1-6: Statewide Teacher Salaries Expenditures, FY 03-04 to FY 08-09

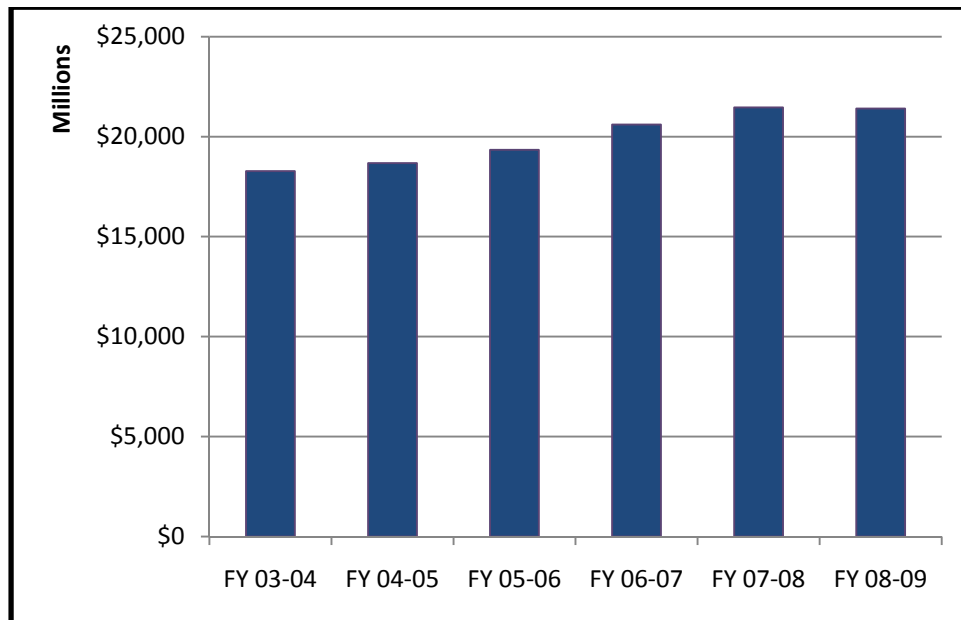

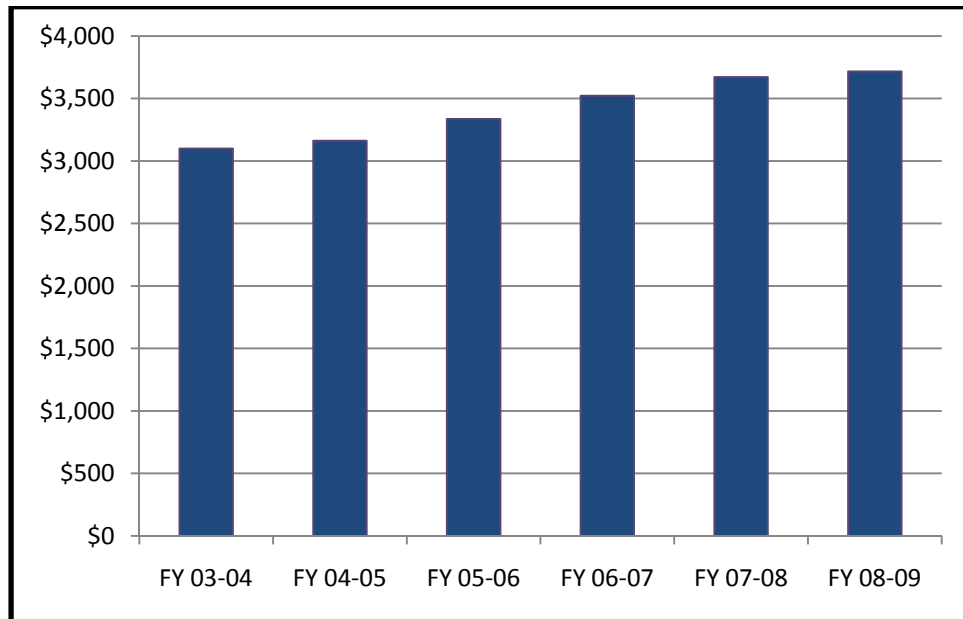

Table 1-7 and Chart 1-7 show the statewide calculated expenditures for teacher salaries per student from FY 03-04 through FY 08-09. The table at the bottom of the facing page shows the savings and the number of teachers that could have been employed had these expenditures in FY 07-08 increased as much as PCPI and been held flat from in FY 08-09.

TABLE 1-7: Statewide Teacher Salaries Expenditures per Student, FY 03-04 to FY 08-09

Fiscal Year	Certificated Teacher Salaries
FY 03-04	\$3,100
FY 04-05	\$3,162
FY 05-06	\$3,337
FY 06-07	\$3,523
FY 07-08	\$3,672
FY 08-09	\$3,717

CHART 1-7: Statewide Teacher Salaries Expenditures per Student, FY 03-04 to FY 08-09

Fiscal Year	Certificated Teacher Salaries-Savings	Add'l Teachers
FY 07-08	\$643,506,881	7,823
FY 08-09	\$255,366,629	3,049

Table 1-8 and Chart 1-8 show the Estimated Teacher and Salaries and Benefits Expenditures as a percentage of Total Expenditures, excluding Capital Expenditures, from FY 03-04 through FY 08-09. Note that this percentage has declined somewhat from 50 percent in FY 03-04 to 48 percent in FY 08-09.

It should also be noted that expenditures for teachers benefits used in this Table were calculated in the following manner: Total Certified Salaries and Total Certified Benefit expenditures statewide are available. These two Total expenditure categories were then utilized to compute an average percentage ratio between salary expenditures and benefit expenditures for all Certificated Personnel statewide. This percentage relationship was then applied to the available Total Salary expenditure for teachers to generate an estimated Teachers Salaries and Benefits expenditure. This calculation was made for each of the Fiscal Years shown in Table 1-8. Benefit packages for more senior Certificated personnel in administrative positions, such as principals and superintendents, may be larger than those granted to classroom teachers, however the overwhelming majority of Certificated Personnel are teachers, thus the benefit percentage for teachers is likely close to this calculated average for all Certificated Personnel. Precise analysis in this regard is not possible in light of the limitations of the SACS accounting object structure, which does not include objects for teacher-specific benefits. For this reason (as noted the Executive Summary), we recommend greater clarity in future aggregations and reporting of SACS data, in order facilitate a more precise discussion.

TABLE 1-8: Statewide Estimated Teacher Salaries and Benefit Expenditures as a % of Total Expenditures, Excluding Capital, FY 03-04 to FY 08-09

Fiscal Year	Total Teacher Salaries & Benefits (est.) as a % of Total Expenditures
FY 03-04	50%
FY 04-05	50%
FY 05-06	49%
FY 06-07	49%
FY 07-08	48%
FY 08-09	48%

CHART 1-8: Statewide Estimated Teacher Salaries and Benefit Expenditures as a % of Total Expenditures, Excluding Capital, FY 03-04 to FY 08-09

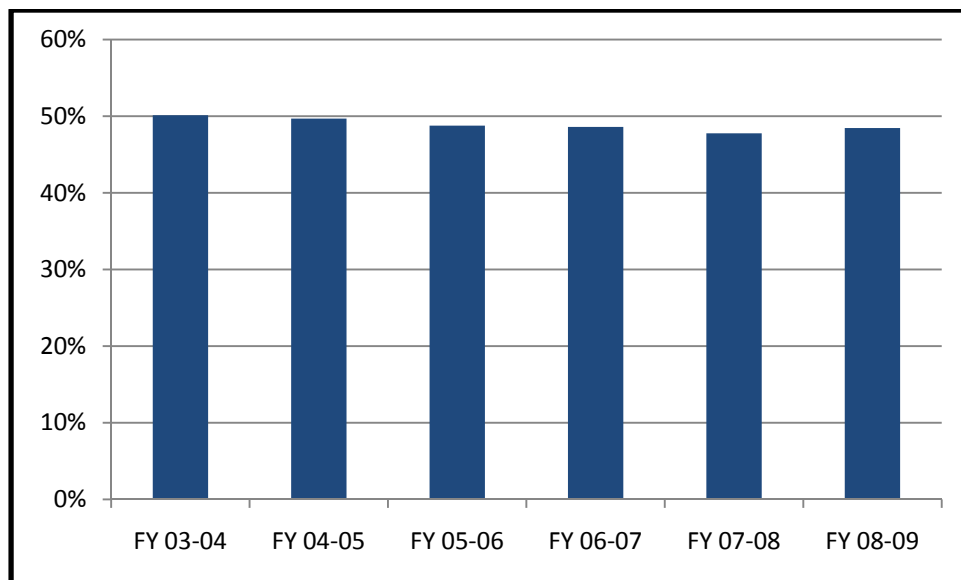

Table 1-9A shows the percent changes in a variety of expenditures per student, between FY 03-04 and FY 08-09, compared to the percent change in California Per Capita Personal Income (PCPI) for the same period. In this table, capital-related expenditures were excluded. The first column lists the category of expenditure (Expenditure Object), while the second column shows the percentage change in each respective category of expenditure from FY 03-04 through FY 08-09. The third column simply shows the percentage change in the California PCPI (Per Capita Personal Income) over the same period. The right hand column shows the difference between the percentage change in the particular expenditure category and the percentage change in the PCPI over this same period. So, for example, expenditures for Certificated Teachers Salaries increased 20 percent from FY 03-04 through FY 08-09, while the corresponding change in PCPI was only 15 percent, with the difference of 5 percent shown in the right hand column. Note that all but four categories of expenditure increased more rapidly than PCPI during this period. The following Table (Table 1-9B) shows this data rank ordered by the size of the differential shown in the right hand column.

TABLE 1-9A: % Change in Various Expenditures per Student vs. % Change in PCPI, FY 03-04 to FY 08-09

Expenditure Object	% Change, FY 03-04 to FY 08-09	% Change in PCPI, FY 03-04 to FY 08/09	Differential
Certificated Teachers' Salaries	20%	15%	5%
Certificated Pupil Support Salaries	41%	15%	26%
Certificated Supervisors' and Administrators' Salaries	27%	15%	12%
Other Certificated Salaries	28%	15%	13%
Classified Instructional Salaries	30%	15%	15%
Classified Support Salaries	25%	15%	10%
Classified Supervisors' and Administrators' Salaries	43%	15%	28%
Clerical, Technical, and Office Staff Salaries	22%	15%	7%
Other Classified Salaries	33%	15%	18%
Approved Textbooks and Core Curricula Materials	34%	15%	19%
Books and Other Reference Materials	-48%	15%	-63%
Materials and Supplies	4%	15%	-11%
Noncapitalized Equipment	-3%	15%	-18%
Travel and Conferences	21%	15%	6%
Dues and Memberships	47%	15%	32%
Insurance	45%	15%	30%
Pupil Insurance	-12%	15%	-27%
Other Insurance	53%	15%	38%
Operations and Housekeeping Services	34%	15%	19%
Rentals, Leases, Repairs, and Noncapitalized Improvements	20%	15%	5%
Professional/Consulting Services and Operating Expenditures	42%	15%	27%
Communications	20%	15%	5%
Total Certificated Benefits	26%	15%	11%
Total Classified Benefits	28%	15%	13%
Total Certificated Salaries	22%	15%	7%
Total Classified Salaries	27%	15%	12%

Table 1-9B shows the rates of change for the same objects of expenditure as in Table 1-9A; however, they are rank ordered by the size of the differential shown in the right hand column. So, for example, the second expenditure category listed “Other Insurance” increased 53% from FY 03-04 to FY 08-09, while the corresponding increase in California PCPI was only 15 percent over this same period. The right hand column (“Differential”) shows the difference (38 percent) between these two percentage increases over this same period.

Note that all but four categories of expenditure increased more rapidly than California PCPI during this period. Only expenditures for Materials and Supplies, Noncapitalized Equipment, Pupil Insurance, and Books and Other Reference Materials did not increase as rapidly as California PCPI during this period. Materials and Supplies increased 5 percent, while expenditures for Noncapitalized Equipment (minus 2 percent) Pupil Insurance (minus 12 percent) and Books and Other Reference Materials (minus 48 percent) actually decreased.

TABLE 1-9B: % Change in Various Expenditures per Student vs. % Change in PCPI, FY 03-04 to FY 08-09

Expenditure Object	% Change, FY 03-04 to FY 08-09	% Change in PCPI, FY 03-04 to FY 08/09	Differential

Books and Other Reference Materials	-48%	15%	-63%

Table 1-10A and Table 1-10B show the growth in Administrator/Supervisor salaries per student, relative to the growth in Teacher Salaries per student.

Table 1-10A shows the percentage change in expenditures per student for Certificated Supervisors and Administrators Salaries compared to the corresponding percentage change in expenditures per student for Teacher Salaries for every Fiscal Year from FY 03-04 through FY08-09. Table 1-10B shows the same relationships for Classified Supervisors and Administrators Salaries.

In almost every year, Administrator/Supervisor salaries per student grew faster than Teacher Salaries per student. Thus, had Administrator/Supervisor salaries been restricted to the growth in Teacher Salaries, substantial savings would have been realized. This savings calculation is shown for each individual year, as well as for the entire six-year time frame (i.e. overall growth between FY 03-04 and FY 08-09).

In FY 08-09, Classified and Certificated Administrators/Supervisors Total Salaries and Estimated Benefits amounted to approximately 6.7% of Total Expenditures (excluding Capital Expenditures) statewide. There are wide variations among the districts in the percentage of spending allocated to classified and certificated administrators, which are shown in the detailed profile pages of each district included in Section 4.

TABLE 1-10A: % Change in Cert. Sup/Admin. Salaries per Student vs. % Change in Teacher Salaries per Student, FY 03-04 to FY 08-09

Fiscal Year	Certificated Supervisors and Administrators Salaries Per Student	% Change	% Change in Teacher Salaries Per Student	Savings from Restricting Growth in Sup/Admin. Salaries to % Change in Teach.Sal.
FY 03-04	\$328

FY 07-08	\$104	8.5%	4.2%	\$23,229,957
FY 08-09	\$106	1.9%	1.2%	\$4,008,313
OVERALL (b/w FY 03-04 and FY 08-09)	\$106	43.2%	19.9%	\$96,706,942

Table 1-11 and Chart 1-11 show expenditures for certificated pupil support salaries from FY 03-04 through FY 08-09. Pupil support salaries are defined as salaries of all certificated personnel performing services of librarian, social worker, or certificated personnel doing pupil personnel work; psychologists and psychometrists; counselors, as well as health services rendered by physicians, oculists, dentists, dental hygienists, nurses optometrists, school audiologists, psychiatrists, otologists, and other personnel as authorized in the field of physical and mental health. These expenditures increased from \$1,086,060,290 in FY03-04 to \$1,491,579,488 in FY 08-09.

TABLE 1-11: Statewide Certificated Pupil Support Salaries Expenditures, FY 03-04 to FY 08-09

Fiscal Year	Certificated Pupil Support Salaries
FY 03-04	\$1,086,060,290
FY 04-05	\$1,119,814,384
FY 05-06	\$1,171,105,658
FY 06-07	\$1,330,361,526
FY 07-08	\$1,488,547,464
FY 08-09	\$1,491,579,488

CHART 1-11: Statewide Certificated Pupil Support Salaries Expenditures, FY 03-04 to FY 08-09

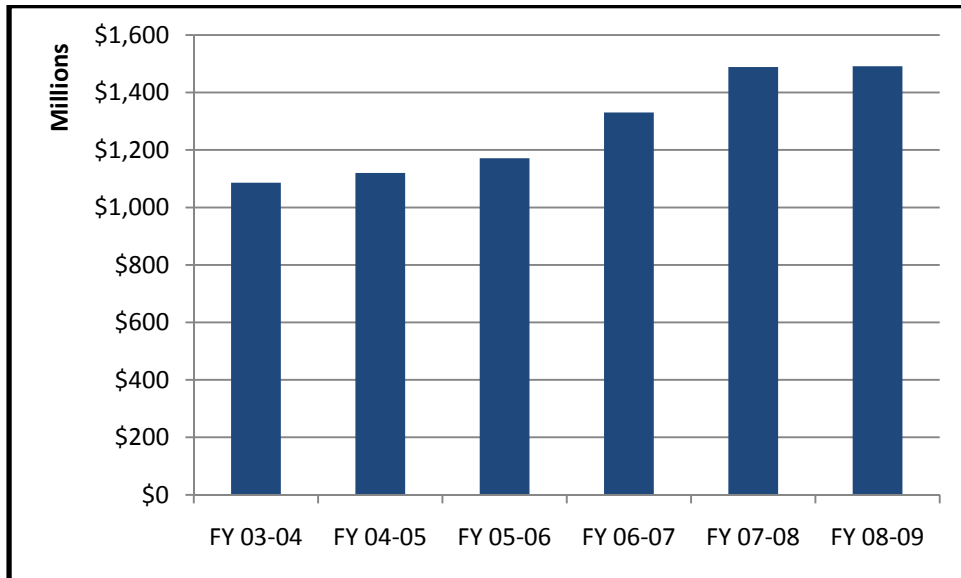

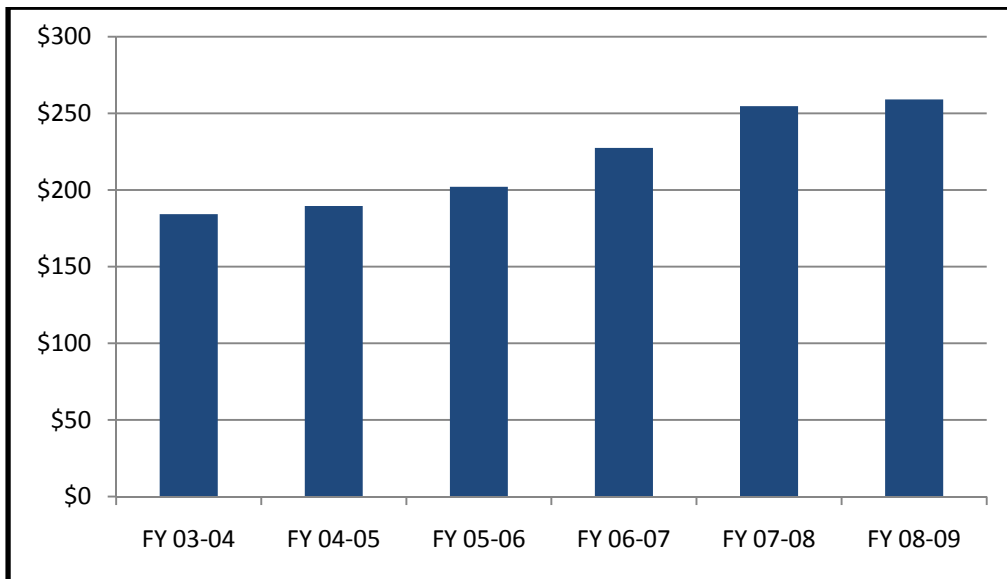

Table 1-12 and Chart 1-12 on the following page show Statewide Certificated Pupil Support Salaries Expenditures on a per student basis for the time period examined, FY 03-04 to FY 08-09. The table at the bottom of the facing page shows the savings and the number of teachers that could have been employed had these expenditures in FY 07-08 increased as much as PCPI and been held flat from in FY 08-09.

As shown on the table at the bottom of the page, the calculated savings in Total Certificated Pupil Support Salaries Expenditures achieved by restricting year-over-year growth to the change in PCPI of Californians would have been \$142,708,731. Because PCPI growth was negative for FY 08-09, the per student expenditure for that year was simply held constant to calculate the estimated savings of \$24,572,443. Applying these savings to hiring more teachers would have resulted in 293 additional teachers being employed in FY 08-09 and 1,735 teachers in FY 07-08.

TABLE 1-12: Statewide Certificated Pupil Support Salaries Expenditures per Student, FY 03-04 to FY 08-09

Fiscal Year	Certificated Pupil Support Salaries
FY 03-04	\$184

FY 08-09	\$0	-

Table 1-15 and Chart 1-15 show the expenditures for Classified Instructional Salaries from FY 03-04 through FY 08-09. Classified Instructional Salaries are defined as total salaries paid to instructional aides who are required to perform any portion of their duty under the supervision of a classroom teacher. These expenditures increased from \$1,477,622,975 in FY 03-04 to \$1,870,974,789 in FY 08-09.

TABLE 1-15: Statewide Classified Instructional Salaries, FY 03-04 to FY 08-09

FY 08-09	\$1,711,009	20

Table 1-19 and Chart 1-19 show expenditures for Classified Supervisor and Administrative Salaries from FY 03-04 through FY 08-09. Classified Supervisor and Administrator Salaries are defined as salaries of supervisory personnel who are business managers, controllers, directors, chief accountants, accounting supervisors, purchasing agents, site administrators, assistant superintendents, and superintendents. These expenditures increased substantially during this time period.

TABLE 1-19: Statewide Classified Supervisors' and Administrators' Salaries, FY 03-04 to FY 08-09

Fiscal Year	Classified Supervisors' and Administrators' Salaries
FY 03-04	\$434,467,400
FY 04-05	\$469,899,871
FY 05-06	\$500,504,760
FY 06-07	\$558,411,736
FY 07-08	\$605,169,597
FY 08-09	\$607,649,347

CHART 1-19: Statewide Classified Supervisors' and Administrators' Salaries, FY 03-04 to FY 08-09

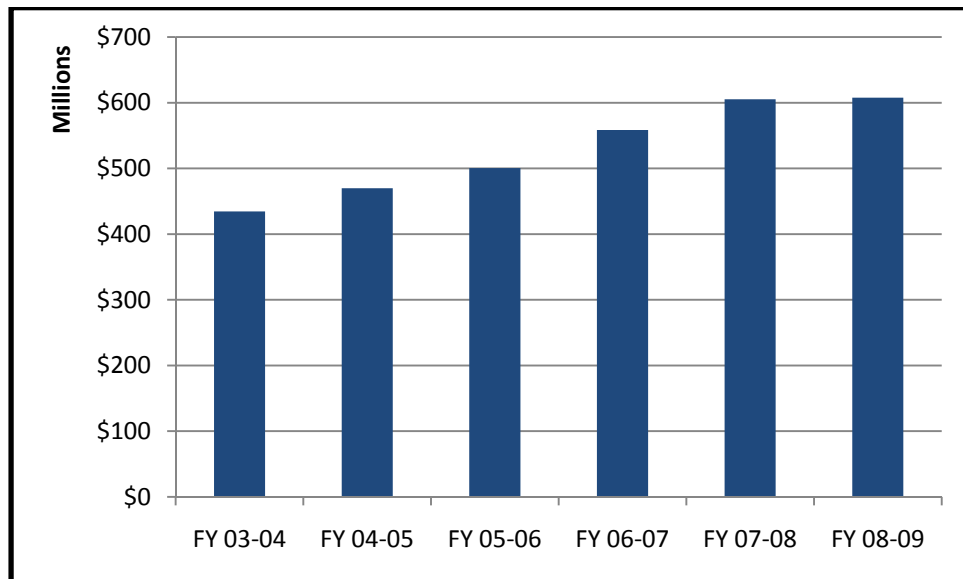

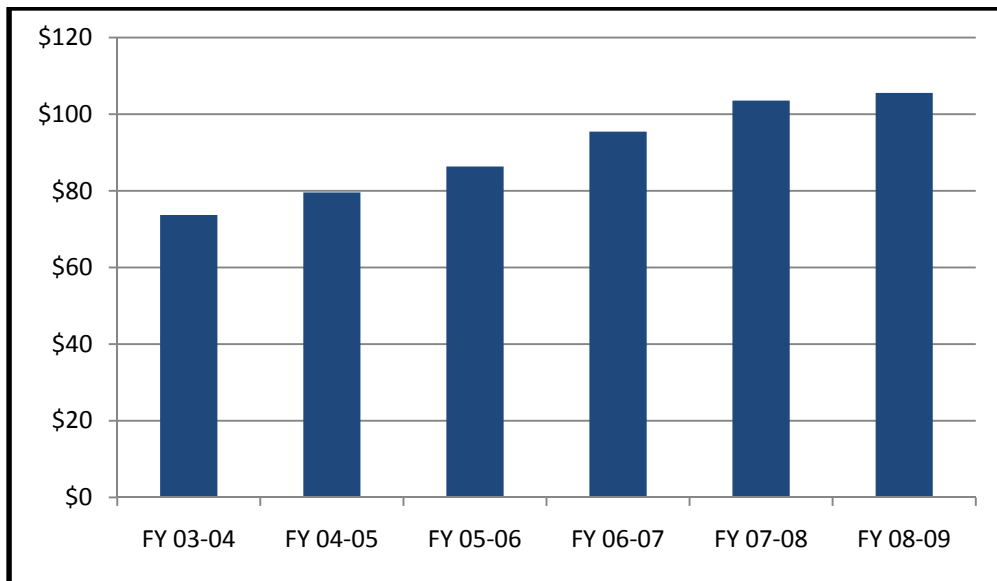

Table 1-20 and Chart 1-20 show per student expenditures for Classified Supervisor and Administrative salaries from FY 03-04 through FY 08-09. On a per student basis these expenditures increased from \$74 in FY03-04 to \$106 in FY 08-09. The table at the bottom of the facing page shows the savings and the number of teachers that could have been employed had these expenditures in FY 07-08 increased as much as PCPI and been held flat in FY 08-09.

TABLE 1-20: Statewide Classified Supervisor and Administrative Salaries per Student, FY 03-04 to FY 08-09

Fiscal Year	Classified Supervisors' and Administrators' Salaries
FY 03-04	\$74
FY 04-05	\$80
FY 05-06	\$86
FY 06-07	\$95
FY 07-08	\$104

FY 05-06	57.8%
FY 06-07	58.1%
FY 07-08	57.6%
FY 08-09	57.8%

CHART 1-39: % of Total Expenditures (excluding capital) spent “In the Classroom”, FY 03-04 to FY 08-09

(This page left intentionally blank)

SECTION 2: STATEWIDE SPECIAL EDUCATION DATA

Table 2-1 shows data about the Average Daily Attendance of special education children statewide, and the relative size of the special education population compared to the total ADA. Note that special education ADA only varied slightly over this period. Note also that the special education ADA as a percentage of the total ADA remained fairly constant at 3 percent between FY 03-04 and FY 08-09.

TABLE 2-1: Special Education ADA as a % of Total ADA, FY 03-04 to FY 08-09

Category	FY 03-04	FY 04-05	FY 05-06	FY 06-07	FY 07-08	FY 08-09
Total ADA	5,896,402	5,906,249	5,796,591	5,850,296	5,844,593	5,757,830
Special Education ADA	182,822	183,528	180,795	183,717	183,670	183,032
Special Education ADA as a % of Total ADA	3%	3%	3%	3%	3%	3%

Table 2-2 shows data about the various categories of the special education population statewide from FY2007-08 back through FY 2003-04. So, for example, the Mental Retardation enrollment was 43,113 in FY07/08, and that enrollment represented 6 percent of the total special education enrollment of 677,875 in FY07/08. The two largest special education categories in FY 07/08 were Speech or Language Impairment (176,256, or 26 percent of the total) and Specific Learning Disability (297,933, or 44 percent of the total). No other category registered more than 7 percent of the total Special Education enrollment in FY 07/08. Generally, the relative percentages of these Special Education categories stay fairly constant over this period from FY 03/04 through FY 07/08, with three notable exceptions. First, the Specific Learning Disability category declined substantially from 50 percent of the total Special Education enrollment in FY 03/04, to 44 percent of the total Special Education enrollment in FY07/08. The Other Health Impairment enrollment increased from 5 percent of the total Special Education enrollment in FY03/04 to 7 percent in FY07/08, while the Autism enrollment increased from 4 percent to 7 percent of the total Special Education enrollment over the same period.

TABLE 2-2: Special Education Enrollment, by Classification, FY 03-04 to FY 08-09

Special Education Classification	Fiscal Year											
	% of FY 08/09		% of FY 07/08		% of FY 06/07		% of FY 05/06		% of FY 04/05		% of FY 03/04

**SECTION 3: QUARTILE AND QUADRANT ANALYSIS OF KEY
COMPARATIVE VARIABLES ACROSS ALL SCHOOL DISTRICTS**

Table 3-1 shows the distribution quartiles of all public school districts in California for Total Expenditures per student in FY 08-09, excluding capital expenditures. As shown in Table 3-1, the 75 percent quartile of expenditures per student was \$10,744. This means that 25 percent of the public school districts in California spent over \$10,744 per student (excluding Capital Expenditures) in FY 08-09, and half of the public school districts in California spent over the median of \$9,090 per student. Note that 25 percent of the public school districts in California spent less than \$8,297 per student (excluding Capital Expenditures) in FY 08-09.

CHART 3-1: Total Expenditures, Excluding Capital, per Student Quartiles,
FY 08-09

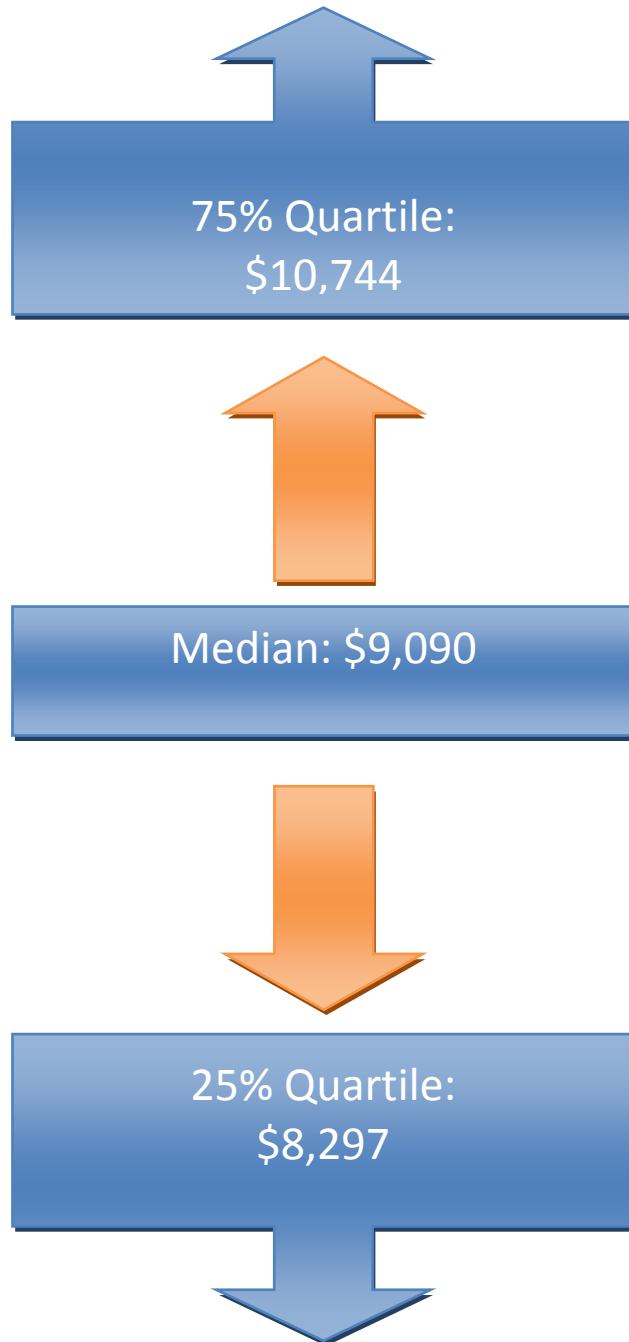

Table 3-2 shows the distribution quartiles of all public school districts in California for Teacher Salary and Benefits Expenditures as a percentage of Total Expenditures (excluding Capital Expenditures). As shown in Table 3-2, only 25 percent of the public school districts in California (those above the 75 percent quartile at the top of the Table) allocated more than 53 percent of their Total Expenditures (excluding Capital Expenditures) to Teacher Salaries and Benefits in FY 08-09. Half the public school districts in California spent less than 49 percent of their Total Expenditures on Teacher Salaries and Benefits, and 25 percent of the public school districts in California spent less than 43 percent of their Total Expenditures on Teacher Salaries and Benefits.

CHART 3-2: Teacher Salary and Benefits as a % of Total Expenditures (Excluding Capital) Quartiles, FY 08-09

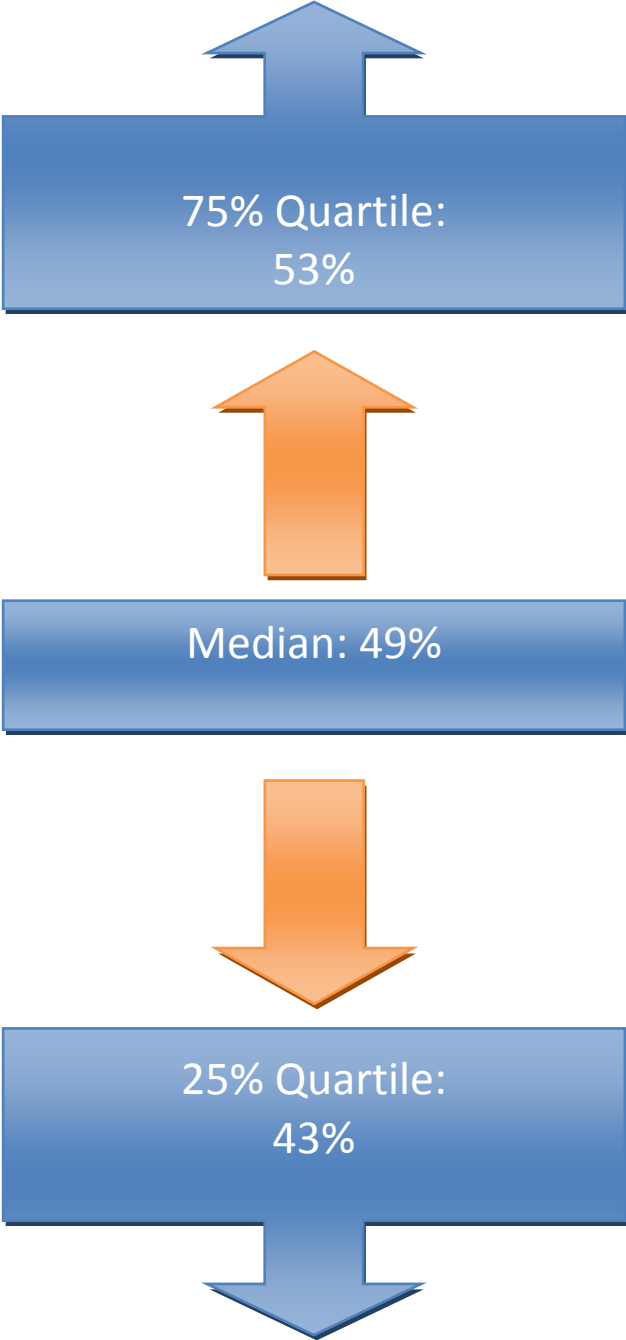

Chart 3-3 shows data about the relationship between expenditures for Administrative Salaries and expenditures for Teachers Salaries for public school districts in California for FY 08-09. So, the public school districts in the 75 percent quartile spent an amount on Administrative Salaries and Benefits equal to or greater than 19 percent of the amount they spent Teachers Salaries in FY 08-09. Half the public school districts in California spent an amount on Administrative Salaries equal to or greater than 15 percent of the amount they spent on Teachers Salaries in FY 08-09. Only 25 percent (those in the “25 percent Quartile”) of the public school districts in California spent an amount on Administrative Salaries equal to or less than 13 percent of the amount they spent on Teachers Salaries in FY 08-09.

CHART 3-3: Administrative Salaries as a % of Teacher Salaries Quartiles,
FY 08-09

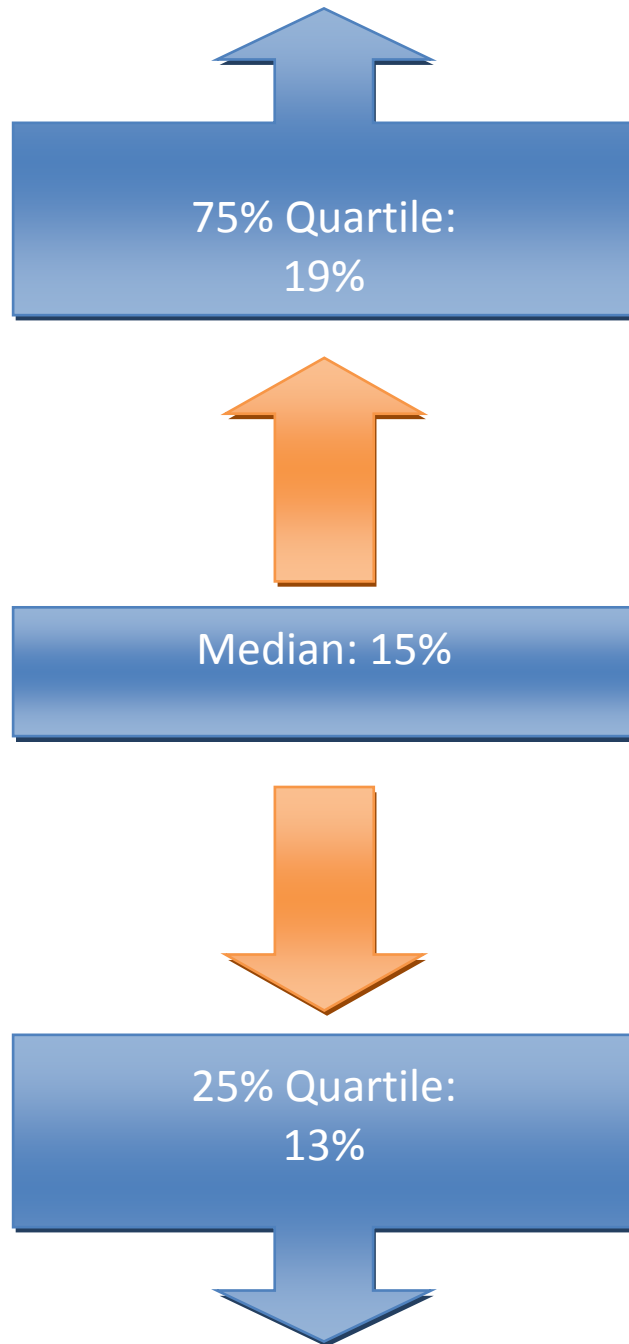

Chart 3-4 shows quartile distributions for data regarding the percentage of Total Expenditures allocated “In the Classroom”. [See Methodology for explanation of how “In the Classroom” spending is calculated]

As shown in Chart 3-4, 25 percent of the public school districts in California (those in the “75 percent Quartile”) spent at least 63 percent of their Total Expenditures (excluding Capital Expenditures) on these Direct Classroom Expenditures. Half the public school districts in California spent 59 percent or more of their Total Expenditures (excluding Capital Expenditures) on these Direct Classroom Expenditures, while those in the bottom quartile spent 54 percent or less.

CHART 3-4: Estimated % of Total Expenditures (Excluding Capital) Spent “In the Classroom” Quartiles, FY 08-09

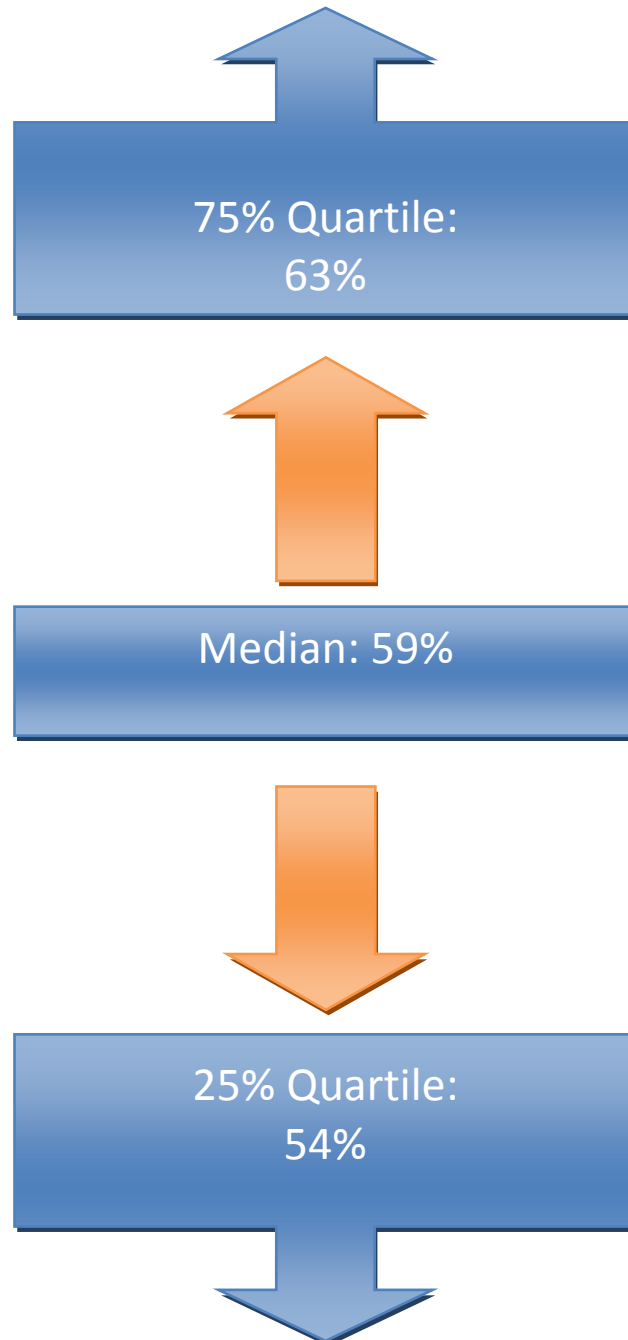

Chart 3-5 shows data about the number of FTE (Full Time Equivalent) teachers above the number of FTE teachers necessary to meet the average class size figure that each district reported to the State Department of Education. This number is calculated by dividing each districts ADA by that districts reported average classroom size. The resulting number of teachers required to meet that district's average classroom size figure is then compared to the number of FTE teachers (as reported in the J-90 data by each district). The resulting difference is then presented in Section 4 for each district. Chart 3-5 shows that 25 percent of the public school districts in California (those in the 75 percent quartile and above) reported that they had at least 28 percent more FTE teachers than the number necessary for the average class size that they reported to the State Department of Education. Over half of the districts had 24 percent more FTE teachers than the number of teachers necessary for the average class size they reported to the State Department of Education. The districts in the 25 percent quartile reported 18 percent (or fewer) FTE teachers above the number necessary for the average class size they reported to the State Department of Education.

CHART 3-5: Estimated % of Teachers Not Engaged in Direct Classroom Teaching,
FY 08-09

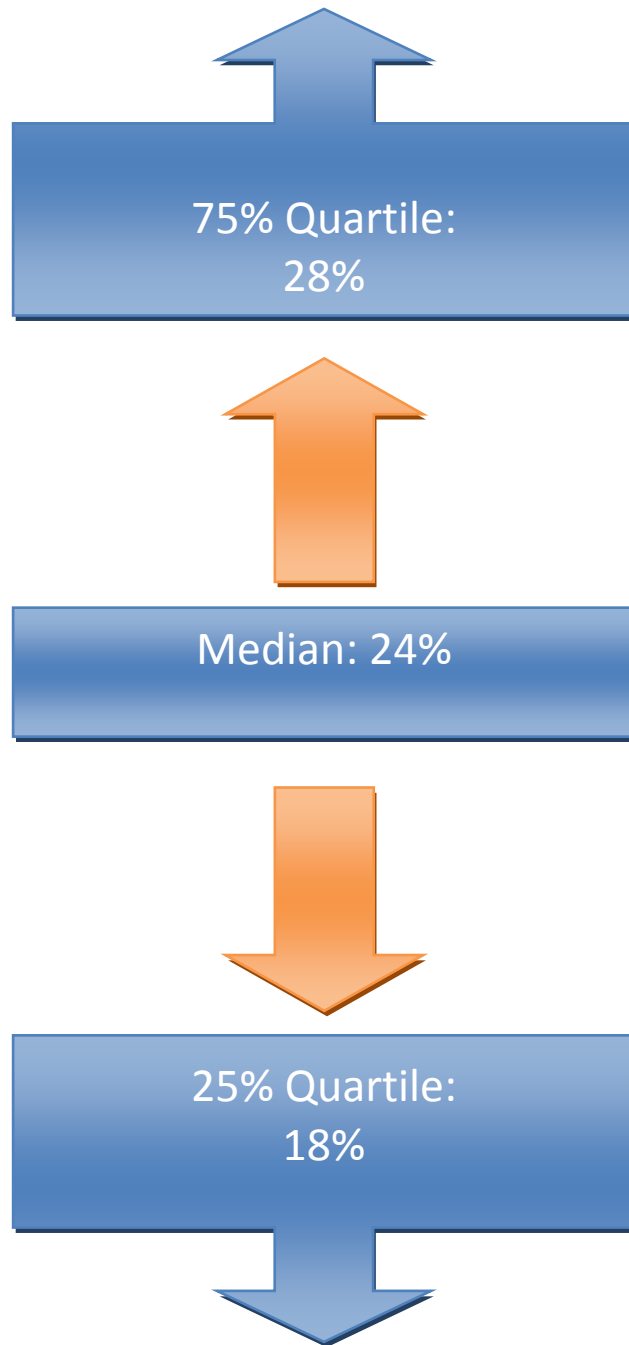

Chart 3-6 divides the analyzed public school districts into four separate quadrants, defined as follows:

Quadrant 1. In these 104 districts, the percentage change in expenditures for Teacher Salaries and Benefits from FY 03-04 through FY 08-09 increased less rapidly than the change in PCPI over this period, and the percentage change in expenditures for Administrative Salaries and Benefits also increased less rapidly than the change in PCPI over this period.

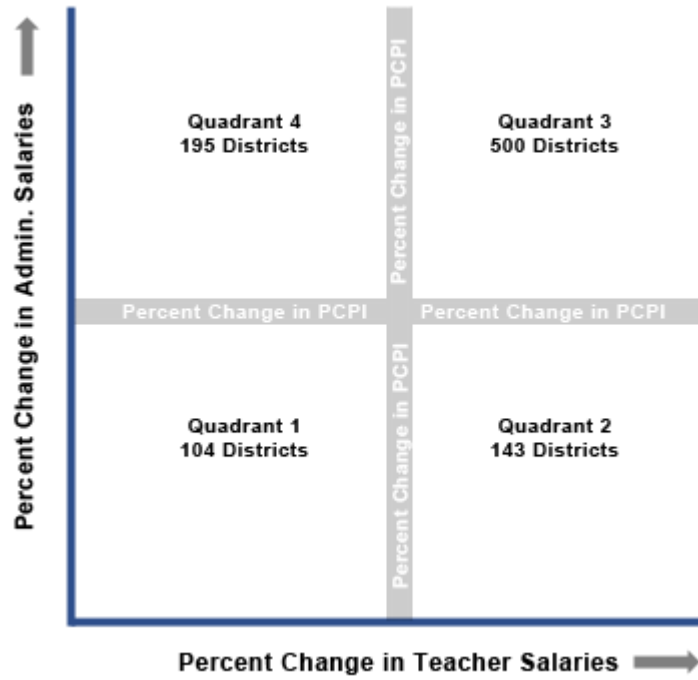

Quadrant 2. In these 143 districts, the percentage change in expenditures for Teacher Salaries and Benefits from FY 03-04 through FY 08-09 increased more rapidly than the change in PCPI over this period, while the percentage change in expenditures for Administrative Salaries and Benefits increased less rapidly over this period.

Quadrant 3. In these 500 districts, the percentage change in expenditures for Teacher Salaries and Benefits from FY 03-04 through FY 08-09 increased more rapidly than the change in PCPI over this period, as did the percentage change in expenditures for Administrative Salaries and Benefits.

Quadrant 4. In these 195 districts, the percentage change in expenditures for Teacher Salaries and Benefits from FY 03-04 through FY 08-09 increased less rapidly than the change in PCPI over this period, while the percentage change in expenditures for Administrative Salaries and Benefits increased more rapidly over this period.

The individual district profiles in Section 4 note which of these four quadrants each particular district falls into.

CHART 3-6: QUADRANT ANALYSIS

(This page left intentionally blank)

SECTION 4: STATEWIDE SCHOOL DISTRICT PROFILES

District Profile: ABC Unified

The graph in the top right corner shows the difference between the change in the district's Total Operating Expenditures (excluding capital) per student (blue bar) and California Per Capita Personal Income (green bar). [See the Methodology for a full description for how this is calculated]. ABC Unified spent \$9,211 per student, which ranked 443 out of the 955 districts for which this information was available, with the top ranked district spending the most per student.

The graph in the middle left hand side of the page shows the annual savings if Total Operating Expenditures per student, excluding Certificated Teacher Salaries and Benefits, had only increased at the same rate as PCPI in FY 07-08. Note that for FY 08-09 the calculation shown is for the savings if the increase in such Operating Expenditures per student (i.e., excluding Certificated Teacher Salaries and Benefits) was held at zero, not decreased at the rate PCPI decreased. Below each year is the number of teachers that could have been employed by those savings.

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed. For FY 08-09, this district ranked 347 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In ABC Unified Total Operating Expenditures per student (excluding capital), grew by 30% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In ABC Unified, 22% of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated 32 additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 12% of Certificated Teacher Salary expenditures. This amount ranked 166 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 59%.

This district is in quadrant 3. (See Chart 3-6, pp. 104-105)

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

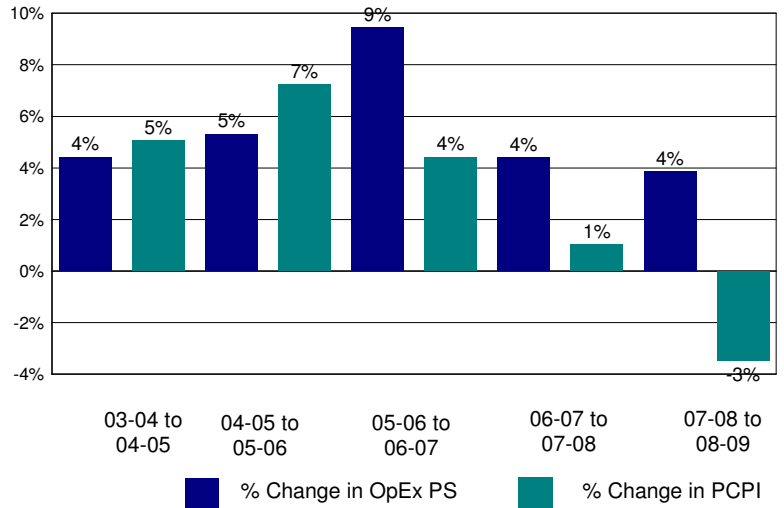

- Total Certificated Teacher Salaries (Object 1100) & Estimated Benefits
- Total Instructional Aide Salaries (Object 2100) & Estimated Benefits
- Approved Textbooks and Books (Objects 4100 & 4200)
- Materials and Supplies expenditures (Object 4300) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180 and 1190)
- Professional/Consulting Services/Subagreements for Services (Objects 5100 and 5800) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180, 1190)

District Profile: ABC Unified

District Profile: Acalanes Union High

The graph in the top right corner shows the difference between the change in the district's Total Operating Expenditures (excluding capital) per student (blue bar) and California Per Capita Personal Income (green bar). [See the Methodology for a full description for how this is calculated]. Acalanes Union High spent \$14,798 per student, which ranked 97 out of the 955 districts for which this information was available, with the top ranked district spending the most per student.

The graph in the middle left hand side of the page shows the annual savings if Total Operating Expenditures per student, excluding Certificated Teacher Salaries and Benefits, had only increased at the same rate as PCPI in FY 07-08. Note that for FY 08-09 the calculation shown is for the savings if the increase in such Operating Expenditures per student (i.e., excluding Certificated Teacher Salaries and Benefits) was held at zero, not decreased at the rate PCPI decreased. Below each year is the number of teachers that could have been employed by those savings.

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed. For FY 08-09, this district ranked 879 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In Acalanes Union High Total Operating Expenditures per student (excluding capital), grew by 8% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In Acalanes Union High, 13% of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated 14 additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 14% of Certificated Teacher Salary expenditures. This amount ranked 312 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 38%.

This district is in quadrant 3. (See Chart 3-6, pp. 104-105)

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

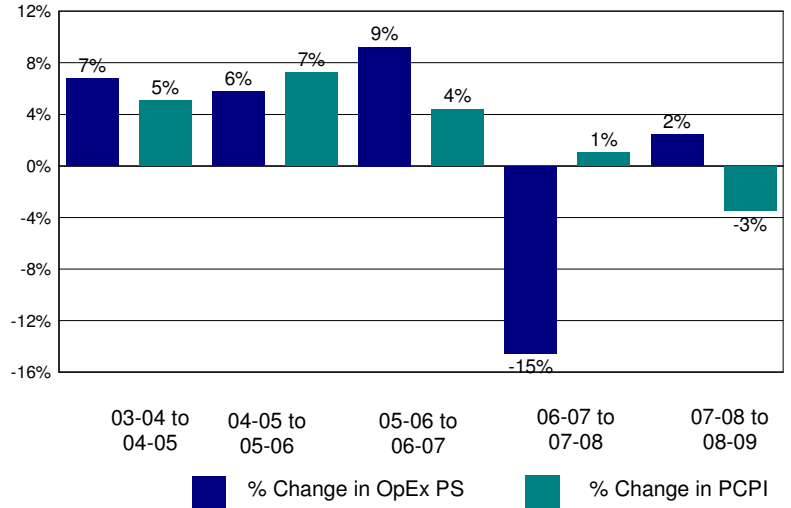

- Total Certificated Teacher Salaries (Object 1100) & Estimated Benefits

District Profile: Ackerman Elementary

The graph in the top right corner shows the difference between the change in the district's Total Operating Expenditures (excluding capital) per student (blue bar) and California Per Capita Personal Income (green bar). [See the Methodology for a full description for how this is calculated]. Ackerman Elementary spent \$6,879 per student, which ranked 945 out of the 955 districts for which this information was available, with the top ranked district spending the most per student.

The graph in the middle left hand side of the page shows the annual savings if Total Operating Expenditures per student, excluding Certificated Teacher Salaries and Benefits, had only increased at the same rate as PCPI in FY 07-08. Note that for FY 08-09 the calculation shown is for the savings if the increase in such Operating Expenditures per student (i.e., excluding Certificated Teacher Salaries and Benefits) was held at zero, not decreased at the rate PCPI decreased. Below each year is the number of teachers that could have been employed by those savings.

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed. For FY 08-09, this district ranked 102 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In Ackerman Elementary Total Operating Expenditures per student (excluding capital), grew by 29% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In Ackerman Elementary, 25% of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated 0 additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 8% of Certificated Teacher Salary expenditures. This amount ranked 29 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 62%.

This district is in quadrant 2. (See Chart 3-6, pp. 104-105)

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

District Profile: Acton-Agua Dulce Unified

The graph in the top right corner shows the difference between the change in the district's Total Operating Expenditures (excluding capital) per student (blue bar) and California Per Capita Personal Income (green bar). [See the Methodology for a full description for how this is calculated]. Acton-Agua Dulce Unified spent \$8,679 per student, which ranked 593 out of the 955 districts for which this information was available, with the top ranked district spending the most per student.

The graph in the middle left hand side of the page shows the annual savings if Total Operating Expenditures per student, excluding Certificated Teacher Salaries and Benefits, had only increased at the same rate as PCPI in FY 07-08. Note that for FY 08-09 the calculation shown is for the savings if the increase in such Operating Expenditures per student (i.e., excluding Certificated Teacher Salaries and Benefits) was held at zero, not decreased at the rate PCPI decreased. Below each year is the number of teachers that could have been employed by those savings.

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed. For FY 08-09, this district ranked 313 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In Acton-Agua Dulce Unified Total Operating Expenditures per student (excluding capital), grew by 36% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In Acton-Agua Dulce Unified, % of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 15% of Certificated Teacher Salary expenditures. This amount ranked 470 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 63%.

This district is in quadrant 3. (See Chart 3-6, pp. 104-105)

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

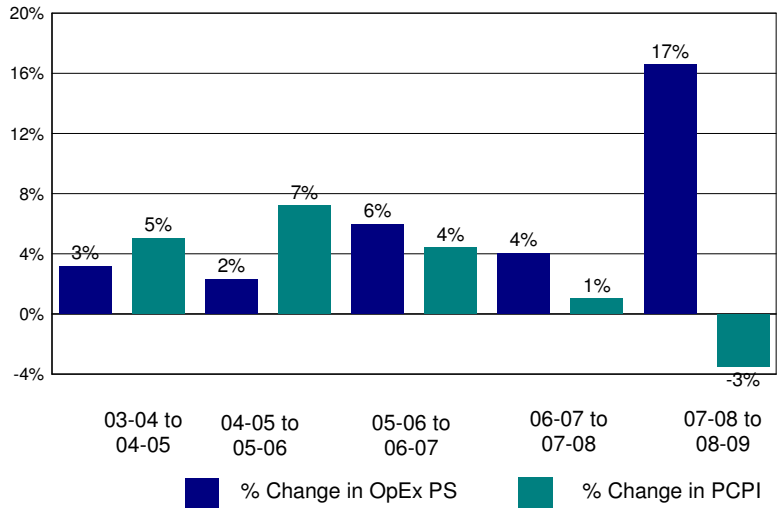

- Total Certificated Teacher Salaries (Object 1100) & Estimated Benefits
- Total Instructional Aide Salaries (Object 2100) & Estimated Benefits

District Profile: Adelanto Elementary

The graph in the top right corner shows the difference between the change in the district's Total Operating Expenditures (excluding capital) per student (blue bar) and California Per Capita Personal Income (green bar). [See the Methodology for a full description for how this is calculated]. Adelanto Elementary spent \$7,616 per student, which ranked 869 out of the 955 districts for which this information was available, with the top ranked district spending the most per student.

The graph in the middle left hand side of the page shows the annual savings if Total Operating Expenditures per student, excluding Certificated Teacher Salaries and Benefits, had only increased at the same rate as PCPI in FY 07-08. Note that for FY 08-09 the calculation shown is for the savings if the increase in such Operating Expenditures per student (i.e., excluding Certificated Teacher Salaries and Benefits) was held at zero, not decreased at the rate PCPI decreased. Below each year is the number of teachers that could have been employed by those savings.

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed. For FY 08-09, this district ranked 342 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In Adelanto Elementary Total Operating Expenditures per student (excluding capital), grew by 33% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In Adelanto Elementary, % of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated 0 additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 22% of Certificated Teacher Salary expenditures. This amount ranked 817 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 60%.

This district is in quadrant 3. (See Chart 3-6, pp. 104-105)

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

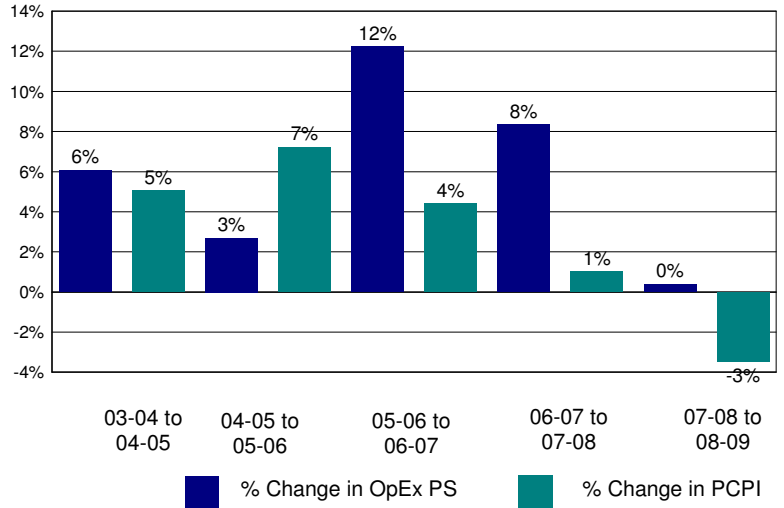

- Total Certificated Teacher Salaries (Object 1100) & Estimated Benefits
- Total Instructional Aide Salaries (Object 2100) & Estimated Benefits
- Approved Textbooks and Books (Objects 4100 & 4200)
- Materials and Supplies expenditures (Object 4300) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180 and 1190)
- Professional/Consulting Services/Subagreements for Services (Objects 5100 and 5800) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180, 1190)

District Profile: Allensworth Elementary

The graph in the top right corner shows the difference between the change in the district's Total Operating Expenditures (excluding capital) per student (blue bar) and California Per Capita Personal Income (green bar). [See the Methodology for a full description for how this is calculated]. Allensworth Elementary spent \$14,146 per student, which ranked 111 out of the 955 districts for which this information was available, with the top ranked district spending the most per student.

The graph in the middle left hand side of the page shows the annual savings if Total Operating Expenditures per student, excluding Certificated Teacher Salaries and Benefits, had only increased at the same rate as PCPI in FY 07-08. Note that for FY 08-09 the calculation shown is for the savings if the increase in such Operating Expenditures per student (i.e., excluding Certificated Teacher Salaries and Benefits) was held at zero, not decreased at the rate PCPI decreased. Below each year is the number of teachers that could have been employed by those savings.

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed. For FY 08-09, this district ranked 936 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In Allensworth Elementary Total Operating Expenditures per student (excluding capital), grew by 29% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In Allensworth Elementary, 5% of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated 0 additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 61% of Certificated Teacher Salary expenditures. This amount ranked 948 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 42%.

This district is in quadrant 3. (See Chart 3-6, pp. 104-105)

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

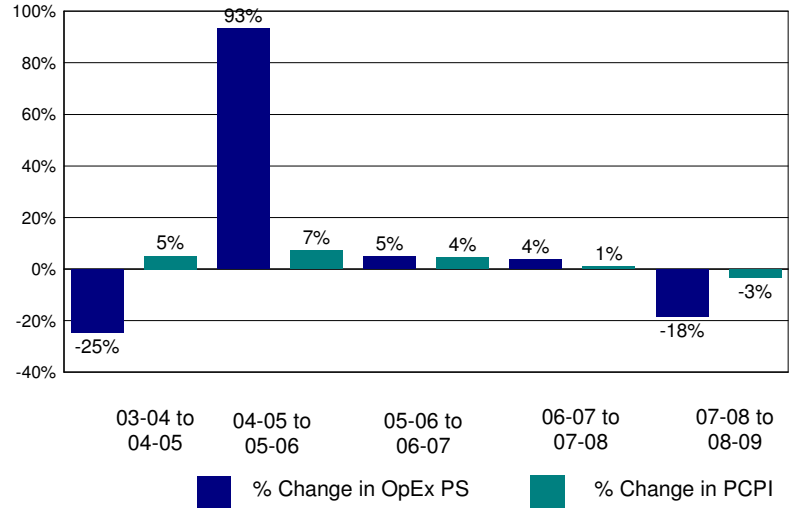

- Total Certificated Teacher Salaries (Object 1100) & Estimated Benefits
- Total Instructional Aide Salaries (Object 2100) & Estimated Benefits
- Approved Textbooks and Books (Objects 4100 & 4200)
- Materials and Supplies expenditures (Object 4300) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180 and 1190)
- Professional/Consulting Services/Subagreements for Services (Objects 5100 and 5800) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180, 1190)

District Profile: Alta-Dutch Flat Union Elementary

The graph in the top right corner shows the difference between the change in the district's Total Operating Expenditures (excluding capital) per student (blue bar) and California Per Capita Personal Income (green bar). [See the Methodology for a full description for how this is calculated]. Alta-Dutch Flat Union Elementary spent \$9,088 per student, which ranked 481 out of the 955 districts for which this information was available, with the top ranked district spending the most per student.

The graph in the middle left hand side of the page shows the annual savings if Total Operating Expenditures per student, excluding Certificated Teacher Salaries and Benefits, had only increased at the same rate as PCPI in FY 07-08. Note that for FY 08-09 the calculation shown is for the savings if the increase in such Operating Expenditures per student (i.e., excluding Certificated Teacher Salaries and Benefits) was held at zero, not decreased at the rate PCPI decreased. Below each year is the number of teachers that could have been employed by those savings.

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed. For FY 08-09, this district ranked 499 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In Alta-Dutch Flat Union Elementary Total Operating Expenditures per student (excluding capital), grew by 16% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In Alta-Dutch Flat Union Elementary, % of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 1% of Certificated Teacher Salary expenditures. This amount ranked 4 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 63%.

This district is in quadrant 2. (See Chart 3-6, pp. 104-105)

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

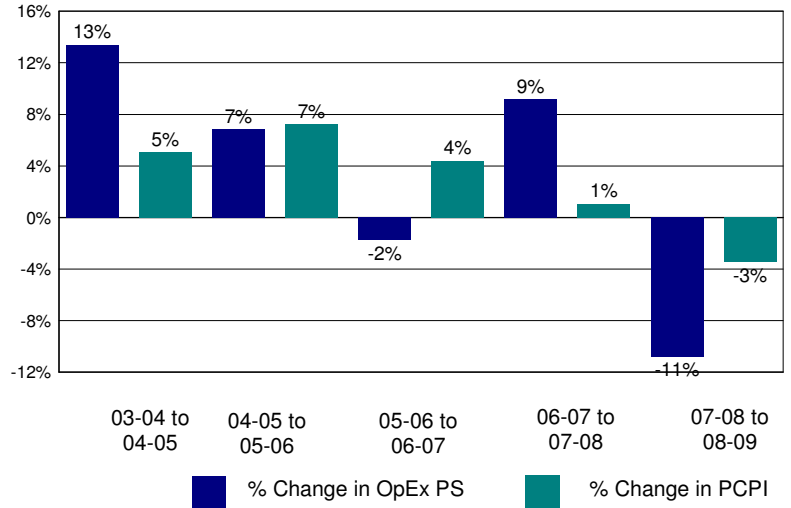

- Total Certificated Teacher Salaries (Object 1100) & Estimated Benefits
- Total Instructional Aide Salaries (Object 2100) & Estimated Benefits
- Approved Textbooks and Books (Objects 4100 & 4200)
- Materials and Supplies expenditures (Object 4300) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180 and 1190)
- Professional/Consulting Services/Subagreements for Services (Objects 5100 and 5800) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180, 1190)

District Profile: American Union Elementary

The graph in the top right corner shows the difference between the change in the district's Total Operating Expenditures (excluding capital) per student (blue bar) and California Per Capita Personal Income (green bar). [See the Methodology for a full description for how this is calculated]. American Union Elementary spent \$12,281 per student, which ranked 161 out of the 955 districts for which this information was available, with the top ranked district spending the most per student.

The graph in the middle left hand side of the page shows the annual savings if Total Operating Expenditures per student, excluding Certificated Teacher Salaries and Benefits, had only increased at the same rate as PCPI in FY 07-08. Note that for FY 08-09 the calculation shown is for the savings if the increase in such Operating Expenditures per student (i.e., excluding Certificated Teacher Salaries and Benefits) was held at zero, not decreased at the rate PCPI decreased. Below each year is the number of teachers that could have been employed by those savings.

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed. For FY 08-09, this district ranked 878 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In American Union Elementary Total Operating Expenditures per student (excluding capital), grew by 75% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In American Union Elementary, % of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 17% of Certificated Teacher Salary expenditures. This amount ranked 596 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 38%.

This district is in quadrant 3. (See Chart 3-6, pp. 104-105)

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

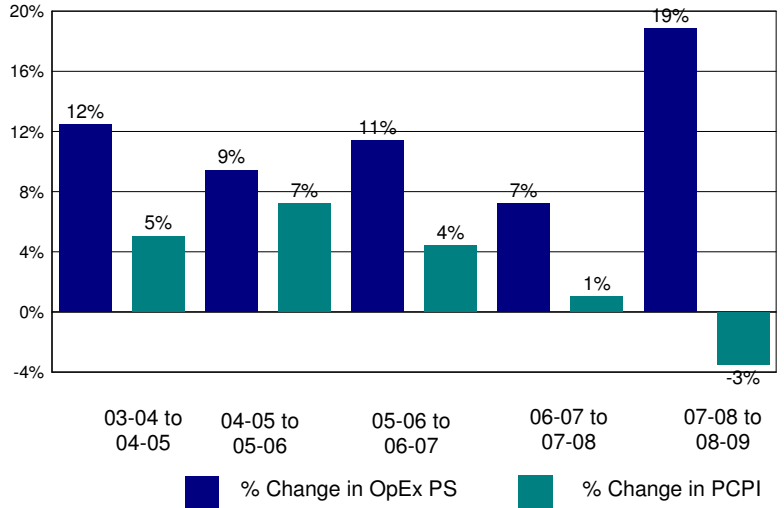

- Total Certificated Teacher Salaries (Object 1100) & Estimated Benefits
- Total Instructional Aide Salaries (Object 2100) & Estimated Benefits
- Approved Textbooks and Books (Objects 4100 & 4200)
- Materials and Supplies expenditures (Object 4300) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180 and 1190)
- Professional/Consulting Services/Subagreements for Services (Objects 5100 and 5800) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180, 1190)

District Profile: Antelope Valley Union High

The graph in the top right corner shows the difference between the change in the district's Total Operating Expenditures (excluding capital) per student (blue bar) and California Per Capita Personal Income (green bar). [See the Methodology for a full description for how this is calculated]. Antelope Valley Union High spent \$9,140 per student, which ranked 465 out of the 955 districts for which this information was available, with the top ranked district spending the most per student.

The graph in the middle left hand side of the page shows the annual savings if Total Operating Expenditures per student, excluding Certificated Teacher Salaries and Benefits, had only increased at the same rate as PCPI in FY 07-08. Note that for FY 08-09 the calculation shown is for the savings if the increase in such Operating Expenditures per student (i.e., excluding Certificated Teacher Salaries and Benefits) was held at zero, not decreased at the rate PCPI decreased. Below each year is the number of teachers that could have been employed by those savings.

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed. For FY 08-09, this district ranked 541 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In Antelope Valley Union High Total Operating Expenditures per student (excluding capital), grew by 40% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In Antelope Valley Union High, 25% of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated 41 additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 13% of Certificated Teacher Salary expenditures. This amount ranked 293 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 57%.

This district is in quadrant 3. (See Chart 3-6, pp. 104-105)

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

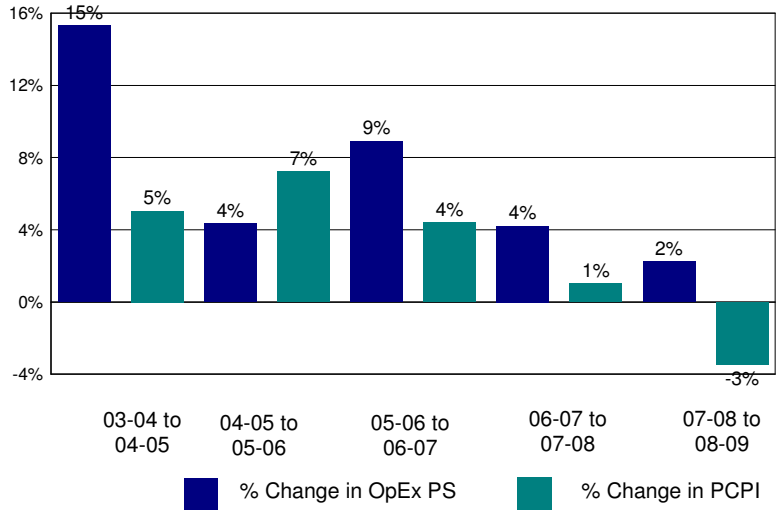

- Total Certificated Teacher Salaries (Object 1100) & Estimated Benefits
- Total Instructional Aide Salaries (Object 2100) & Estimated Benefits
- Approved Textbooks and Books (Objects 4100 & 4200)
- Materials and Supplies expenditures (Object 4300) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180 and 1190)
- Professional/Consulting Services/Subagreements for Services (Objects 5100 and 5800) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180, 1190)

The graph in the top right corner shows the difference between the change in the district's Total Operating Expenditures (excluding capital) per student (blue bar) and California Per Capita Personal Income (green bar). [See the Methodology for a full description for how this is calculated]. Armona Union Elementary spent \$12,190 per student, which ranked 165 out of the 955 districts for which this information was available, with the top ranked district spending the most per student.

The graph in the middle left hand side of the page shows the annual savings if Total Operating Expenditures per student, excluding Certificated Teacher Salaries and Benefits, had only increased at the same rate as PCPI in FY 07-08. Note that for FY 08-09 the calculation shown is for the savings if the increase in such Operating Expenditures per student (i.e., excluding Certificated Teacher Salaries and Benefits) was held at zero, not decreased at the rate PCPI decreased. Below each year is the number of teachers that could have been employed by those savings.

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed. For FY 08-09, this district ranked 856 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In Armona Union Elementary Total Operating Expenditures per student (excluding capital), grew by 87% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In Armona Union Elementary, % of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated 40 additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 17% of Certificated Teacher Salary expenditures. This amount ranked 592 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 44%.

This district is in quadrant 3. (See Chart 3-6, pp. 104-105)

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

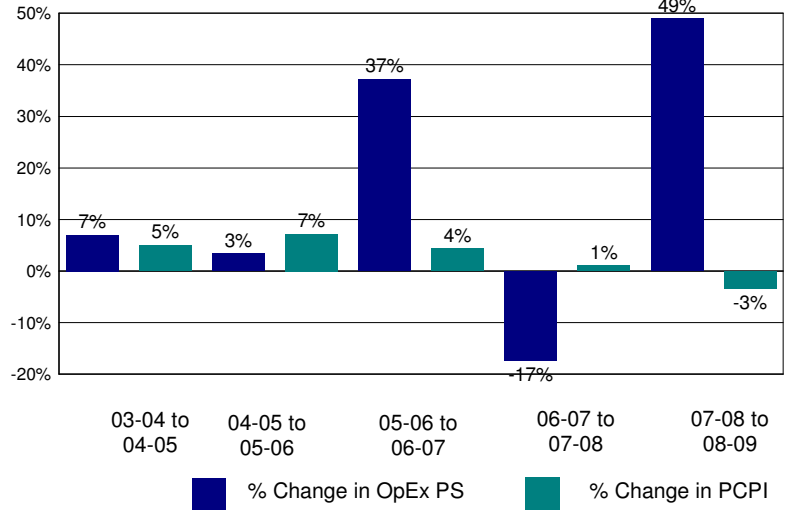

- Total Certificated Teacher Salaries (Object 1100) & Estimated Benefits
- Total Instructional Aide Salaries (Object 2100) & Estimated Benefits
- Approved Textbooks and Books (Objects 4100 & 4200)
- Materials and Supplies expenditures (Object 4300) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180 and 1190)
- Professional/Consulting Services/Subagreements for Services (Objects 5100 and 5800) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180, 1190)

District Profile: Azusa Unified

The graph in the top right corner shows the difference between the change in the district's Total Operating Expenditures (excluding capital) per student (blue bar) and California Per Capita Personal Income (green bar). [See the Methodology for a full description for how this is calculated]. Azusa Unified spent \$8,800 per student, which ranked 555 out of the 955 districts for which this information was available, with the top ranked district spending the most per student.

The graph in the middle left hand side of the page shows the annual savings if Total Operating Expenditures per student, excluding Certificated Teacher Salaries and Benefits, had only increased at the same rate as PCPI in FY 07-08. Note that for FY 08-09 the calculation shown is for the savings if the increase in such Operating Expenditures per student (i.e., excluding Certificated Teacher Salaries and Benefits) was held at zero, not decreased at the rate PCPI decreased. Below each year is the number of teachers that could have been employed by those savings.

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed. For FY 08-09, this district ranked 227 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In Azusa Unified Total Operating Expenditures per student (excluding capital), grew by 24% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In Azusa Unified, 30% of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated 0 additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 14% of Certificated Teacher Salary expenditures. This amount ranked 368 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 64%.

This district is in quadrant 3. (See Chart 3-6, pp. 104-105)

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

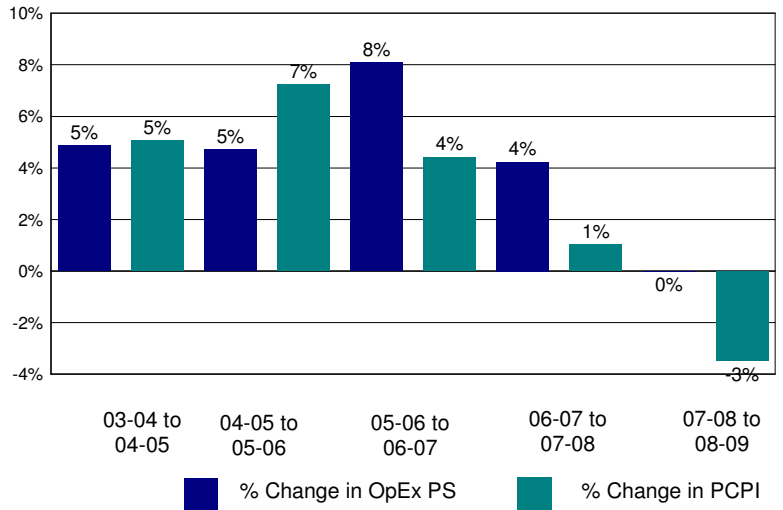

- Total Certificated Teacher Salaries (Object 1100) & Estimated Benefits
- Total Instructional Aide Salaries (Object 2100) & Estimated Benefits
- Approved Textbooks and Books (Objects 4100 & 4200)
- Materials and Supplies expenditures (Object 4300) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180 and 1190)
- Professional/Consulting Services/Subagreements for Services (Objects 5100 and 5800) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180, 1190)

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed. For FY 08-09, this district ranked 674 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In Bangor Union Elementary Total Operating Expenditures per student (excluding capital), grew by 35% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In Bangor Union Elementary, % of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 25% of Certificated Teacher Salary expenditures. This amount ranked 853 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 60%.

This district is in quadrant 3. (See Chart 3-6, pp. 104-105)

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

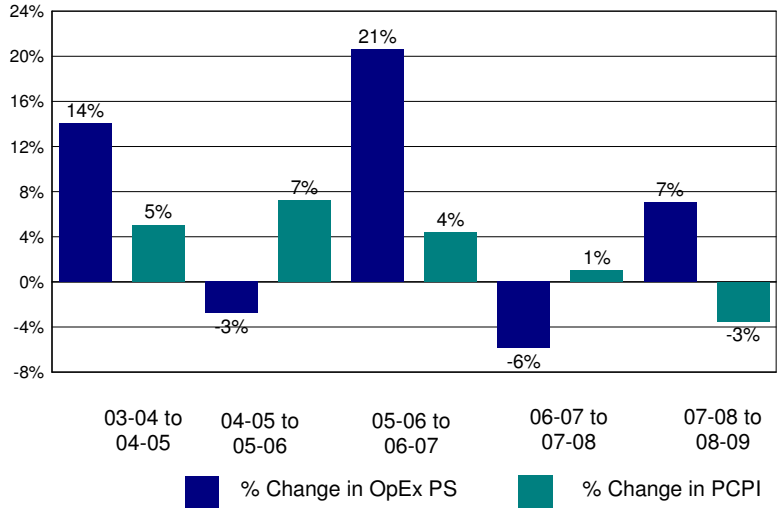

- Total Certificated Teacher Salaries (Object 1100) & Estimated Benefits
- Total Instructional Aide Salaries (Object 2100) & Estimated Benefits
- Approved Textbooks and Books (Objects 4100 & 4200)
- Materials and Supplies expenditures (Object 4300) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180 and 1190)
- Professional/Consulting Services/Subagreements for Services (Objects 5100 and 5800) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180, 1190)

District Profile: Banning Unified

The graph in the top right corner shows the difference between the change in the district's Total Operating Expenditures (excluding capital) per student (blue bar) and California Per Capita Personal Income (green bar). [See the Methodology for a full description for how this is calculated]. Banning Unified spent \$9,609 per student, which ranked 368 out of the 955 districts for which this information was available, with the top ranked district spending the most per student.

The graph in the middle left hand side of the page shows the annual savings if Total Operating Expenditures per student, excluding Certificated Teacher Salaries and Benefits, had only increased at the same rate as PCPI in FY 07-08. Note that for FY 08-09 the calculation shown is for the savings if the increase in such Operating Expenditures per student (i.e., excluding Certificated Teacher Salaries and Benefits) was held at zero, not decreased at the rate PCPI decreased. Below each year is the number of teachers that could have been employed by those savings.

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed. For FY 08-09, this district ranked 424 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In Banning Unified Total Operating Expenditures per student (excluding capital), grew by 27% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In Banning Unified, 34% of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated 9 additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 15% of Certificated Teacher Salary expenditures. This amount ranked 409 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 58%.

This district is in quadrant 3. (See Chart 3-6, pp. 104-105)

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

District Profile: Bayshore Elementary

The graph in the top right corner shows the difference between the change in the district's Total Operating Expenditures (excluding capital) per student (blue bar) and California Per Capita Personal Income (green bar). [See the Methodology for a full description for how this is calculated]. Bayshore Elementary spent \$9,620 per student, which ranked 367 out of the 955 districts for which this information was available, with the top ranked district spending the most per student.

The graph in the middle left hand side of the page shows the annual savings if Total Operating Expenditures per student, excluding Certificated Teacher Salaries and Benefits, had only increased at the same rate as PCPI in FY 07-08. Note that for FY 08-09 the calculation shown is for the savings if the increase in such Operating Expenditures per student (i.e., excluding Certificated Teacher Salaries and Benefits) was held at zero, not decreased at the rate PCPI decreased. Below each year is the number of teachers that could have been employed by those savings.

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed. For FY 08-09, this district ranked 246 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In Bayshore Elementary Total Operating Expenditures per student (excluding capital), grew by 47% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In Bayshore Elementary, 25% of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated 3 additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 18% of Certificated Teacher Salary expenditures. This amount ranked 637 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 72%.

This district is in quadrant 3. (See Chart 3-6, pp. 104-105)

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

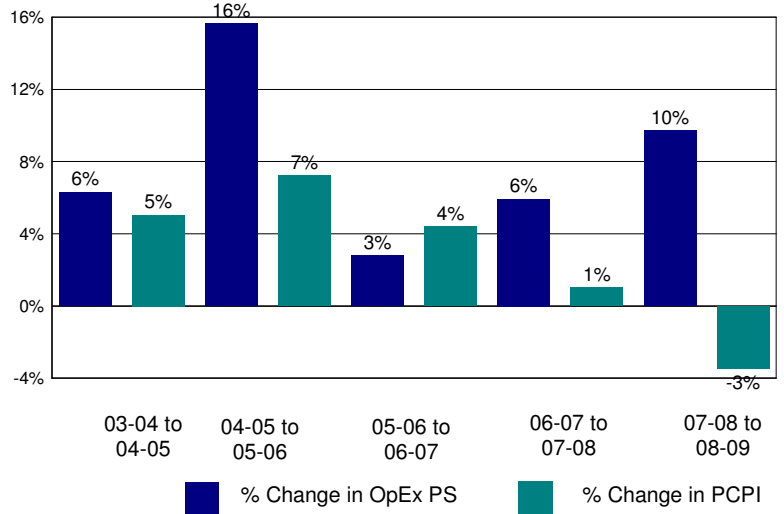

- Total Certificated Teacher Salaries (Object 1100) & Estimated Benefits
- Total Instructional Aide Salaries (Object 2100) & Estimated Benefits
- Approved Textbooks and Books (Objects 4100 & 4200)
- Materials and Supplies expenditures (Object 4300) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180 and 1190)
- Professional/Consulting Services/Subagreements for Services (Objects 5100 and 5800) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180, 1190)

District Profile: Bear Valley Unified

The graph in the top right corner shows the difference between the change in the district's Total Operating Expenditures (excluding capital) per student (blue bar) and California Per Capita Personal Income (green bar). [See the Methodology for a full description for how this is calculated]. Bear Valley Unified spent \$8,170 per student, which ranked 760 out of the 955 districts for which this information was available, with the top ranked district spending the most per student.

The graph in the middle left hand side of the page shows the annual savings if Total Operating Expenditures per student, excluding Certificated Teacher Salaries and Benefits, had only increased at the same rate as PCPI in FY 07-08. Note that for FY 08-09 the calculation shown is for the savings if the increase in such Operating Expenditures per student (i.e., excluding Certificated Teacher Salaries and Benefits) was held at zero, not decreased at the rate PCPI decreased. Below each year is the number of teachers that could have been employed by those savings.

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed. For FY 08-09, this district ranked 125 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In Bear Valley Unified Total Operating Expenditures per student (excluding capital), grew by 20% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In Bear Valley Unified, 17% of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated 0 additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 15% of Certificated Teacher Salary expenditures. This amount ranked 422 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 63%.

This district is in quadrant 2. (See Chart 3-6, pp. 104-105)

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

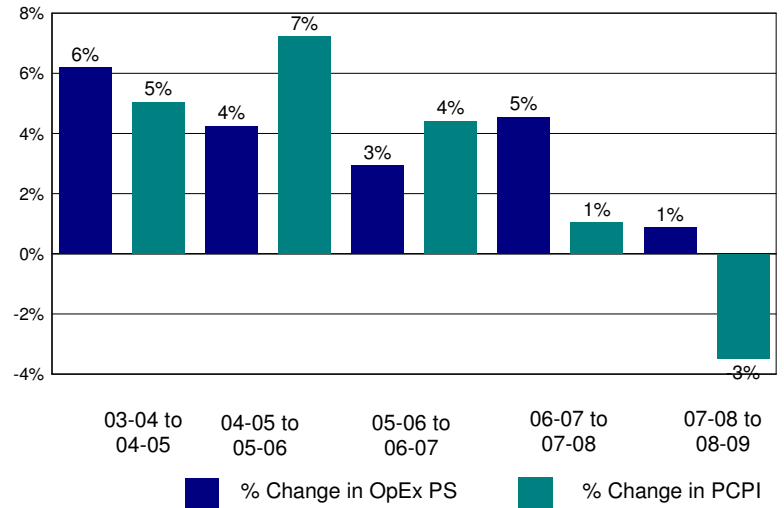

- Total Certificated Teacher Salaries (Object 1100) & Estimated Benefits

District Profile: Bellevue Union Elementary

The graph in the top right corner shows the difference between the change in the district's Total Operating Expenditures (excluding capital) per student (blue bar) and California Per Capita Personal Income (green bar). [See the Methodology for a full description for how this is calculated]. Bellevue Union Elementary spent \$9,390 per student, which ranked 411 out of the 955 districts for which this information was available, with the top ranked district spending the most per student.

The graph in the middle left hand side of the page shows the annual savings if Total Operating Expenditures per student, excluding Certificated Teacher Salaries and Benefits, had only increased at the same rate as PCPI in FY 07-08. Note that for FY 08-09 the calculation shown is for the savings if the increase in such Operating Expenditures per student (i.e., excluding Certificated Teacher Salaries and Benefits) was held at zero, not decreased at the rate PCPI decreased. Below each year is the number of teachers that could have been employed by those savings.

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed. For FY 08-09, this district ranked 318 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In Bellevue Union Elementary Total Operating Expenditures per student (excluding capital), grew by 22% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In Bellevue Union Elementary, 28% of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated 0 additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 9% of Certificated Teacher Salary expenditures. This amount ranked 42 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 75%.

This district is in quadrant 2. (See Chart 3-6, pp. 104-105)

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

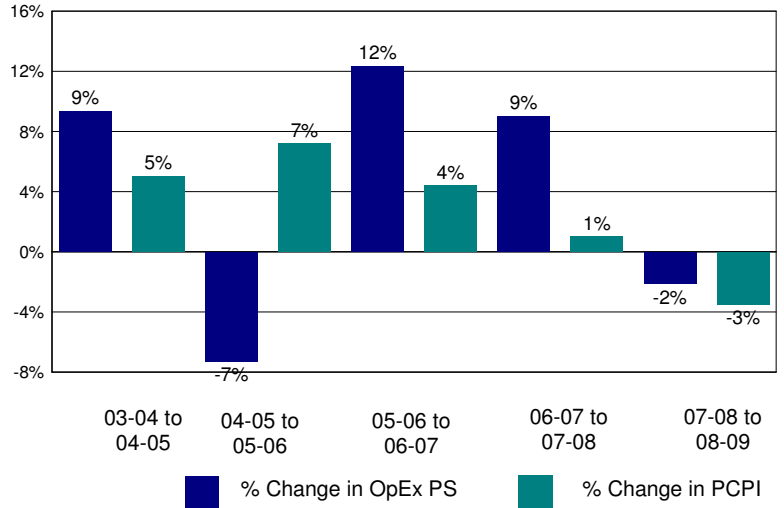

- Total Certificated Teacher Salaries (Object 1100) & Estimated Benefits
- Total Instructional Aide Salaries (Object 2100) & Estimated Benefits
- Approved Textbooks and Books (Objects 4100 & 4200)
- Materials and Supplies expenditures (Object 4300) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180 and 1190)
- Professional/Consulting Services/Subagreements for Services (Objects 5100 and 5800) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180, 1190)

District Profile: Bellflower Unified

The graph in the top right corner shows the difference between the change in the district's Total Operating Expenditures (excluding capital) per student (blue bar) and California Per Capita Personal Income (green bar). [See the Methodology for a full description for how this is calculated]. Bellflower Unified spent \$9,086 per student, which ranked 483 out of the 955 districts for which this information was available, with the top ranked district spending the most per student.

The graph in the middle left hand side of the page shows the annual savings if Total Operating Expenditures per student, excluding Certificated Teacher Salaries and Benefits, had only increased at the same rate as PCPI in FY 07-08. Note that for FY 08-09 the calculation shown is for the savings if the increase in such Operating Expenditures per student (i.e., excluding Certificated Teacher Salaries and Benefits) was held at zero, not decreased at the rate PCPI decreased. Below each year is the number of teachers that could have been employed by those savings.

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed. For FY 08-09, this district ranked 484 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In Bellflower Unified Total Operating Expenditures per student (excluding capital), grew by 14% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In Bellflower Unified, 14% of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated 0 additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 11% of Certificated Teacher Salary expenditures. This amount ranked 130 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 58%.

This district is in quadrant 1. (See Chart 3-6, pp. 104-105)

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

District Profile: Bennett Valley Union Elementary

The graph in the top right corner shows the difference between the change in the district's Total Operating Expenditures (excluding capital) per student (blue bar) and California Per Capita Personal Income (green bar). [See the Methodology for a full description for how this is calculated]. Bennett Valley Union Elementary spent \$7,379 per student, which ranked 900 out of the 955 districts for which this information was available, with the top ranked district spending the most per student.

The graph in the middle left hand side of the page shows the annual savings if Total Operating Expenditures per student, excluding Certificated Teacher Salaries and Benefits, had only increased at the same rate as PCPI in FY 07-08. Note that for FY 08-09 the calculation shown is for the savings if the increase in such Operating Expenditures per student (i.e., excluding Certificated Teacher Salaries and Benefits) was held at zero, not decreased at the rate PCPI decreased. Below each year is the number of teachers that could have been employed by those savings.

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed. For FY 08-09, this district ranked 145 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In Bennett Valley Union Elementary Total Operating Expenditures per student (excluding capital), grew by 15% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In Bennett Valley Union Elementary, 13% of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated 0 additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 13% of Certificated Teacher Salary expenditures. This amount ranked 235 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 69%.

This district is in quadrant 4. (See Chart 3-6, pp. 104-105)

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

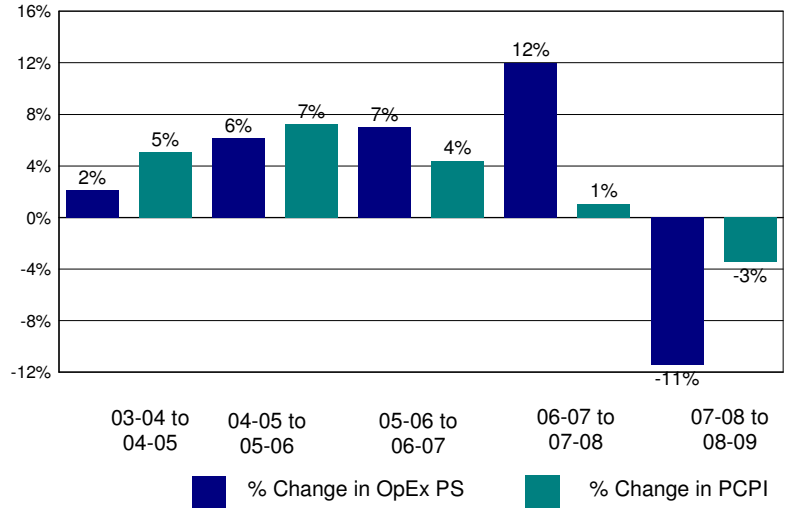

- Total Certificated Teacher Salaries (Object 1100) & Estimated Benefits
- Total Instructional Aide Salaries (Object 2100) & Estimated Benefits
- Approved Textbooks and Books (Objects 4100 & 4200)
- Materials and Supplies expenditures (Object 4300) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180 and 1190)
- Professional/Consulting Services/Subagreements for Services (Objects 5100 and 5800) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180, 1190)

District Profile: Berkeley Unified

The graph in the top right corner shows the difference between the change in the district's Total Operating Expenditures (excluding capital) per student (blue bar) and California Per Capita Personal Income (green bar). [See the Methodology for a full description for how this is calculated]. Berkeley Unified spent \$19,094 per student, which ranked 51 out of the 955 districts for which this information was available, with the top ranked district spending the most per student.

The graph in the middle left hand side of the page shows the annual savings if Total Operating Expenditures per student, excluding Certificated Teacher Salaries and Benefits, had only increased at the same rate as PCPI in FY 07-08. Note that for FY 08-09 the calculation shown is for the savings if the increase in such Operating Expenditures per student (i.e., excluding Certificated Teacher Salaries and Benefits) was held at zero, not decreased at the rate PCPI decreased. Below each year is the number of teachers that could have been employed by those savings.

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed. For FY 08-09, this district ranked 908 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In Berkeley Unified Total Operating Expenditures per student (excluding capital), grew by 68% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In Berkeley Unified, % of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 19% of Certificated Teacher Salary expenditures. This amount ranked 707 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 44%.

This district is in quadrant 3. (See Chart 3-6, pp. 104-105)

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

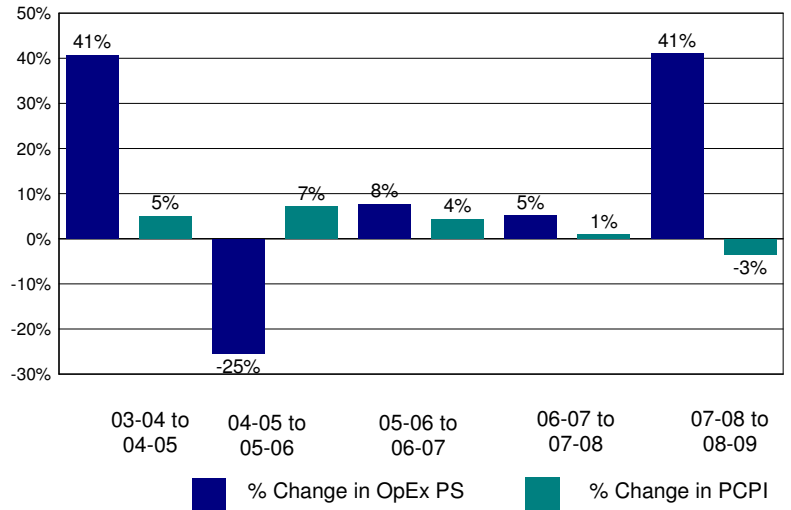

- Total Certificated Teacher Salaries (Object 1100) & Estimated Benefits
- Total Instructional Aide Salaries (Object 2100) & Estimated Benefits

District Profile: Big Oak Flat-Groveland Unified

The graph in the top right corner shows the difference between the change in the district's Total Operating Expenditures (excluding capital) per student (blue bar) and California Per Capita Personal Income (green bar). [See the Methodology for a full description for how this is calculated]. Big Oak Flat-Groveland Unified spent \$11,562 per student, which ranked 184 out of the 955 districts for which this information was available, with the top ranked district spending the most per student.

The graph in the middle left hand side of the page shows the annual savings if Total Operating Expenditures per student, excluding Certificated Teacher Salaries and Benefits, had only increased at the same rate as PCPI in FY 07-08. Note that for FY 08-09 the calculation shown is for the savings if the increase in such Operating Expenditures per student (i.e., excluding Certificated Teacher Salaries and Benefits) was held at zero, not decreased at the rate PCPI decreased. Below each year is the number of teachers that could have been employed by those savings.

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed. For FY 08-09, this district ranked 423 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In Big Oak Flat-Groveland Unified Total Operating Expenditures per student (excluding capital), grew by 19% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In Big Oak Flat-Groveland Unified, % of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated 0 additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 17% of Certificated Teacher Salary expenditures. This amount ranked 623 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 55%.

This district is in quadrant 2. (See Chart 3-6, pp. 104-105)

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

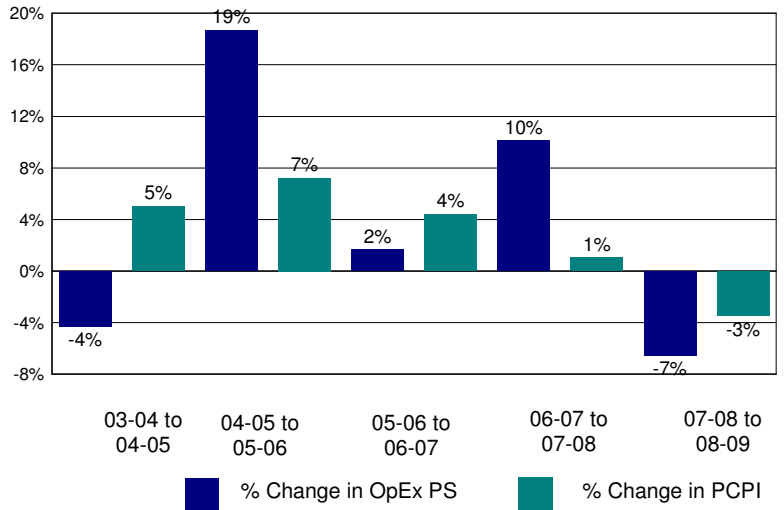

- Total Certificated Teacher Salaries (Object 1100) & Estimated Benefits
- Total Instructional Aide Salaries (Object 2100) & Estimated Benefits
- Approved Textbooks and Books (Objects 4100 & 4200)
- Materials and Supplies expenditures (Object 4300) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180 and 1190)
- Professional/Consulting Services/Subagreements for Services (Objects 5100 and 5800) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180, 1190)

District Profile: Big Pine Unified

The graph in the top right corner shows the difference between the change in the district's Total Operating Expenditures (excluding capital) per student (blue bar) and California Per Capita Personal Income (green bar). [See the Methodology for a full description for how this is calculated]. Big Pine Unified spent \$18,341 per student, which ranked 59 out of the 955 districts for which this information was available, with the top ranked district spending the most per student.

The graph in the middle left hand side of the page shows the annual savings if Total Operating Expenditures per student, excluding Certificated Teacher Salaries and Benefits, had only increased at the same rate as PCPI in FY 07-08. Note that for FY 08-09 the calculation shown is for the savings if the increase in such Operating Expenditures per student (i.e., excluding Certificated Teacher Salaries and Benefits) was held at zero, not decreased at the rate PCPI decreased. Below each year is the number of teachers that could have been employed by those savings.

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed. For FY 08-09, this district ranked 832 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In Big Pine Unified Total Operating Expenditures per student (excluding capital), grew by 42% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In Big Pine Unified, % of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 6% of Certificated Teacher Salary expenditures. This amount ranked 16 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 47%.

This district is in quadrant 2. (See Chart 3-6, pp. 104-105)

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

District Profile: Bitterwater-Tully Union Elementary

The graph in the top right corner shows the difference between the change in the district's Total Operating Expenditures (excluding capital) per student (blue bar) and California Per Capita Personal Income (green bar). [See the Methodology for a full description for how this is calculated]. Bitterwater-Tully Union Elementary spent \$13,092 per student, which ranked 136 out of the 955 districts for which this information was available, with the top ranked district spending the most per student.

The graph in the middle left hand side of the page shows the annual savings if Total Operating Expenditures per student, excluding Certificated Teacher Salaries and Benefits, had only increased at the same rate as PCPI in FY 07-08. Note that for FY 08-09 the calculation shown is for the savings if the increase in such Operating Expenditures per student (i.e., excluding Certificated Teacher Salaries and Benefits) was held at zero, not decreased at the rate PCPI decreased. Below each year is the number of teachers that could have been employed by those savings.

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed. For FY 08-09, this district ranked 807 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In Bitterwater-Tully Union Elementary Total Operating Expenditures per student (excluding capital), grew by 6% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In Bitterwater-Tully Union Elementary, % of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 6% of Certificated Teacher Salary expenditures. This amount ranked 14 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 65%.

This district is in quadrant 4. (See Chart 3-6, pp. 104-105)

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

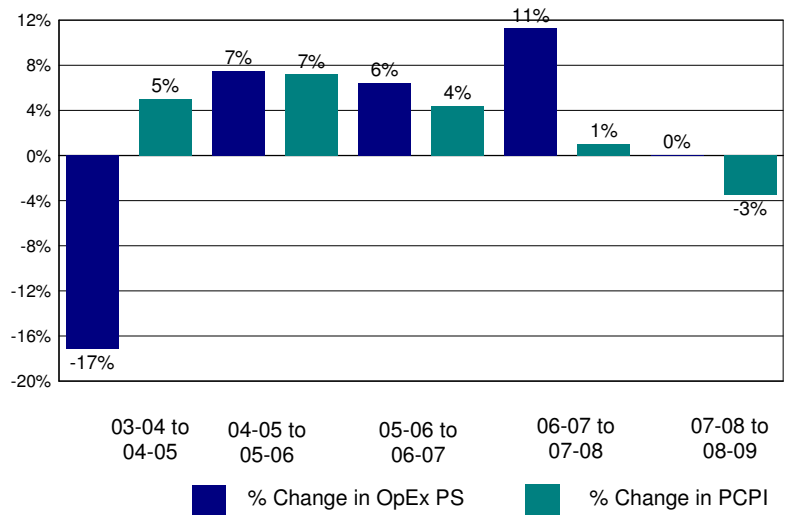

- Total Certificated Teacher Salaries (Object 1100) & Estimated Benefits
- Total Instructional Aide Salaries (Object 2100) & Estimated Benefits
- Approved Textbooks and Books (Objects 4100 & 4200)
- Materials and Supplies expenditures (Object 4300) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180 and 1190)
- Professional/Consulting Services/Subagreements for Services (Objects 5100 and 5800) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180, 1190)

District Profile: Bogus Elementary

The graph in the top right corner shows the difference between the change in the district's Total Operating Expenditures (excluding capital) per student (blue bar) and California Per Capita Personal Income (green bar). [See the Methodology for a full description for how this is calculated]. Bogus Elementary spent \$22,732 per student, which ranked 34 out of the 955 districts for which this information was available, with the top ranked district spending the most per student.

The graph in the middle left hand side of the page shows the annual savings if Total Operating Expenditures per student, excluding Certificated Teacher Salaries and Benefits, had only increased at the same rate as PCPI in FY 07-08. Note that for FY 08-09 the calculation shown is for the savings if the increase in such Operating Expenditures per student (i.e., excluding Certificated Teacher Salaries and Benefits) was held at zero, not decreased at the rate PCPI decreased. Below each year is the number of teachers that could have been employed by those savings.

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed. For FY 08-09, this district ranked 933 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In Bogus Elementary Total Operating Expenditures per student (excluding capital), grew by 24% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In Bogus Elementary, % of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 26% of Certificated Teacher Salary expenditures. This amount ranked 867 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 43%.

This district is in quadrant . (See Chart 3-6, pp. 104-105)

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

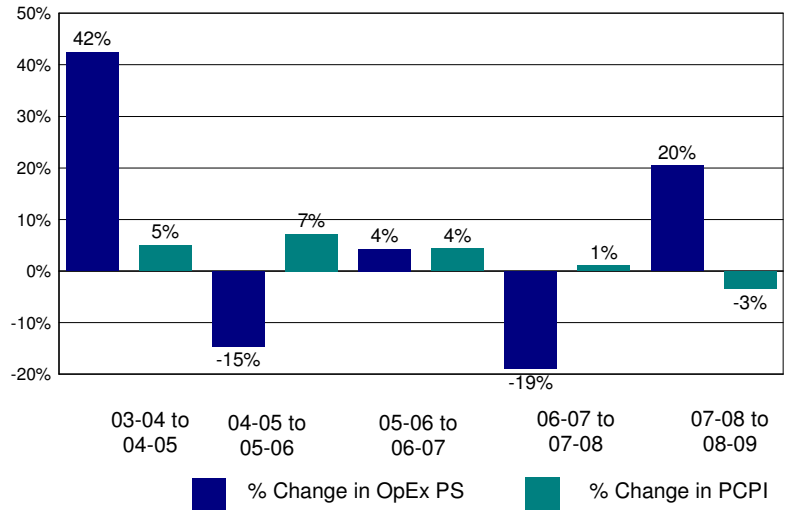

- Total Certificated Teacher Salaries (Object 1100) & Estimated Benefits
- Total Instructional Aide Salaries (Object 2100) & Estimated Benefits
- Approved Textbooks and Books (Objects 4100 & 4200)
- Materials and Supplies expenditures (Object 4300) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180 and 1190)
- Professional/Consulting Services/Subagreements for Services (Objects 5100 and 5800) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180, 1190)

District Profile: Bradley Union Elementary

The graph in the top right corner shows the difference between the change in the district's Total Operating Expenditures (excluding capital) per student (blue bar) and California Per Capita Personal Income (green bar). [See the Methodology for a full description for how this is calculated]. Bradley Union Elementary spent \$14,741 per student, which ranked 99 out of the 955 districts for which this information was available, with the top ranked district spending the most per student.

The graph in the middle left hand side of the page shows the annual savings if Total Operating Expenditures per student, excluding Certificated Teacher Salaries and Benefits, had only increased at the same rate as PCPI in FY 07-08. Note that for FY 08-09 the calculation shown is for the savings if the increase in such Operating Expenditures per student (i.e., excluding Certificated Teacher Salaries and Benefits) was held at zero, not decreased at the rate PCPI decreased. Below each year is the number of teachers that could have been employed by those savings.

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed. For FY 08-09, this district ranked 911 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In Bradley Union Elementary Total Operating Expenditures per student (excluding capital), grew by -19% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In Bradley Union Elementary, % of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 19% of Certificated Teacher Salary expenditures. This amount ranked 688 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 52%.

This district is in quadrant 1. (See Chart 3-6, pp. 104-105)

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

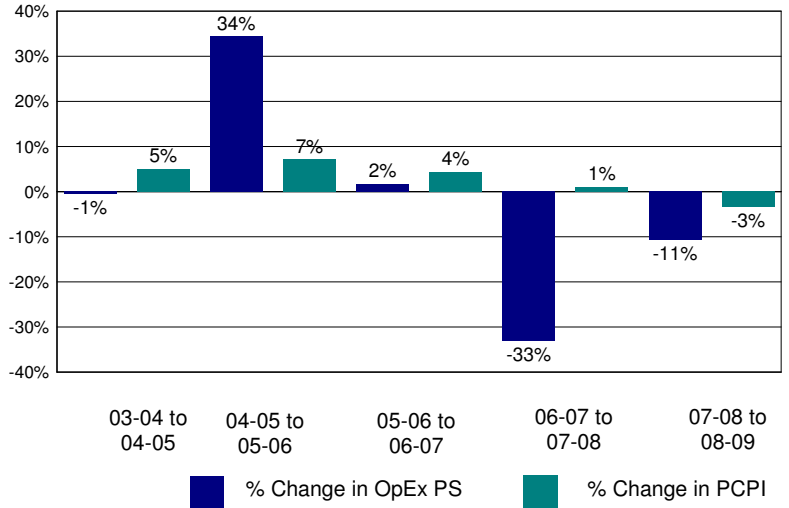

- Total Certificated Teacher Salaries (Object 1100) & Estimated Benefits
- Total Instructional Aide Salaries (Object 2100) & Estimated Benefits
- Approved Textbooks and Books (Objects 4100 & 4200)
- Materials and Supplies expenditures (Object 4300) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180 and 1190)
- Professional/Consulting Services/Subagreements for Services (Objects 5100 and 5800) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180, 1190)

District Profile: Bridgeville Elementary

The graph in the top right corner shows the difference between the change in the district's Total Operating Expenditures (excluding capital) per student (blue bar) and California Per Capita Personal Income (green bar). [See the Methodology for a full description for how this is calculated]. Bridgeville Elementary spent \$18,898 per student, which ranked 53 out of the 955 districts for which this information was available, with the top ranked district spending the most per student.

The graph in the middle left hand side of the page shows the annual savings if Total Operating Expenditures per student, excluding Certificated Teacher Salaries and Benefits, had only increased at the same rate as PCPI in FY 07-08. Note that for FY 08-09 the calculation shown is for the savings if the increase in such Operating Expenditures per student (i.e., excluding Certificated Teacher Salaries and Benefits) was held at zero, not decreased at the rate PCPI decreased. Below each year is the number of teachers that could have been employed by those savings.

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed. For FY 08-09, this district ranked 854 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In Bridgeville Elementary Total Operating Expenditures per student (excluding capital), grew by 51% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In Bridgeville Elementary, 13% of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated 1 additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 27% of Certificated Teacher Salary expenditures. This amount ranked 873 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 51%.

This district is in quadrant 2. (See Chart 3-6, pp. 104-105)

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

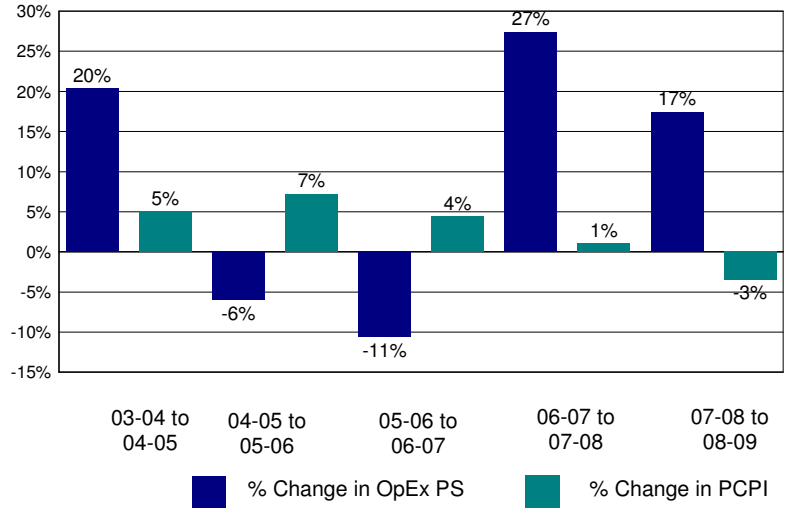

- Total Certificated Teacher Salaries (Object 1100) & Estimated Benefits
- Total Instructional Aide Salaries (Object 2100) & Estimated Benefits
- Approved Textbooks and Books (Objects 4100 & 4200)
- Materials and Supplies expenditures (Object 4300) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180 and 1190)
- Professional/Consulting Services/Subagreements for Services (Objects 5100 and 5800) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180, 1190)

District Profile: Buellton Union Elementary

The graph in the top right corner shows the difference between the change in the district's Total Operating Expenditures (excluding capital) per student (blue bar) and California Per Capita Personal Income (green bar). [See the Methodology for a full description for how this is calculated]. Buellton Union Elementary spent \$10,217 per student, which ranked 291 out of the 955 districts for which this information was available, with the top ranked district spending the most per student.

The graph in the middle left hand side of the page shows the annual savings if Total Operating Expenditures per student, excluding Certificated Teacher Salaries and Benefits, had only increased at the same rate as PCPI in FY 07-08. Note that for FY 08-09 the calculation shown is for the savings if the increase in such Operating Expenditures per student (i.e., excluding Certificated Teacher Salaries and Benefits) was held at zero, not decreased at the rate PCPI decreased. Below each year is the number of teachers that could have been employed by those savings.

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed. For FY 08-09, this district ranked 463 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In Buellton Union Elementary Total Operating Expenditures per student (excluding capital), grew by 57% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In Buellton Union Elementary, 31% of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated 0 additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 16% of Certificated Teacher Salary expenditures. This amount ranked 537 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 64%.

This district is in quadrant 3. (See Chart 3-6, pp. 104-105)

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

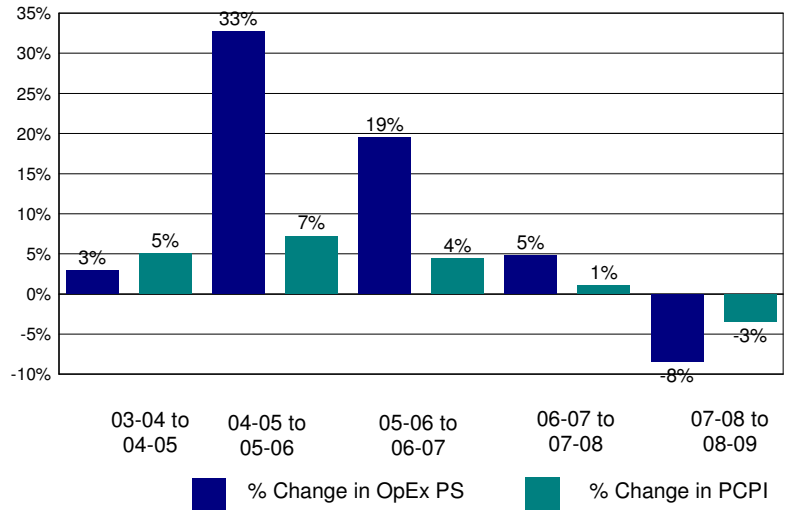

- Total Certificated Teacher Salaries (Object 1100) & Estimated Benefits
- Total Instructional Aide Salaries (Object 2100) & Estimated Benefits
- Approved Textbooks and Books (Objects 4100 & 4200)
- Materials and Supplies expenditures (Object 4300) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180 and 1190)
- Professional/Consulting Services/Subagreements for Services (Objects 5100 and 5800) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180, 1190)

District Profile: Burrel Union Elementary

The graph in the top right corner shows the difference between the change in the district's Total Operating Expenditures (excluding capital) per student (blue bar) and California Per Capita Personal Income (green bar). [See the Methodology for a full description for how this is calculated]. Burrel Union Elementary spent \$10,531 per student, which ranked 257 out of the 955 districts for which this information was available, with the top ranked district spending the most per student.

The graph in the middle left hand side of the page shows the annual savings if Total Operating Expenditures per student, excluding Certificated Teacher Salaries and Benefits, had only increased at the same rate as PCPI in FY 07-08. Note that for FY 08-09 the calculation shown is for the savings if the increase in such Operating Expenditures per student (i.e., excluding Certificated Teacher Salaries and Benefits) was held at zero, not decreased at the rate PCPI decreased. Below each year is the number of teachers that could have been employed by those savings.

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed. For FY 08-09, this district ranked 876 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In Burrel Union Elementary Total Operating Expenditures per student (excluding capital), grew by 24% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In Burrel Union Elementary, 21% of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated 0 additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 26% of Certificated Teacher Salary expenditures. This amount ranked 857 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 51%.

This district is in quadrant 4. (See Chart 3-6, pp. 104-105)

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

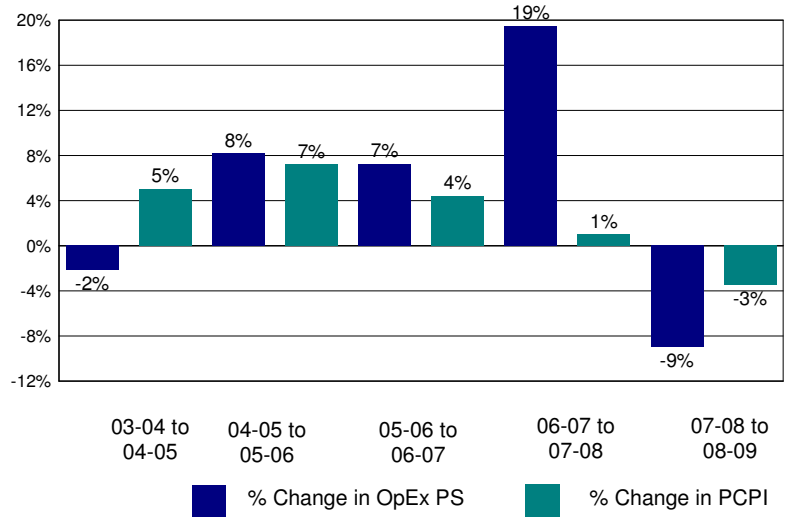

- Total Certificated Teacher Salaries (Object 1100) & Estimated Benefits
- Total Instructional Aide Salaries (Object 2100) & Estimated Benefits
- Approved Textbooks and Books (Objects 4100 & 4200)
- Materials and Supplies expenditures (Object 4300) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180 and 1190)
- Professional/Consulting Services/Subagreements for Services (Objects 5100 and 5800) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180, 1190)

The graph in the top right corner shows the difference between the change in the district's Total Operating Expenditures (excluding capital) per student (blue bar) and California Per Capita Personal Income (green bar). [See the Methodology for a full description for how this is calculated]. Cabrillo Unified spent \$8,498 per student, which ranked 656 out of the 955 districts for which this information was available, with the top ranked district spending the most per student.

The graph in the middle left hand side of the page shows the annual savings if Total Operating Expenditures per student, excluding Certificated Teacher Salaries and Benefits, had only increased at the same rate as PCPI in FY 07-08. Note that for FY 08-09 the calculation shown is for the savings if the increase in such Operating Expenditures per student (i.e., excluding Certificated Teacher Salaries and Benefits) was held at zero, not decreased at the rate PCPI decreased. Below each year is the number of teachers that could have been employed by those savings.

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed. For FY 08-09, this district ranked 529 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In Cabrillo Unified Total Operating Expenditures per student (excluding capital), grew by 23% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In Cabrillo Unified, 24% of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated 1 additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 22% of Certificated Teacher Salary expenditures. This amount ranked 806 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 55%.

This district is in quadrant 4. (See Chart 3-6, pp. 104-105)

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

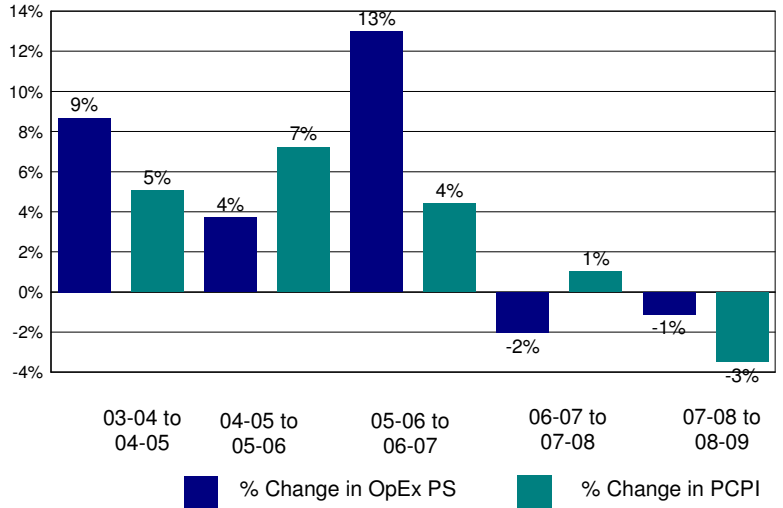

- Total Certificated Teacher Salaries (Object 1100) & Estimated Benefits
- Total Instructional Aide Salaries (Object 2100) & Estimated Benefits
- Approved Textbooks and Books (Objects 4100 & 4200)
- Materials and Supplies expenditures (Object 4300) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180 and 1190)
- Professional/Consulting Services/Subagreements for Services (Objects 5100 and 5800) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180, 1190)

The graph in the top right corner shows the difference between the change in the district's Total Operating Expenditures (excluding capital) per student (blue bar) and California Per Capita Personal Income (green bar). [See the Methodology for a full description for how this is calculated]. Calistoga Joint Unified spent \$13,551 per student, which ranked 125 out of the 955 districts for which this information was available, with the top ranked district spending the most per student.

The graph in the middle left hand side of the page shows the annual savings if Total Operating Expenditures per student, excluding Certificated Teacher Salaries and Benefits, had only increased at the same rate as PCPI in FY 07-08. Note that for FY 08-09 the calculation shown is for the savings if the increase in such Operating Expenditures per student (i.e., excluding Certificated Teacher Salaries and Benefits) was held at zero, not decreased at the rate PCPI decreased. Below each year is the number of teachers that could have been employed by those savings.

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed. For FY 08-09, this district ranked 376 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In Calistoga Joint Unified Total Operating Expenditures per student (excluding capital), grew by 56% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In Calistoga Joint Unified, % of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 20% of Certificated Teacher Salary expenditures. This amount ranked 731 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 66%.

This district is in quadrant 3. (See Chart 3-6, pp. 104-105)

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

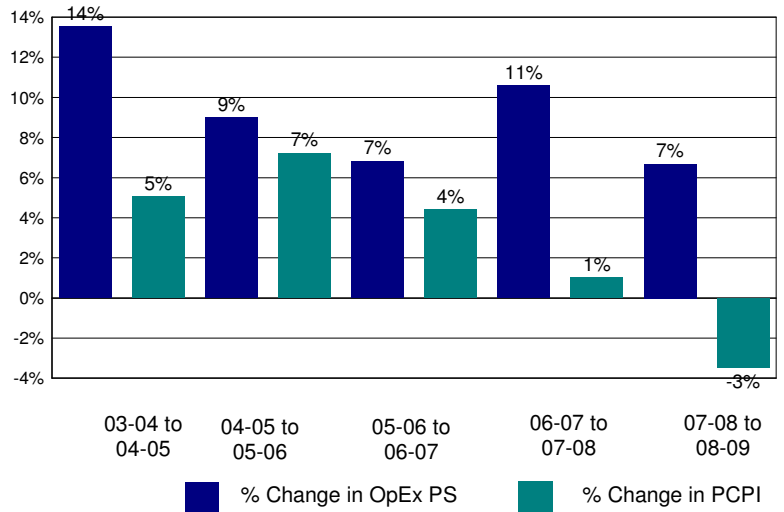

- Total Certificated Teacher Salaries (Object 1100) & Estimated Benefits
- Total Instructional Aide Salaries (Object 2100) & Estimated Benefits
- Approved Textbooks and Books (Objects 4100 & 4200)
- Materials and Supplies expenditures (Object 4300) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180 and 1190)
- Professional/Consulting Services/Subagreements for Services (Objects 5100 and 5800) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180, 1190)

District Profile: Canyon Elementary

The graph in the top right corner shows the difference between the change in the district's Total Operating Expenditures (excluding capital) per student (blue bar) and California Per Capita Personal Income (green bar). [See the Methodology for a full description for how this is calculated]. Canyon Elementary spent \$8,863 per student, which ranked 535 out of the 955 districts for which this information was available, with the top ranked district spending the most per student.

The graph in the middle left hand side of the page shows the annual savings if Total Operating Expenditures per student, excluding Certificated Teacher Salaries and Benefits, had only increased at the same rate as PCPI in FY 07-08. Note that for FY 08-09 the calculation shown is for the savings if the increase in such Operating Expenditures per student (i.e., excluding Certificated Teacher Salaries and Benefits) was held at zero, not decreased at the rate PCPI decreased. Below each year is the number of teachers that could have been employed by those savings.

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed. For FY 08-09, this district ranked 39 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In Canyon Elementary Total Operating Expenditures per student (excluding capital), grew by 25% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In Canyon Elementary, % of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 25% of Certificated Teacher Salary expenditures. This amount ranked 852 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 64%.

This district is in quadrant 2. (See Chart 3-6, pp. 104-105)

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

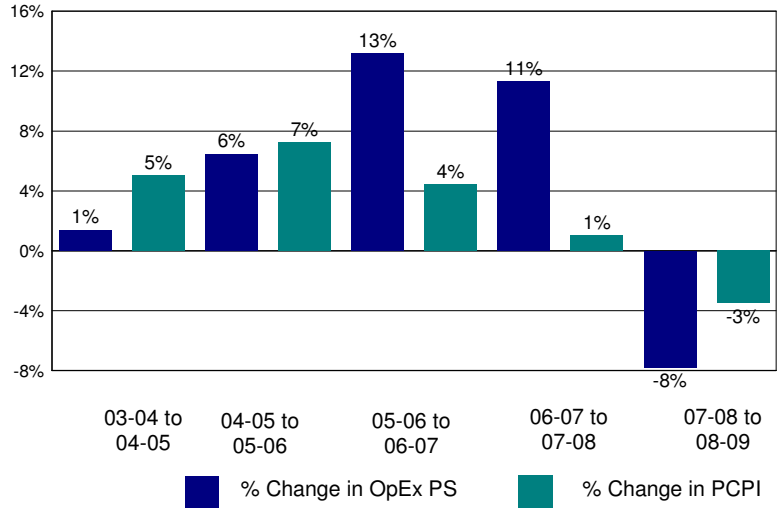

- Total Certificated Teacher Salaries (Object 1100) & Estimated Benefits
- Total Instructional Aide Salaries (Object 2100) & Estimated Benefits
- Approved Textbooks and Books (Objects 4100 & 4200)
- Materials and Supplies expenditures (Object 4300) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180 and 1190)
- Professional/Consulting Services/Subagreements for Services (Objects 5100 and 5800) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180, 1190)

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed. For FY 08-09, this district ranked 616 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In Carpinteria Unified Total Operating Expenditures per student (excluding capital), grew by 40% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In Carpinteria Unified, % of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 16% of Certificated Teacher Salary expenditures. This amount ranked 518 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 55%.

This district is in quadrant 3. (See Chart 3-6, pp. 104-105)

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

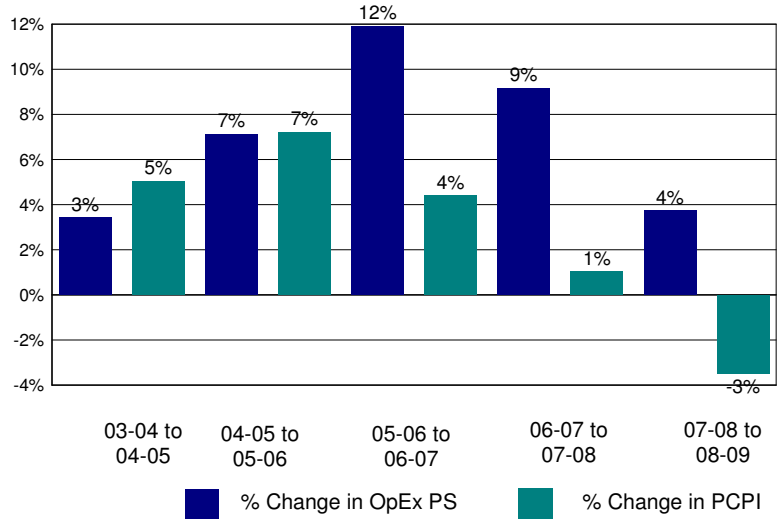

- Total Certificated Teacher Salaries (Object 1100) & Estimated Benefits
- Total Instructional Aide Salaries (Object 2100) & Estimated Benefits
- Approved Textbooks and Books (Objects 4100 & 4200)
- Materials and Supplies expenditures (Object 4300) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180 and 1190)
- Professional/Consulting Services/Subagreements for Services (Objects 5100 and 5800) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180, 1190)

District Profile: Caruthers Unified

The graph in the top right corner shows the difference between the change in the district's Total Operating Expenditures (excluding capital) per student (blue bar) and California Per Capita Personal Income (green bar). [See the Methodology for a full description for how this is calculated]. Caruthers Unified spent \$9,017 per student, which ranked 497 out of the 955 districts for which this information was available, with the top ranked district spending the most per student.

The graph in the middle left hand side of the page shows the annual savings if Total Operating Expenditures per student, excluding Certificated Teacher Salaries and Benefits, had only increased at the same rate as PCPI in FY 07-08. Note that for FY 08-09 the calculation shown is for the savings if the increase in such Operating Expenditures per student (i.e., excluding Certificated Teacher Salaries and Benefits) was held at zero, not decreased at the rate PCPI decreased. Below each year is the number of teachers that could have been employed by those savings.

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed. For FY 08-09, this district ranked 585 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In Caruthers Unified Total Operating Expenditures per student (excluding capital), grew by 20% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In Caruthers Unified, 27% of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated 0 additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 18% of Certificated Teacher Salary expenditures. This amount ranked 654 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 55%.

This district is in quadrant 3. (See Chart 3-6, pp. 104-105)

District Profile: Cayucos Elementary

The graph in the top right corner shows the difference between the change in the district's Total Operating Expenditures (excluding capital) per student (blue bar) and California Per Capita Personal Income (green bar). [See the Methodology for a full description for how this is calculated]. Cayucos Elementary spent \$11,373 per student, which ranked 194 out of the 955 districts for which this information was available, with the top ranked district spending the most per student.

The graph in the middle left hand side of the page shows the annual savings if Total Operating Expenditures per student, excluding Certificated Teacher Salaries and Benefits, had only increased at the same rate as PCPI in FY 07-08. Note that for FY 08-09 the calculation shown is for the savings if the increase in such Operating Expenditures per student (i.e., excluding Certificated Teacher Salaries and Benefits) was held at zero, not decreased at the rate PCPI decreased. Below each year is the number of teachers that could have been employed by those savings.

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed. For FY 08-09, this district ranked 163 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In Cayucos Elementary Total Operating Expenditures per student (excluding capital), grew by 44% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In Cayucos Elementary, % of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 15% of Certificated Teacher Salary expenditures. This amount ranked 449 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 66%.

This district is in quadrant 3. (See Chart 3-6, pp. 104-105)

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

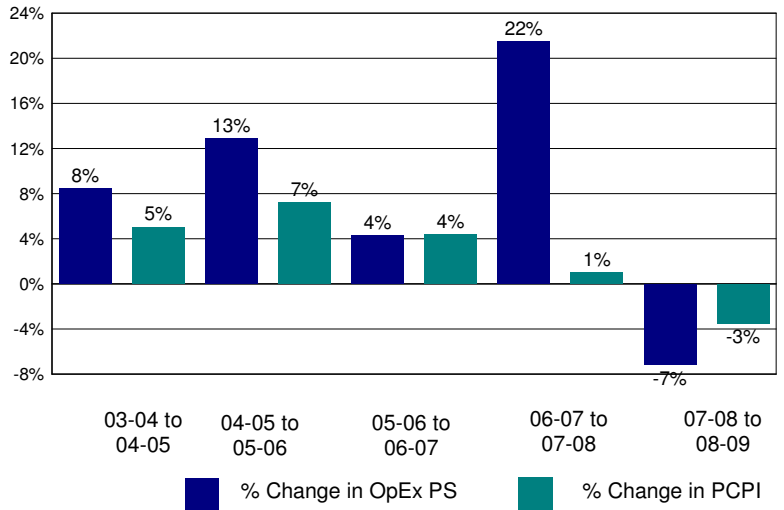

- Total Certificated Teacher Salaries (Object 1100) & Estimated Benefits
- Total Instructional Aide Salaries (Object 2100) & Estimated Benefits
- Approved Textbooks and Books (Objects 4100 & 4200)
- Materials and Supplies expenditures (Object 4300) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180 and 1190)
- Professional/Consulting Services/Subagreements for Services (Objects 5100 and 5800) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180, 1190)

District Profile: Center Joint Unified

The graph in the top right corner shows the difference between the change in the district's Total Operating Expenditures (excluding capital) per student (blue bar) and California Per Capita Personal Income (green bar). [See the Methodology for a full description for how this is calculated]. Center Joint Unified spent \$8,291 per student, which ranked 718 out of the 955 districts for which this information was available, with the top ranked district spending the most per student.

The graph in the middle left hand side of the page shows the annual savings if Total Operating Expenditures per student, excluding Certificated Teacher Salaries and Benefits, had only increased at the same rate as PCPI in FY 07-08. Note that for FY 08-09 the calculation shown is for the savings if the increase in such Operating Expenditures per student (i.e., excluding Certificated Teacher Salaries and Benefits) was held at zero, not decreased at the rate PCPI decreased. Below each year is the number of teachers that could have been employed by those savings.

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed. For FY 08-09, this district ranked 122 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In Center Joint Unified Total Operating Expenditures per student (excluding capital), grew by 38% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In Center Joint Unified, 20% of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated 10 additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 13% of Certificated Teacher Salary expenditures. This amount ranked 252 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 66%.

This district is in quadrant 3. (See Chart 3-6, pp. 104-105)

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

District Profile: Central Union High

The graph in the top right corner shows the difference between the change in the district's Total Operating Expenditures (excluding capital) per student (blue bar) and California Per Capita Personal Income (green bar). [See the Methodology for a full description for how this is calculated]. Central Union High spent \$8,542 per student, which ranked 639 out of the 955 districts for which this information was available, with the top ranked district spending the most per student.

The graph in the middle left hand side of the page shows the annual savings if Total Operating Expenditures per student, excluding Certificated Teacher Salaries and Benefits, had only increased at the same rate as PCPI in FY 07-08. Note that for FY 08-09 the calculation shown is for the savings if the increase in such Operating Expenditures per student (i.e., excluding Certificated Teacher Salaries and Benefits) was held at zero, not decreased at the rate PCPI decreased. Below each year is the number of teachers that could have been employed by those savings.

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed. For FY 08-09, this district ranked 378 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In Central Union High Total Operating Expenditures per student (excluding capital), grew by 23% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In Central Union High, 29% of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated 0 additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 15% of Certificated Teacher Salary expenditures. This amount ranked 412 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 56%.

This district is in quadrant 3. (See Chart 3-6, pp. 104-105)

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

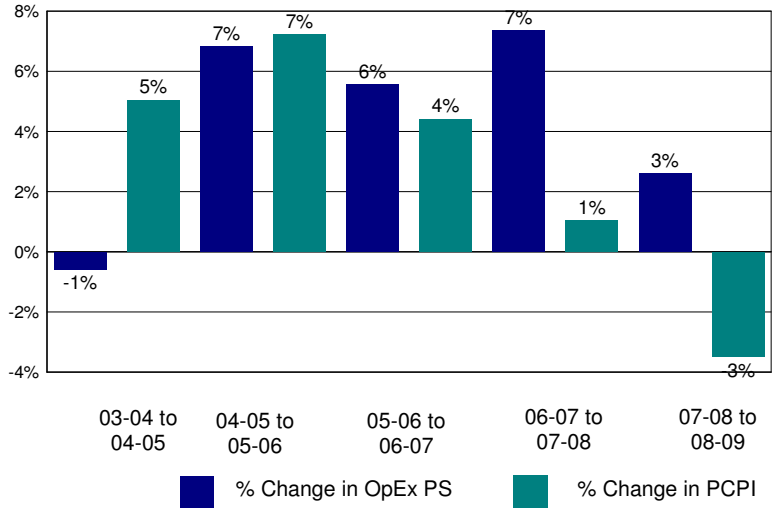

- Total Certificated Teacher Salaries (Object 1100) & Estimated Benefits
- Total Instructional Aide Salaries (Object 2100) & Estimated Benefits
- Approved Textbooks and Books (Objects 4100 & 4200)
- Materials and Supplies expenditures (Object 4300) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180 and 1190)
- Professional/Consulting Services/Subagreements for Services (Objects 5100 and 5800) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180, 1190)

District Profile: Centralia Elementary

The graph in the top right corner shows the difference between the change in the district's Total Operating Expenditures (excluding capital) per student (blue bar) and California Per Capita Personal Income (green bar). [See the Methodology for a full description for how this is calculated]. Centralia Elementary spent \$8,656 per student, which ranked 601 out of the 955 districts for which this information was available, with the top ranked district spending the most per student.

The graph in the middle left hand side of the page shows the annual savings if Total Operating Expenditures per student, excluding Certificated Teacher Salaries and Benefits, had only increased at the same rate as PCPI in FY 07-08. Note that for FY 08-09 the calculation shown is for the savings if the increase in such Operating Expenditures per student (i.e., excluding Certificated Teacher Salaries and Benefits) was held at zero, not decreased at the rate PCPI decreased. Below each year is the number of teachers that could have been employed by those savings.

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed. For FY 08-09, this district ranked 223 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In Centralia Elementary Total Operating Expenditures per student (excluding capital), grew by 21% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In Centralia Elementary, 11% of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated 0 additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 13% of Certificated Teacher Salary expenditures. This amount ranked 251 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 62%.

This district is in quadrant 3. (See Chart 3-6, pp. 104-105)

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

For FY 08-09, this district ranked 668 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In Chawanakee Unified Total Operating Expenditures per student (excluding capital), grew by 12% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In Chawanakee Unified, % of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 32% of Certificated Teacher Salary expenditures. This amount ranked 903 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 54%.

This district is in quadrant 4. (See Chart 3-6, pp. 104-105)

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

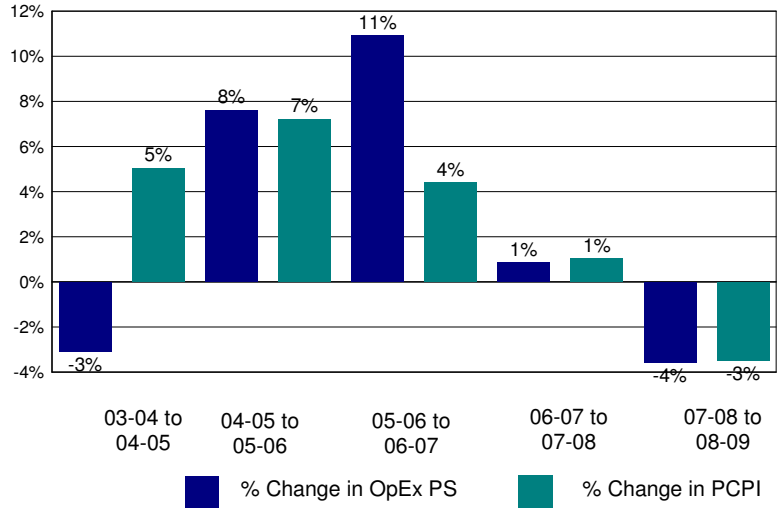

- Total Certificated Teacher Salaries (Object 1100) & Estimated Benefits
- Total Instructional Aide Salaries (Object 2100) & Estimated Benefits
- Approved Textbooks and Books (Objects 4100 & 4200)
- Materials and Supplies expenditures (Object 4300) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180 and 1190)
- Professional/Consulting Services/Subagreements for Services (Objects 5100 and 5800) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180, 1190)

District Profile: Chicago Park Elementary

The graph in the top right corner shows the difference between the change in the district's Total Operating Expenditures (excluding capital) per student (blue bar) and California Per Capita Personal Income (green bar). [See the Methodology for a full description for how this is calculated]. Chicago Park Elementary spent \$8,117 per student, which ranked 780 out of the 955 districts for which this information was available, with the top ranked district spending the most per student.

The graph in the middle left hand side of the page shows the annual savings if Total Operating Expenditures per student, excluding Certificated Teacher Salaries and Benefits, had only increased at the same rate as PCPI in FY 07-08. Note that for FY 08-09 the calculation shown is for the savings if the increase in such Operating Expenditures per student (i.e., excluding Certificated Teacher Salaries and Benefits) was held at zero, not decreased at the rate PCPI decreased. Below each year is the number of teachers that could have been employed by those savings.

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed. For FY 08-09, this district ranked 297 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In Chicago Park Elementary Total Operating Expenditures per student (excluding capital), grew by 25% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In Chicago Park Elementary, 22% of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated 0 additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 33% of Certificated Teacher Salary expenditures. This amount ranked 908 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 59%.

This district is in quadrant 3. (See Chart 3-6, pp. 104-105)

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

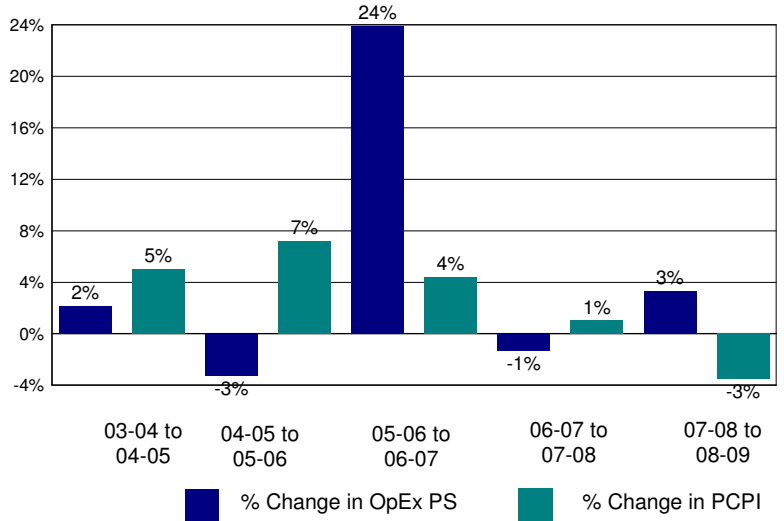

- Total Certificated Teacher Salaries (Object 1100) & Estimated Benefits

For FY 08-09, this district ranked 627 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In Chowchilla Union High Total Operating Expenditures per student (excluding capital), grew by 25% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In Chowchilla Union High, 22% of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated 0 additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 15% of Certificated Teacher Salary expenditures. This amount ranked 465 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 51%.

This district is in quadrant 3. (See Chart 3-6, pp. 104-105)

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

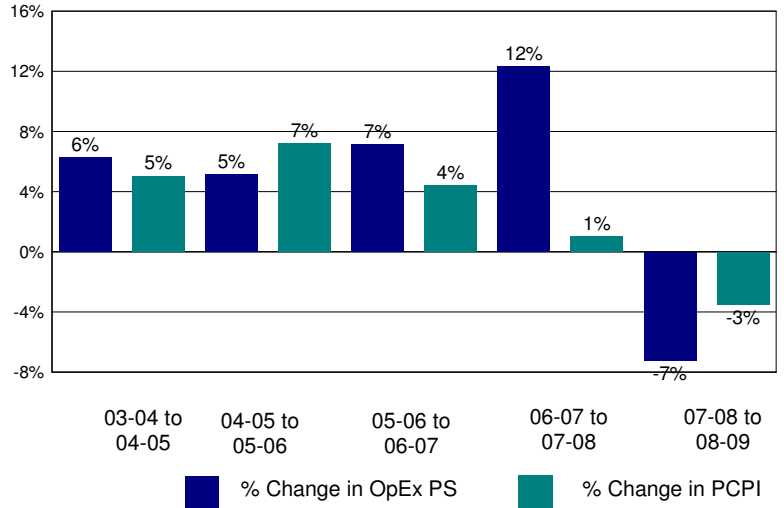

- Total Certificated Teacher Salaries (Object 1100) & Estimated Benefits
- Total Instructional Aide Salaries (Object 2100) & Estimated Benefits
- Approved Textbooks and Books (Objects 4100 & 4200)
- Materials and Supplies expenditures (Object 4300) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180 and 1190)
- Professional/Consulting Services/Subagreements for Services (Objects 5100 and 5800) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180, 1190)

District Profile: Chualar Union Elementary

The graph in the top right corner shows the difference between the change in the district's Total Operating Expenditures (excluding capital) per student (blue bar) and California Per Capita Personal Income (green bar). [See the Methodology for a full description for how this is calculated]. Chualar Union Elementary spent \$9,088 per student, which ranked 480 out of the 955 districts for which this information was available, with the top ranked district spending the most per student.

The graph in the middle left hand side of the page shows the annual savings if Total Operating Expenditures per student, excluding Certificated Teacher Salaries and Benefits, had only increased at the same rate as PCPI in FY 07-08. Note that for FY 08-09 the calculation shown is for the savings if the increase in such Operating Expenditures per student (i.e., excluding Certificated Teacher Salaries and Benefits) was held at zero, not decreased at the rate PCPI decreased. Below each year is the number of teachers that could have been employed by those savings.

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed. For FY 08-09, this district ranked 820 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In Chualar Union Elementary Total Operating Expenditures per student (excluding capital), grew by 13% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In Chualar Union Elementary, % of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 8% of Certificated Teacher Salary expenditures. This amount ranked 26 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 46%.

This district is in quadrant 2. (See Chart 3-6, pp. 104-105)

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

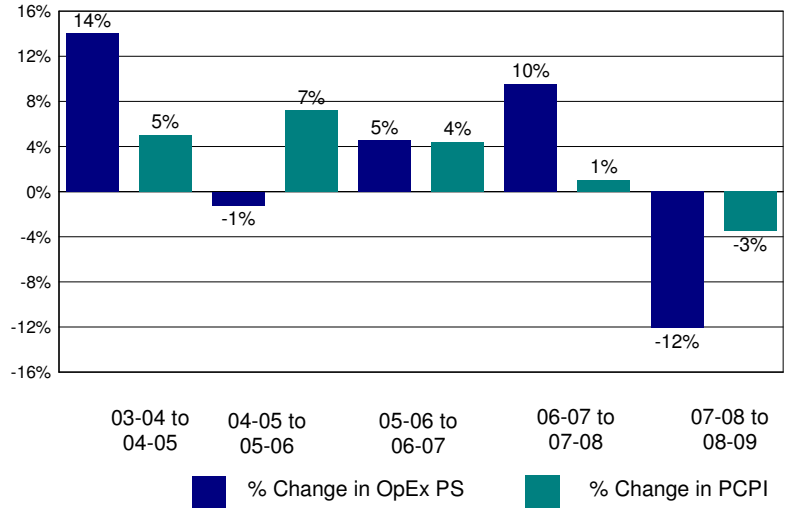

- Total Certificated Teacher Salaries (Object 1100) & Estimated Benefits
- Total Instructional Aide Salaries (Object 2100) & Estimated Benefits

District Profile: Claremont Unified

The graph in the top right corner shows the difference between the change in the district's Total Operating Expenditures (excluding capital) per student (blue bar) and California Per Capita Personal Income (green bar). [See the Methodology for a full description for how this is calculated]. Claremont Unified spent \$9,399 per student, which ranked 408 out of the 955 districts for which this information was available, with the top ranked district spending the most per student.

The graph in the middle left hand side of the page shows the annual savings if Total Operating Expenditures per student, excluding Certificated Teacher Salaries and Benefits, had only increased at the same rate as PCPI in FY 07-08. Note that for FY 08-09 the calculation shown is for the savings if the increase in such Operating Expenditures per student (i.e., excluding Certificated Teacher Salaries and Benefits) was held at zero, not decreased at the rate PCPI decreased. Below each year is the number of teachers that could have been employed by those savings.

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed. For FY 08-09, this district ranked 617 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In Claremont Unified Total Operating Expenditures per student (excluding capital), grew by 26% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In Claremont Unified, 24% of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated 23 additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 17% of Certificated Teacher Salary expenditures. This amount ranked 567 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 57%.

This district is in quadrant 3. (See Chart 3-6, pp. 104-105)

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

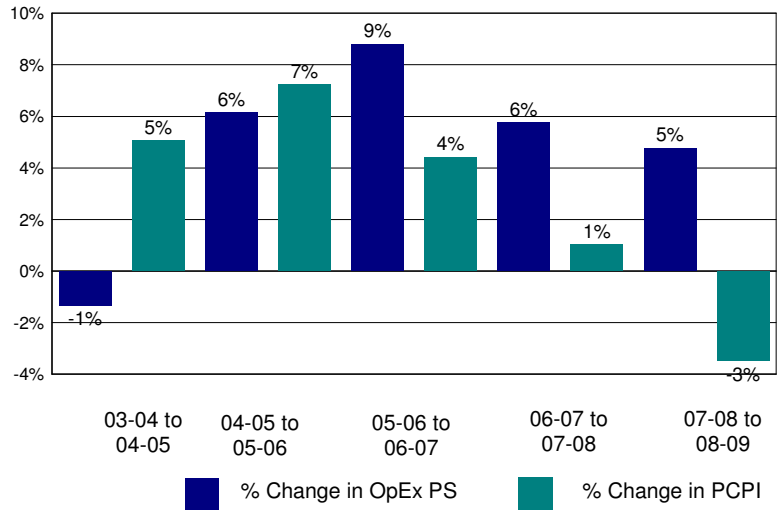

- Total Certificated Teacher Salaries (Object 1100) & Estimated Benefits
- Total Instructional Aide Salaries (Object 2100) & Estimated Benefits
- Approved Textbooks and Books (Objects 4100 & 4200)
- Materials and Supplies expenditures (Object 4300) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180 and 1190)
- Professional/Consulting Services/Subagreements for Services (Objects 5100 and 5800) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180, 1190)

District Profile: Clay Joint Elementary

The graph in the top right corner shows the difference between the change in the district's Total Operating Expenditures (excluding capital) per student (blue bar) and California Per Capita Personal Income (green bar). [See the Methodology for a full description for how this is calculated]. Clay Joint Elementary spent \$6,941 per student, which ranked 939 out of the 955 districts for which this information was available, with the top ranked district spending the most per student.

The graph in the middle left hand side of the page shows the annual savings if Total Operating Expenditures per student, excluding Certificated Teacher Salaries and Benefits, had only increased at the same rate as PCPI in FY 07-08. Note that for FY 08-09 the calculation shown is for the savings if the increase in such Operating Expenditures per student (i.e., excluding Certificated Teacher Salaries and Benefits) was held at zero, not decreased at the rate PCPI decreased. Below each year is the number of teachers that could have been employed by those savings.

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed. For FY 08-09, this district ranked 284 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In Clay Joint Elementary Total Operating Expenditures per student (excluding capital), grew by 23% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In Clay Joint Elementary, 19% of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated 0 additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 20% of Certificated Teacher Salary expenditures. This amount ranked 754 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 60%.

This district is in quadrant 2. (See Chart 3-6, pp. 104-105)

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

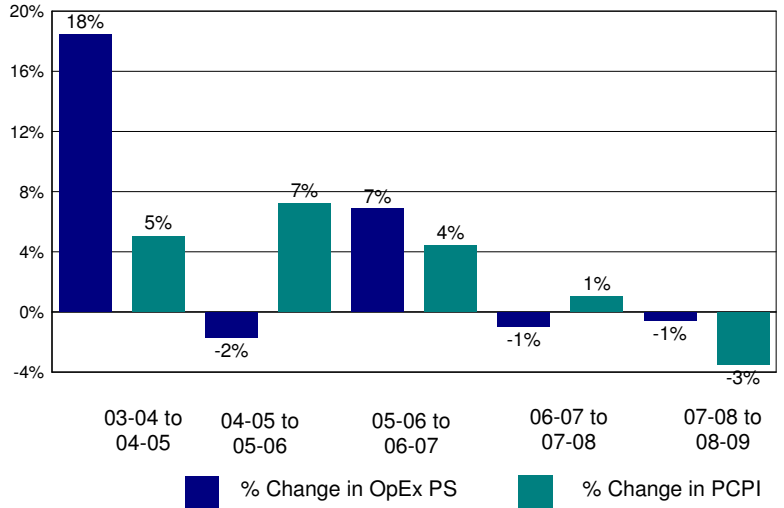

- Total Certificated Teacher Salaries (Object 1100) & Estimated Benefits

District Profile: Coalinga-Huron Joint Unified

The graph in the top right corner shows the difference between the change in the district's Total Operating Expenditures (excluding capital) per student (blue bar) and California Per Capita Personal Income (green bar). [See the Methodology for a full description for how this is calculated]. Coalinga-Huron Joint Unified spent \$9,118 per student, which ranked 471 out of the 955 districts for which this information was available, with the top ranked district spending the most per student.

The graph in the middle left hand side of the page shows the annual savings if Total Operating Expenditures per student, excluding Certificated Teacher Salaries and Benefits, had only increased at the same rate as PCPI in FY 07-08. Note that for FY 08-09 the calculation shown is for the savings if the increase in such Operating Expenditures per student (i.e., excluding Certificated Teacher Salaries and Benefits) was held at zero, not decreased at the rate PCPI decreased. Below each year is the number of teachers that could have been employed by those savings.

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed. For FY 08-09, this district ranked 550 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In Coalinga-Huron Joint Unified Total Operating Expenditures per student (excluding capital), grew by 26% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In Coalinga-Huron Joint Unified, 28% of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated 0 additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 15% of Certificated Teacher Salary expenditures. This amount ranked 475 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 53%.

This district is in quadrant 3. (See Chart 3-6, pp. 104-105)

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

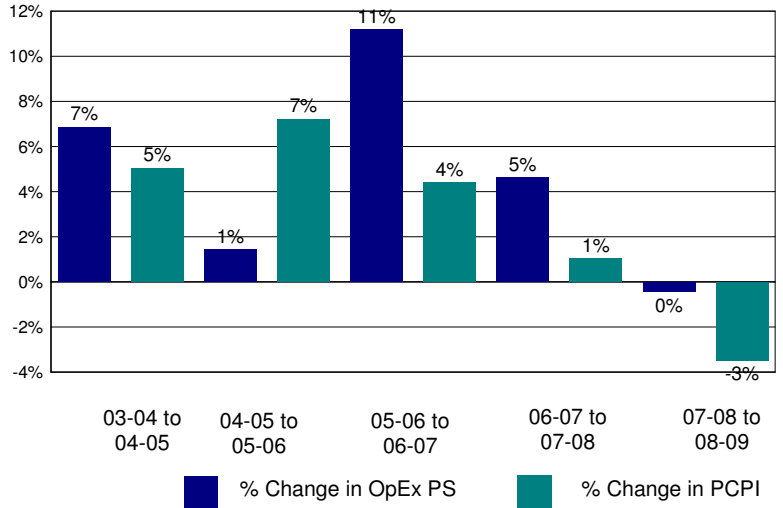

- Total Certificated Teacher Salaries (Object 1100) & Estimated Benefits
- Total Instructional Aide Salaries (Object 2100) & Estimated Benefits
- Approved Textbooks and Books (Objects 4100 & 4200)
- Materials and Supplies expenditures (Object 4300) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180 and 1190)
- Professional/Consulting Services/Subagreements for Services (Objects 5100 and 5800) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180, 1190)

District Profile: Coast Unified

The graph in the top right corner shows the difference between the change in the district's Total Operating Expenditures (excluding capital) per student (blue bar) and California Per Capita Personal Income (green bar). [See the Methodology for a full description for how this is calculated]. Coast Unified spent \$15,064 per student, which ranked 92 out of the 955 districts for which this information was available, with the top ranked district spending the most per student.

The graph in the middle left hand side of the page shows the annual savings if Total Operating Expenditures per student, excluding Certificated Teacher Salaries and Benefits, had only increased at the same rate as PCPI in FY 07-08. Note that for FY 08-09 the calculation shown is for the savings if the increase in such Operating Expenditures per student (i.e., excluding Certificated Teacher Salaries and Benefits) was held at zero, not decreased at the rate PCPI decreased. Below each year is the number of teachers that could have been employed by those savings.

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed. For FY 08-09, this district ranked 600 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In Coast Unified Total Operating Expenditures per student (excluding capital), grew by 86% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In Coast Unified, 26% of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated 10 additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 19% of Certificated Teacher Salary expenditures. This amount ranked 713 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 52%.

This district is in quadrant 3. (See Chart 3-6, pp. 104-105)

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

District Profile: Colton Joint Unified

The graph in the top right corner shows the difference between the change in the district's Total Operating Expenditures (excluding capital) per student (blue bar) and California Per Capita Personal Income (green bar). [See the Methodology for a full description for how this is calculated]. Colton Joint Unified spent \$8,801 per student, which ranked 554 out of the 955 districts for which this information was available, with the top ranked district spending the most per student.

The graph in the middle left hand side of the page shows the annual savings if Total Operating Expenditures per student, excluding Certificated Teacher Salaries and Benefits, had only increased at the same rate as PCPI in FY 07-08. Note that for FY 08-09 the calculation shown is for the savings if the increase in such Operating Expenditures per student (i.e., excluding Certificated Teacher Salaries and Benefits) was held at zero, not decreased at the rate PCPI decreased. Below each year is the number of teachers that could have been employed by those savings.

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed. For FY 08-09, this district ranked 350 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In Colton Joint Unified Total Operating Expenditures per student (excluding capital), grew by 37% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In Colton Joint Unified, 33% of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated 33 additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 13% of Certificated Teacher Salary expenditures. This amount ranked 291 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 59%.

This district is in quadrant 3. (See Chart 3-6, pp. 104-105)

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

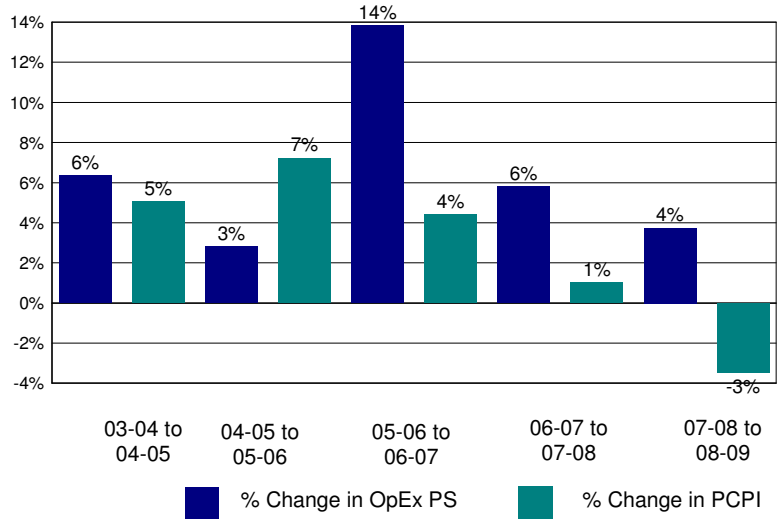

- Total Certificated Teacher Salaries (Object 1100) & Estimated Benefits
- Total Instructional Aide Salaries (Object 2100) & Estimated Benefits
- Approved Textbooks and Books (Objects 4100 & 4200)
- Materials and Supplies expenditures (Object 4300) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180 and 1190)
- Professional/Consulting Services/Subagreements for Services (Objects 5100 and 5800) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180, 1190)

District Profile: Columbia Elementary

The graph in the top right corner shows the difference between the change in the district's Total Operating Expenditures (excluding capital) per student (blue bar) and California Per Capita Personal Income (green bar). [See the Methodology for a full description for how this is calculated]. Columbia Elementary spent \$8,307 per student, which ranked 711 out of the 955 districts for which this information was available, with the top ranked district spending the most per student.

The graph in the middle left hand side of the page shows the annual savings if Total Operating Expenditures per student, excluding Certificated Teacher Salaries and Benefits, had only increased at the same rate as PCPI in FY 07-08. Note that for FY 08-09 the calculation shown is for the savings if the increase in such Operating Expenditures per student (i.e., excluding Certificated Teacher Salaries and Benefits) was held at zero, not decreased at the rate PCPI decreased. Below each year is the number of teachers that could have been employed by those savings.

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed. For FY 08-09, this district ranked 385 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In Columbia Elementary Total Operating Expenditures per student (excluding capital), grew by 28% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In Columbia Elementary, 27% of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated 3 additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 14% of Certificated Teacher Salary expenditures. This amount ranked 380 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 61%.

This district is in quadrant 3. (See Chart 3-6, pp. 104-105)

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

District Profile: Conejo Valley Unified

The graph in the top right corner shows the difference between the change in the district's Total Operating Expenditures (excluding capital) per student (blue bar) and California Per Capita Personal Income (green bar). [See the Methodology for a full description for how this is calculated]. Conejo Valley Unified spent \$9,350 per student, which ranked 417 out of the 955 districts for which this information was available, with the top ranked district spending the most per student.

The graph in the middle left hand side of the page shows the annual savings if Total Operating Expenditures per student, excluding Certificated Teacher Salaries and Benefits, had only increased at the same rate as PCPI in FY 07-08. Note that for FY 08-09 the calculation shown is for the savings if the increase in such Operating Expenditures per student (i.e., excluding Certificated Teacher Salaries and Benefits) was held at zero, not decreased at the rate PCPI decreased. Below each year is the number of teachers that could have been employed by those savings.

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed. For FY 08-09, this district ranked 559 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In Conejo Valley Unified Total Operating Expenditures per student (excluding capital), grew by 22% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In Conejo Valley Unified, 23% of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated 0 additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 12% of Certificated Teacher Salary expenditures. This amount ranked 161 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 53%.

This district is in quadrant 3. (See Chart 3-6, pp. 104-105)

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

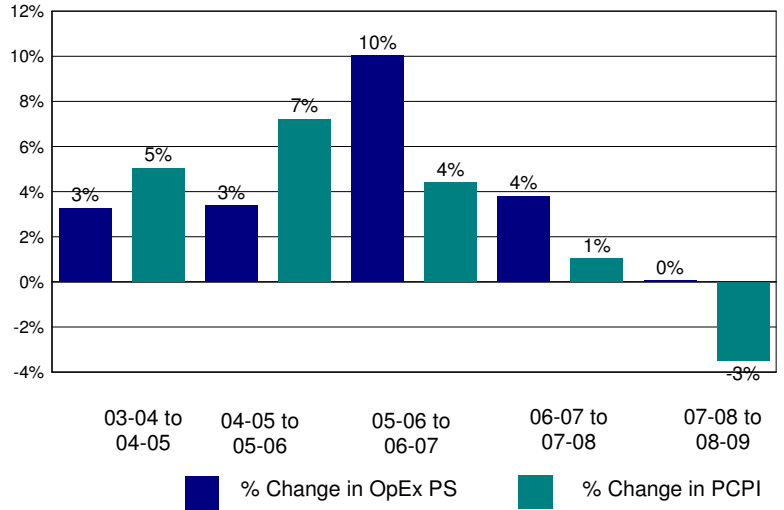

- Total Certificated Teacher Salaries (Object 1100) & Estimated Benefits
- Total Instructional Aide Salaries (Object 2100) & Estimated Benefits
- Approved Textbooks and Books (Objects 4100 & 4200)
- Materials and Supplies expenditures (Object 4300) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180 and 1190)
- Professional/Consulting Services/Subagreements for Services (Objects 5100 and 5800) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180, 1190)

District Profile: Corcoran Joint Unified

The graph in the top right corner shows the difference between the change in the district's Total Operating Expenditures (excluding capital) per student (blue bar) and California Per Capita Personal Income (green bar). [See the Methodology for a full description for how this is calculated]. Corcoran Joint Unified spent \$9,205 per student, which ranked 445 out of the 955 districts for which this information was available, with the top ranked district spending the most per student.

The graph in the middle left hand side of the page shows the annual savings if Total Operating Expenditures per student, excluding Certificated Teacher Salaries and Benefits, had only increased at the same rate as PCPI in FY 07-08. Note that for FY 08-09 the calculation shown is for the savings if the increase in such Operating Expenditures per student (i.e., excluding Certificated Teacher Salaries and Benefits) was held at zero, not decreased at the rate PCPI decreased. Below each year is the number of teachers that could have been employed by those savings.

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed. For FY 08-09, this district ranked 247 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In Corcoran Joint Unified Total Operating Expenditures per student (excluding capital), grew by 28% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In Corcoran Joint Unified, 28% of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated 0 additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 11% of Certificated Teacher Salary expenditures. This amount ranked 120 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 63%.

This district is in quadrant 3. (See Chart 3-6, pp. 104-105)

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

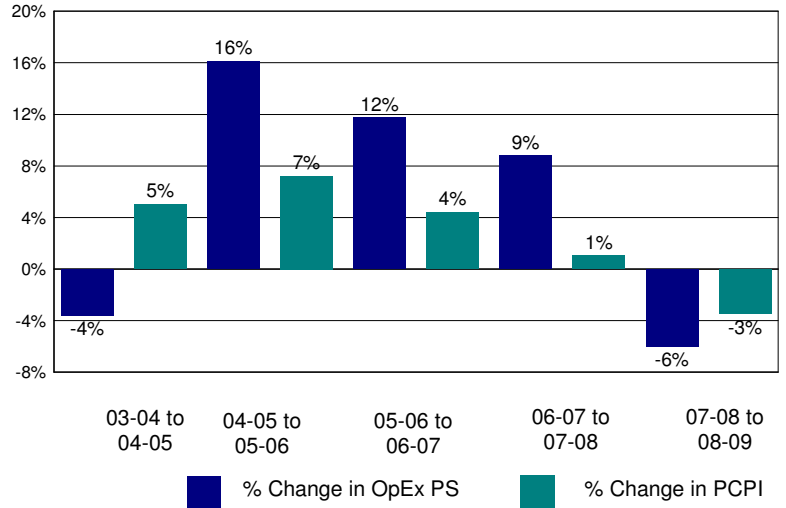

- Total Certificated Teacher Salaries (Object 1100) & Estimated Benefits

District Profile: Cotati-Rohnert Park Unified

The graph in the top right corner shows the difference between the change in the district's Total Operating Expenditures (excluding capital) per student (blue bar) and California Per Capita Personal Income (green bar). [See the Methodology for a full description for how this is calculated]. Cotati-Rohnert Park Unified spent \$9,148 per student, which ranked 463 out of the 955 districts for which this information was available, with the top ranked district spending the most per student.

The graph in the middle left hand side of the page shows the annual savings if Total Operating Expenditures per student, excluding Certificated Teacher Salaries and Benefits, had only increased at the same rate as PCPI in FY 07-08. Note that for FY 08-09 the calculation shown is for the savings if the increase in such Operating Expenditures per student (i.e., excluding Certificated Teacher Salaries and Benefits) was held at zero, not decreased at the rate PCPI decreased. Below each year is the number of teachers that could have been employed by those savings.

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed. For FY 08-09, this district ranked 606 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In Cotati-Rohnert Park Unified Total Operating Expenditures per student (excluding capital), grew by 31% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In Cotati-Rohnert Park Unified, 23% of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated 15 additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 13% of Certificated Teacher Salary expenditures. This amount ranked 225 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 63%.

This district is in quadrant 4. (See Chart 3-6, pp. 104-105)

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

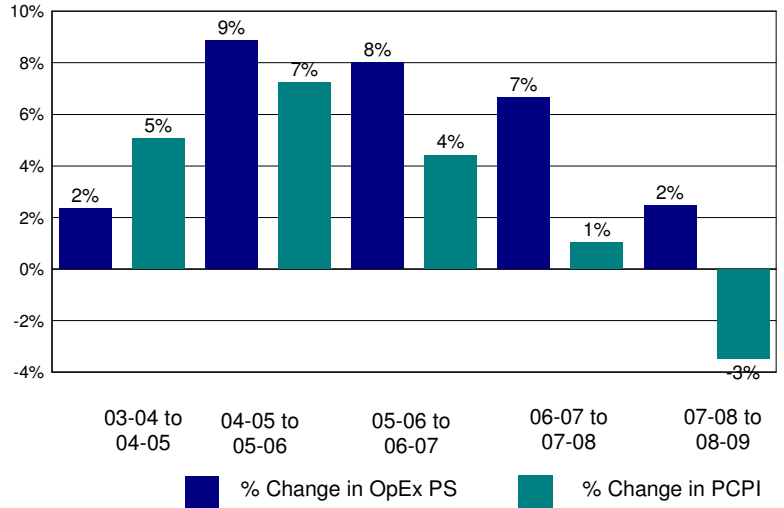

- Total Certificated Teacher Salaries (Object 1100) & Estimated Benefits
- Total Instructional Aide Salaries (Object 2100) & Estimated Benefits
- Approved Textbooks and Books (Objects 4100 & 4200)
- Materials and Supplies expenditures (Object 4300) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180 and 1190)
- Professional/Consulting Services/Subagreements for Services (Objects 5100 and 5800) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180, 1190)

District Profile: Cottonwood Union Elementary

The graph in the top right corner shows the difference between the change in the district's Total Operating Expenditures (excluding capital) per student (blue bar) and California Per Capita Personal Income (green bar). [See the Methodology for a full description for how this is calculated]. Cottonwood Union Elementary spent \$8,810 per student, which ranked 552 out of the 955 districts for which this information was available, with the top ranked district spending the most per student.

The graph in the middle left hand side of the page shows the annual savings if Total Operating Expenditures per student, excluding Certificated Teacher Salaries and Benefits, had only increased at the same rate as PCPI in FY 07-08. Note that for FY 08-09 the calculation shown is for the savings if the increase in such Operating Expenditures per student (i.e., excluding Certificated Teacher Salaries and Benefits) was held at zero, not decreased at the rate PCPI decreased. Below each year is the number of teachers that could have been employed by those savings.

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed. For FY 08-09, this district ranked 135 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In Cottonwood Union Elementary Total Operating Expenditures per student (excluding capital), grew by 31% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In Cottonwood Union Elementary, 26% of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated 0 additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 13% of Certificated Teacher Salary expenditures. This amount ranked 287 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 63%.

This district is in quadrant 3. (See Chart 3-6, pp. 104-105)

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

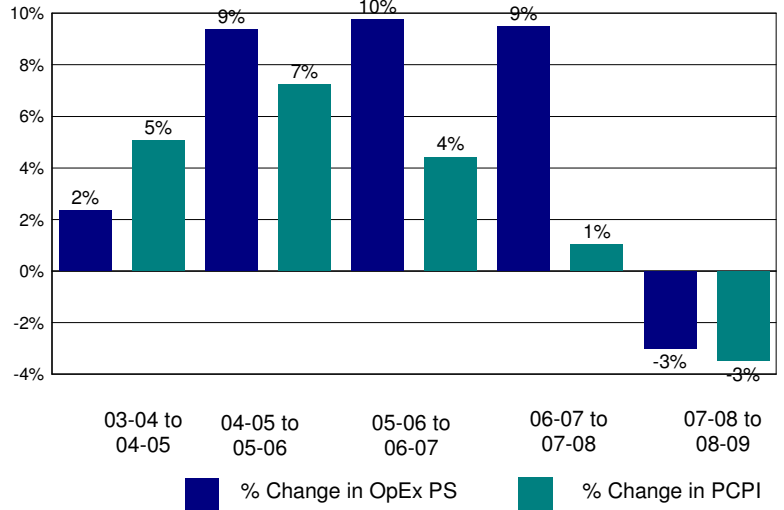

- Total Certificated Teacher Salaries (Object 1100) & Estimated Benefits
- Total Instructional Aide Salaries (Object 2100) & Estimated Benefits

District Profile: Culver City Unified

The graph in the top right corner shows the difference between the change in the district's Total Operating Expenditures (excluding capital) per student (blue bar) and California Per Capita Personal Income (green bar). [See the Methodology for a full description for how this is calculated]. Culver City Unified spent \$11,300 per student, which ranked 202 out of the 955 districts for which this information was available, with the top ranked district spending the most per student.

The graph in the middle left hand side of the page shows the annual savings if Total Operating Expenditures per student, excluding Certificated Teacher Salaries and Benefits, had only increased at the same rate as PCPI in FY 07-08. Note that for FY 08-09 the calculation shown is for the savings if the increase in such Operating Expenditures per student (i.e., excluding Certificated Teacher Salaries and Benefits) was held at zero, not decreased at the rate PCPI decreased. Below each year is the number of teachers that could have been employed by those savings.

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed. For FY 08-09, this district ranked 828 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In Culver City Unified Total Operating Expenditures per student (excluding capital), grew by 48% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In Culver City Unified, 25% of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated 8 additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 14% of Certificated Teacher Salary expenditures. This amount ranked 347 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 51%.

This district is in quadrant 4. (See Chart 3-6, pp. 104-105)

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

District Profile: Cupertino Union Elementary

The graph in the top right corner shows the difference between the change in the district's Total Operating Expenditures (excluding capital) per student (blue bar) and California Per Capita Personal Income (green bar). [See the Methodology for a full description for how this is calculated]. Cupertino Union Elementary spent \$8,898 per student, which ranked 526 out of the 955 districts for which this information was available, with the top ranked district spending the most per student.

The graph in the middle left hand side of the page shows the annual savings if Total Operating Expenditures per student, excluding Certificated Teacher Salaries and Benefits, had only increased at the same rate as PCPI in FY 07-08. Note that for FY 08-09 the calculation shown is for the savings if the increase in such Operating Expenditures per student (i.e., excluding Certificated Teacher Salaries and Benefits) was held at zero, not decreased at the rate PCPI decreased. Below each year is the number of teachers that could have been employed by those savings.

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed. For FY 08-09, this district ranked 515 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In Cupertino Union Elementary Total Operating Expenditures per student (excluding capital), grew by 24% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In Cupertino Union Elementary, 23% of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated 0 additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 14% of Certificated Teacher Salary expenditures. This amount ranked 337 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 60%.

This district is in quadrant 3. (See Chart 3-6, pp. 104-105)

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

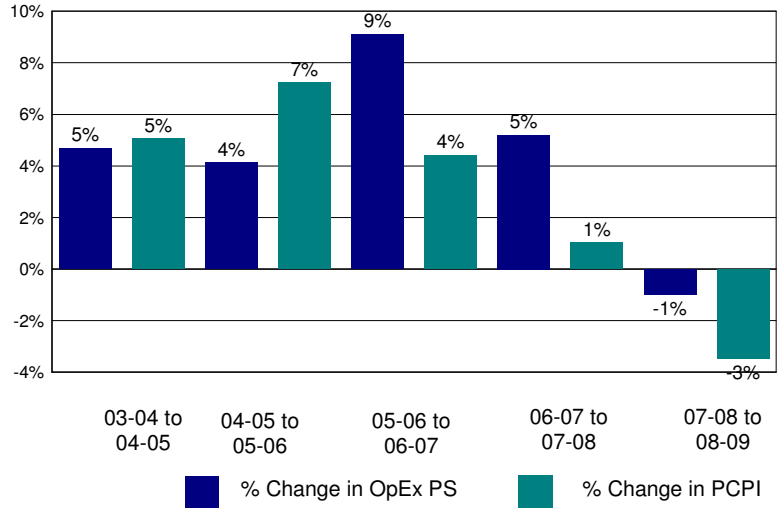

- Total Certificated Teacher Salaries (Object 1100) & Estimated Benefits
- Total Instructional Aide Salaries (Object 2100) & Estimated Benefits
- Approved Textbooks and Books (Objects 4100 & 4200)
- Materials and Supplies expenditures (Object 4300) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180 and 1190)
- Professional/Consulting Services/Subagreements for Services (Objects 5100 and 5800) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180, 1190)

District Profile: Cypress Elementary

The graph in the top right corner shows the difference between the change in the district's Total Operating Expenditures (excluding capital) per student (blue bar) and California Per Capita Personal Income (green bar). [See the Methodology for a full description for how this is calculated]. Cypress Elementary spent \$8,906 per student, which ranked 525 out of the 955 districts for which this information was available, with the top ranked district spending the most per student.

The graph in the middle left hand side of the page shows the annual savings if Total Operating Expenditures per student, excluding Certificated Teacher Salaries and Benefits, had only increased at the same rate as PCPI in FY 07-08. Note that for FY 08-09 the calculation shown is for the savings if the increase in such Operating Expenditures per student (i.e., excluding Certificated Teacher Salaries and Benefits) was held at zero, not decreased at the rate PCPI decreased. Below each year is the number of teachers that could have been employed by those savings.

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed. For FY 08-09, this district ranked 176 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In Cypress Elementary Total Operating Expenditures per student (excluding capital), grew by 24% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In Cypress Elementary, 21% of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated 0 additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 11% of Certificated Teacher Salary expenditures. This amount ranked 129 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 62%.

This district is in quadrant 3. (See Chart 3-6, pp. 104-105)

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

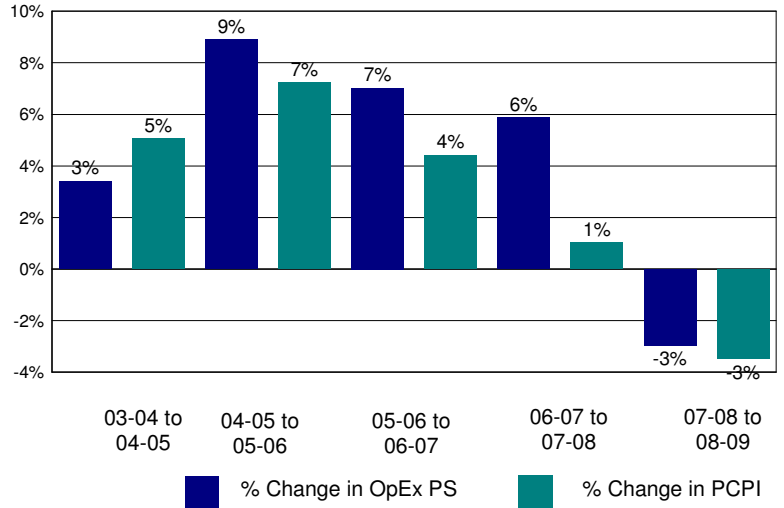

- Total Certificated Teacher Salaries (Object 1100) & Estimated Benefits
- Total Instructional Aide Salaries (Object 2100) & Estimated Benefits

District Profile: Davis Joint Unified

The graph in the top right corner shows the difference between the change in the district's Total Operating Expenditures (excluding capital) per student (blue bar) and California Per Capita Personal Income (green bar). [See the Methodology for a full description for how this is calculated]. Davis Joint Unified spent \$8,822 per student, which ranked 550 out of the 955 districts for which this information was available, with the top ranked district spending the most per student.

The graph in the middle left hand side of the page shows the annual savings if Total Operating Expenditures per student, excluding Certificated Teacher Salaries and Benefits, had only increased at the same rate as PCPI in FY 07-08. Note that for FY 08-09 the calculation shown is for the savings if the increase in such Operating Expenditures per student (i.e., excluding Certificated Teacher Salaries and Benefits) was held at zero, not decreased at the rate PCPI decreased. Below each year is the number of teachers that could have been employed by those savings.

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed. For FY 08-09, this district ranked 316 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In Davis Joint Unified Total Operating Expenditures per student (excluding capital), grew by 25% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In Davis Joint Unified, 32% of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated 6 additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 14% of Certificated Teacher Salary expenditures. This amount ranked 309 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 65%.

This district is in quadrant 3. (See Chart 3-6, pp. 104-105)

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

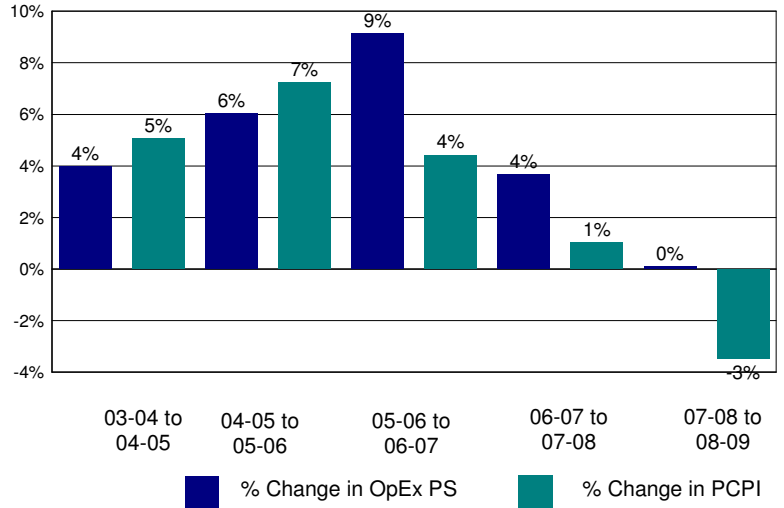

- Total Certificated Teacher Salaries (Object 1100) & Estimated Benefits
- Total Instructional Aide Salaries (Object 2100) & Estimated Benefits
- Approved Textbooks and Books (Objects 4100 & 4200)
- Materials and Supplies expenditures (Object 4300) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180 and 1190)
- Professional/Consulting Services/Subagreements for Services (Objects 5100 and 5800) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180, 1190)

District Profile: Delano Joint Union High

The graph in the top right corner shows the difference between the change in the district's Total Operating Expenditures (excluding capital) per student (blue bar) and California Per Capita Personal Income (green bar). [See the Methodology for a full description for how this is calculated]. Delano Joint Union High spent \$10,499 per student, which ranked 260 out of the 955 districts for which this information was available, with the top ranked district spending the most per student.

The graph in the middle left hand side of the page shows the annual savings if Total Operating Expenditures per student, excluding Certificated Teacher Salaries and Benefits, had only increased at the same rate as PCPI in FY 07-08. Note that for FY 08-09 the calculation shown is for the savings if the increase in such Operating Expenditures per student (i.e., excluding Certificated Teacher Salaries and Benefits) was held at zero, not decreased at the rate PCPI decreased. Below each year is the number of teachers that could have been employed by those savings.

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed. For FY 08-09, this district ranked 803 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In Delano Joint Union High Total Operating Expenditures per student (excluding capital), grew by 39% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In Delano Joint Union High, 18% of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated 55 additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 20% of Certificated Teacher Salary expenditures. This amount ranked 749 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 49%.

This district is in quadrant 3. (See Chart 3-6, pp. 104-105)

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

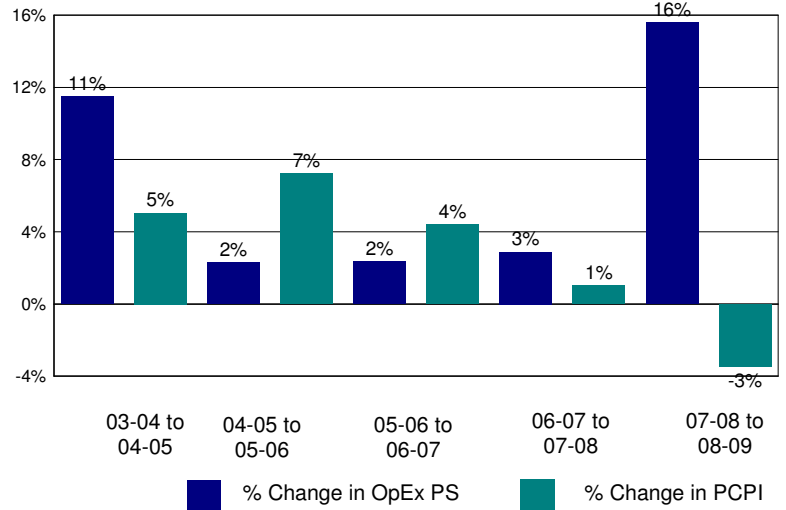

- Total Certificated Teacher Salaries (Object 1100) & Estimated Benefits

District Profile: Delano Union Elementary

The graph in the top right corner shows the difference between the change in the district's Total Operating Expenditures (excluding capital) per student (blue bar) and California Per Capita Personal Income (green bar). [See the Methodology for a full description for how this is calculated]. Delano Union Elementary spent \$8,208 per student, which ranked 743 out of the 955 districts for which this information was available, with the top ranked district spending the most per student.

The graph in the middle left hand side of the page shows the annual savings if Total Operating Expenditures per student, excluding Certificated Teacher Salaries and Benefits, had only increased at the same rate as PCPI in FY 07-08. Note that for FY 08-09 the calculation shown is for the savings if the increase in such Operating Expenditures per student (i.e., excluding Certificated Teacher Salaries and Benefits) was held at zero, not decreased at the rate PCPI decreased. Below each year is the number of teachers that could have been employed by those savings.

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed. For FY 08-09, this district ranked 287 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In Delano Union Elementary Total Operating Expenditures per student (excluding capital), grew by 17% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In Delano Union Elementary, 22% of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated 0 additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 15% of Certificated Teacher Salary expenditures. This amount ranked 437 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 61%.

This district is in quadrant 3. (See Chart 3-6, pp. 104-105)

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

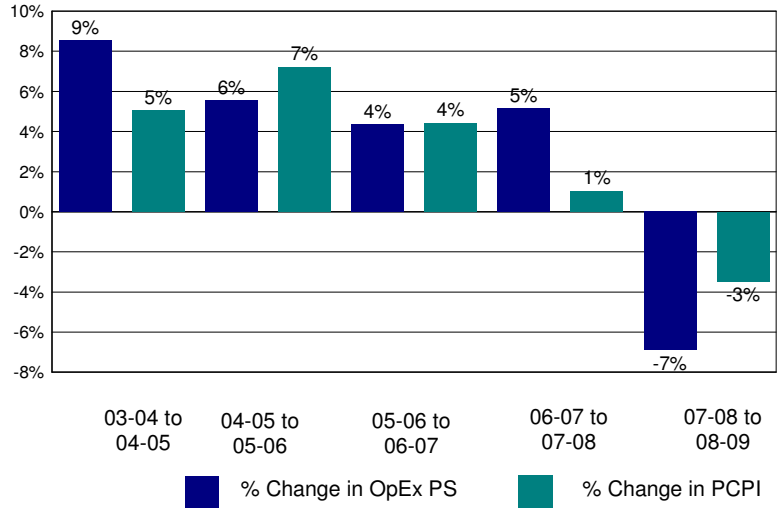

- Total Certificated Teacher Salaries (Object 1100) & Estimated Benefits
- Total Instructional Aide Salaries (Object 2100) & Estimated Benefits
- Approved Textbooks and Books (Objects 4100 & 4200)
- Materials and Supplies expenditures (Object 4300) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180 and 1190)
- Professional/Consulting Services/Subagreements for Services (Objects 5100 and 5800) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180, 1190)

District Profile: Desert Sands Unified

The graph in the top right corner shows the difference between the change in the district's Total Operating Expenditures (excluding capital) per student (blue bar) and California Per Capita Personal Income (green bar). [See the Methodology for a full description for how this is calculated]. Desert Sands Unified spent \$8,408 per student, which ranked 682 out of the 955 districts for which this information was available, with the top ranked district spending the most per student.

The graph in the middle left hand side of the page shows the annual savings if Total Operating Expenditures per student, excluding Certificated Teacher Salaries and Benefits, had only increased at the same rate as PCPI in FY 07-08. Note that for FY 08-09 the calculation shown is for the savings if the increase in such Operating Expenditures per student (i.e., excluding Certificated Teacher Salaries and Benefits) was held at zero, not decreased at the rate PCPI decreased. Below each year is the number of teachers that could have been employed by those savings.

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed. For FY 08-09, this district ranked 213 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In Desert Sands Unified Total Operating Expenditures per student (excluding capital), grew by 22% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In Desert Sands Unified, 23% of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated 0 additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 9% of Certificated Teacher Salary expenditures. This amount ranked 41 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 60%.

This district is in quadrant 2. (See Chart 3-6, pp. 104-105)

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

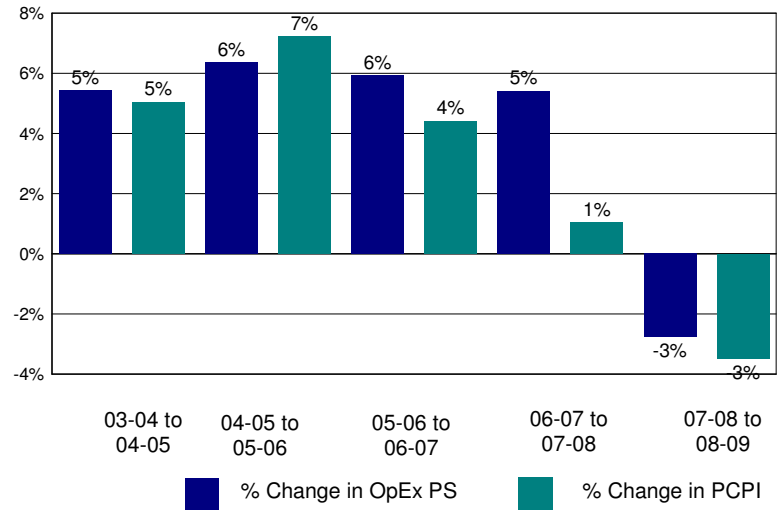

- Total Certificated Teacher Salaries (Object 1100) & Estimated Benefits
- Total Instructional Aide Salaries (Object 2100) & Estimated Benefits
- Approved Textbooks and Books (Objects 4100 & 4200)
- Materials and Supplies expenditures (Object 4300) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180 and 1190)
- Professional/Consulting Services/Subagreements for Services (Objects 5100 and 5800) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180, 1190)

District Profile: Douglas City Elementary

The graph in the top right corner shows the difference between the change in the district's Total Operating Expenditures (excluding capital) per student (blue bar) and California Per Capita Personal Income (green bar). [See the Methodology for a full description for how this is calculated]. Douglas City Elementary spent \$11,071 per student, which ranked 219 out of the 955 districts for which this information was available, with the top ranked district spending the most per student.

The graph in the middle left hand side of the page shows the annual savings if Total Operating Expenditures per student, excluding Certificated Teacher Salaries and Benefits, had only increased at the same rate as PCPI in FY 07-08. Note that for FY 08-09 the calculation shown is for the savings if the increase in such Operating Expenditures per student (i.e., excluding Certificated Teacher Salaries and Benefits) was held at zero, not decreased at the rate PCPI decreased. Below each year is the number of teachers that could have been employed by those savings.

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed. For FY 08-09, this district ranked 757 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In Douglas City Elementary Total Operating Expenditures per student (excluding capital), grew by 26% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In Douglas City Elementary, 26% of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated 0 additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 19% of Certificated Teacher Salary expenditures. This amount ranked 686 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 54%.

This district is in quadrant 3. (See Chart 3-6, pp. 104-105)

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

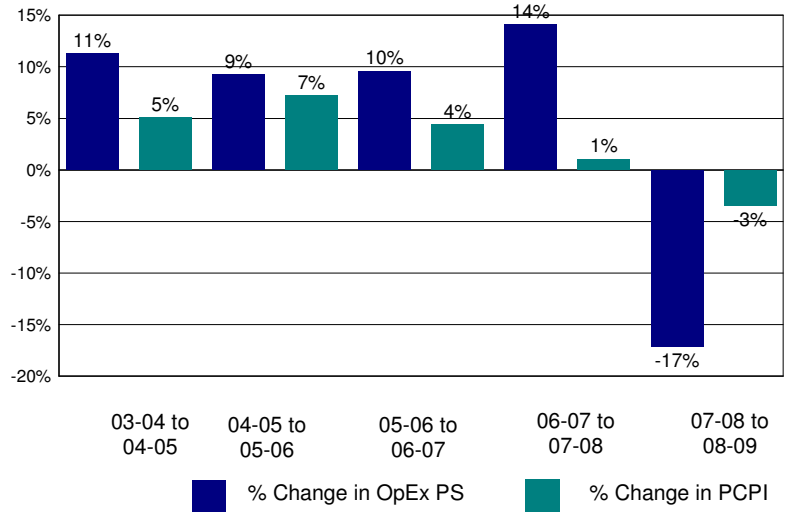

- Total Certificated Teacher Salaries (Object 1100) & Estimated Benefits
- Total Instructional Aide Salaries (Object 2100) & Estimated Benefits
- Approved Textbooks and Books (Objects 4100 & 4200)
- Materials and Supplies expenditures (Object 4300) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180 and 1190)
- Professional/Consulting Services/Subagreements for Services (Objects 5100 and 5800) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180, 1190)

Travel & Conferences	\$34	\$41	20%
Consulting Services	\$538	\$768	43%

District Profile: Dunham Elementary

The graph in the top right corner shows the difference between the change in the district's Total Operating Expenditures (excluding capital) per student (blue bar) and California Per Capita Personal Income (green bar). [See the Methodology for a full description for how this is calculated]. Dunham Elementary spent \$7,853 per student, which ranked 838 out of the 955 districts for which this information was available, with the top ranked district spending the most per student.

The graph in the middle left hand side of the page shows the annual savings if Total Operating Expenditures per student, excluding Certificated Teacher Salaries and Benefits, had only increased at the same rate as PCPI in FY 07-08. Note that for FY 08-09 the calculation shown is for the savings if the increase in such Operating Expenditures per student (i.e., excluding Certificated Teacher Salaries and Benefits) was held at zero, not decreased at the rate PCPI decreased. Below each year is the number of teachers that could have been employed by those savings.

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed. For FY 08-09, this district ranked 361 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In Dunham Elementary Total Operating Expenditures per student (excluding capital), grew by 17% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In Dunham Elementary, 17% of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated 0 additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 19% of Certificated Teacher Salary expenditures. This amount ranked 708 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 66%.

This district is in quadrant 3. (See Chart 3-6, pp. 104-105)

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

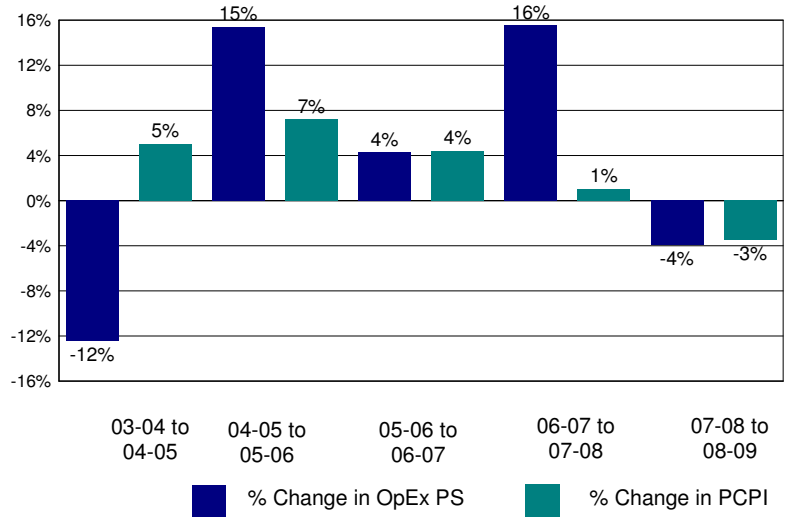

- Total Certificated Teacher Salaries (Object 1100) & Estimated Benefits
- Total Instructional Aide Salaries (Object 2100) & Estimated Benefits
- Approved Textbooks and Books (Objects 4100 & 4200)
- Materials and Supplies expenditures (Object 4300) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180 and 1190)
- Professional/Consulting Services/Subagreements for Services (Objects 5100 and 5800) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180, 1190)

District Profile: East Side Union High

The graph in the top right corner shows the difference between the change in the district's Total Operating Expenditures (excluding capital) per student (blue bar) and California Per Capita Personal Income (green bar). [See the Methodology for a full description for how this is calculated]. East Side Union High spent \$9,828 per student, which ranked 337 out of the 955 districts for which this information was available, with the top ranked district spending the most per student.

The graph in the middle left hand side of the page shows the annual savings if Total Operating Expenditures per student, excluding Certificated Teacher Salaries and Benefits, had only increased at the same rate as PCPI in FY 07-08. Note that for FY 08-09 the calculation shown is for the savings if the increase in such Operating Expenditures per student (i.e., excluding Certificated Teacher Salaries and Benefits) was held at zero, not decreased at the rate PCPI decreased. Below each year is the number of teachers that could have been employed by those savings.

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed. For FY 08-09, this district ranked 474 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In East Side Union High Total Operating Expenditures per student (excluding capital), grew by 12% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In East Side Union High, 30% of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated 0 additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 10% of Certificated Teacher Salary expenditures. This amount ranked 53 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 55%.

This district is in quadrant 2. (See Chart 3-6, pp. 104-105)

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

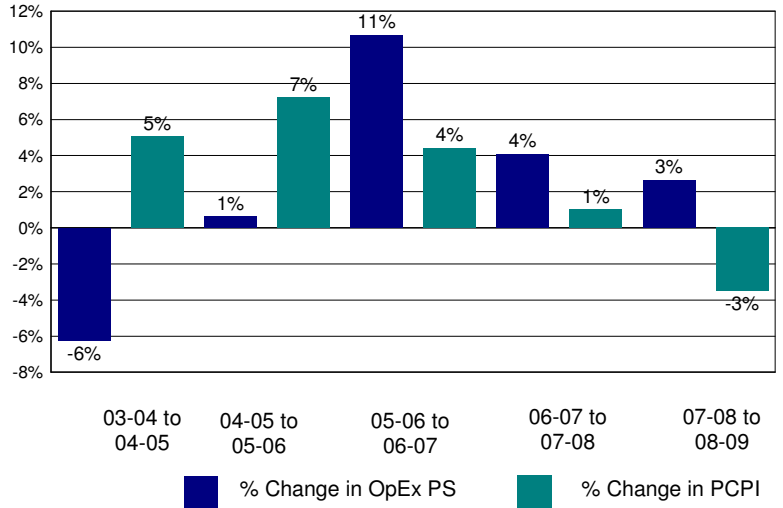

- Total Certificated Teacher Salaries (Object 1100) & Estimated Benefits
- Total Instructional Aide Salaries (Object 2100) & Estimated Benefits
- Approved Textbooks and Books (Objects 4100 & 4200)
- Materials and Supplies expenditures (Object 4300) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180 and 1190)
- Professional/Consulting Services/Subagreements for Services (Objects 5100 and 5800) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180, 1190)

The graph in the top right corner shows the difference between the change in the district's Total Operating Expenditures (excluding capital) per student (blue bar) and California Per Capita Personal Income (green bar). [See the Methodology for a full description for how this is calculated]. El Dorado Union High spent \$8,301 per student, which ranked 715 out of the 955 districts for which this information was available, with the top ranked district spending the most per student.

The graph in the middle left hand side of the page shows the annual savings if Total Operating Expenditures per student, excluding Certificated Teacher Salaries and Benefits, had only increased at the same rate as PCPI in FY 07-08. Note that for FY 08-09 the calculation shown is for the savings if the increase in such Operating Expenditures per student (i.e., excluding Certificated Teacher Salaries and Benefits) was held at zero, not decreased at the rate PCPI decreased. Below each year is the number of teachers that could have been employed by those savings.

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed. For FY 08-09, this district ranked 411 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In El Dorado Union High Total Operating Expenditures per student (excluding capital), grew by 26% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In El Dorado Union High, 22% of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated 0 additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 16% of Certificated Teacher Salary expenditures. This amount ranked 496 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 56%.

This district is in quadrant 3. (See Chart 3-6, pp. 104-105)

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

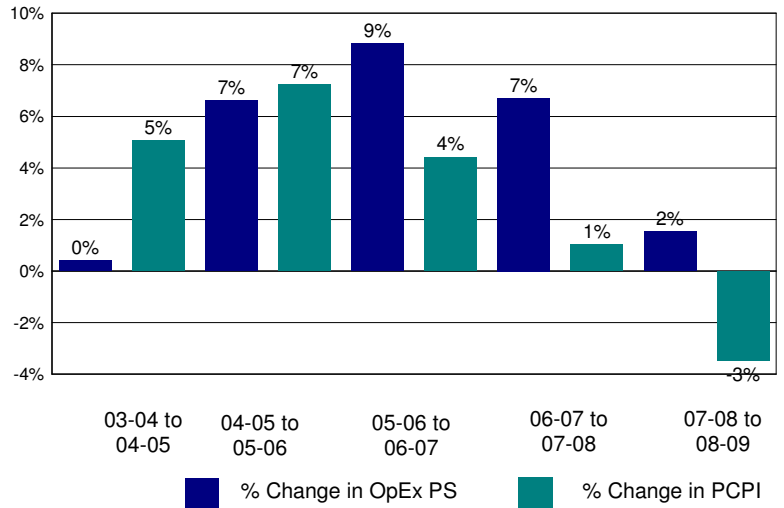

- Total Certificated Teacher Salaries (Object 1100) & Estimated Benefits
- Total Instructional Aide Salaries (Object 2100) & Estimated Benefits
- Approved Textbooks and Books (Objects 4100 & 4200)
- Materials and Supplies expenditures (Object 4300) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180 and 1190)
- Professional/Consulting Services/Subagreements for Services (Objects 5100 and 5800) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180, 1190)

The graph in the top right corner shows the difference between the change in the district's Total Operating Expenditures (excluding capital) per student (blue bar) and California Per Capita Personal Income (green bar). [See the Methodology for a full description for how this is calculated]. El Tejon Unified spent \$8,142 per student, which ranked 768 out of the 955 districts for which this information was available, with the top ranked district spending the most per student.

The graph in the middle left hand side of the page shows the annual savings if Total Operating Expenditures per student, excluding Certificated Teacher Salaries and Benefits, had only increased at the same rate as PCPI in FY 07-08. Note that for FY 08-09 the calculation shown is for the savings if the increase in such Operating Expenditures per student (i.e., excluding Certificated Teacher Salaries and Benefits) was held at zero, not decreased at the rate PCPI decreased. Below each year is the number of teachers that could have been employed by those savings.

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed. For FY 08-09, this district ranked 623 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In El Tejon Unified Total Operating Expenditures per student (excluding capital), grew by 19% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In El Tejon Unified, 13% of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated 0 additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 15% of Certificated Teacher Salary expenditures. This amount ranked 426 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 53%.

This district is in quadrant 1. (See Chart 3-6, pp. 104-105)

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

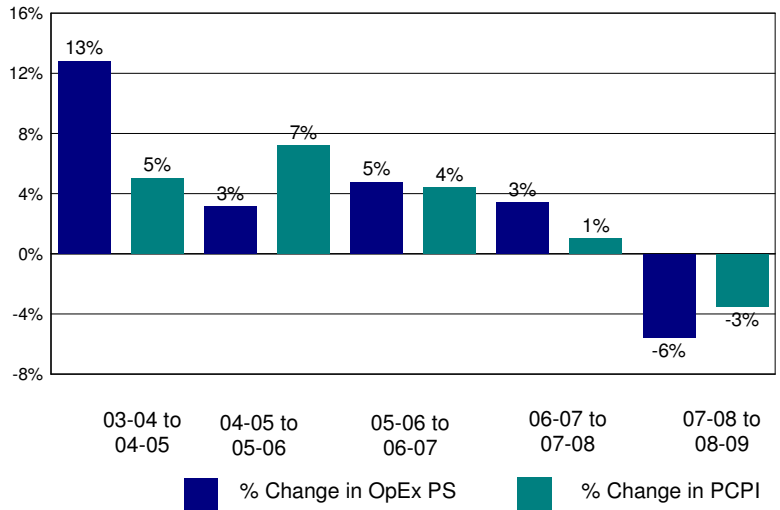

- Total Certificated Teacher Salaries (Object 1100) & Estimated Benefits
- Total Instructional Aide Salaries (Object 2100) & Estimated Benefits
- Approved Textbooks and Books (Objects 4100 & 4200)
- Materials and Supplies expenditures (Object 4300) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180 and 1190)
- Professional/Consulting Services/Subagreements for Services (Objects 5100 and 5800) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180, 1190)

District Profile: Empire Union Elementary

The graph in the top right corner shows the difference between the change in the district's Total Operating Expenditures (excluding capital) per student (blue bar) and California Per Capita Personal Income (green bar). [See the Methodology for a full description for how this is calculated]. Empire Union Elementary spent \$8,997 per student, which ranked 502 out of the 955 districts for which this information was available, with the top ranked district spending the most per student.

The graph in the middle left hand side of the page shows the annual savings if Total Operating Expenditures per student, excluding Certificated Teacher Salaries and Benefits, had only increased at the same rate as PCPI in FY 07-08. Note that for FY 08-09 the calculation shown is for the savings if the increase in such Operating Expenditures per student (i.e., excluding Certificated Teacher Salaries and Benefits) was held at zero, not decreased at the rate PCPI decreased. Below each year is the number of teachers that could have been employed by those savings.

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed. For FY 08-09, this district ranked 339 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In Empire Union Elementary Total Operating Expenditures per student (excluding capital), grew by 18% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In Empire Union Elementary, 27% of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated 1 additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 14% of Certificated Teacher Salary expenditures. This amount ranked 314 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 66%.

This district is in quadrant 4. (See Chart 3-6, pp. 104-105)

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

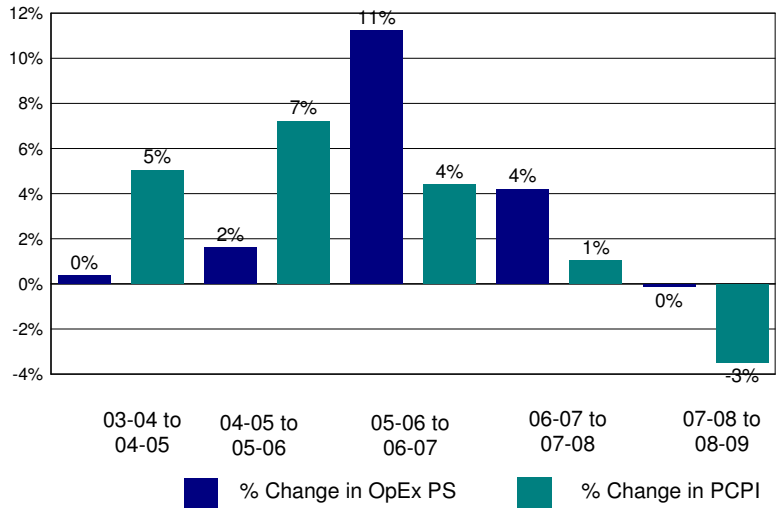

- Total Certificated Teacher Salaries (Object 1100) & Estimated Benefits
- Total Instructional Aide Salaries (Object 2100) & Estimated Benefits
- Approved Textbooks and Books (Objects 4100 & 4200)
- Materials and Supplies expenditures (Object 4300) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180 and 1190)
- Professional/Consulting Services/Subagreements for Services (Objects 5100 and 5800) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180, 1190)

The graph in the top right corner shows the difference between the change in the district's Total Operating Expenditures (excluding capital) per student (blue bar) and California Per Capita Personal Income (green bar). [See the Methodology for a full description for how this is calculated]. Esparto Unified spent \$9,179 per student, which ranked 454 out of the 955 districts for which this information was available, with the top ranked district spending the most per student.

The graph in the middle left hand side of the page shows the annual savings if Total Operating Expenditures per student, excluding Certificated Teacher Salaries and Benefits, had only increased at the same rate as PCPI in FY 07-08. Note that for FY 08-09 the calculation shown is for the savings if the increase in such Operating Expenditures per student (i.e., excluding Certificated Teacher Salaries and Benefits) was held at zero, not decreased at the rate PCPI decreased. Below each year is the number of teachers that could have been employed by those savings.

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed. For FY 08-09, this district ranked 699 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In Esparto Unified Total Operating Expenditures per student (excluding capital), grew by 18% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In Esparto Unified, 27% of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated 0 additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 27% of Certificated Teacher Salary expenditures. This amount ranked 871 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 54%.

This district is in quadrant 4. (See Chart 3-6, pp. 104-105)

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

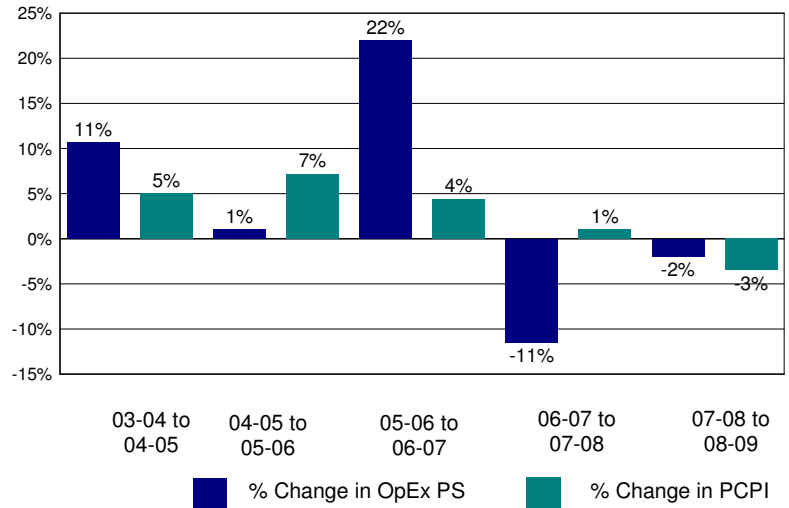

- Total Certificated Teacher Salaries (Object 1100) & Estimated Benefits
- Total Instructional Aide Salaries (Object 2100) & Estimated Benefits
- Approved Textbooks and Books (Objects 4100 & 4200)
- Materials and Supplies expenditures (Object 4300) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180 and 1190)
- Professional/Consulting Services/Subagreements for Services (Objects 5100 and 5800) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180, 1190)

District Profile: Etiwanda Elementary

The graph in the top right corner shows the difference between the change in the district's Total Operating Expenditures (excluding capital) per student (blue bar) and California Per Capita Personal Income (green bar). [See the Methodology for a full description for how this is calculated]. Etiwanda Elementary spent \$6,848 per student, which ranked 948 out of the 955 districts for which this information was available, with the top ranked district spending the most per student.

The graph in the middle left hand side of the page shows the annual savings if Total Operating Expenditures per student, excluding Certificated Teacher Salaries and Benefits, had only increased at the same rate as PCPI in FY 07-08. Note that for FY 08-09 the calculation shown is for the savings if the increase in such Operating Expenditures per student (i.e., excluding Certificated Teacher Salaries and Benefits) was held at zero, not decreased at the rate PCPI decreased. Below each year is the number of teachers that could have been employed by those savings.

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed. For FY 08-09, this district ranked 3 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In Etiwanda Elementary Total Operating Expenditures per student (excluding capital), grew by 27% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In Etiwanda Elementary, 25% of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated 0 additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 10% of Certificated Teacher Salary expenditures. This amount ranked 71 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 71%.

This district is in quadrant 3. (See Chart 3-6, pp. 104-105)

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

For FY 08-09, this district ranked 51 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In Exeter Union Elementary Total Operating Expenditures per student (excluding capital), grew by 15% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In Exeter Union Elementary, 27% of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated 0 additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 14% of Certificated Teacher Salary expenditures. This amount ranked 338 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 66%.

This district is in quadrant 3. (See Chart 3-6, pp. 104-105)

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

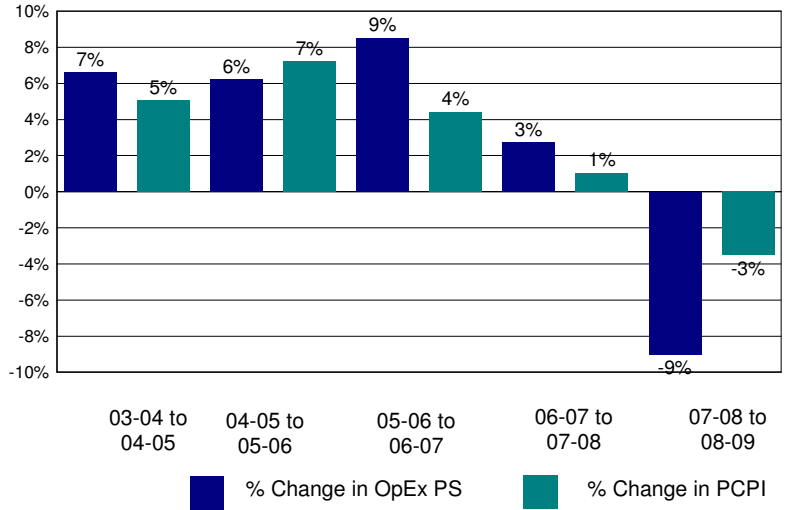

- Total Certificated Teacher Salaries (Object 1100) & Estimated Benefits
- Total Instructional Aide Salaries (Object 2100) & Estimated Benefits
- Approved Textbooks and Books (Objects 4100 & 4200)
- Materials and Supplies expenditures (Object 4300) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180 and 1190)
- Professional/Consulting Services/Subagreements for Services (Objects 5100 and 5800) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180, 1190)

District Profile: Exeter Union High

The graph in the top right corner shows the difference between the change in the district's Total Operating Expenditures (excluding capital) per student (blue bar) and California Per Capita Personal Income (green bar). [See the Methodology for a full description for how this is calculated]. Exeter Union High spent \$8,848 per student, which ranked 539 out of the 955 districts for which this information was available, with the top ranked district spending the most per student.

The graph in the middle left hand side of the page shows the annual savings if Total Operating Expenditures per student, excluding Certificated Teacher Salaries and Benefits, had only increased at the same rate as PCPI in FY 07-08. Note that for FY 08-09 the calculation shown is for the savings if the increase in such Operating Expenditures per student (i.e., excluding Certificated Teacher Salaries and Benefits) was held at zero, not decreased at the rate PCPI decreased. Below each year is the number of teachers that could have been employed by those savings.

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed. For FY 08-09, this district ranked 720 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In Exeter Union High Total Operating Expenditures per student (excluding capital), grew by 3% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In Exeter Union High, 31% of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated 0 additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 18% of Certificated Teacher Salary expenditures. This amount ranked 672 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 50%.

This district is in quadrant 4. (See Chart 3-6, pp. 104-105)

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

For FY 08-09, this district ranked 596 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In Fallbrook Union High Total Operating Expenditures per student (excluding capital), grew by 23% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In Fallbrook Union High, 14% of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated 1 additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 15% of Certificated Teacher Salary expenditures. This amount ranked 455 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 55%.

This district is in quadrant 4. (See Chart 3-6, pp. 104-105)

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

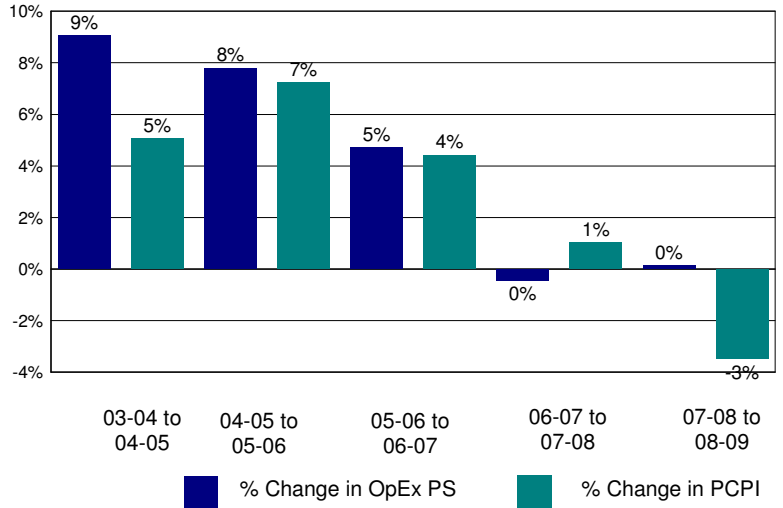

- Total Certificated Teacher Salaries (Object 1100) & Estimated Benefits
- Total Instructional Aide Salaries (Object 2100) & Estimated Benefits
- Approved Textbooks and Books (Objects 4100 & 4200)
- Materials and Supplies expenditures (Object 4300) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180 and 1190)
- Professional/Consulting Services/Subagreements for Services (Objects 5100 and 5800) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180, 1190)

District Profile: Farmersville Unified

The graph in the top right corner shows the difference between the change in the district's Total Operating Expenditures (excluding capital) per student (blue bar) and California Per Capita Personal Income (green bar). [See the Methodology for a full description for how this is calculated]. Farmersville Unified spent \$9,952 per student, which ranked 322 out of the 955 districts for which this information was available, with the top ranked district spending the most per student.

The graph in the middle left hand side of the page shows the annual savings if Total Operating Expenditures per student, excluding Certificated Teacher Salaries and Benefits, had only increased at the same rate as PCPI in FY 07-08. Note that for FY 08-09 the calculation shown is for the savings if the increase in such Operating Expenditures per student (i.e., excluding Certificated Teacher Salaries and Benefits) was held at zero, not decreased at the rate PCPI decreased. Below each year is the number of teachers that could have been employed by those savings.

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed. For FY 08-09, this district ranked 507 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In Farmersville Unified Total Operating Expenditures per student (excluding capital), grew by 33% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In Farmersville Unified, 22% of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated 7 additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 15% of Certificated Teacher Salary expenditures. This amount ranked 439 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 57%.

This district is in quadrant 3. (See Chart 3-6, pp. 104-105)

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

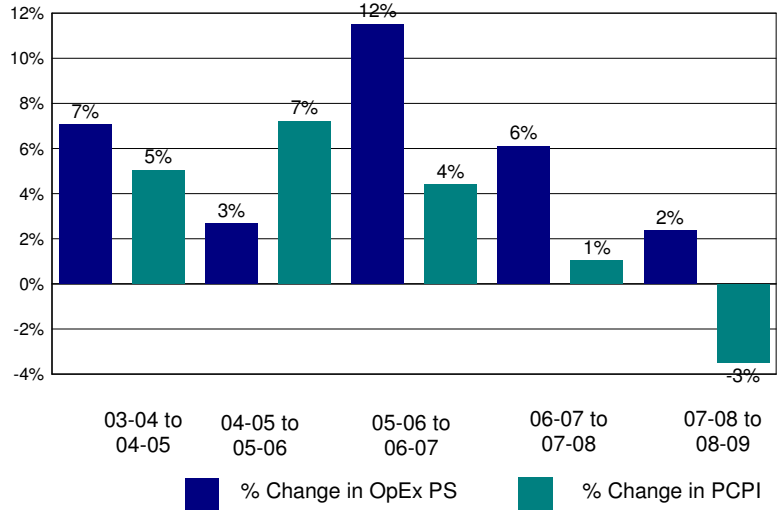

- Total Certificated Teacher Salaries (Object 1100) & Estimated Benefits
- Total Instructional Aide Salaries (Object 2100) & Estimated Benefits

District Profile: Firebaugh-Las Deltas Joint Unified

The graph in the top right corner shows the difference between the change in the district's Total Operating Expenditures (excluding capital) per student (blue bar) and California Per Capita Personal Income (green bar). [See the Methodology for a full description for how this is calculated]. Firebaugh-Las Deltas Joint Unified spent \$8,469 per student, which ranked 664 out of the 955 districts for which this information was available, with the top ranked district spending the most per student.

The graph in the middle left hand side of the page shows the annual savings if Total Operating Expenditures per student, excluding Certificated Teacher Salaries and Benefits, had only increased at the same rate as PCPI in FY 07-08. Note that for FY 08-09 the calculation shown is for the savings if the increase in such Operating Expenditures per student (i.e., excluding Certificated Teacher Salaries and Benefits) was held at zero, not decreased at the rate PCPI decreased. Below each year is the number of teachers that could have been employed by those savings.

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed. For FY 08-09, this district ranked 613 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In Firebaugh-Las Deltas Joint Unified Total Operating Expenditures per student (excluding capital), grew by 19% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In Firebaugh-Las Deltas Joint Unified, 26% of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated 0 additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 16% of Certificated Teacher Salary expenditures. This amount ranked 515 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 55%.

This district is in quadrant 1. (See Chart 3-6, pp. 104-105)

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

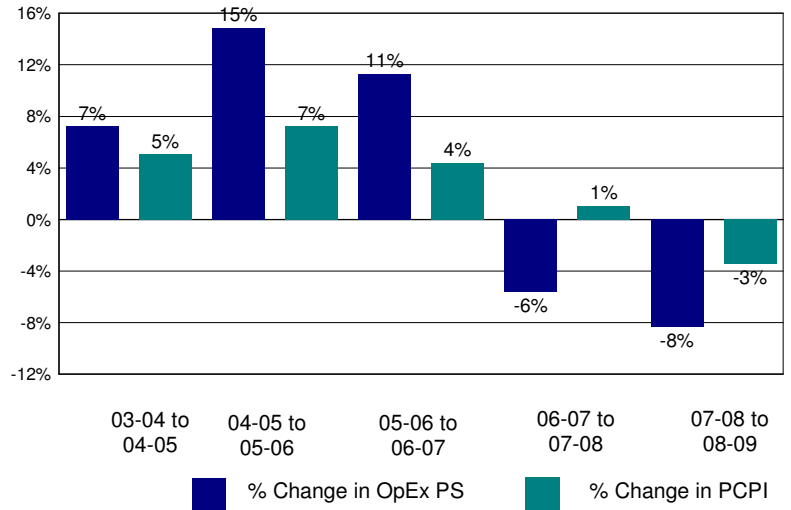

- Total Certificated Teacher Salaries (Object 1100) & Estimated Benefits
- Total Instructional Aide Salaries (Object 2100) & Estimated Benefits
- Approved Textbooks and Books (Objects 4100 & 4200)
- Materials and Supplies expenditures (Object 4300) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180 and 1190)
- Professional/Consulting Services/Subagreements for Services (Objects 5100 and 5800) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180, 1190)

District Profile: Flournoy Union Elementary

The graph in the top right corner shows the difference between the change in the district's Total Operating Expenditures (excluding capital) per student (blue bar) and California Per Capita Personal Income (green bar). [See the Methodology for a full description for how this is calculated]. Flournoy Union Elementary spent \$15,895 per student, which ranked 81 out of the 955 districts for which this information was available, with the top ranked district spending the most per student.

The graph in the middle left hand side of the page shows the annual savings if Total Operating Expenditures per student, excluding Certificated Teacher Salaries and Benefits, had only increased at the same rate as PCPI in FY 07-08. Note that for FY 08-09 the calculation shown is for the savings if the increase in such Operating Expenditures per student (i.e., excluding Certificated Teacher Salaries and Benefits) was held at zero, not decreased at the rate PCPI decreased. Below each year is the number of teachers that could have been employed by those savings.

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed. For FY 08-09, this district ranked 921 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In Flournoy Union Elementary Total Operating Expenditures per student (excluding capital), grew by 60% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In Flournoy Union Elementary, % of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 34% of Certificated Teacher Salary expenditures. This amount ranked 911 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 49%.

This district is in quadrant 3. (See Chart 3-6, pp. 104-105)

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

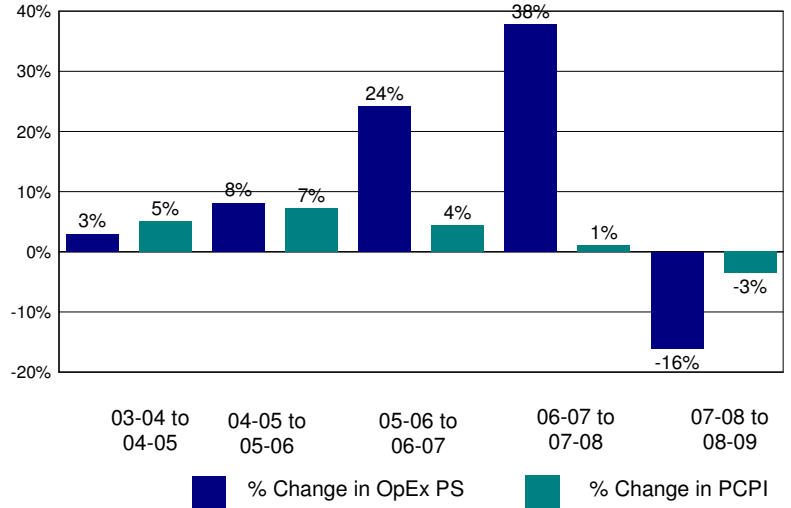

- Total Certificated Teacher Salaries (Object 1100) & Estimated Benefits

For FY 08-09, this district ranked 955 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In Forks of Salmon Elementary Total Operating Expenditures per student (excluding capital), grew by 29% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In Forks of Salmon Elementary, % of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 65% of Certificated Teacher Salary expenditures. This amount ranked 949 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 27%.

This district is in quadrant 1. (See Chart 3-6, pp. 104-105)

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

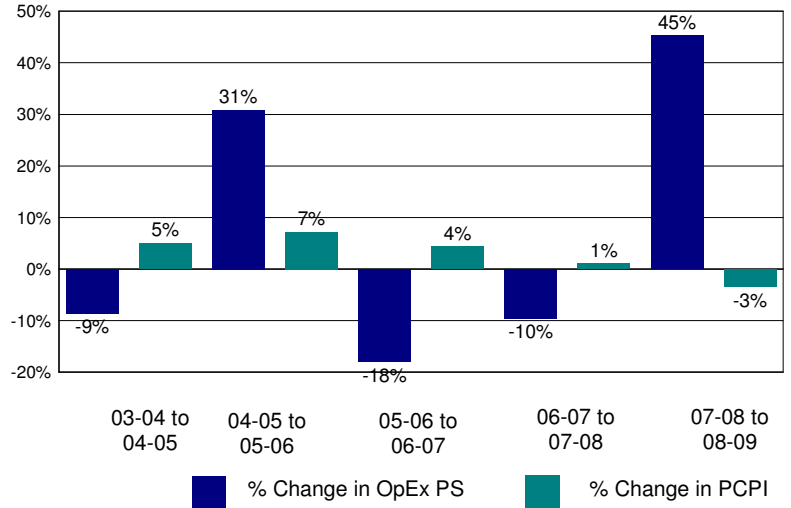

- Total Certificated Teacher Salaries (Object 1100) & Estimated Benefits
- Total Instructional Aide Salaries (Object 2100) & Estimated Benefits
- Approved Textbooks and Books (Objects 4100 & 4200)
- Materials and Supplies expenditures (Object 4300) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180 and 1190)
- Professional/Consulting Services/Subagreements for Services (Objects 5100 and 5800) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180, 1190)

District Profile: Fort Bragg Unified

The graph in the top right corner shows the difference between the change in the district's Total Operating Expenditures (excluding capital) per student (blue bar) and California Per Capita Personal Income (green bar). [See the Methodology for a full description for how this is calculated]. Fort Bragg Unified spent \$9,734 per student, which ranked 351 out of the 955 districts for which this information was available, with the top ranked district spending the most per student.

The graph in the middle left hand side of the page shows the annual savings if Total Operating Expenditures per student, excluding Certificated Teacher Salaries and Benefits, had only increased at the same rate as PCPI in FY 07-08. Note that for FY 08-09 the calculation shown is for the savings if the increase in such Operating Expenditures per student (i.e., excluding Certificated Teacher Salaries and Benefits) was held at zero, not decreased at the rate PCPI decreased. Below each year is the number of teachers that could have been employed by those savings.

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed. For FY 08-09, this district ranked 570 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In Fort Bragg Unified Total Operating Expenditures per student (excluding capital), grew by 18% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In Fort Bragg Unified, 33% of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated 0 additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 19% of Certificated Teacher Salary expenditures. This amount ranked 710 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 56%.

This district is in quadrant 4. (See Chart 3-6, pp. 104-105)

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

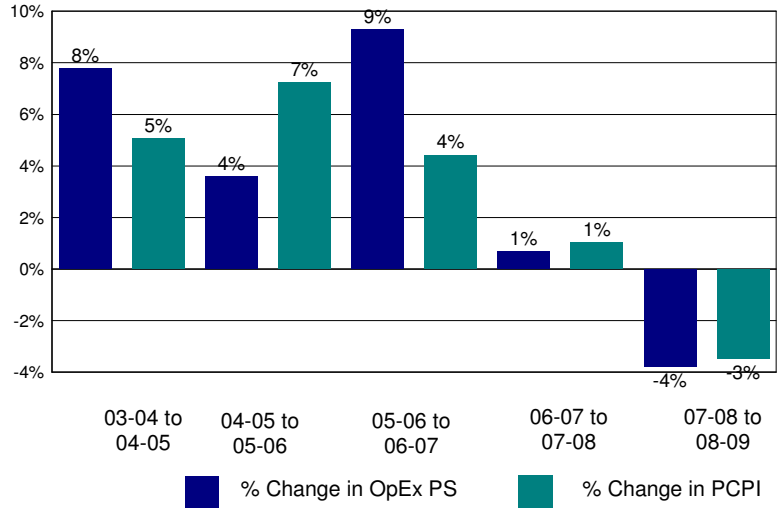

- Total Certificated Teacher Salaries (Object 1100) & Estimated Benefits
- Total Instructional Aide Salaries (Object 2100) & Estimated Benefits

District Profile: Fountain Valley Elementary

The graph in the top right corner shows the difference between the change in the district's Total Operating Expenditures (excluding capital) per student (blue bar) and California Per Capita Personal Income (green bar). [See the Methodology for a full description for how this is calculated]. Fountain Valley Elementary spent \$9,483 per student, which ranked 389 out of the 955 districts for which this information was available, with the top ranked district spending the most per student.

The graph in the middle left hand side of the page shows the annual savings if Total Operating Expenditures per student, excluding Certificated Teacher Salaries and Benefits, had only increased at the same rate as PCPI in FY 07-08. Note that for FY 08-09 the calculation shown is for the savings if the increase in such Operating Expenditures per student (i.e., excluding Certificated Teacher Salaries and Benefits) was held at zero, not decreased at the rate PCPI decreased. Below each year is the number of teachers that could have been employed by those savings.

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed. For FY 08-09, this district ranked 569 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In Fountain Valley Elementary Total Operating Expenditures per student (excluding capital), grew by 27% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In Fountain Valley Elementary, 25% of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated 0 additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 17% of Certificated Teacher Salary expenditures. This amount ranked 583 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 58%.

This district is in quadrant 3. (See Chart 3-6, pp. 104-105)

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

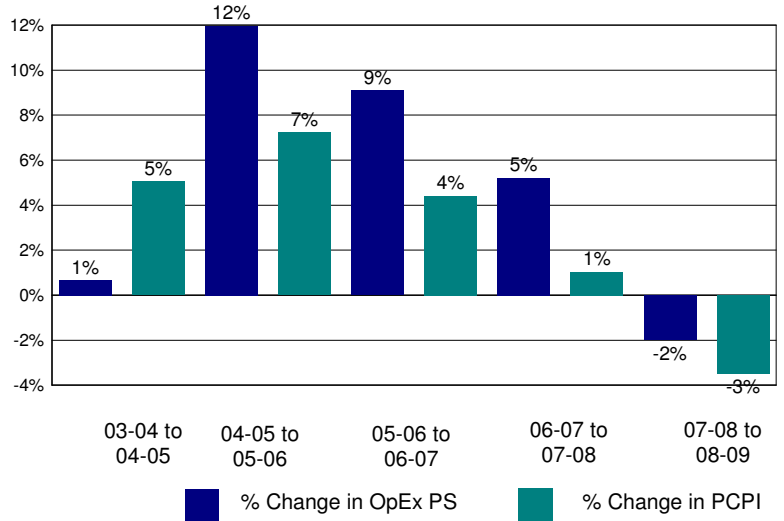

- Total Certificated Teacher Salaries (Object 1100) & Estimated Benefits
- Total Instructional Aide Salaries (Object 2100) & Estimated Benefits
- Approved Textbooks and Books (Objects 4100 & 4200)
- Materials and Supplies expenditures (Object 4300) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180 and 1190)
- Professional/Consulting Services/Subagreements for Services (Objects 5100 and 5800) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180, 1190)

District Profile: Fowler Unified

The graph in the top right corner shows the difference between the change in the district's Total Operating Expenditures (excluding capital) per student (blue bar) and California Per Capita Personal Income (green bar). [See the Methodology for a full description for how this is calculated]. Fowler Unified spent \$8,165 per student, which ranked 763 out of the 955 districts for which this information was available, with the top ranked district spending the most per student.

The graph in the middle left hand side of the page shows the annual savings if Total Operating Expenditures per student, excluding Certificated Teacher Salaries and Benefits, had only increased at the same rate as PCPI in FY 07-08. Note that for FY 08-09 the calculation shown is for the savings if the increase in such Operating Expenditures per student (i.e., excluding Certificated Teacher Salaries and Benefits) was held at zero, not decreased at the rate PCPI decreased. Below each year is the number of teachers that could have been employed by those savings.

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed. For FY 08-09, this district ranked 256 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In Fowler Unified Total Operating Expenditures per student (excluding capital), grew by 17% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In Fowler Unified, 27% of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated 0 additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 10% of Certificated Teacher Salary expenditures. This amount ranked 62 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 60%.

This district is in quadrant 2. (See Chart 3-6, pp. 104-105)

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

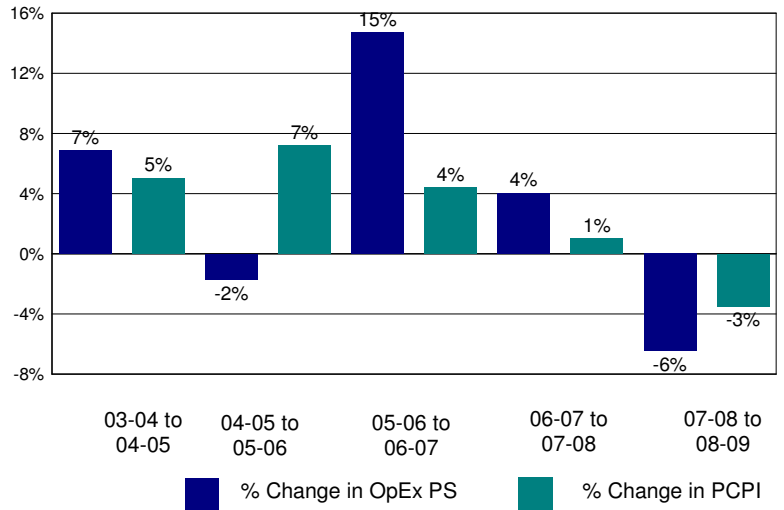

- Total Certificated Teacher Salaries (Object 1100) & Estimated Benefits
- Total Instructional Aide Salaries (Object 2100) & Estimated Benefits

District Profile: French Gulch-Whiskeytown Elementary

The graph in the top right corner shows the difference between the change in the district's Total Operating Expenditures (excluding capital) per student (blue bar) and California Per Capita Personal Income (green bar). [See the Methodology for a full description for how this is calculated]. French Gulch-Whiskeytown Elementary spent \$19,259 per student, which ranked 49 out of the 955 districts for which this information was available, with the top ranked district spending the most per student.

The graph in the middle left hand side of the page shows the annual savings if Total Operating Expenditures per student, excluding Certificated Teacher Salaries and Benefits, had only increased at the same rate as PCPI in FY 07-08. Note that for FY 08-09 the calculation shown is for the savings if the increase in such Operating Expenditures per student (i.e., excluding Certificated Teacher Salaries and Benefits) was held at zero, not decreased at the rate PCPI decreased. Below each year is the number of teachers that could have been employed by those savings.

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed. For FY 08-09, this district ranked 944 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In French Gulch-Whiskeytown Elementary Total Operating Expenditures per student (excluding capital), grew by 78% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In French Gulch-Whiskeytown Elementary, 3% of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated 0 additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 3% of Certificated Teacher Salary expenditures. This amount ranked 7 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 39%.

This district is in quadrant 1. (See Chart 3-6, pp. 104-105)

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

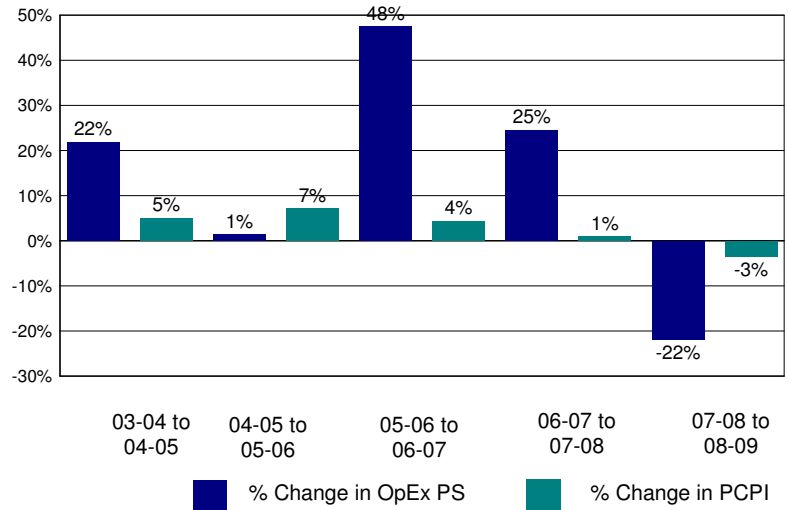

- Total Certificated Teacher Salaries (Object 1100) & Estimated Benefits
- Total Instructional Aide Salaries (Object 2100) & Estimated Benefits
- Approved Textbooks and Books (Objects 4100 & 4200)
- Materials and Supplies expenditures (Object 4300) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180 and 1190)
- Professional/Consulting Services/Subagreements for Services (Objects 5100 and 5800) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180, 1190)

District Profile: Freshwater Elementary

The graph in the top right corner shows the difference between the change in the district's Total Operating Expenditures (excluding capital) per student (blue bar) and California Per Capita Personal Income (green bar). [See the Methodology for a full description for how this is calculated]. Freshwater Elementary spent \$6,995 per student, which ranked 936 out of the 955 districts for which this information was available, with the top ranked district spending the most per student.

The graph in the middle left hand side of the page shows the annual savings if Total Operating Expenditures per student, excluding Certificated Teacher Salaries and Benefits, had only increased at the same rate as PCPI in FY 07-08. Note that for FY 08-09 the calculation shown is for the savings if the increase in such Operating Expenditures per student (i.e., excluding Certificated Teacher Salaries and Benefits) was held at zero, not decreased at the rate PCPI decreased. Below each year is the number of teachers that could have been employed by those savings.

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed. For FY 08-09, this district ranked 214 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In Freshwater Elementary Total Operating Expenditures per student (excluding capital), grew by 3% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In Freshwater Elementary, % of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 12% of Certificated Teacher Salary expenditures. This amount ranked 138 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 65%.

This district is in quadrant 1. (See Chart 3-6, pp. 104-105)

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

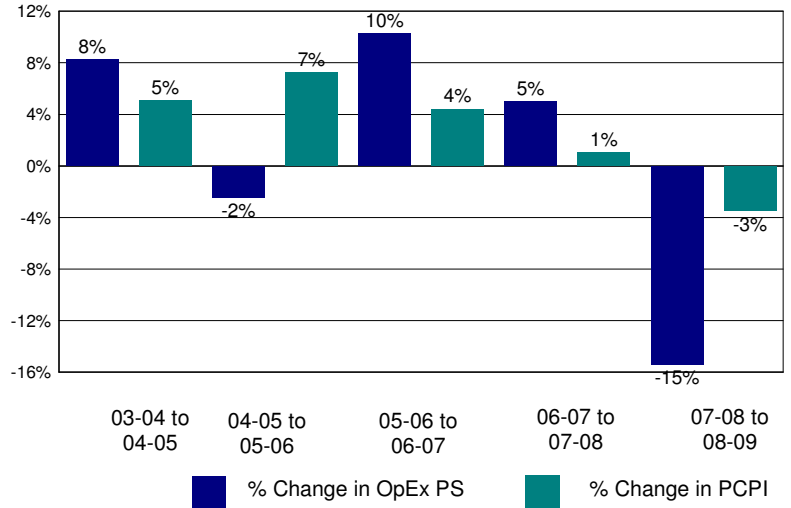

- Total Certificated Teacher Salaries (Object 1100) & Estimated Benefits

District Profile: Galt Joint Union Elementary

The graph in the top right corner shows the difference between the change in the district's Total Operating Expenditures (excluding capital) per student (blue bar) and California Per Capita Personal Income (green bar). [See the Methodology for a full description for how this is calculated]. Galt Joint Union Elementary spent \$8,413 per student, which ranked 680 out of the 955 districts for which this information was available, with the top ranked district spending the most per student.

The graph in the middle left hand side of the page shows the annual savings if Total Operating Expenditures per student, excluding Certificated Teacher Salaries and Benefits, had only increased at the same rate as PCPI in FY 07-08. Note that for FY 08-09 the calculation shown is for the savings if the increase in such Operating Expenditures per student (i.e., excluding Certificated Teacher Salaries and Benefits) was held at zero, not decreased at the rate PCPI decreased. Below each year is the number of teachers that could have been employed by those savings.

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed. For FY 08-09, this district ranked 40 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In Galt Joint Union Elementary Total Operating Expenditures per student (excluding capital), grew by 26% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In Galt Joint Union Elementary, 30% of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated 0 additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 13% of Certificated Teacher Salary expenditures. This amount ranked 231 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 67%.

This district is in quadrant 3. (See Chart 3-6, pp. 104-105)

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

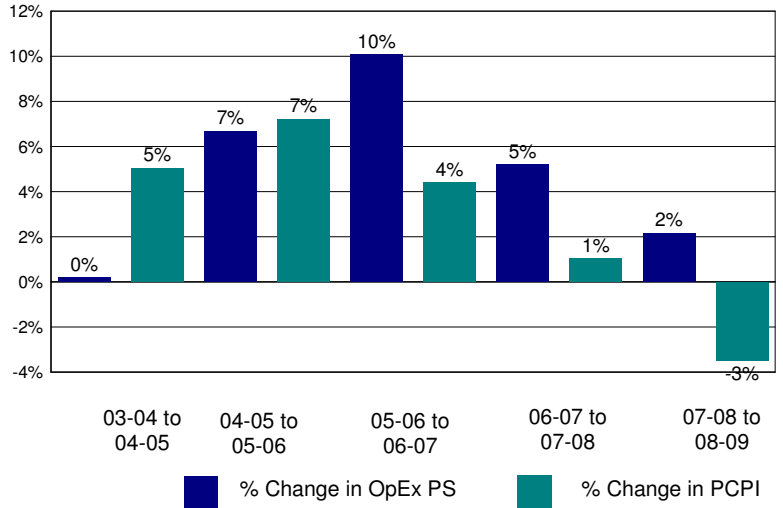

- Total Certificated Teacher Salaries (Object 1100) & Estimated Benefits
- Total Instructional Aide Salaries (Object 2100) & Estimated Benefits
- Approved Textbooks and Books (Objects 4100 & 4200)
- Materials and Supplies expenditures (Object 4300) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180 and 1190)
- Professional/Consulting Services/Subagreements for Services (Objects 5100 and 5800) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180, 1190)

District Profile: Galt Joint Union High

The graph in the top right corner shows the difference between the change in the district's Total Operating Expenditures (excluding capital) per student (blue bar) and California Per Capita Personal Income (green bar). [See the Methodology for a full description for how this is calculated]. Galt Joint Union High spent \$8,779 per student, which ranked 559 out of the 955 districts for which this information was available, with the top ranked district spending the most per student.

The graph in the middle left hand side of the page shows the annual savings if Total Operating Expenditures per student, excluding Certificated Teacher Salaries and Benefits, had only increased at the same rate as PCPI in FY 07-08. Note that for FY 08-09 the calculation shown is for the savings if the increase in such Operating Expenditures per student (i.e., excluding Certificated Teacher Salaries and Benefits) was held at zero, not decreased at the rate PCPI decreased. Below each year is the number of teachers that could have been employed by those savings.

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed. For FY 08-09, this district ranked 348 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In Galt Joint Union High Total Operating Expenditures per student (excluding capital), grew by 12% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In Galt Joint Union High, 32% of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated 4 additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 22% of Certificated Teacher Salary expenditures. This amount ranked 811 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 58%.

This district is in quadrant 3. (See Chart 3-6, pp. 104-105)

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

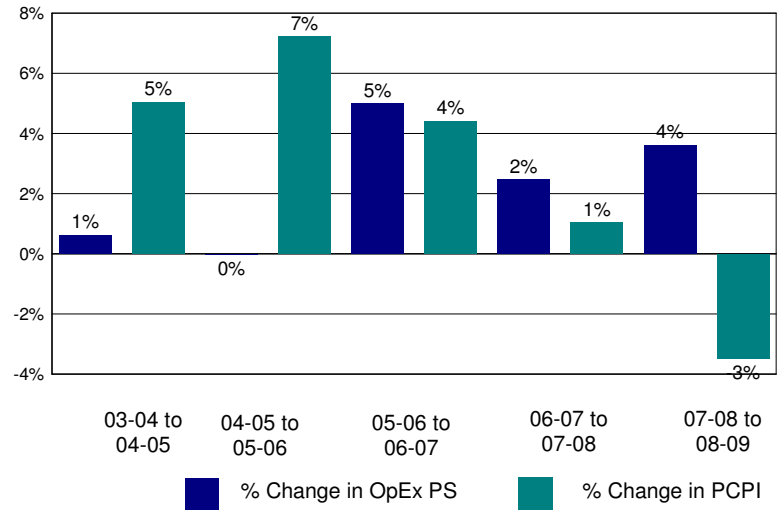

- Total Certificated Teacher Salaries (Object 1100) & Estimated Benefits
- Total Instructional Aide Salaries (Object 2100) & Estimated Benefits
- Approved Textbooks and Books (Objects 4100 & 4200)

District Profile: Gazelle Union Elementary

The graph in the top right corner shows the difference between the change in the district's Total Operating Expenditures (excluding capital) per student (blue bar) and California Per Capita Personal Income (green bar). [See the Methodology for a full description for how this is calculated]. Gazelle Union Elementary spent \$11,445 per student, which ranked 190 out of the 955 districts for which this information was available, with the top ranked district spending the most per student.

The graph in the middle left hand side of the page shows the annual savings if Total Operating Expenditures per student, excluding Certificated Teacher Salaries and Benefits, had only increased at the same rate as PCPI in FY 07-08. Note that for FY 08-09 the calculation shown is for the savings if the increase in such Operating Expenditures per student (i.e., excluding Certificated Teacher Salaries and Benefits) was held at zero, not decreased at the rate PCPI decreased. Below each year is the number of teachers that could have been employed by those savings.

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed. For FY 08-09, this district ranked 925 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In Gazelle Union Elementary Total Operating Expenditures per student (excluding capital), grew by 14% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In Gazelle Union Elementary, % of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 43% of Certificated Teacher Salary expenditures. This amount ranked 931 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 49%.

This district is in quadrant 1. (See Chart 3-6, pp. 104-105)

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

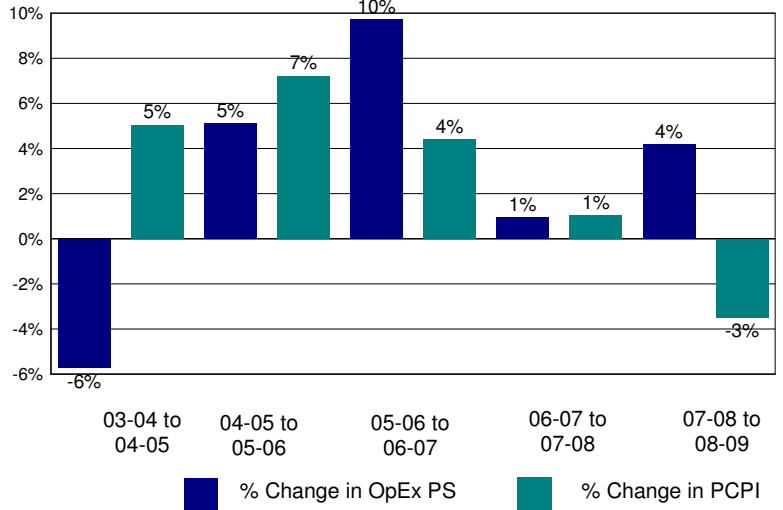

- Total Certificated Teacher Salaries (Object 1100) & Estimated Benefits

District Profile: General Shafter Elementary

The graph in the top right corner shows the difference between the change in the district's Total Operating Expenditures (excluding capital) per student (blue bar) and California Per Capita Personal Income (green bar). [See the Methodology for a full description for how this is calculated]. General Shafter Elementary spent \$9,544 per student, which ranked 378 out of the 955 districts for which this information was available, with the top ranked district spending the most per student.

The graph in the middle left hand side of the page shows the annual savings if Total Operating Expenditures per student, excluding Certificated Teacher Salaries and Benefits, had only increased at the same rate as PCPI in FY 07-08. Note that for FY 08-09 the calculation shown is for the savings if the increase in such Operating Expenditures per student (i.e., excluding Certificated Teacher Salaries and Benefits) was held at zero, not decreased at the rate PCPI decreased. Below each year is the number of teachers that could have been employed by those savings.

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed. For FY 08-09, this district ranked 825 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In General Shafter Elementary Total Operating Expenditures per student (excluding capital), grew by 29% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In General Shafter Elementary, % of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 18% of Certificated Teacher Salary expenditures. This amount ranked 671 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 46%.

This district is in quadrant 4. (See Chart 3-6, pp. 104-105)

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

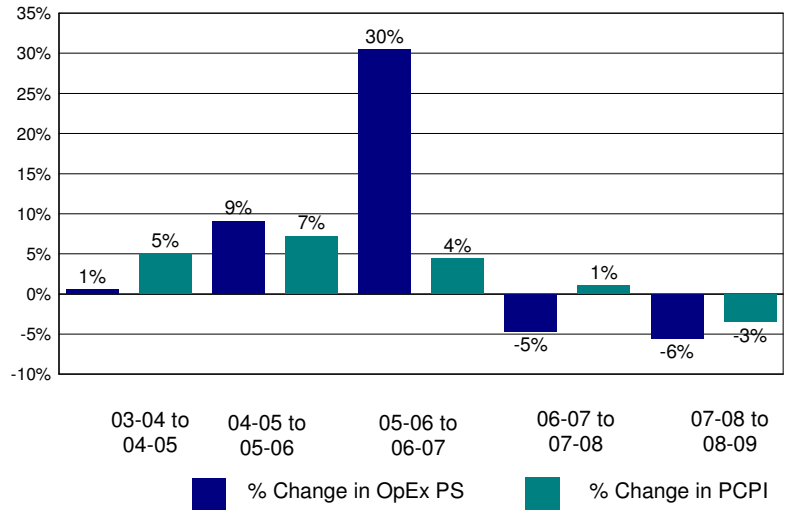

- Total Certificated Teacher Salaries (Object 1100) & Estimated Benefits
- Total Instructional Aide Salaries (Object 2100) & Estimated Benefits
- Approved Textbooks and Books (Objects 4100 & 4200)
- Materials and Supplies expenditures (Object 4300) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180 and 1190)
- Professional/Consulting Services/Subagreements for Services (Objects 5100 and 5800) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180, 1190)

District Profile: Gold Oak Union Elementary

The graph in the top right corner shows the difference between the change in the district's Total Operating Expenditures (excluding capital) per student (blue bar) and California Per Capita Personal Income (green bar). [See the Methodology for a full description for how this is calculated]. Gold Oak Union Elementary spent \$7,297 per student, which ranked 910 out of the 955 districts for which this information was available, with the top ranked district spending the most per student.

The graph in the middle left hand side of the page shows the annual savings if Total Operating Expenditures per student, excluding Certificated Teacher Salaries and Benefits, had only increased at the same rate as PCPI in FY 07-08. Note that for FY 08-09 the calculation shown is for the savings if the increase in such Operating Expenditures per student (i.e., excluding Certificated Teacher Salaries and Benefits) was held at zero, not decreased at the rate PCPI decreased. Below each year is the number of teachers that could have been employed by those savings.

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed. For FY 08-09, this district ranked 244 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In Gold Oak Union Elementary Total Operating Expenditures per student (excluding capital), grew by 9% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In Gold Oak Union Elementary, 17% of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated 0 additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 19% of Certificated Teacher Salary expenditures. This amount ranked 705 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 58%.

This district is in quadrant 4. (See Chart 3-6, pp. 104-105)

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

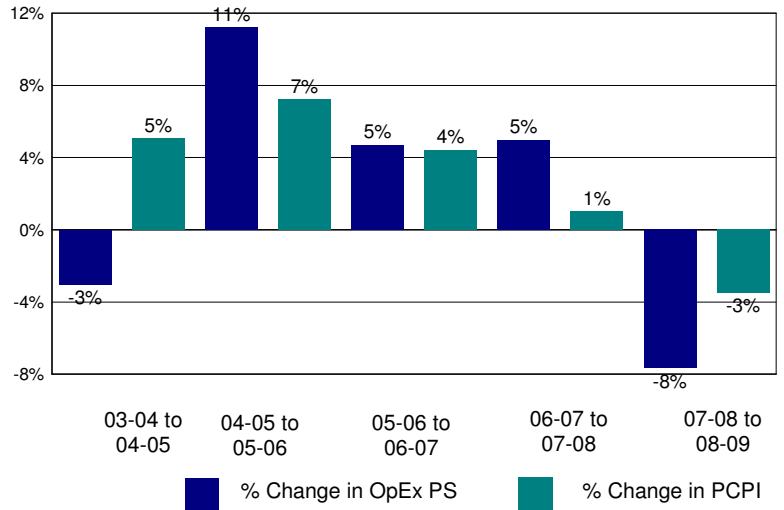

- Total Certificated Teacher Salaries (Object 1100) & Estimated Benefits
- Total Instructional Aide Salaries (Object 2100) & Estimated Benefits
- Approved Textbooks and Books (Objects 4100 & 4200)
- Materials and Supplies expenditures (Object 4300) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180 and 1190)
- Professional/Consulting Services/Subagreements for Services (Objects 5100 and 5800) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180, 1190)

District Profile: Gonzales Unified

The graph in the top right corner shows the difference between the change in the district's Total Operating Expenditures (excluding capital) per student (blue bar) and California Per Capita Personal Income (green bar). [See the Methodology for a full description for how this is calculated]. Gonzales Unified spent \$9,564 per student, which ranked 375 out of the 955 districts for which this information was available, with the top ranked district spending the most per student.

The graph in the middle left hand side of the page shows the annual savings if Total Operating Expenditures per student, excluding Certificated Teacher Salaries and Benefits, had only increased at the same rate as PCPI in FY 07-08. Note that for FY 08-09 the calculation shown is for the savings if the increase in such Operating Expenditures per student (i.e., excluding Certificated Teacher Salaries and Benefits) was held at zero, not decreased at the rate PCPI decreased. Below each year is the number of teachers that could have been employed by those savings.

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed. For FY 08-09, this district ranked 500 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In Gonzales Unified Total Operating Expenditures per student (excluding capital), grew by 19% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In Gonzales Unified, 34% of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated 0 additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 16% of Certificated Teacher Salary expenditures. This amount ranked 521 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 57%.

This district is in quadrant 4. (See Chart 3-6, pp. 104-105)

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

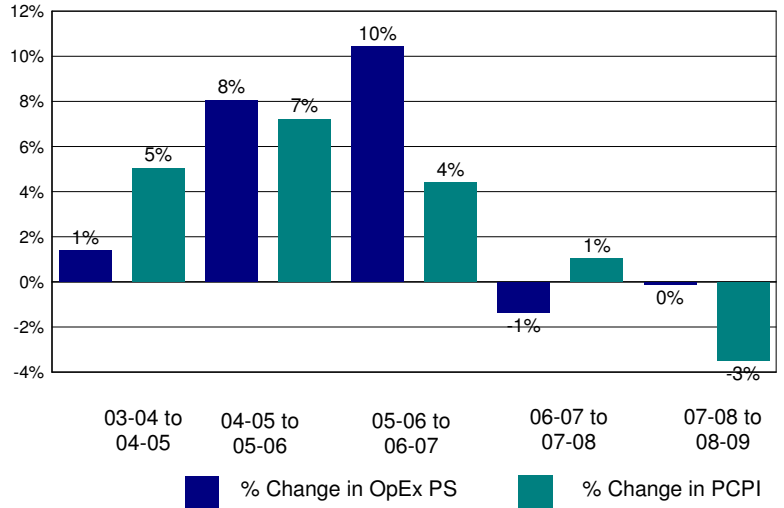

- Total Certificated Teacher Salaries (Object 1100) & Estimated Benefits
- Total Instructional Aide Salaries (Object 2100) & Estimated Benefits
- Approved Textbooks and Books (Objects 4100 & 4200)
- Materials and Supplies expenditures (Object 4300) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180 and 1190)
- Professional/Consulting Services/Subagreements for Services (Objects 5100 and 5800) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180, 1190)

District Profile: Graves Elementary

The graph in the top right corner shows the difference between the change in the district's Total Operating Expenditures (excluding capital) per student (blue bar) and California Per Capita Personal Income (green bar). [See the Methodology for a full description for how this is calculated]. Graves Elementary spent \$10,248 per student, which ranked 285 out of the 955 districts for which this information was available, with the top ranked district spending the most per student.

The graph in the middle left hand side of the page shows the annual savings if Total Operating Expenditures per student, excluding Certificated Teacher Salaries and Benefits, had only increased at the same rate as PCPI in FY 07-08. Note that for FY 08-09 the calculation shown is for the savings if the increase in such Operating Expenditures per student (i.e., excluding Certificated Teacher Salaries and Benefits) was held at zero, not decreased at the rate PCPI decreased. Below each year is the number of teachers that could have been employed by those savings.

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed. For FY 08-09, this district ranked 745 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In Graves Elementary Total Operating Expenditures per student (excluding capital), grew by 25% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In Graves Elementary, % of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 9% of Certificated Teacher Salary expenditures. This amount ranked 44 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 58%.

This district is in quadrant 2. (See Chart 3-6, pp. 104-105)

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

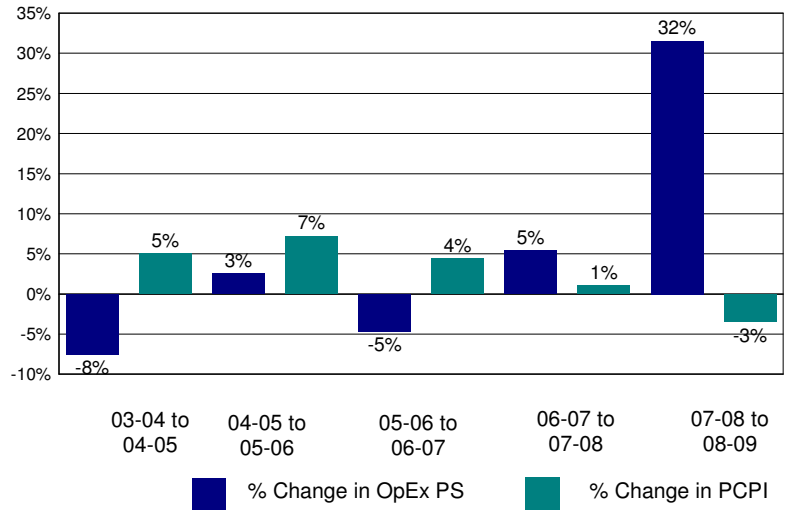

- Total Certificated Teacher Salaries (Object 1100) & Estimated Benefits
- Total Instructional Aide Salaries (Object 2100) & Estimated Benefits
- Approved Textbooks and Books (Objects 4100 & 4200)
- Materials and Supplies expenditures (Object 4300) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180 and 1190)
- Professional/Consulting Services/Subagreements for Services (Objects 5100 and 5800) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180, 1190)

Travel & Conferences	\$27	\$27	0%
Consulting Services	\$540	\$965	79%

District Profile: Guadalupe Union Elementary

The graph in the top right corner shows the difference between the change in the district's Total Operating Expenditures (excluding capital) per student (blue bar) and California Per Capita Personal Income (green bar). [See the Methodology for a full description for how this is calculated]. Guadalupe Union Elementary spent \$8,627 per student, which ranked 612 out of the 955 districts for which this information was available, with the top ranked district spending the most per student.

The graph in the middle left hand side of the page shows the annual savings if Total Operating Expenditures per student, excluding Certificated Teacher Salaries and Benefits, had only increased at the same rate as PCPI in FY 07-08. Note that for FY 08-09 the calculation shown is for the savings if the increase in such Operating Expenditures per student (i.e., excluding Certificated Teacher Salaries and Benefits) was held at zero, not decreased at the rate PCPI decreased. Below each year is the number of teachers that could have been employed by those savings.

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed. For FY 08-09, this district ranked 13 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In Guadalupe Union Elementary Total Operating Expenditures per student (excluding capital), grew by 18% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In Guadalupe Union Elementary, 20% of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated 0 additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 14% of Certificated Teacher Salary expenditures. This amount ranked 353 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 71%.

This district is in quadrant 3. (See Chart 3-6, pp. 104-105)

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

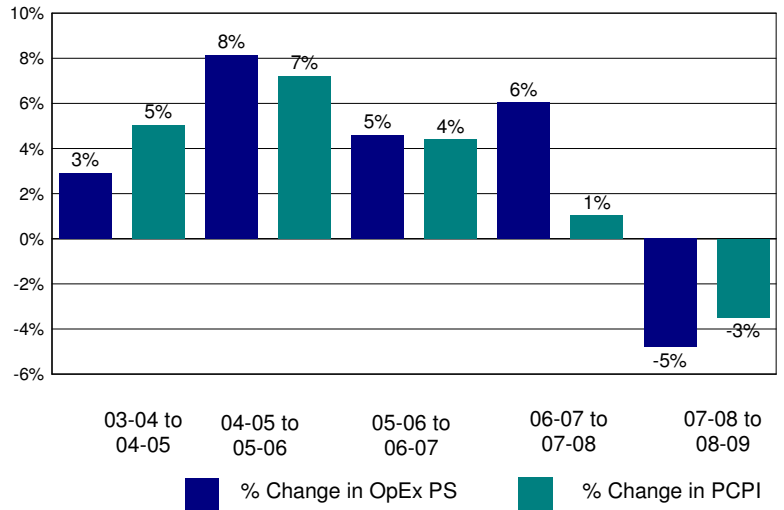

- Total Certificated Teacher Salaries (Object 1100) & Estimated Benefits
- Total Instructional Aide Salaries (Object 2100) & Estimated Benefits
- Approved Textbooks and Books (Objects 4100 & 4200)
- Materials and Supplies expenditures (Object 4300) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180 and 1190)
- Professional/Consulting Services/Subagreements for Services (Objects 5100 and 5800) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180, 1190)

District Profile: Hanford Elementary

The graph in the top right corner shows the difference between the change in the district's Total Operating Expenditures (excluding capital) per student (blue bar) and California Per Capita Personal Income (green bar). [See the Methodology for a full description for how this is calculated]. Hanford Elementary spent \$8,319 per student, which ranked 707 out of the 955 districts for which this information was available, with the top ranked district spending the most per student.

The graph in the middle left hand side of the page shows the annual savings if Total Operating Expenditures per student, excluding Certificated Teacher Salaries and Benefits, had only increased at the same rate as PCPI in FY 07-08. Note that for FY 08-09 the calculation shown is for the savings if the increase in such Operating Expenditures per student (i.e., excluding Certificated Teacher Salaries and Benefits) was held at zero, not decreased at the rate PCPI decreased. Below each year is the number of teachers that could have been employed by those savings.

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed. For FY 08-09, this district ranked 632 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In Hanford Elementary Total Operating Expenditures per student (excluding capital), grew by 17% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In Hanford Elementary, 20% of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated 0 additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 30% of Certificated Teacher Salary expenditures. This amount ranked 895 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 51%.

This district is in quadrant 3. (See Chart 3-6, pp. 104-105)

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

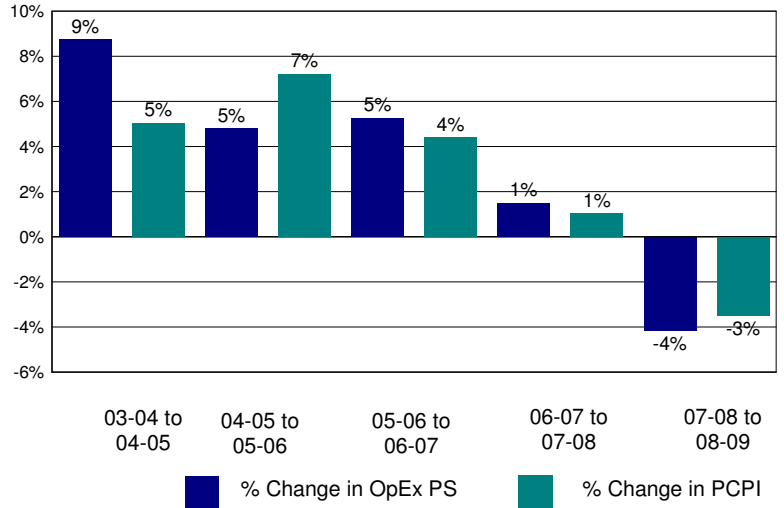

- Total Certificated Teacher Salaries (Object 1100) & Estimated Benefits
- Total Instructional Aide Salaries (Object 2100) & Estimated Benefits
- Approved Textbooks and Books (Objects 4100 & 4200)
- Materials and Supplies expenditures (Object 4300) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180 and 1190)
- Professional/Consulting Services/Subagreements for Services (Objects 5100 and 5800) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180, 1190)

Hart-Ransom Union Elementary spent \$7,874 per student, which ranked 835 out of the 955 districts for which this information was available, with the top ranked district spending the most per student.

The graph in the middle left hand side of the page shows the annual savings if Total Operating Expenditures per student, excluding Certificated Teacher Salaries and Benefits, had only increased at the same rate as PCPI in FY 07-08. Note that for FY 08-09 the calculation shown is for the savings if the increase in such Operating Expenditures per student (i.e., excluding Certificated Teacher Salaries and Benefits) was held at zero, not decreased at the rate PCPI decreased. Below each year is the number of teachers that could have been employed by those savings.

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed. For FY 08-09, this district ranked 215 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In Hart-Ransom Union Elementary Total Operating Expenditures per student (excluding capital), grew by 29% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In Hart-Ransom Union Elementary, % of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 14% of Certificated Teacher Salary expenditures. This amount ranked 392 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 72%.

This district is in quadrant 3. (See Chart 3-6, pp. 104-105)

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

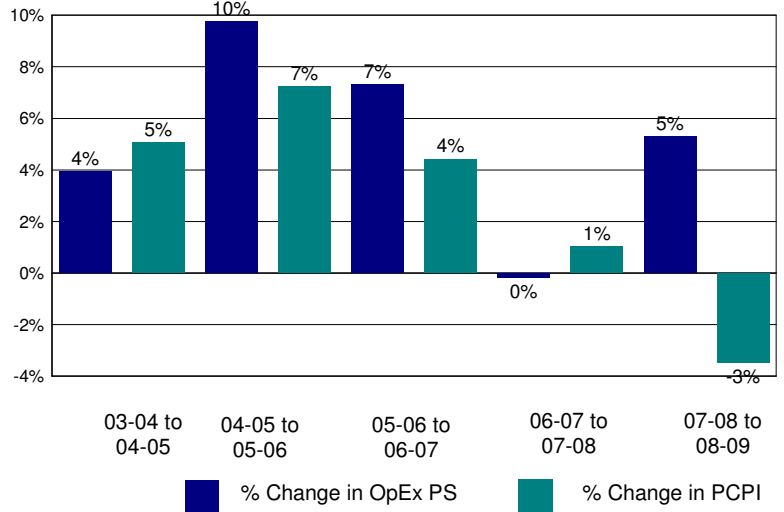

- Total Certificated Teacher Salaries (Object 1100) & Estimated Benefits
- Total Instructional Aide Salaries (Object 2100) & Estimated Benefits
- Approved Textbooks and Books (Objects 4100 & 4200)
- Materials and Supplies expenditures (Object 4300) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180 and 1190)
- Professional/Consulting Services/Subagreements for Services (Objects 5100 and 5800) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180, 1190)

District Profile: Hemet Unified

The graph in the top right corner shows the difference between the change in the district's Total Operating Expenditures (excluding capital) per student (blue bar) and California Per Capita Personal Income (green bar). [See the Methodology for a full description for how this is calculated]. Hemet Unified spent \$9,224 per student, which ranked 439 out of the 955 districts for which this information was available, with the top ranked district spending the most per student.

The graph in the middle left hand side of the page shows the annual savings if Total Operating Expenditures per student, excluding Certificated Teacher Salaries and Benefits, had only increased at the same rate as PCPI in FY 07-08. Note that for FY 08-09 the calculation shown is for the savings if the increase in such Operating Expenditures per student (i.e., excluding Certificated Teacher Salaries and Benefits) was held at zero, not decreased at the rate PCPI decreased. Below each year is the number of teachers that could have been employed by those savings.

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed. For FY 08-09, this district ranked 579 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In Hemet Unified Total Operating Expenditures per student (excluding capital), grew by 31% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In Hemet Unified, 24% of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated 43 additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 17% of Certificated Teacher Salary expenditures. This amount ranked 572 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 55%.

This district is in quadrant 3. (See Chart 3-6, pp. 104-105)

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

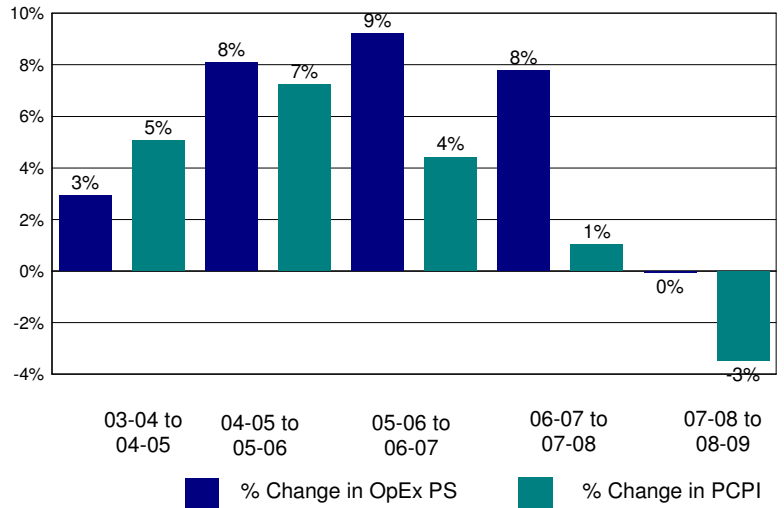

- Total Certificated Teacher Salaries (Object 1100) & Estimated Benefits
- Total Instructional Aide Salaries (Object 2100) & Estimated Benefits
- Approved Textbooks and Books (Objects 4100 & 4200)
- Materials and Supplies expenditures (Object 4300) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180 and 1190)
- Professional/Consulting Services/Subagreements for Services (Objects 5100 and 5800) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180, 1190)

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed. For FY 08-09, this district ranked 62 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In Hollister Elementary Total Operating Expenditures per student (excluding capital), grew by 16% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In Hollister Elementary, 34% of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated 0 additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 14% of Certificated Teacher Salary expenditures. This amount ranked 391 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 67%.

This district is in quadrant 4. (See Chart 3-6, pp. 104-105)

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

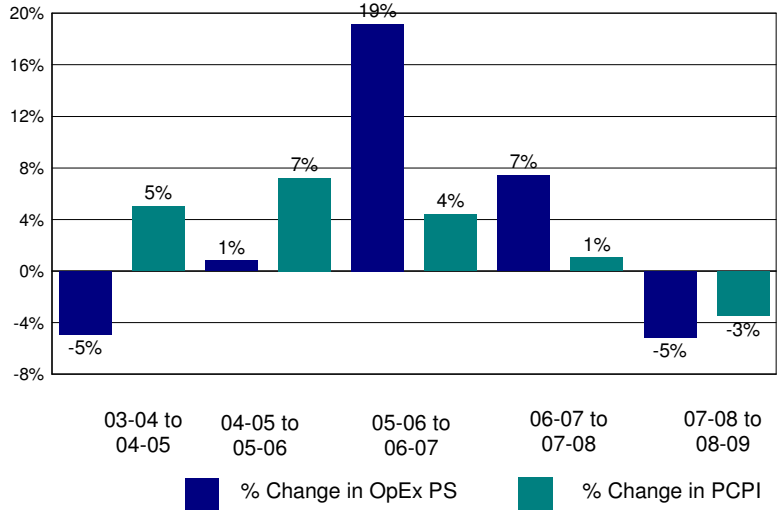

- Total Certificated Teacher Salaries (Object 1100) & Estimated Benefits
- Total Instructional Aide Salaries (Object 2100) & Estimated Benefits
- Approved Textbooks and Books (Objects 4100 & 4200)
- Materials and Supplies expenditures (Object 4300) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180 and 1190)
- Professional/Consulting Services/Subagreements for Services (Objects 5100 and 5800) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180, 1190)

District Profile: Holtville Unified

The graph in the top right corner shows the difference between the change in the district's Total Operating Expenditures (excluding capital) per student (blue bar) and California Per Capita Personal Income (green bar). [See the Methodology for a full description for how this is calculated]. Holtville Unified spent \$9,145 per student, which ranked 464 out of the 955 districts for which this information was available, with the top ranked district spending the most per student.

The graph in the middle left hand side of the page shows the annual savings if Total Operating Expenditures per student, excluding Certificated Teacher Salaries and Benefits, had only increased at the same rate as PCPI in FY 07-08. Note that for FY 08-09 the calculation shown is for the savings if the increase in such Operating Expenditures per student (i.e., excluding Certificated Teacher Salaries and Benefits) was held at zero, not decreased at the rate PCPI decreased. Below each year is the number of teachers that could have been employed by those savings.

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed. For FY 08-09, this district ranked 225 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In Holtville Unified Total Operating Expenditures per student (excluding capital), grew by 28% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In Holtville Unified, 28% of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated 0 additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 14% of Certificated Teacher Salary expenditures. This amount ranked 325 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 61%.

This district is in quadrant 3. (See Chart 3-6, pp. 104-105)

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

District Profile: Howell Mountain Elementary

The graph in the top right corner shows the difference between the change in the district's Total Operating Expenditures (excluding capital) per student (blue bar) and California Per Capita Personal Income (green bar). [See the Methodology for a full description for how this is calculated]. Howell Mountain Elementary spent \$14,644 per student, which ranked 102 out of the 955 districts for which this information was available, with the top ranked district spending the most per student.

The graph in the middle left hand side of the page shows the annual savings if Total Operating Expenditures per student, excluding Certificated Teacher Salaries and Benefits, had only increased at the same rate as PCPI in FY 07-08. Note that for FY 08-09 the calculation shown is for the savings if the increase in such Operating Expenditures per student (i.e., excluding Certificated Teacher Salaries and Benefits) was held at zero, not decreased at the rate PCPI decreased. Below each year is the number of teachers that could have been employed by those savings.

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed. For FY 08-09, this district ranked 792 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In Howell Mountain Elementary Total Operating Expenditures per student (excluding capital), grew by 30% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In Howell Mountain Elementary, % of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 22% of Certificated Teacher Salary expenditures. This amount ranked 805 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 59%.

This district is in quadrant 2. (See Chart 3-6, pp. 104-105)

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

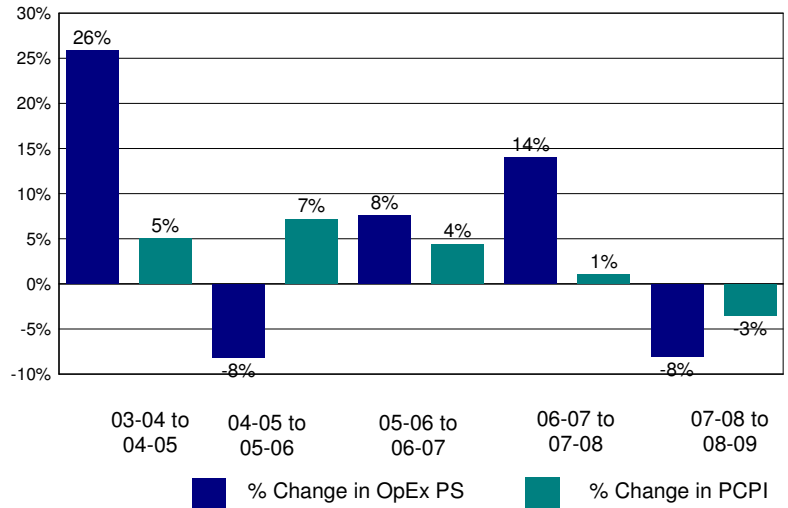

- Total Certificated Teacher Salaries (Object 1100) & Estimated Benefits
- Total Instructional Aide Salaries (Object 2100) & Estimated Benefits
- Approved Textbooks and Books (Objects 4100 & 4200)
- Materials and Supplies expenditures (Object 4300) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180 and 1190)
- Professional/Consulting Services/Subagreements for Services (Objects 5100 and 5800) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180, 1190)

District Profile: Hueneme Elementary

The graph in the top right corner shows the difference between the change in the district's Total Operating Expenditures (excluding capital) per student (blue bar) and California Per Capita Personal Income (green bar). [See the Methodology for a full description for how this is calculated]. Hueneme Elementary spent \$8,620 per student, which ranked 615 out of the 955 districts for which this information was available, with the top ranked district spending the most per student.

The graph in the middle left hand side of the page shows the annual savings if Total Operating Expenditures per student, excluding Certificated Teacher Salaries and Benefits, had only increased at the same rate as PCPI in FY 07-08. Note that for FY 08-09 the calculation shown is for the savings if the increase in such Operating Expenditures per student (i.e., excluding Certificated Teacher Salaries and Benefits) was held at zero, not decreased at the rate PCPI decreased. Below each year is the number of teachers that could have been employed by those savings.

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed. For FY 08-09, this district ranked 52 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In Hueneme Elementary Total Operating Expenditures per student (excluding capital), grew by 21% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In Hueneme Elementary, 24% of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated 0 additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 11% of Certificated Teacher Salary expenditures. This amount ranked 85 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 66%.

This district is in quadrant 3. (See Chart 3-6, pp. 104-105)

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

District Profile: Hydesville Elementary

The graph in the top right corner shows the difference between the change in the district's Total Operating Expenditures (excluding capital) per student (blue bar) and California Per Capita Personal Income (green bar). [See the Methodology for a full description for how this is calculated]. Hydesville Elementary spent \$7,972 per student, which ranked 816 out of the 955 districts for which this information was available, with the top ranked district spending the most per student.

The graph in the middle left hand side of the page shows the annual savings if Total Operating Expenditures per student, excluding Certificated Teacher Salaries and Benefits, had only increased at the same rate as PCPI in FY 07-08. Note that for FY 08-09 the calculation shown is for the savings if the increase in such Operating Expenditures per student (i.e., excluding Certificated Teacher Salaries and Benefits) was held at zero, not decreased at the rate PCPI decreased. Below each year is the number of teachers that could have been employed by those savings.

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed. For FY 08-09, this district ranked 516 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In Hydesville Elementary Total Operating Expenditures per student (excluding capital), grew by 12% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In Hydesville Elementary, % of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 21% of Certificated Teacher Salary expenditures. This amount ranked 781 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 59%.

This district is in quadrant 4. (See Chart 3-6, pp. 104-105)

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

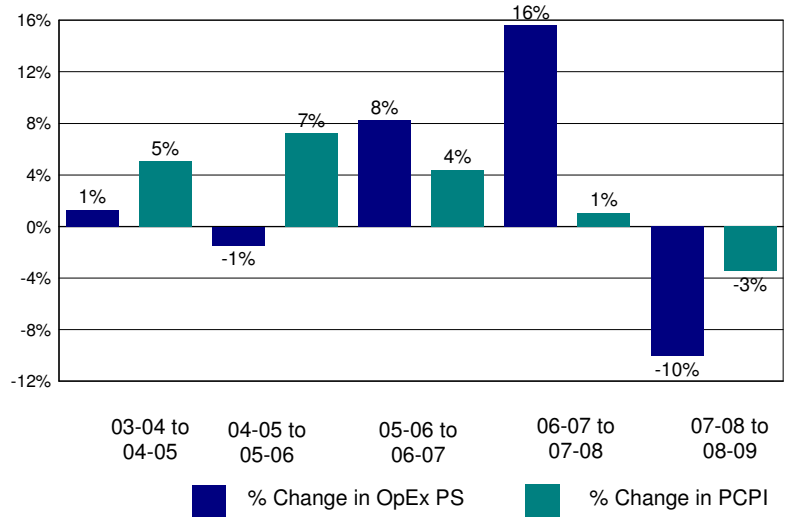

- Total Certificated Teacher Salaries (Object 1100) & Estimated Benefits
- Total Instructional Aide Salaries (Object 2100) & Estimated Benefits
- Approved Textbooks and Books (Objects 4100 & 4200)
- Materials and Supplies expenditures (Object 4300) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180 and 1190)
- Professional/Consulting Services/Subagreements for Services (Objects 5100 and 5800) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180, 1190)

District Profile: Igo, Ono, Platina Union Elementary

The graph in the top right corner shows the difference between the change in the district's Total Operating Expenditures (excluding capital) per student (blue bar) and California Per Capita Personal Income (green bar). [See the Methodology for a full description for how this is calculated]. Igo, Ono, Platina Union Elementary spent \$13,758 per student, which ranked 121 out of the 955 districts for which this information was available, with the top ranked district spending the most per student.

The graph in the middle left hand side of the page shows the annual savings if Total Operating Expenditures per student, excluding Certificated Teacher Salaries and Benefits, had only increased at the same rate as PCPI in FY 07-08. Note that for FY 08-09 the calculation shown is for the savings if the increase in such Operating Expenditures per student (i.e., excluding Certificated Teacher Salaries and Benefits) was held at zero, not decreased at the rate PCPI decreased. Below each year is the number of teachers that could have been employed by those savings.

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed. For FY 08-09, this district ranked 899 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In Igo, Ono, Platina Union Elementary Total Operating Expenditures per student (excluding capital), grew by 74% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In Igo, Ono, Platina Union Elementary, 10% of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated 2 additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 24% of Certificated Teacher Salary expenditures. This amount ranked 841 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 54%.

This district is in quadrant 3. (See Chart 3-6, pp. 104-105)

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

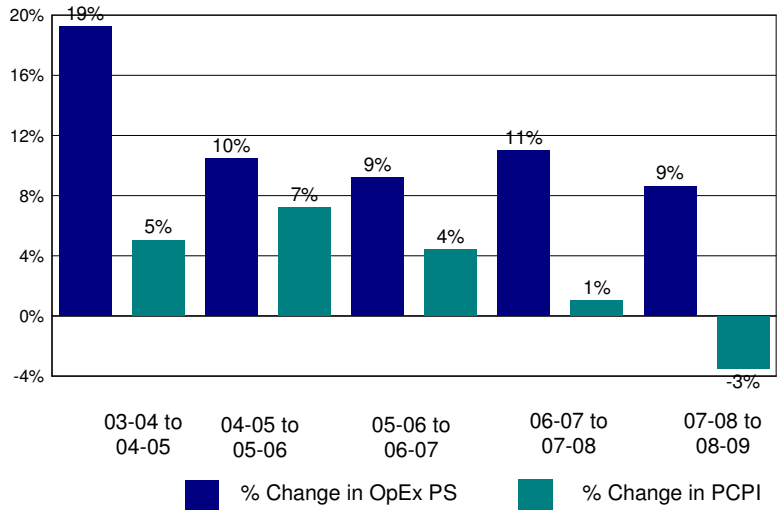

- Total Certificated Teacher Salaries (Object 1100) & Estimated Benefits
- Total Instructional Aide Salaries (Object 2100) & Estimated Benefits

District Profile: Irvine Unified

The graph in the top right corner shows the difference between the change in the district's Total Operating Expenditures (excluding capital) per student (blue bar) and California Per Capita Personal Income (green bar). [See the Methodology for a full description for how this is calculated]. Irvine Unified spent \$9,072 per student, which ranked 489 out of the 955 districts for which this information was available, with the top ranked district spending the most per student.

The graph in the middle left hand side of the page shows the annual savings if Total Operating Expenditures per student, excluding Certificated Teacher Salaries and Benefits, had only increased at the same rate as PCPI in FY 07-08. Note that for FY 08-09 the calculation shown is for the savings if the increase in such Operating Expenditures per student (i.e., excluding Certificated Teacher Salaries and Benefits) was held at zero, not decreased at the rate PCPI decreased. Below each year is the number of teachers that could have been employed by those savings.

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed. For FY 08-09, this district ranked 494 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In Irvine Unified Total Operating Expenditures per student (excluding capital), grew by 19% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In Irvine Unified, 26% of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated 0 additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 12% of Certificated Teacher Salary expenditures. This amount ranked 181 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 58%.

This district is in quadrant 3. (See Chart 3-6, pp. 104-105)

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

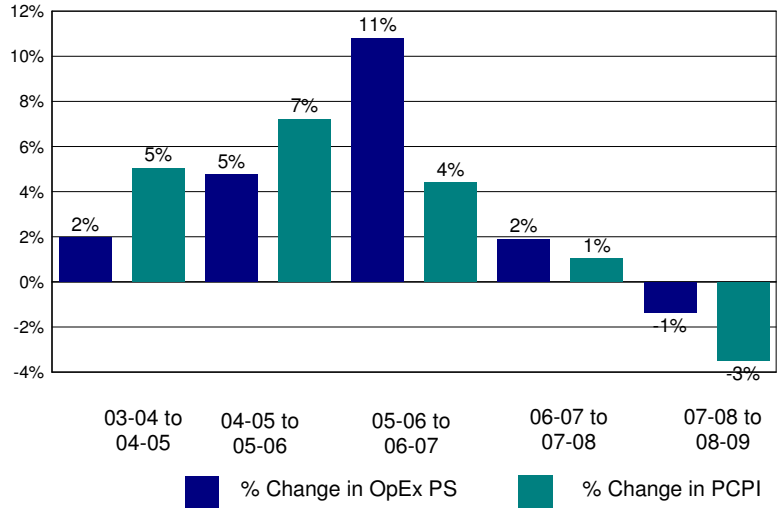

- Total Certificated Teacher Salaries (Object 1100) & Estimated Benefits
- Total Instructional Aide Salaries (Object 2100) & Estimated Benefits
- Approved Textbooks and Books (Objects 4100 & 4200)
- Materials and Supplies expenditures (Object 4300) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180 and 1190)
- Professional/Consulting Services/Subagreements for Services (Objects 5100 and 5800) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180, 1190)

District Profile: Island Union Elementary

The graph in the top right corner shows the difference between the change in the district's Total Operating Expenditures (excluding capital) per student (blue bar) and California Per Capita Personal Income (green bar). [See the Methodology for a full description for how this is calculated]. Island Union Elementary spent \$7,165 per student, which ranked 924 out of the 955 districts for which this information was available, with the top ranked district spending the most per student.

The graph in the middle left hand side of the page shows the annual savings if Total Operating Expenditures per student, excluding Certificated Teacher Salaries and Benefits, had only increased at the same rate as PCPI in FY 07-08. Note that for FY 08-09 the calculation shown is for the savings if the increase in such Operating Expenditures per student (i.e., excluding Certificated Teacher Salaries and Benefits) was held at zero, not decreased at the rate PCPI decreased. Below each year is the number of teachers that could have been employed by those savings.

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed. For FY 08-09, this district ranked 525 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In Island Union Elementary Total Operating Expenditures per student (excluding capital), grew by -8% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In Island Union Elementary, % of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 23% of Certificated Teacher Salary expenditures. This amount ranked 823 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 64%.

This district is in quadrant 1. (See Chart 3-6, pp. 104-105)

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

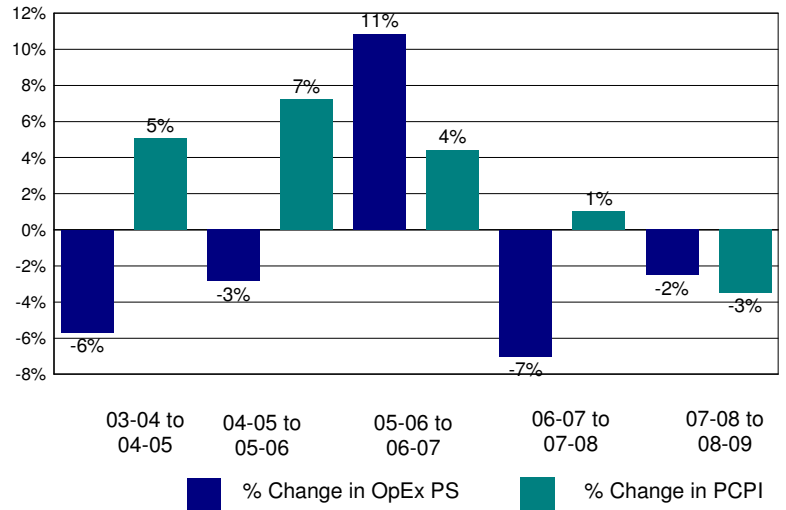

- Total Certificated Teacher Salaries (Object 1100) & Estimated Benefits
- Total Instructional Aide Salaries (Object 2100) & Estimated Benefits
- Approved Textbooks and Books (Objects 4100 & 4200)
