The graph in the top right corner shows the difference between the change in the district's Total Operating Expenditures (excluding capital) per student (blue bar) and California Per Capita Personal Income (green bar). [See the Methodology for a full description for how this is calculated]. Jamestown Elementary spent \$10,635 per student, which ranked 248 out of the 955 districts for which this information was available, with the top ranked district spending the most per student.

The graph in the middle left hand side of the page shows the annual savings if Total Operating Expenditures per student, excluding Certificated Teacher Salaries and Benefits, had only increased at the same rate as PCPI in FY 07-08. Note that for FY 08-09 the calculation shown is for the savings if the increase in such Operating Expenditures per student (i.e., excluding Certificated Teacher Salaries and Benefits) was held at zero, not decreased at the rate PCPI decreased. Below each year is the number of teachers that could have been employed by those savings.

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed. For FY 08-09, this district ranked 485 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In Jamestown Elementary Total Operating Expenditures per student (excluding capital), grew by 66% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In Jamestown Elementary, % of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated 1 additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 20% of Certificated Teacher Salary expenditures. This amount ranked 757 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 57%.

This district is in quadrant 3. (See Chart 3-6, pp. 104-105)

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

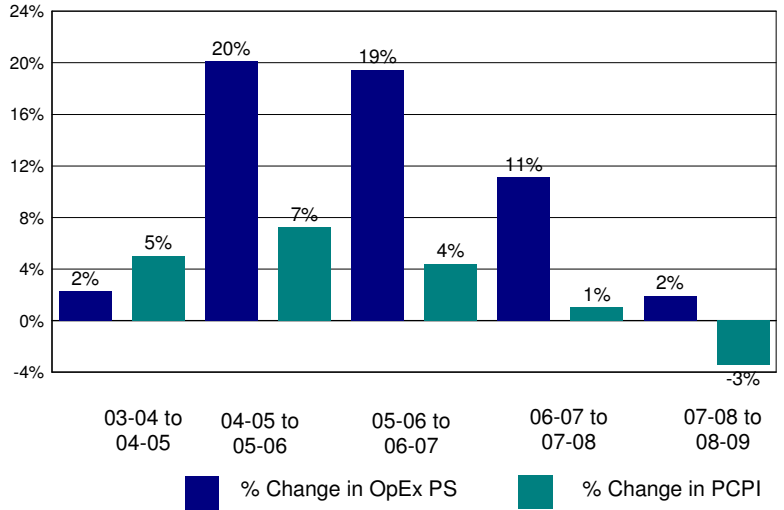

- Total Certificated Teacher Salaries (Object 1100) & Estimated Benefits
- Total Instructional Aide Salaries (Object 2100) & Estimated Benefits
- Approved Textbooks and Books (Objects 4100 & 4200)
- Materials and Supplies expenditures (Object 4300) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180 and 1190)
- Professional/Consulting Services/Subagreements for Services (Objects 5100 and 5800) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180, 1190)

District Profile: John Swett Unified

The graph in the top right corner shows the difference between the change in the district's Total Operating Expenditures (excluding capital) per student (blue bar) and California Per Capita Personal Income (green bar). [See the Methodology for a full description for how this is calculated]. John Swett Unified spent \$9,783 per student, which ranked 345 out of the 955 districts for which this information was available, with the top ranked district spending the most per student.

The graph in the middle left hand side of the page shows the annual savings if Total Operating Expenditures per student, excluding Certificated Teacher Salaries and Benefits, had only increased at the same rate as PCPI in FY 07-08. Note that for FY 08-09 the calculation shown is for the savings if the increase in such Operating Expenditures per student (i.e., excluding Certificated Teacher Salaries and Benefits) was held at zero, not decreased at the rate PCPI decreased. Below each year is the number of teachers that could have been employed by those savings.

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed. For FY 08-09, this district ranked 622 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In John Swett Unified Total Operating Expenditures per student (excluding capital), grew by 35% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In John Swett Unified, 27% of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated 7 additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 19% of Certificated Teacher Salary expenditures. This amount ranked 692 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 58%.

This district is in quadrant 3. (See Chart 3-6, pp. 104-105)

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

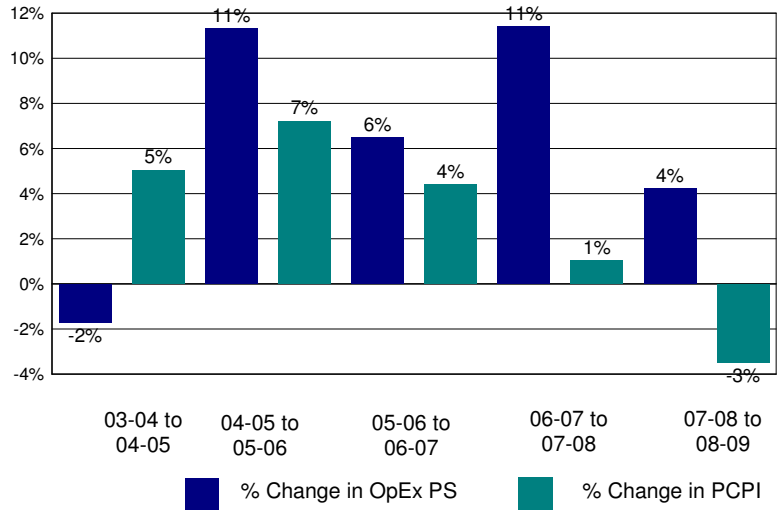

- Total Certificated Teacher Salaries (Object 1100) & Estimated Benefits
- Total Instructional Aide Salaries (Object 2100) & Estimated Benefits

District Profile: Johnstonville Elementary

The graph in the top right corner shows the difference between the change in the district's Total Operating Expenditures (excluding capital) per student (blue bar) and California Per Capita Personal Income (green bar). [See the Methodology for a full description for how this is calculated]. Johnstonville Elementary spent \$7,629 per student, which ranked 867 out of the 955 districts for which this information was available, with the top ranked district spending the most per student.

The graph in the middle left hand side of the page shows the annual savings if Total Operating Expenditures per student, excluding Certificated Teacher Salaries and Benefits, had only increased at the same rate as PCPI in FY 07-08. Note that for FY 08-09 the calculation shown is for the savings if the increase in such Operating Expenditures per student (i.e., excluding Certificated Teacher Salaries and Benefits) was held at zero, not decreased at the rate PCPI decreased. Below each year is the number of teachers that could have been employed by those savings.

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed. For FY 08-09, this district ranked 604 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In Johnstonville Elementary Total Operating Expenditures per student (excluding capital), grew by 8% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In Johnstonville Elementary, 2% of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated 1 additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 29% of Certificated Teacher Salary expenditures. This amount ranked 883 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 53%.

This district is in quadrant 4. (See Chart 3-6, pp. 104-105)

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

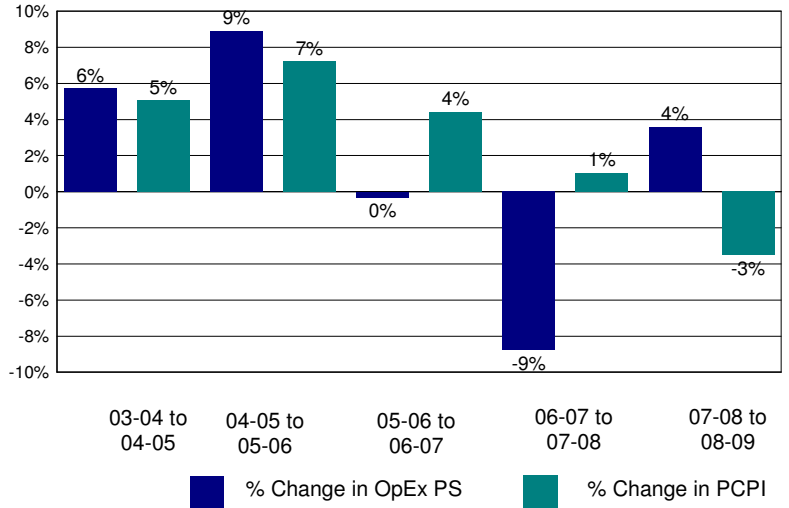

- Total Certificated Teacher Salaries (Object 1100) & Estimated Benefits
- Total Instructional Aide Salaries (Object 2100) & Estimated Benefits
- Approved Textbooks and Books (Objects 4100 & 4200)
- Materials and Supplies expenditures (Object 4300) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180 and 1190)
- Professional/Consulting Services/Subagreements for Services (Objects 5100 and 5800) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180, 1190)

The graph in the top right corner shows the difference between the change in the district's Total Operating Expenditures (excluding capital) per student (blue bar) and California Per Capita Personal Income (green bar). [See the Methodology for a full description for how this is calculated]. Kashia Elementary spent \$29,902 per student, which ranked 13 out of the 955 districts for which this information was available, with the top ranked district spending the most per student.

The graph in the middle left hand side of the page shows the annual savings if Total Operating Expenditures per student, excluding Certificated Teacher Salaries and Benefits, had only increased at the same rate as PCPI in FY 07-08. Note that for FY 08-09 the calculation shown is for the savings if the increase in such Operating Expenditures per student (i.e., excluding Certificated Teacher Salaries and Benefits) was held at zero, not decreased at the rate PCPI decreased. Below each year is the number of teachers that could have been employed by those savings.

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed. For FY 08-09, this district ranked 929 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In Kashia Elementary Total Operating Expenditures per student (excluding capital), grew by 68% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In Kashia Elementary, % of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 19% of Certificated Teacher Salary expenditures. This amount ranked 682 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 48%.

This district is in quadrant 2. (See Chart 3-6, pp. 104-105)

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

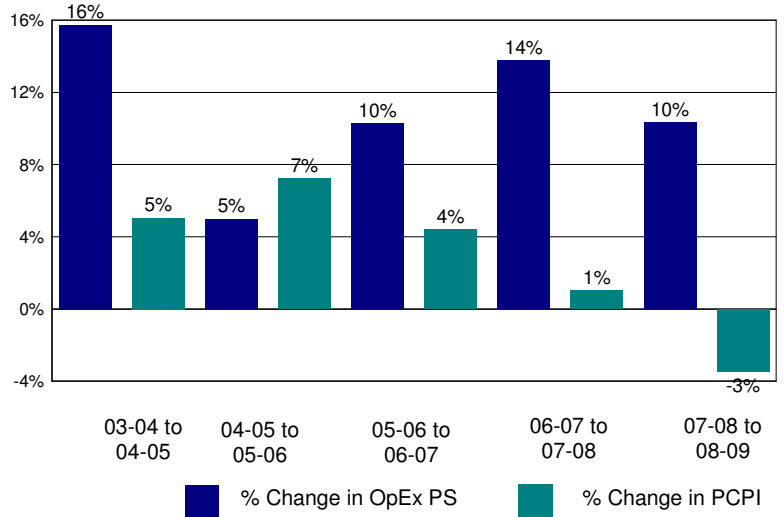

- Total Certificated Teacher Salaries (Object 1100) & Estimated Benefits
- Total Instructional Aide Salaries (Object 2100) & Estimated Benefits
- Approved Textbooks and Books (Objects 4100 & 4200)
- Materials and Supplies expenditures (Object 4300) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180 and 1190)
- Professional/Consulting Services/Subagreements for Services (Objects 5100 and 5800) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180, 1190)

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed. For FY 08-09, this district ranked 714 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In Kern Union High Total Operating Expenditures per student (excluding capital), grew by 25% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In Kern Union High, 27% of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated 92 additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 14% of Certificated Teacher Salary expenditures. This amount ranked 298 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 50%.

This district is in quadrant 3. (See Chart 3-6, pp. 104-105)

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

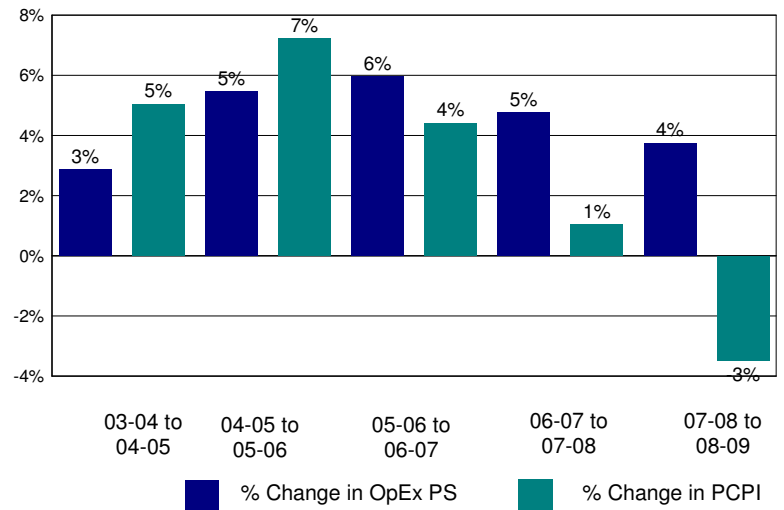

- Total Certificated Teacher Salaries (Object 1100) & Estimated Benefits
- Total Instructional Aide Salaries (Object 2100) & Estimated Benefits
- Approved Textbooks and Books (Objects 4100 & 4200)
- Materials and Supplies expenditures (Object 4300) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180 and 1190)
- Professional/Consulting Services/Subagreements for Services (Objects 5100 and 5800) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180, 1190)

District Profile: Kernville Union Elementary

The graph in the top right corner shows the difference between the change in the district's Total Operating Expenditures (excluding capital) per student (blue bar) and California Per Capita Personal Income (green bar). [See the Methodology for a full description for how this is calculated]. Kernville Union Elementary spent \$10,790 per student, which ranked 234 out of the 955 districts for which this information was available, with the top ranked district spending the most per student.

The graph in the middle left hand side of the page shows the annual savings if Total Operating Expenditures per student, excluding Certificated Teacher Salaries and Benefits, had only increased at the same rate as PCPI in FY 07-08. Note that for FY 08-09 the calculation shown is for the savings if the increase in such Operating Expenditures per student (i.e., excluding Certificated Teacher Salaries and Benefits) was held at zero, not decreased at the rate PCPI decreased. Below each year is the number of teachers that could have been employed by those savings.

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed. For FY 08-09, this district ranked 789 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In Kernville Union Elementary Total Operating Expenditures per student (excluding capital), grew by 19% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In Kernville Union Elementary, 1% of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated 0 additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 22% of Certificated Teacher Salary expenditures. This amount ranked 803 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 50%.

District Profile: Kings River Union Elementary

The graph in the top right corner shows the difference between the change in the district's Total Operating Expenditures (excluding capital) per student (blue bar) and California Per Capita Personal Income (green bar). [See the Methodology for a full description for how this is calculated]. Kings River Union Elementary spent \$10,664 per student, which ranked 246 out of the 955 districts for which this information was available, with the top ranked district spending the most per student.

The graph in the middle left hand side of the page shows the annual savings if Total Operating Expenditures per student, excluding Certificated Teacher Salaries and Benefits, had only increased at the same rate as PCPI in FY 07-08. Note that for FY 08-09 the calculation shown is for the savings if the increase in such Operating Expenditures per student (i.e., excluding Certificated Teacher Salaries and Benefits) was held at zero, not decreased at the rate PCPI decreased. Below each year is the number of teachers that could have been employed by those savings.

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed. For FY 08-09, this district ranked 656 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In Kings River Union Elementary Total Operating Expenditures per student (excluding capital), grew by 36% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In Kings River Union Elementary, 15% of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated 3 additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 15% of Certificated Teacher Salary expenditures. This amount ranked 477 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 52%.

This district is in quadrant 3. (See Chart 3-6, pp. 104-105)

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

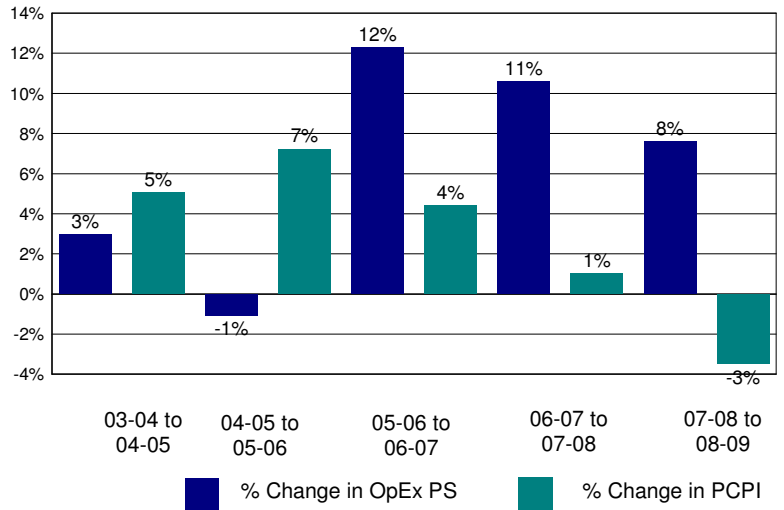

- Total Certificated Teacher Salaries (Object 1100) & Estimated Benefits
- Total Instructional Aide Salaries (Object 2100) & Estimated Benefits
- Approved Textbooks and Books (Objects 4100 & 4200)
- Materials and Supplies expenditures (Object 4300) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180 and 1190)
- Professional/Consulting Services/Subagreements for Services (Objects 5100 and 5800) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180, 1190)

District Profile: Kings River-Hardwick Union Elementary

The graph in the top right corner shows the difference between the change in the district's Total Operating Expenditures (excluding capital) per student (blue bar) and California Per Capita Personal Income (green bar). [See the Methodology for a full description for how this is calculated]. Kings River-Hardwick Union Elementary spent \$8,119 per student, which ranked 779 out of the 955 districts for which this information was available, with the top ranked district spending the most per student.

The graph in the middle left hand side of the page shows the annual savings if Total Operating Expenditures per student, excluding Certificated Teacher Salaries and Benefits, had only increased at the same rate as PCPI in FY 07-08. Note that for FY 08-09 the calculation shown is for the savings if the increase in such Operating Expenditures per student (i.e., excluding Certificated Teacher Salaries and Benefits) was held at zero, not decreased at the rate PCPI decreased. Below each year is the number of teachers that could have been employed by those savings.

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed. For FY 08-09, this district ranked 114 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In Kings River-Hardwick Union Elementary Total Operating Expenditures per student (excluding capital), grew by 38% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In Kings River-Hardwick Union Elementary, 17% of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated 0 additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 17% of Certificated Teacher Salary expenditures. This amount ranked 575 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 61%.

This district is in quadrant 3. (See Chart 3-6, pp. 104-105)

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

District Profile: Klamath River Union Elementary

The graph in the top right corner shows the difference between the change in the district's Total Operating Expenditures (excluding capital) per student (blue bar) and California Per Capita Personal Income (green bar). [See the Methodology for a full description for how this is calculated]. Klamath River Union Elementary spent \$18,358 per student, which ranked 58 out of the 955 districts for which this information was available, with the top ranked district spending the most per student.

The graph in the middle left hand side of the page shows the annual savings if Total Operating Expenditures per student, excluding Certificated Teacher Salaries and Benefits, had only increased at the same rate as PCPI in FY 07-08. Note that for FY 08-09 the calculation shown is for the savings if the increase in such Operating Expenditures per student (i.e., excluding Certificated Teacher Salaries and Benefits) was held at zero, not decreased at the rate PCPI decreased. Below each year is the number of teachers that could have been employed by those savings.

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed. For FY 08-09, this district ranked 867 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In Klamath River Union Elementary Total Operating Expenditures per student (excluding capital), grew by 8% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In Klamath River Union Elementary, 15% of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated 0 additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 6% of Certificated Teacher Salary expenditures. This amount ranked 13 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 44%.

This district is in quadrant 1. (See Chart 3-6, pp. 104-105)

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

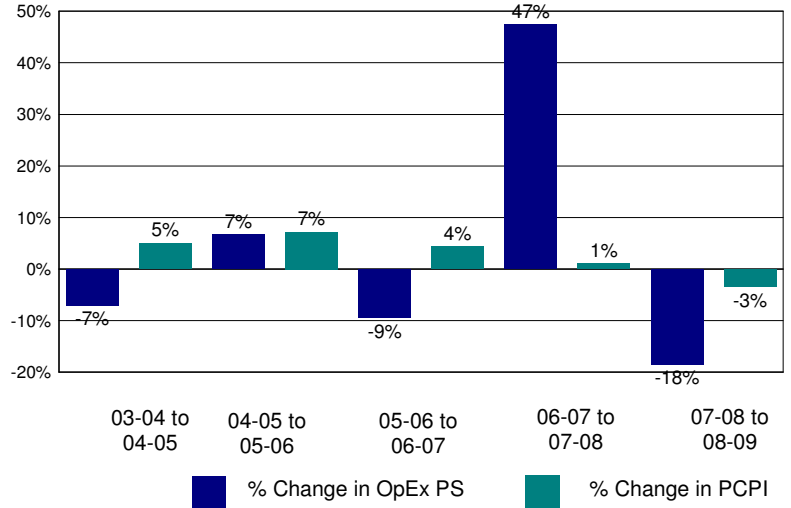

- Total Certificated Teacher Salaries (Object 1100) & Estimated Benefits
- Total Instructional Aide Salaries (Object 2100) & Estimated Benefits
- Approved Textbooks and Books (Objects 4100 & 4200)
- Materials and Supplies expenditures (Object 4300) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180 and 1190)
- Professional/Consulting Services/Subagreements for Services (Objects 5100 and 5800) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180, 1190)

District Profile: Klamath-Trinity Joint Unified

The graph in the top right corner shows the difference between the change in the district's Total Operating Expenditures (excluding capital) per student (blue bar) and California Per Capita Personal Income (green bar). [See the Methodology for a full description for how this is calculated]. Klamath-Trinity Joint Unified spent \$17,417 per student, which ranked 66 out of the 955 districts for which this information was available, with the top ranked district spending the most per student.

The graph in the middle left hand side of the page shows the annual savings if Total Operating Expenditures per student, excluding Certificated Teacher Salaries and Benefits, had only increased at the same rate as PCPI in FY 07-08. Note that for FY 08-09 the calculation shown is for the savings if the increase in such Operating Expenditures per student (i.e., excluding Certificated Teacher Salaries and Benefits) was held at zero, not decreased at the rate PCPI decreased. Below each year is the number of teachers that could have been employed by those savings.

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed. For FY 08-09, this district ranked 910 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In Klamath-Trinity Joint Unified Total Operating Expenditures per student (excluding capital), grew by 31% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In Klamath-Trinity Joint Unified, 18% of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated 27 additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 23% of Certificated Teacher Salary expenditures. This amount ranked 829 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 43%.

This district is in quadrant 4. (See Chart 3-6, pp. 104-105)

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

District Profile: La Canada Unified

The graph in the top right corner shows the difference between the change in the district's Total Operating Expenditures (excluding capital) per student (blue bar) and California Per Capita Personal Income (green bar). [See the Methodology for a full description for how this is calculated]. La Canada Unified spent \$8,728 per student, which ranked 578 out of the 955 districts for which this information was available, with the top ranked district spending the most per student.

The graph in the middle left hand side of the page shows the annual savings if Total Operating Expenditures per student, excluding Certificated Teacher Salaries and Benefits, had only increased at the same rate as PCPI in FY 07-08. Note that for FY 08-09 the calculation shown is for the savings if the increase in such Operating Expenditures per student (i.e., excluding Certificated Teacher Salaries and Benefits) was held at zero, not decreased at the rate PCPI decreased. Below each year is the number of teachers that could have been employed by those savings.

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed. For FY 08-09, this district ranked 381 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In La Canada Unified Total Operating Expenditures per student (excluding capital), grew by 25% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In La Canada Unified, 24% of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated 6 additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 12% of Certificated Teacher Salary expenditures. This amount ranked 150 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 64%.

This district is in quadrant 3. (See Chart 3-6, pp. 104-105)

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

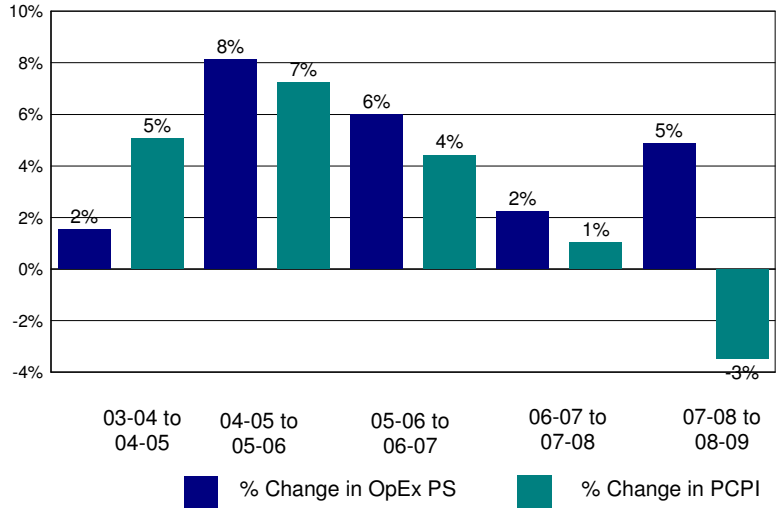

- Total Certificated Teacher Salaries (Object 1100) & Estimated Benefits
- Total Instructional Aide Salaries (Object 2100) & Estimated Benefits
- Approved Textbooks and Books (Objects 4100 & 4200)
- Materials and Supplies expenditures (Object 4300) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180 and 1190)
- Professional/Consulting Services/Subagreements for Services (Objects 5100 and 5800) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180, 1190)

District Profile: La Grange Elementary

The graph in the top right corner shows the difference between the change in the district's Total Operating Expenditures (excluding capital) per student (blue bar) and California Per Capita Personal Income (green bar). [See the Methodology for a full description for how this is calculated]. La Grange Elementary spent \$20,119 per student, which ranked 45 out of the 955 districts for which this information was available, with the top ranked district spending the most per student.

The graph in the middle left hand side of the page shows the annual savings if Total Operating Expenditures per student, excluding Certificated Teacher Salaries and Benefits, had only increased at the same rate as PCPI in FY 07-08. Note that for FY 08-09 the calculation shown is for the savings if the increase in such Operating Expenditures per student (i.e., excluding Certificated Teacher Salaries and Benefits) was held at zero, not decreased at the rate PCPI decreased. Below each year is the number of teachers that could have been employed by those savings.

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed. For FY 08-09, this district ranked 913 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In La Grange Elementary Total Operating Expenditures per student (excluding capital), grew by 175% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In La Grange Elementary, % of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 12% of Certificated Teacher Salary expenditures. This amount ranked 142 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 48%.

This district is in quadrant 3. (See Chart 3-6, pp. 104-105)

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

District Profile: Laguna Beach Unified

The graph in the top right corner shows the difference between the change in the district's Total Operating Expenditures (excluding capital) per student (blue bar) and California Per Capita Personal Income (green bar). [See the Methodology for a full description for how this is calculated]. Laguna Beach Unified spent \$13,058 per student, which ranked 138 out of the 955 districts for which this information was available, with the top ranked district spending the most per student.

The graph in the middle left hand side of the page shows the annual savings if Total Operating Expenditures per student, excluding Certificated Teacher Salaries and Benefits, had only increased at the same rate as PCPI in FY 07-08. Note that for FY 08-09 the calculation shown is for the savings if the increase in such Operating Expenditures per student (i.e., excluding Certificated Teacher Salaries and Benefits) was held at zero, not decreased at the rate PCPI decreased. Below each year is the number of teachers that could have been employed by those savings.

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed. For FY 08-09, this district ranked 583 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In Laguna Beach Unified Total Operating Expenditures per student (excluding capital), grew by 43% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In Laguna Beach Unified, 24% of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated 4 additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 21% of Certificated Teacher Salary expenditures. This amount ranked 787 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 57%.

This district is in quadrant 3. (See Chart 3-6, pp. 104-105)

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

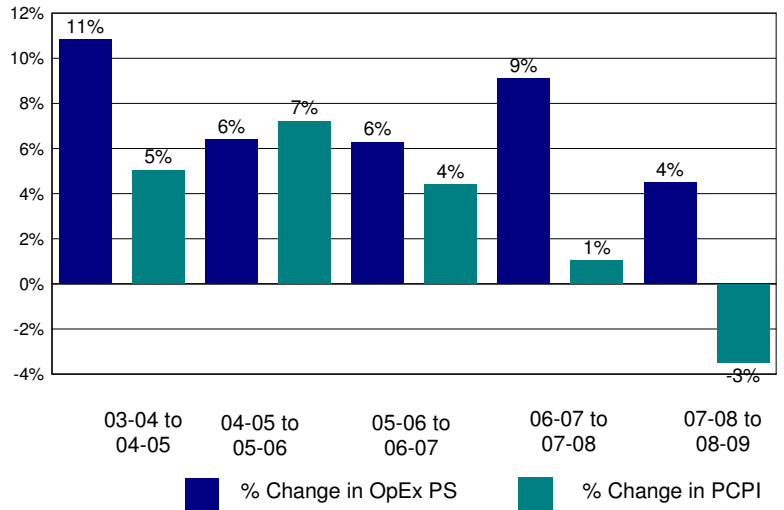

- Total Certificated Teacher Salaries (Object 1100) & Estimated Benefits
- Total Instructional Aide Salaries (Object 2100) & Estimated Benefits
- Approved Textbooks and Books (Objects 4100 & 4200)
- Materials and Supplies expenditures (Object 4300) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180 and 1190)
- Professional/Consulting Services/Subagreements for Services (Objects 5100 and 5800) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180, 1190)

District Profile: Laguna Joint Elementary

The graph in the top right corner shows the difference between the change in the district's Total Operating Expenditures (excluding capital) per student (blue bar) and California Per Capita Personal Income (green bar). [See the Methodology for a full description for how this is calculated]. Laguna Joint Elementary spent \$9,088 per student, which ranked 479 out of the 955 districts for which this information was available, with the top ranked district spending the most per student.

The graph in the middle left hand side of the page shows the annual savings if Total Operating Expenditures per student, excluding Certificated Teacher Salaries and Benefits, had only increased at the same rate as PCPI in FY 07-08. Note that for FY 08-09 the calculation shown is for the savings if the increase in such Operating Expenditures per student (i.e., excluding Certificated Teacher Salaries and Benefits) was held at zero, not decreased at the rate PCPI decreased. Below each year is the number of teachers that could have been employed by those savings.

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed. For FY 08-09, this district ranked 101 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In Laguna Joint Elementary Total Operating Expenditures per student (excluding capital), grew by 12% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In Laguna Joint Elementary, 25% of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated 0 additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 6% of Certificated Teacher Salary expenditures. This amount ranked 18 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 71%.

This district is in quadrant 4. (See Chart 3-6, pp. 104-105)

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

District Profile: Lake Tahoe Unified

The graph in the top right corner shows the difference between the change in the district's Total Operating Expenditures (excluding capital) per student (blue bar) and California Per Capita Personal Income (green bar). [See the Methodology for a full description for how this is calculated]. Lake Tahoe Unified spent \$9,261 per student, which ranked 429 out of the 955 districts for which this information was available, with the top ranked district spending the most per student.

The graph in the middle left hand side of the page shows the annual savings if Total Operating Expenditures per student, excluding Certificated Teacher Salaries and Benefits, had only increased at the same rate as PCPI in FY 07-08. Note that for FY 08-09 the calculation shown is for the savings if the increase in such Operating Expenditures per student (i.e., excluding Certificated Teacher Salaries and Benefits) was held at zero, not decreased at the rate PCPI decreased. Below each year is the number of teachers that could have been employed by those savings.

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed. For FY 08-09, this district ranked 236 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In Lake Tahoe Unified Total Operating Expenditures per student (excluding capital), grew by 29% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In Lake Tahoe Unified, 24% of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated 0 additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 12% of Certificated Teacher Salary expenditures. This amount ranked 179 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 60%.

This district is in quadrant 3. (See Chart 3-6, pp. 104-105)

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

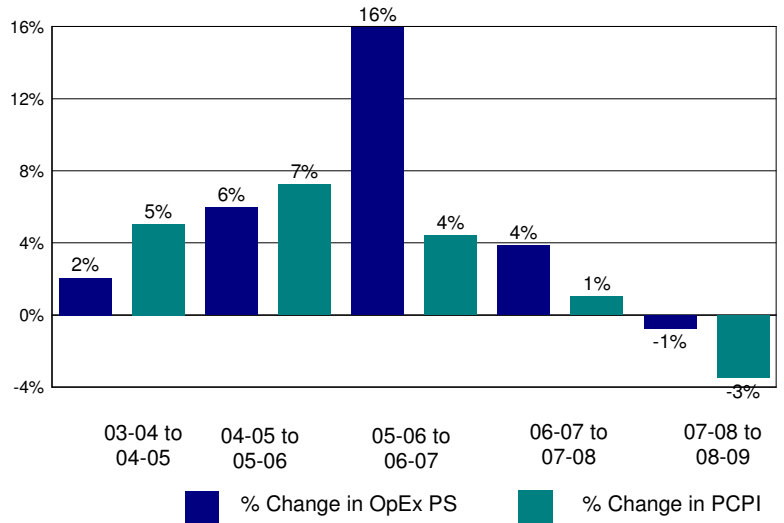

- Total Certificated Teacher Salaries (Object 1100) & Estimated Benefits
- Total Instructional Aide Salaries (Object 2100) & Estimated Benefits
- Approved Textbooks and Books (Objects 4100 & 4200)
- Materials and Supplies expenditures (Object 4300) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180 and 1190)
- Professional/Consulting Services/Subagreements for Services (Objects 5100 and 5800) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180, 1190)

District Profile: Lakeport Unified

The graph in the top right corner shows the difference between the change in the district's Total Operating Expenditures (excluding capital) per student (blue bar) and California Per Capita Personal Income (green bar). [See the Methodology for a full description for how this is calculated]. Lakeport Unified spent \$8,103 per student, which ranked 784 out of the 955 districts for which this information was available, with the top ranked district spending the most per student.

The graph in the middle left hand side of the page shows the annual savings if Total Operating Expenditures per student, excluding Certificated Teacher Salaries and Benefits, had only increased at the same rate as PCPI in FY 07-08. Note that for FY 08-09 the calculation shown is for the savings if the increase in such Operating Expenditures per student (i.e., excluding Certificated Teacher Salaries and Benefits) was held at zero, not decreased at the rate PCPI decreased. Below each year is the number of teachers that could have been employed by those savings.

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed. For FY 08-09, this district ranked 504 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In Lakeport Unified Total Operating Expenditures per student (excluding capital), grew by 13% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In Lakeport Unified, 25% of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated 0 additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 19% of Certificated Teacher Salary expenditures. This amount ranked 698 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 55%.

This district is in quadrant 4. (See Chart 3-6, pp. 104-105)

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

District Profile: Lancaster Elementary

The graph in the top right corner shows the difference between the change in the district's Total Operating Expenditures (excluding capital) per student (blue bar) and California Per Capita Personal Income (green bar). [See the Methodology for a full description for how this is calculated]. Lancaster Elementary spent \$8,434 per student, which ranked 673 out of the 955 districts for which this information was available, with the top ranked district spending the most per student.

The graph in the middle left hand side of the page shows the annual savings if Total Operating Expenditures per student, excluding Certificated Teacher Salaries and Benefits, had only increased at the same rate as PCPI in FY 07-08. Note that for FY 08-09 the calculation shown is for the savings if the increase in such Operating Expenditures per student (i.e., excluding Certificated Teacher Salaries and Benefits) was held at zero, not decreased at the rate PCPI decreased. Below each year is the number of teachers that could have been employed by those savings.

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed. For FY 08-09, this district ranked 464 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In Lancaster Elementary Total Operating Expenditures per student (excluding capital), grew by 20% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In Lancaster Elementary, 23% of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated 1 additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 11% of Certificated Teacher Salary expenditures. This amount ranked 128 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 59%.

This district is in quadrant 4. (See Chart 3-6, pp. 104-105)

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

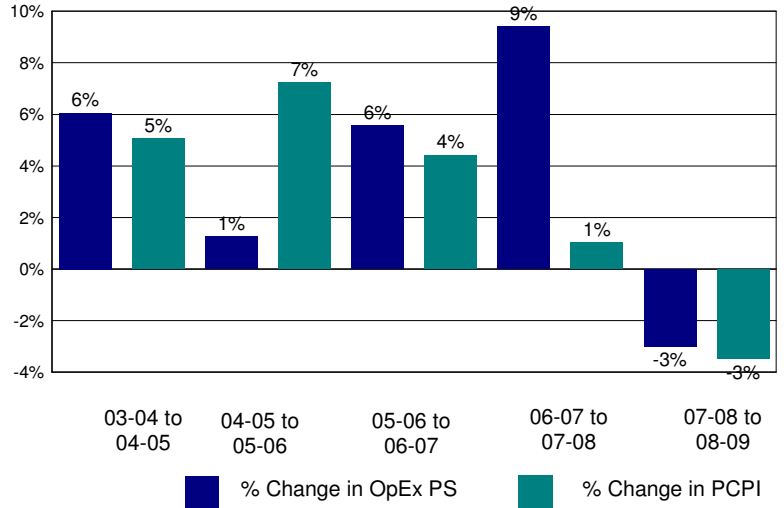

- Total Certificated Teacher Salaries (Object 1100) & Estimated Benefits
- Total Instructional Aide Salaries (Object 2100) & Estimated Benefits
- Approved Textbooks and Books (Objects 4100 & 4200)
- Materials and Supplies expenditures (Object 4300) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180 and 1190)
- Professional/Consulting Services/Subagreements for Services (Objects 5100 and 5800) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180, 1190)

District Profile: Larkspur Elementary

The graph in the top right corner shows the difference between the change in the district's Total Operating Expenditures (excluding capital) per student (blue bar) and California Per Capita Personal Income (green bar). [See the Methodology for a full description for how this is calculated]. Larkspur Elementary spent \$10,600 per student, which ranked 251 out of the 955 districts for which this information was available, with the top ranked district spending the most per student.

The graph in the middle left hand side of the page shows the annual savings if Total Operating Expenditures per student, excluding Certificated Teacher Salaries and Benefits, had only increased at the same rate as PCPI in FY 07-08. Note that for FY 08-09 the calculation shown is for the savings if the increase in such Operating Expenditures per student (i.e., excluding Certificated Teacher Salaries and Benefits) was held at zero, not decreased at the rate PCPI decreased. Below each year is the number of teachers that could have been employed by those savings.

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed. For FY 08-09, this district ranked 161 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In Larkspur Elementary Total Operating Expenditures per student (excluding capital), grew by 25% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In Larkspur Elementary, 37% of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated 0 additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 19% of Certificated Teacher Salary expenditures. This amount ranked 700 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 64%.

This district is in quadrant 3. (See Chart 3-6, pp. 104-105)

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

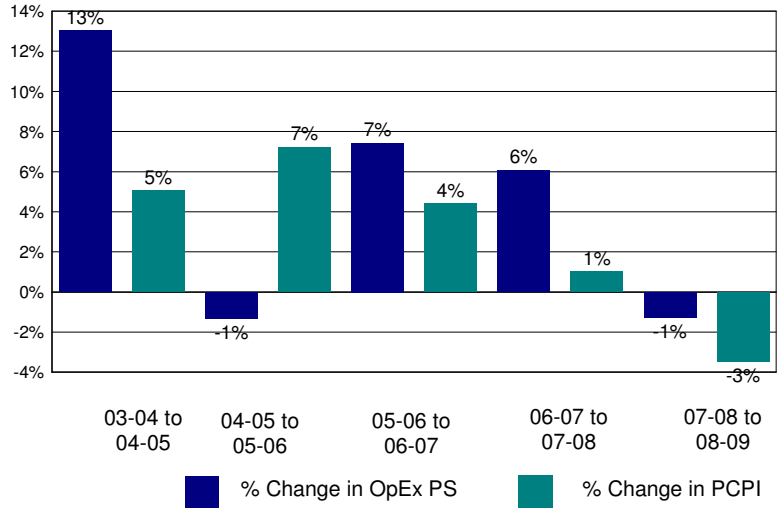

- Total Certificated Teacher Salaries (Object 1100) & Estimated Benefits
- Total Instructional Aide Salaries (Object 2100) & Estimated Benefits

District Profile: Laton Joint Unified

The graph in the top right corner shows the difference between the change in the district's Total Operating Expenditures (excluding capital) per student (blue bar) and California Per Capita Personal Income (green bar). [See the Methodology for a full description for how this is calculated]. Laton Joint Unified spent \$8,917 per student, which ranked 520 out of the 955 districts for which this information was available, with the top ranked district spending the most per student.

The graph in the middle left hand side of the page shows the annual savings if Total Operating Expenditures per student, excluding Certificated Teacher Salaries and Benefits, had only increased at the same rate as PCPI in FY 07-08. Note that for FY 08-09 the calculation shown is for the savings if the increase in such Operating Expenditures per student (i.e., excluding Certificated Teacher Salaries and Benefits) was held at zero, not decreased at the rate PCPI decreased. Below each year is the number of teachers that could have been employed by those savings.

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed. For FY 08-09, this district ranked 417 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In Laton Joint Unified Total Operating Expenditures per student (excluding capital), grew by 19% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In Laton Joint Unified, 15% of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated 3 additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 14% of Certificated Teacher Salary expenditures. This amount ranked 400 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 58%.

This district is in quadrant 1. (See Chart 3-6, pp. 104-105)

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

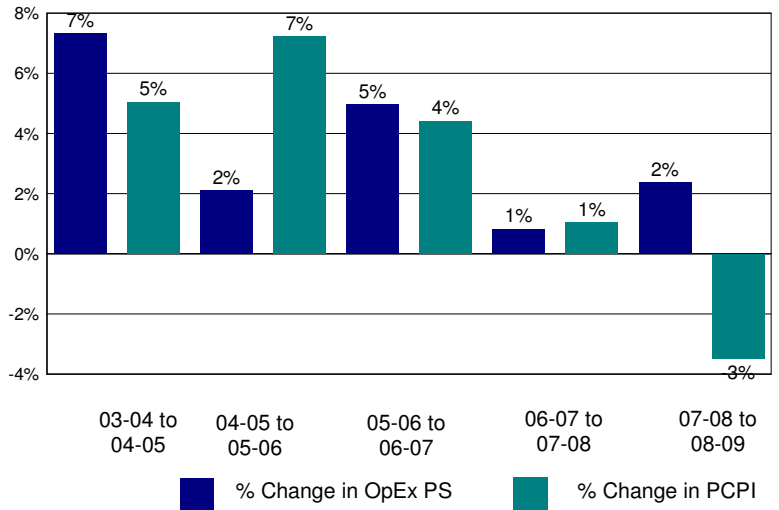

- Total Certificated Teacher Salaries (Object 1100) & Estimated Benefits
- Total Instructional Aide Salaries (Object 2100) & Estimated Benefits
- Approved Textbooks and Books (Objects 4100 & 4200)
- Materials and Supplies expenditures (Object 4300) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180 and 1190)
- Professional/Consulting Services/Subagreements for Services (Objects 5100 and 5800) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180, 1190)

District Profile: Latrobe Elementary

The graph in the top right corner shows the difference between the change in the district's Total Operating Expenditures (excluding capital) per student (blue bar) and California Per Capita Personal Income (green bar). [See the Methodology for a full description for how this is calculated]. Latrobe Elementary spent \$10,588 per student, which ranked 253 out of the 955 districts for which this information was available, with the top ranked district spending the most per student.

The graph in the middle left hand side of the page shows the annual savings if Total Operating Expenditures per student, excluding Certificated Teacher Salaries and Benefits, had only increased at the same rate as PCPI in FY 07-08. Note that for FY 08-09 the calculation shown is for the savings if the increase in such Operating Expenditures per student (i.e., excluding Certificated Teacher Salaries and Benefits) was held at zero, not decreased at the rate PCPI decreased. Below each year is the number of teachers that could have been employed by those savings.

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed. For FY 08-09, this district ranked 440 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In Latrobe Elementary Total Operating Expenditures per student (excluding capital), grew by 56% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In Latrobe Elementary, 18% of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated 2 additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 36% of Certificated Teacher Salary expenditures. This amount ranked 916 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 56%.

This district is in quadrant 3. (See Chart 3-6, pp. 104-105)

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

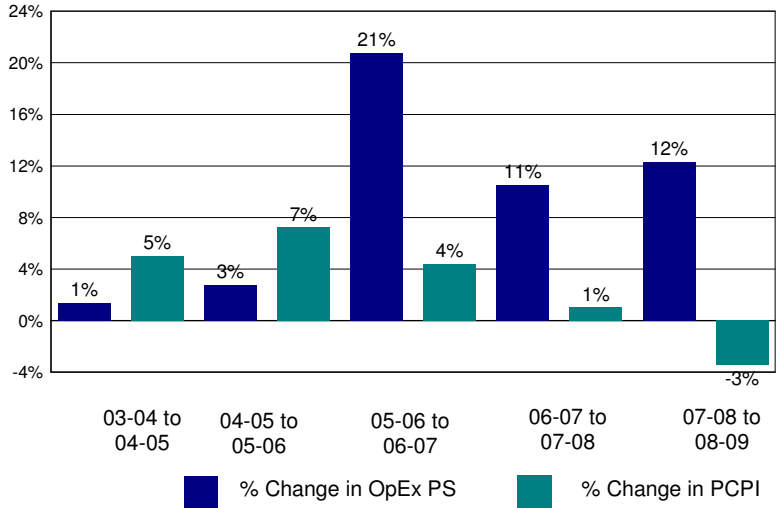

- Total Certificated Teacher Salaries (Object 1100) & Estimated Benefits

District Profile: Leggett Valley Unified

The graph in the top right corner shows the difference between the change in the district's Total Operating Expenditures (excluding capital) per student (blue bar) and California Per Capita Personal Income (green bar). [See the Methodology for a full description for how this is calculated]. Leggett Valley Unified spent \$21,231 per student, which ranked 41 out of the 955 districts for which this information was available, with the top ranked district spending the most per student.

The graph in the middle left hand side of the page shows the annual savings if Total Operating Expenditures per student, excluding Certificated Teacher Salaries and Benefits, had only increased at the same rate as PCPI in FY 07-08. Note that for FY 08-09 the calculation shown is for the savings if the increase in such Operating Expenditures per student (i.e., excluding Certificated Teacher Salaries and Benefits) was held at zero, not decreased at the rate PCPI decreased. Below each year is the number of teachers that could have been employed by those savings.

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed. For FY 08-09, this district ranked 887 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In Leggett Valley Unified Total Operating Expenditures per student (excluding capital), grew by 40% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In Leggett Valley Unified, % of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated 4 additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 22% of Certificated Teacher Salary expenditures. This amount ranked 800 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 48%.

This district is in quadrant 3. (See Chart 3-6, pp. 104-105)

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

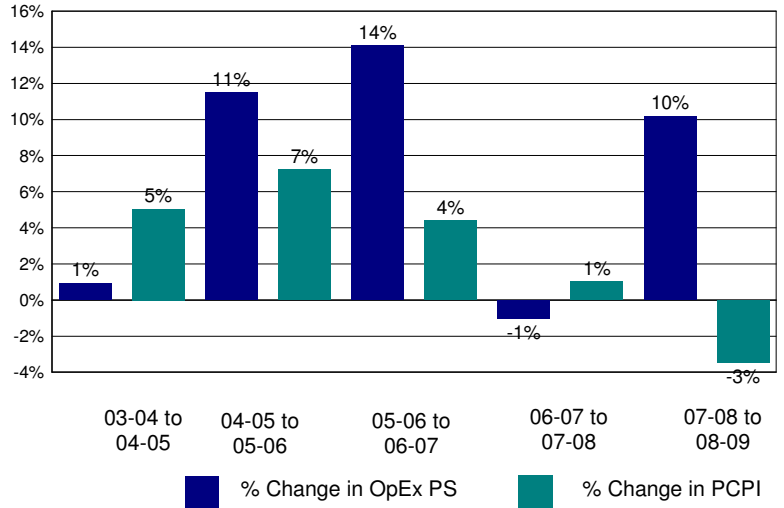

- Total Certificated Teacher Salaries (Object 1100) & Estimated Benefits
- Total Instructional Aide Salaries (Object 2100) & Estimated Benefits
- Approved Textbooks and Books (Objects 4100 & 4200)
- Materials and Supplies expenditures (Object 4300) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180 and 1190)
- Professional/Consulting Services/Subagreements for Services (Objects 5100 and 5800) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180, 1190)

District Profile: Lemon Grove Elementary

The graph in the top right corner shows the difference between the change in the district's Total Operating Expenditures (excluding capital) per student (blue bar) and California Per Capita Personal Income (green bar). [See the Methodology for a full description for how this is calculated]. Lemon Grove Elementary spent \$8,448 per student, which ranked 670 out of the 955 districts for which this information was available, with the top ranked district spending the most per student.

The graph in the middle left hand side of the page shows the annual savings if Total Operating Expenditures per student, excluding Certificated Teacher Salaries and Benefits, had only increased at the same rate as PCPI in FY 07-08. Note that for FY 08-09 the calculation shown is for the savings if the increase in such Operating Expenditures per student (i.e., excluding Certificated Teacher Salaries and Benefits) was held at zero, not decreased at the rate PCPI decreased. Below each year is the number of teachers that could have been employed by those savings.

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed. For FY 08-09, this district ranked 61 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In Lemon Grove Elementary Total Operating Expenditures per student (excluding capital), grew by 27% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In Lemon Grove Elementary, 30% of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated 0 additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 14% of Certificated Teacher Salary expenditures. This amount ranked 358 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 66%.

This district is in quadrant 3. (See Chart 3-6, pp. 104-105)

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

District Profile: Liberty Union High

The graph in the top right corner shows the difference between the change in the district's Total Operating Expenditures (excluding capital) per student (blue bar) and California Per Capita Personal Income (green bar). [See the Methodology for a full description for how this is calculated]. Liberty Union High spent \$8,579 per student, which ranked 627 out of the 955 districts for which this information was available, with the top ranked district spending the most per student.

The graph in the middle left hand side of the page shows the annual savings if Total Operating Expenditures per student, excluding Certificated Teacher Salaries and Benefits, had only increased at the same rate as PCPI in FY 07-08. Note that for FY 08-09 the calculation shown is for the savings if the increase in such Operating Expenditures per student (i.e., excluding Certificated Teacher Salaries and Benefits) was held at zero, not decreased at the rate PCPI decreased. Below each year is the number of teachers that could have been employed by those savings.

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed. For FY 08-09, this district ranked 431 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In Liberty Union High Total Operating Expenditures per student (excluding capital), grew by 18% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In Liberty Union High, 27% of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated 0 additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 16% of Certificated Teacher Salary expenditures. This amount ranked 492 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 58%.

This district is in quadrant 2. (See Chart 3-6, pp. 104-105)

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

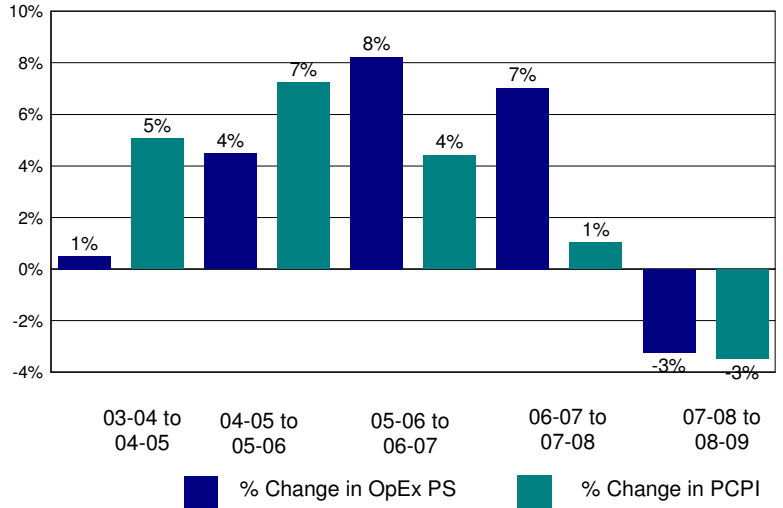

- Total Certificated Teacher Salaries (Object 1100) & Estimated Benefits
- Total Instructional Aide Salaries (Object 2100) & Estimated Benefits
- Approved Textbooks and Books (Objects 4100 & 4200)
- Materials and Supplies expenditures (Object 4300) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180 and 1190)
- Professional/Consulting Services/Subagreements for Services (Objects 5100 and 5800) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180, 1190)

District Profile: Linns Valley-Poso Flat Union

The graph in the top right corner shows the difference between the change in the district's Total Operating Expenditures (excluding capital) per student (blue bar) and California Per Capita Personal Income (green bar). [See the Methodology for a full description for how this is calculated]. Linns Valley-Poso Flat Union spent \$16,468 per student, which ranked 77 out of the 955 districts for which this information was available, with the top ranked district spending the most per student.

The graph in the middle left hand side of the page shows the annual savings if Total Operating Expenditures per student, excluding Certificated Teacher Salaries and Benefits, had only increased at the same rate as PCPI in FY 07-08. Note that for FY 08-09 the calculation shown is for the savings if the increase in such Operating Expenditures per student (i.e., excluding Certificated Teacher Salaries and Benefits) was held at zero, not decreased at the rate PCPI decreased. Below each year is the number of teachers that could have been employed by those savings.

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed. For FY 08-09, this district ranked 950 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In Linns Valley-Poso Flat Union Total Operating Expenditures per student (excluding capital), grew by 21% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In Linns Valley-Poso Flat Union, % of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 46% of Certificated Teacher Salary expenditures. This amount ranked 938 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 55%.

This district is in quadrant 1. (See Chart 3-6, pp. 104-105)

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

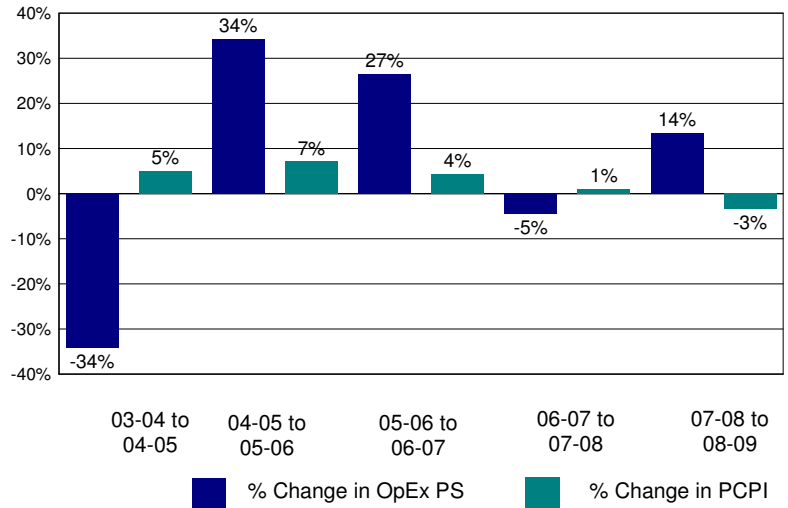

- Total Certificated Teacher Salaries (Object 1100) & Estimated Benefits
- Total Instructional Aide Salaries (Object 2100) & Estimated Benefits
- Approved Textbooks and Books (Objects 4100 & 4200)

District Profile: Little Lake City Elementary

The graph in the top right corner shows the difference between the change in the district's Total Operating Expenditures (excluding capital) per student (blue bar) and California Per Capita Personal Income (green bar). [See the Methodology for a full description for how this is calculated]. Little Lake City Elementary spent \$8,267 per student, which ranked 728 out of the 955 districts for which this information was available, with the top ranked district spending the most per student.

The graph in the middle left hand side of the page shows the annual savings if Total Operating Expenditures per student, excluding Certificated Teacher Salaries and Benefits, had only increased at the same rate as PCPI in FY 07-08. Note that for FY 08-09 the calculation shown is for the savings if the increase in such Operating Expenditures per student (i.e., excluding Certificated Teacher Salaries and Benefits) was held at zero, not decreased at the rate PCPI decreased. Below each year is the number of teachers that could have been employed by those savings.

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed. For FY 08-09, this district ranked 137 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In Little Lake City Elementary Total Operating Expenditures per student (excluding capital), grew by 27% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In Little Lake City Elementary, 22% of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated 7 additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 12% of Certificated Teacher Salary expenditures. This amount ranked 203 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 68%.

This district is in quadrant 3. (See Chart 3-6, pp. 104-105)

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

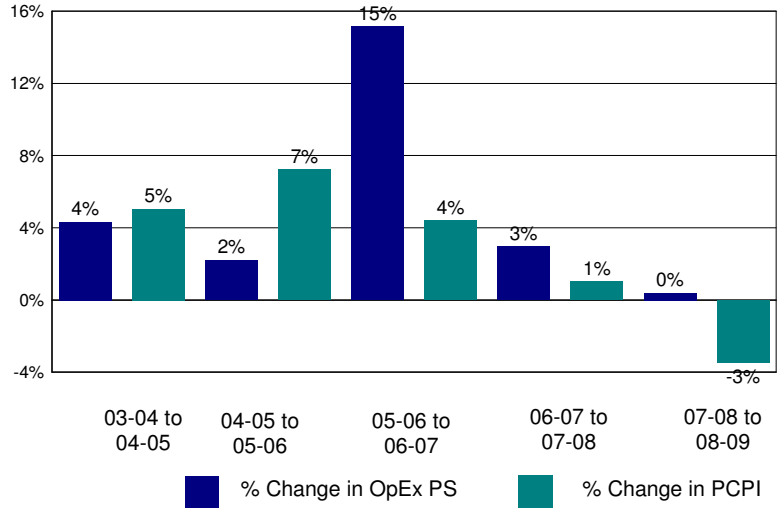

- Total Certificated Teacher Salaries (Object 1100) & Estimated Benefits
- Total Instructional Aide Salaries (Object 2100) & Estimated Benefits
- Approved Textbooks and Books (Objects 4100 & 4200)
- Materials and Supplies expenditures (Object 4300) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180 and 1190)
- Professional/Consulting Services/Subagreements for Services (Objects 5100 and 5800) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180, 1190)

District Profile: Lodi Unified

The graph in the top right corner shows the difference between the change in the district's Total Operating Expenditures (excluding capital) per student (blue bar) and California Per Capita Personal Income (green bar). [See the Methodology for a full description for how this is calculated]. Lodi Unified spent \$9,196 per student, which ranked 449 out of the 955 districts for which this information was available, with the top ranked district spending the most per student.

The graph in the middle left hand side of the page shows the annual savings if Total Operating Expenditures per student, excluding Certificated Teacher Salaries and Benefits, had only increased at the same rate as PCPI in FY 07-08. Note that for FY 08-09 the calculation shown is for the savings if the increase in such Operating Expenditures per student (i.e., excluding Certificated Teacher Salaries and Benefits) was held at zero, not decreased at the rate PCPI decreased. Below each year is the number of teachers that could have been employed by those savings.

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed. For FY 08-09, this district ranked 311 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In Lodi Unified Total Operating Expenditures per student (excluding capital), grew by 27% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In Lodi Unified, 28% of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated 0 additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 14% of Certificated Teacher Salary expenditures. This amount ranked 303 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 62%.

This district is in quadrant 3. (See Chart 3-6, pp. 104-105)

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

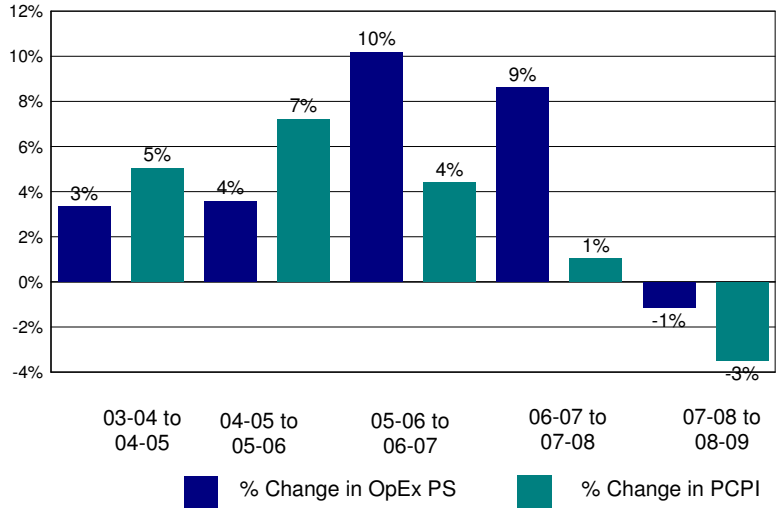

- Total Certificated Teacher Salaries (Object 1100) & Estimated Benefits
- Total Instructional Aide Salaries (Object 2100) & Estimated Benefits
- Approved Textbooks and Books (Objects 4100 & 4200)
- Materials and Supplies expenditures (Object 4300) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180 and 1190)
- Professional/Consulting Services/Subagreements for Services (Objects 5100 and 5800) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180, 1190)

District Profile: Loomis Union Elementary

The graph in the top right corner shows the difference between the change in the district's Total Operating Expenditures (excluding capital) per student (blue bar) and California Per Capita Personal Income (green bar). [See the Methodology for a full description for how this is calculated]. Loomis Union Elementary spent \$8,277 per student, which ranked 722 out of the 955 districts for which this information was available, with the top ranked district spending the most per student.

The graph in the middle left hand side of the page shows the annual savings if Total Operating Expenditures per student, excluding Certificated Teacher Salaries and Benefits, had only increased at the same rate as PCPI in FY 07-08. Note that for FY 08-09 the calculation shown is for the savings if the increase in such Operating Expenditures per student (i.e., excluding Certificated Teacher Salaries and Benefits) was held at zero, not decreased at the rate PCPI decreased. Below each year is the number of teachers that could have been employed by those savings.

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed. For FY 08-09, this district ranked 489 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In Loomis Union Elementary Total Operating Expenditures per student (excluding capital), grew by 30% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In Loomis Union Elementary, 26% of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated 24 additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 15% of Certificated Teacher Salary expenditures. This amount ranked 405 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 58%.

This district is in quadrant 3. (See Chart 3-6, pp. 104-105)

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

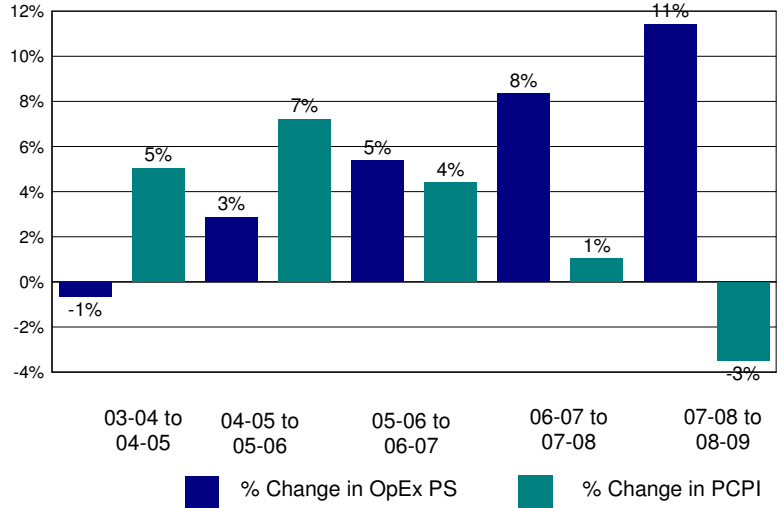

- Total Certificated Teacher Salaries (Object 1100) & Estimated Benefits
- Total Instructional Aide Salaries (Object 2100) & Estimated Benefits
- Approved Textbooks and Books (Objects 4100 & 4200)
- Materials and Supplies expenditures (Object 4300) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180 and 1190)
- Professional/Consulting Services/Subagreements for Services (Objects 5100 and 5800) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180, 1190)

District Profile: Los Gatos Union Elementary

The graph in the top right corner shows the difference between the change in the district's Total Operating Expenditures (excluding capital) per student (blue bar) and California Per Capita Personal Income (green bar). [See the Methodology for a full description for how this is calculated]. Los Gatos Union Elementary spent \$9,289 per student, which ranked 428 out of the 955 districts for which this information was available, with the top ranked district spending the most per student.

The graph in the middle left hand side of the page shows the annual savings if Total Operating Expenditures per student, excluding Certificated Teacher Salaries and Benefits, had only increased at the same rate as PCPI in FY 07-08. Note that for FY 08-09 the calculation shown is for the savings if the increase in such Operating Expenditures per student (i.e., excluding Certificated Teacher Salaries and Benefits) was held at zero, not decreased at the rate PCPI decreased. Below each year is the number of teachers that could have been employed by those savings.

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed. For FY 08-09, this district ranked 28 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In Los Gatos Union Elementary Total Operating Expenditures per student (excluding capital), grew by 23% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In Los Gatos Union Elementary, 29% of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated 0 additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 15% of Certificated Teacher Salary expenditures. This amount ranked 454 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 66%.

This district is in quadrant 2. (See Chart 3-6, pp. 104-105)

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

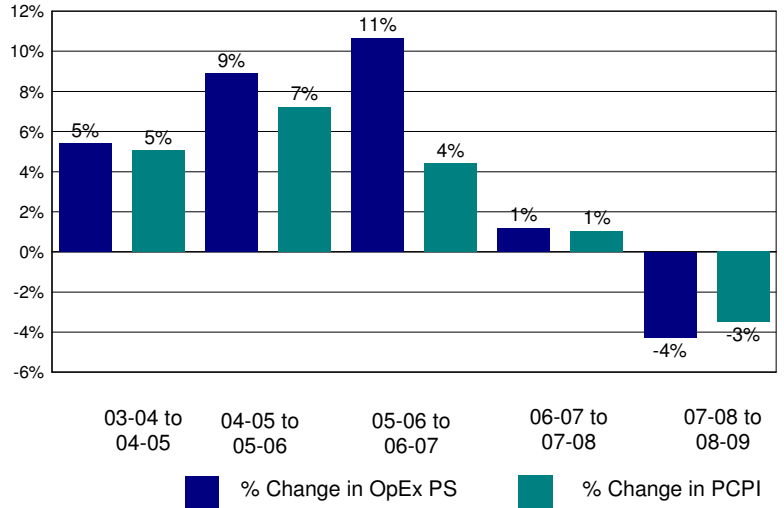

- Total Certificated Teacher Salaries (Object 1100) & Estimated Benefits
- Total Instructional Aide Salaries (Object 2100) & Estimated Benefits
- Approved Textbooks and Books (Objects 4100 & 4200)
- Materials and Supplies expenditures (Object 4300) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180 and 1190)
- Professional/Consulting Services/Subagreements for Services (Objects 5100 and 5800) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180, 1190)

District Profile: Lowell Joint Elementary

The graph in the top right corner shows the difference between the change in the district's Total Operating Expenditures (excluding capital) per student (blue bar) and California Per Capita Personal Income (green bar). [See the Methodology for a full description for how this is calculated]. Lowell Joint Elementary spent \$7,599 per student, which ranked 875 out of the 955 districts for which this information was available, with the top ranked district spending the most per student.

The graph in the middle left hand side of the page shows the annual savings if Total Operating Expenditures per student, excluding Certificated Teacher Salaries and Benefits, had only increased at the same rate as PCPI in FY 07-08. Note that for FY 08-09 the calculation shown is for the savings if the increase in such Operating Expenditures per student (i.e., excluding Certificated Teacher Salaries and Benefits) was held at zero, not decreased at the rate PCPI decreased. Below each year is the number of teachers that could have been employed by those savings.

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed. For FY 08-09, this district ranked 174 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In Lowell Joint Elementary Total Operating Expenditures per student (excluding capital), grew by 16% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In Lowell Joint Elementary, 15% of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated 0 additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 16% of Certificated Teacher Salary expenditures. This amount ranked 542 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 64%.

This district is in quadrant 3. (See Chart 3-6, pp. 104-105)

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

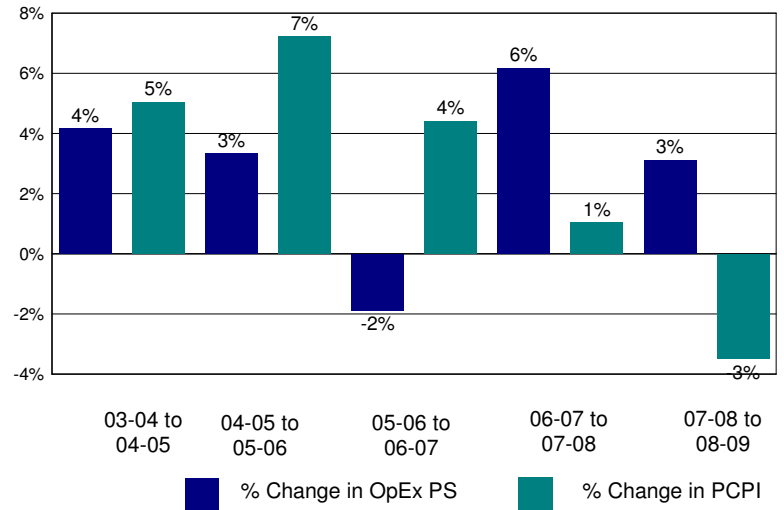

- Total Certificated Teacher Salaries (Object 1100) & Estimated Benefits
- Total Instructional Aide Salaries (Object 2100) & Estimated Benefits
- Approved Textbooks and Books (Objects 4100 & 4200)
- Materials and Supplies expenditures (Object 4300) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180 and 1190)
- Professional/Consulting Services/Subagreements for Services (Objects 5100 and 5800) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180, 1190)

District Profile: Madera Unified

The graph in the top right corner shows the difference between the change in the district's Total Operating Expenditures (excluding capital) per student (blue bar) and California Per Capita Personal Income (green bar). [See the Methodology for a full description for how this is calculated]. Madera Unified spent \$7,959 per student, which ranked 821 out of the 955 districts for which this information was available, with the top ranked district spending the most per student.

The graph in the middle left hand side of the page shows the annual savings if Total Operating Expenditures per student, excluding Certificated Teacher Salaries and Benefits, had only increased at the same rate as PCPI in FY 07-08. Note that for FY 08-09 the calculation shown is for the savings if the increase in such Operating Expenditures per student (i.e., excluding Certificated Teacher Salaries and Benefits) was held at zero, not decreased at the rate PCPI decreased. Below each year is the number of teachers that could have been employed by those savings.

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed. For FY 08-09, this district ranked 399 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In Madera Unified Total Operating Expenditures per student (excluding capital), grew by 16% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In Madera Unified, 27% of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated 0 additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 15% of Certificated Teacher Salary expenditures. This amount ranked 469 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 57%.

This district is in quadrant 4. (See Chart 3-6, pp. 104-105)

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

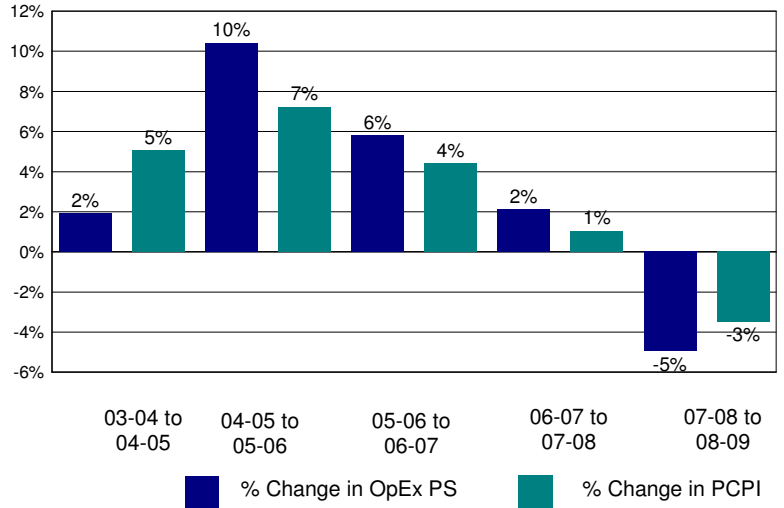

- Total Certificated Teacher Salaries (Object 1100) & Estimated Benefits
- Total Instructional Aide Salaries (Object 2100) & Estimated Benefits
- Approved Textbooks and Books (Objects 4100 & 4200)
- Materials and Supplies expenditures (Object 4300) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180 and 1190)
- Professional/Consulting Services/Subagreements for Services (Objects 5100 and 5800) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180, 1190)

The graph in the top right corner shows the difference between the change in the district's Total Operating Expenditures (excluding capital) per student (blue bar) and California Per Capita Personal Income (green bar). [See the Methodology for a full description for how this is calculated]. Manteca Unified spent \$8,002 per student, which ranked 812 out of the 955 districts for which this information was available, with the top ranked district spending the most per student.

The graph in the middle left hand side of the page shows the annual savings if Total Operating Expenditures per student, excluding Certificated Teacher Salaries and Benefits, had only increased at the same rate as PCPI in FY 07-08. Note that for FY 08-09 the calculation shown is for the savings if the increase in such Operating Expenditures per student (i.e., excluding Certificated Teacher Salaries and Benefits) was held at zero, not decreased at the rate PCPI decreased. Below each year is the number of teachers that could have been employed by those savings.

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed. For FY 08-09, this district ranked 332 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In Manteca Unified Total Operating Expenditures per student (excluding capital), grew by 32% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In Manteca Unified, 27% of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated 0 additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 17% of Certificated Teacher Salary expenditures. This amount ranked 582 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 59%.

This district is in quadrant 3. (See Chart 3-6, pp. 104-105)

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

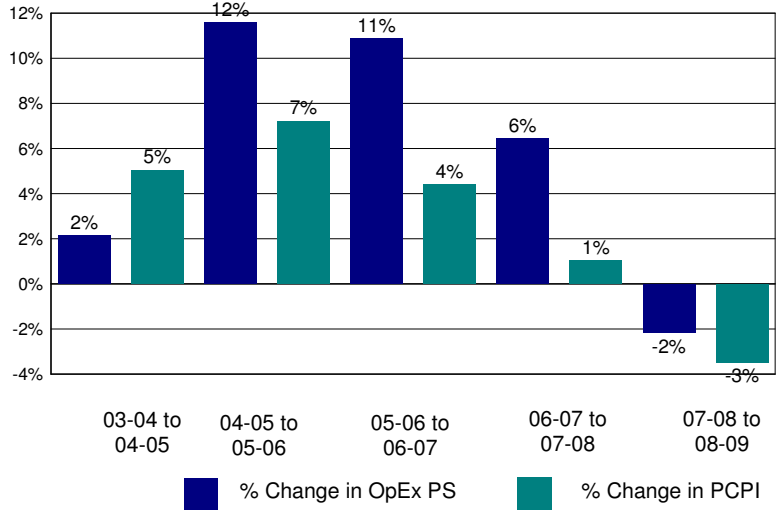

- Total Certificated Teacher Salaries (Object 1100) & Estimated Benefits
- Total Instructional Aide Salaries (Object 2100) & Estimated Benefits
- Approved Textbooks and Books (Objects 4100 & 4200)
- Materials and Supplies expenditures (Object 4300) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180 and 1190)
- Professional/Consulting Services/Subagreements for Services (Objects 5100 and 5800) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180, 1190)

The graph in the top right corner shows the difference between the change in the district's Total Operating Expenditures (excluding capital) per student (blue bar) and California Per Capita Personal Income (green bar). [See the Methodology for a full description for how this is calculated]. Maricopa Unified spent \$12,577 per student, which ranked 152 out of the 955 districts for which this information was available, with the top ranked district spending the most per student.

The graph in the middle left hand side of the page shows the annual savings if Total Operating Expenditures per student, excluding Certificated Teacher Salaries and Benefits, had only increased at the same rate as PCPI in FY 07-08. Note that for FY 08-09 the calculation shown is for the savings if the increase in such Operating Expenditures per student (i.e., excluding Certificated Teacher Salaries and Benefits) was held at zero, not decreased at the rate PCPI decreased. Below each year is the number of teachers that could have been employed by those savings.

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed. For FY 08-09, this district ranked 806 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In Maricopa Unified Total Operating Expenditures per student (excluding capital), grew by 35% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In Maricopa Unified, 12% of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated 0 additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 9% of Certificated Teacher Salary expenditures. This amount ranked 34 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 50%.

This district is in quadrant 3. (See Chart 3-6, pp. 104-105)

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

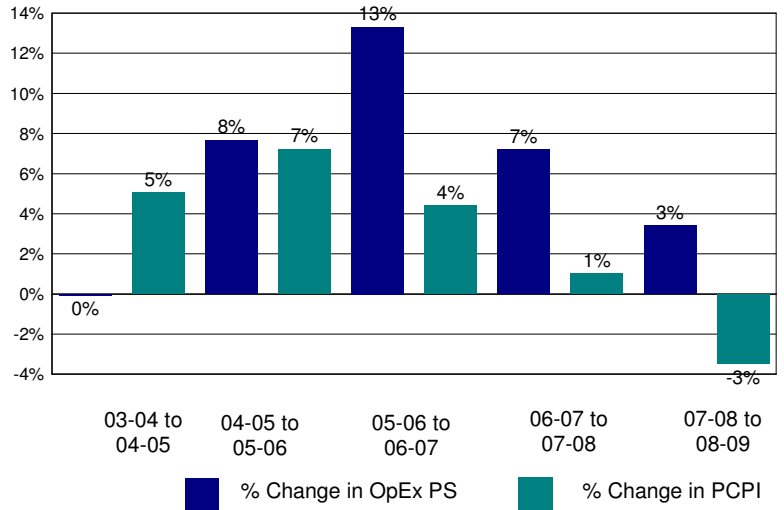

- Total Certificated Teacher Salaries (Object 1100) & Estimated Benefits
- Total Instructional Aide Salaries (Object 2100) & Estimated Benefits
- Approved Textbooks and Books (Objects 4100 & 4200)
- Materials and Supplies expenditures (Object 4300) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180 and 1190)
- Professional/Consulting Services/Subagreements for Services (Objects 5100 and 5800) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180, 1190)

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed. For FY 08-09, this district ranked 558 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In Mattole Unified Total Operating Expenditures per student (excluding capital), grew by 48% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In Mattole Unified, % of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 11% of Certificated Teacher Salary expenditures. This amount ranked 93 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 56%.

This district is in quadrant 3. (See Chart 3-6, pp. 104-105)

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

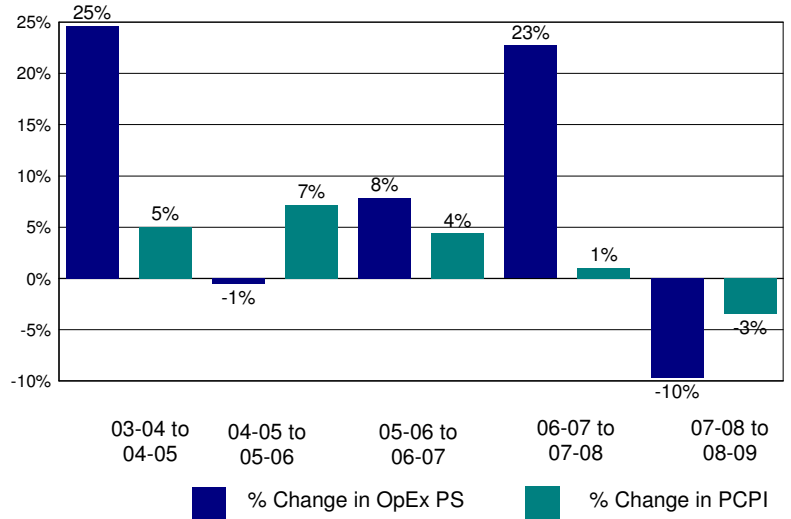

- Total Certificated Teacher Salaries (Object 1100) & Estimated Benefits
- Total Instructional Aide Salaries (Object 2100) & Estimated Benefits
- Approved Textbooks and Books (Objects 4100 & 4200)
- Materials and Supplies expenditures (Object 4300) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180 and 1190)
- Professional/Consulting Services/Subagreements for Services (Objects 5100 and 5800) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180, 1190)

District Profile: Maxwell Unified

The graph in the top right corner shows the difference between the change in the district's Total Operating Expenditures (excluding capital) per student (blue bar) and California Per Capita Personal Income (green bar). [See the Methodology for a full description for how this is calculated]. Maxwell Unified spent \$9,865 per student, which ranked 332 out of the 955 districts for which this information was available, with the top ranked district spending the most per student.

The graph in the middle left hand side of the page shows the annual savings if Total Operating Expenditures per student, excluding Certificated Teacher Salaries and Benefits, had only increased at the same rate as PCPI in FY 07-08. Note that for FY 08-09 the calculation shown is for the savings if the increase in such Operating Expenditures per student (i.e., excluding Certificated Teacher Salaries and Benefits) was held at zero, not decreased at the rate PCPI decreased. Below each year is the number of teachers that could have been employed by those savings.

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed. For FY 08-09, this district ranked 241 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In Maxwell Unified Total Operating Expenditures per student (excluding capital), grew by 22% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In Maxwell Unified, 7% of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated 2 additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 19% of Certificated Teacher Salary expenditures. This amount ranked 687 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 58%.

This district is in quadrant 3. (See Chart 3-6, pp. 104-105)

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

For FY 08-09, this district ranked 931 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In Mckittrick Elementary Total Operating Expenditures per student (excluding capital), grew by 17% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In Mckittrick Elementary, 9% of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated 2 additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 26% of Certificated Teacher Salary expenditures. This amount ranked 859 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 38%.

This district is in quadrant 2. (See Chart 3-6, pp. 104-105)

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

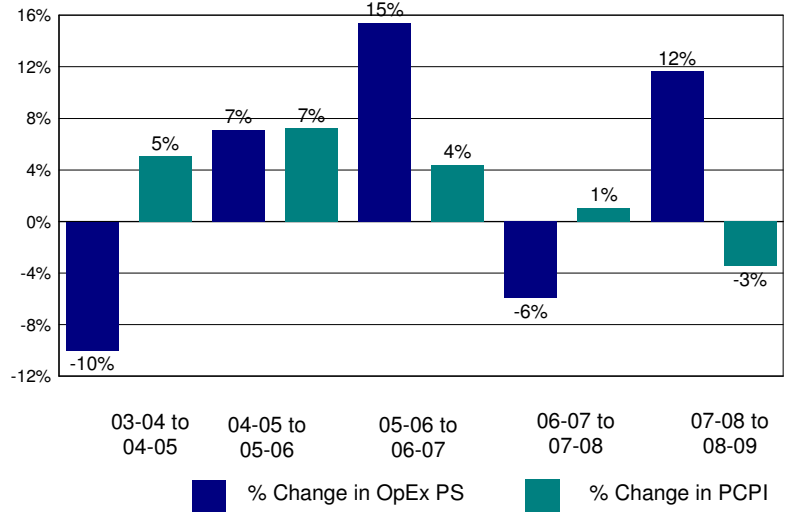

- Total Certificated Teacher Salaries (Object 1100) & Estimated Benefits
- Total Instructional Aide Salaries (Object 2100) & Estimated Benefits
- Approved Textbooks and Books (Objects 4100 & 4200)
- Materials and Supplies expenditures (Object 4300) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180 and 1190)
- Professional/Consulting Services/Subagreements for Services (Objects 5100 and 5800) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180, 1190)

District Profile: McSwain Union Elementary

The graph in the top right corner shows the difference between the change in the district's Total Operating Expenditures (excluding capital) per student (blue bar) and California Per Capita Personal Income (green bar). [See the Methodology for a full description for how this is calculated]. McSwain Union Elementary spent \$7,510 per student, which ranked 889 out of the 955 districts for which this information was available, with the top ranked district spending the most per student.

The graph in the middle left hand side of the page shows the annual savings if Total Operating Expenditures per student, excluding Certificated Teacher Salaries and Benefits, had only increased at the same rate as PCPI in FY 07-08. Note that for FY 08-09 the calculation shown is for the savings if the increase in such Operating Expenditures per student (i.e., excluding Certificated Teacher Salaries and Benefits) was held at zero, not decreased at the rate PCPI decreased. Below each year is the number of teachers that could have been employed by those savings.

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed. For FY 08-09, this district ranked 67 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In McSwain Union Elementary Total Operating Expenditures per student (excluding capital), grew by 27% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In McSwain Union Elementary, 26% of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated 0 additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 19% of Certificated Teacher Salary expenditures. This amount ranked 715 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 63%.

This district is in quadrant 3. (See Chart 3-6, pp. 104-105)

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

District Profile: Menlo Park City Elementary

The graph in the top right corner shows the difference between the change in the district's Total Operating Expenditures (excluding capital) per student (blue bar) and California Per Capita Personal Income (green bar). [See the Methodology for a full description for how this is calculated]. Menlo Park City Elementary spent \$12,533 per student, which ranked 154 out of the 955 districts for which this information was available, with the top ranked district spending the most per student.

The graph in the middle left hand side of the page shows the annual savings if Total Operating Expenditures per student, excluding Certificated Teacher Salaries and Benefits, had only increased at the same rate as PCPI in FY 07-08. Note that for FY 08-09 the calculation shown is for the savings if the increase in such Operating Expenditures per student (i.e., excluding Certificated Teacher Salaries and Benefits) was held at zero, not decreased at the rate PCPI decreased. Below each year is the number of teachers that could have been employed by those savings.

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed. For FY 08-09, this district ranked 15 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In Menlo Park City Elementary Total Operating Expenditures per student (excluding capital), grew by 16% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In Menlo Park City Elementary, 38% of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated 0 additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 15% of Certificated Teacher Salary expenditures. This amount ranked 461 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 71%.

This district is in quadrant 3. (See Chart 3-6, pp. 104-105)

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

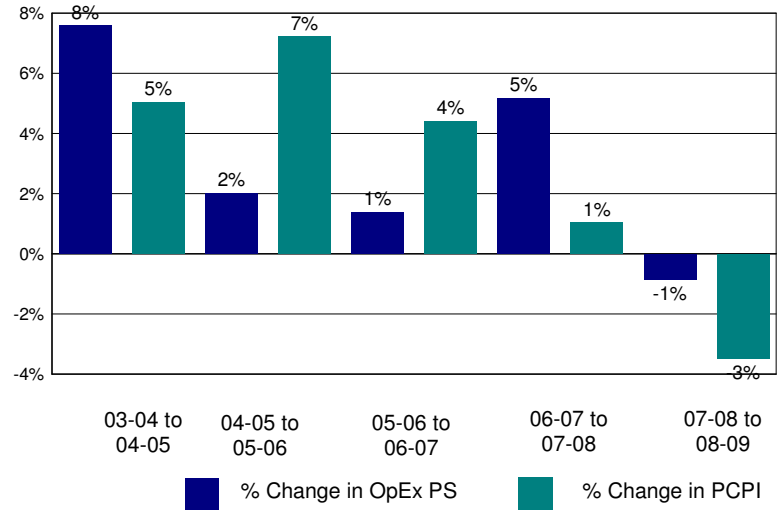

- Total Certificated Teacher Salaries (Object 1100) & Estimated Benefits
- Total Instructional Aide Salaries (Object 2100) & Estimated Benefits
- Approved Textbooks and Books (Objects 4100 & 4200)
- Materials and Supplies expenditures (Object 4300) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180 and 1190)
- Professional/Consulting Services/Subagreements for Services (Objects 5100 and 5800) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180, 1190)

District Profile: Merced City Elementary

The graph in the top right corner shows the difference between the change in the district's Total Operating Expenditures (excluding capital) per student (blue bar) and California Per Capita Personal Income (green bar). [See the Methodology for a full description for how this is calculated]. Merced City Elementary spent \$8,683 per student, which ranked 590 out of the 955 districts for which this information was available, with the top ranked district spending the most per student.

The graph in the middle left hand side of the page shows the annual savings if Total Operating Expenditures per student, excluding Certificated Teacher Salaries and Benefits, had only increased at the same rate as PCPI in FY 07-08. Note that for FY 08-09 the calculation shown is for the savings if the increase in such Operating Expenditures per student (i.e., excluding Certificated Teacher Salaries and Benefits) was held at zero, not decreased at the rate PCPI decreased. Below each year is the number of teachers that could have been employed by those savings.

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed. For FY 08-09, this district ranked 105 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In Merced City Elementary Total Operating Expenditures per student (excluding capital), grew by -1% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In Merced City Elementary, 25% of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated 0 additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 13% of Certificated Teacher Salary expenditures. This amount ranked 257 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 62%.

This district is in quadrant 3. (See Chart 3-6, pp. 104-105)

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

District Profile: Middletown Unified

The graph in the top right corner shows the difference between the change in the district's Total Operating Expenditures (excluding capital) per student (blue bar) and California Per Capita Personal Income (green bar). [See the Methodology for a full description for how this is calculated]. Middletown Unified spent \$8,297 per student, which ranked 716 out of the 955 districts for which this information was available, with the top ranked district spending the most per student.

The graph in the middle left hand side of the page shows the annual savings if Total Operating Expenditures per student, excluding Certificated Teacher Salaries and Benefits, had only increased at the same rate as PCPI in FY 07-08. Note that for FY 08-09 the calculation shown is for the savings if the increase in such Operating Expenditures per student (i.e., excluding Certificated Teacher Salaries and Benefits) was held at zero, not decreased at the rate PCPI decreased. Below each year is the number of teachers that could have been employed by those savings.

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed. For FY 08-09, this district ranked 351 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In Middletown Unified Total Operating Expenditures per student (excluding capital), grew by 27% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In Middletown Unified, 7% of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated 0 additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 16% of Certificated Teacher Salary expenditures. This amount ranked 480 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 59%.

This district is in quadrant 3. (See Chart 3-6, pp. 104-105)

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

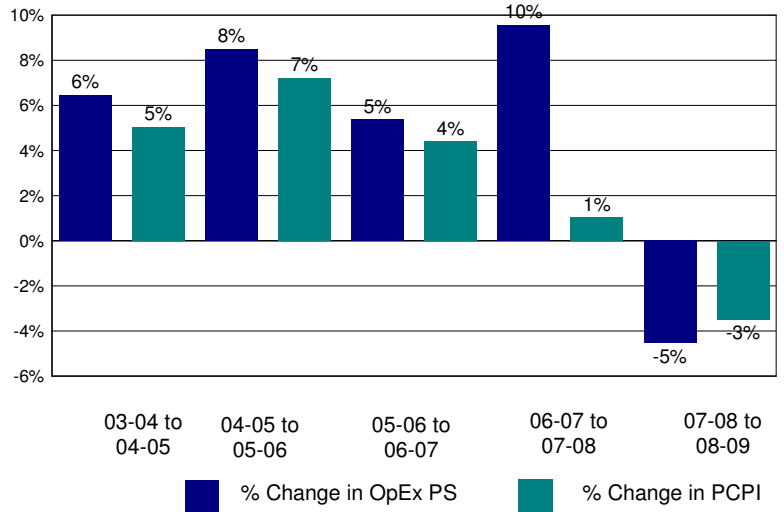

- Total Certificated Teacher Salaries (Object 1100) & Estimated Benefits
- Total Instructional Aide Salaries (Object 2100) & Estimated Benefits
- Approved Textbooks and Books (Objects 4100 & 4200)
- Materials and Supplies expenditures (Object 4300) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180 and 1190)
- Professional/Consulting Services/Subagreements for Services (Objects 5100 and 5800) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180, 1190)

District Profile: Midway Elementary

The graph in the top right corner shows the difference between the change in the district's Total Operating Expenditures (excluding capital) per student (blue bar) and California Per Capita Personal Income (green bar). [See the Methodology for a full description for how this is calculated]. Midway Elementary spent \$25,315 per student, which ranked 25 out of the 955 districts for which this information was available, with the top ranked district spending the most per student.

The graph in the middle left hand side of the page shows the annual savings if Total Operating Expenditures per student, excluding Certificated Teacher Salaries and Benefits, had only increased at the same rate as PCPI in FY 07-08. Note that for FY 08-09 the calculation shown is for the savings if the increase in such Operating Expenditures per student (i.e., excluding Certificated Teacher Salaries and Benefits) was held at zero, not decreased at the rate PCPI decreased. Below each year is the number of teachers that could have been employed by those savings.

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed. For FY 08-09, this district ranked 917 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In Midway Elementary Total Operating Expenditures per student (excluding capital), grew by 39% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In Midway Elementary, 9% of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated 0 additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 19% of Certificated Teacher Salary expenditures. This amount ranked 704 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 38%.

This district is in quadrant 4. (See Chart 3-6, pp. 104-105)

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

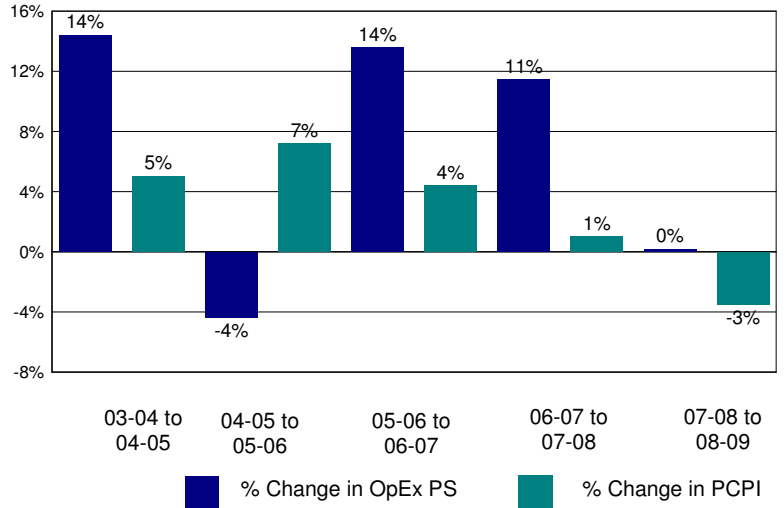

- Total Certificated Teacher Salaries (Object 1100) & Estimated Benefits
- Total Instructional Aide Salaries (Object 2100) & Estimated Benefits

District Profile: Mineral Elementary

The graph in the top right corner shows the difference between the change in the district's Total Operating Expenditures (excluding capital) per student (blue bar) and California Per Capita Personal Income (green bar). [See the Methodology for a full description for how this is calculated]. Mineral Elementary spent \$10,492 per student, which ranked 262 out of the 955 districts for which this information was available, with the top ranked district spending the most per student.

The graph in the middle left hand side of the page shows the annual savings if Total Operating Expenditures per student, excluding Certificated Teacher Salaries and Benefits, had only increased at the same rate as PCPI in FY 07-08. Note that for FY 08-09 the calculation shown is for the savings if the increase in such Operating Expenditures per student (i.e., excluding Certificated Teacher Salaries and Benefits) was held at zero, not decreased at the rate PCPI decreased. Below each year is the number of teachers that could have been employed by those savings.

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed. For FY 08-09, this district ranked 698 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In Mineral Elementary Total Operating Expenditures per student (excluding capital), grew by -39% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In Mineral Elementary, % of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 32% of Certificated Teacher Salary expenditures. This amount ranked 907 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 54%.

This district is in quadrant 1. (See Chart 3-6, pp. 104-105)

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

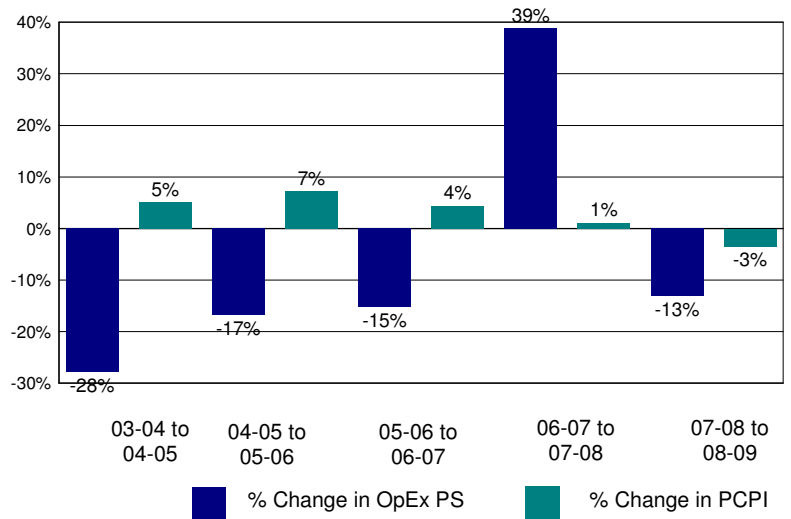

- Total Certificated Teacher Salaries (Object 1100) & Estimated Benefits
- Total Instructional Aide Salaries (Object 2100) & Estimated Benefits
- Approved Textbooks and Books (Objects 4100 & 4200)
- Materials and Supplies expenditures (Object 4300) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180 and 1190)
- Professional/Consulting Services/Subagreements for Services (Objects 5100 and 5800) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180, 1190)

District Profile: Mission Union Elementary

The graph in the top right corner shows the difference between the change in the district's Total Operating Expenditures (excluding capital) per student (blue bar) and California Per Capita Personal Income (green bar). [See the Methodology for a full description for how this is calculated]. Mission Union Elementary spent \$8,180 per student, which ranked 754 out of the 955 districts for which this information was available, with the top ranked district spending the most per student.

The graph in the middle left hand side of the page shows the annual savings if Total Operating Expenditures per student, excluding Certificated Teacher Salaries and Benefits, had only increased at the same rate as PCPI in FY 07-08. Note that for FY 08-09 the calculation shown is for the savings if the increase in such Operating Expenditures per student (i.e., excluding Certificated Teacher Salaries and Benefits) was held at zero, not decreased at the rate PCPI decreased. Below each year is the number of teachers that could have been employed by those savings.

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed. For FY 08-09, this district ranked 700 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In Mission Union Elementary Total Operating Expenditures per student (excluding capital), grew by 3% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In Mission Union Elementary, % of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 36% of Certificated Teacher Salary expenditures. This amount ranked 915 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 55%.

This district is in quadrant 4. (See Chart 3-6, pp. 104-105)

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

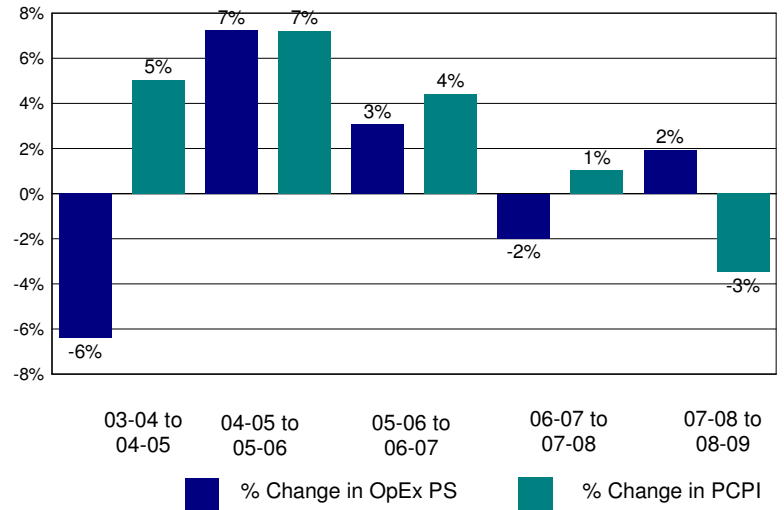

- Total Certificated Teacher Salaries (Object 1100) & Estimated Benefits
- Total Instructional Aide Salaries (Object 2100) & Estimated Benefits

District Profile: Monson-Sultana Joint Union Elementary

The graph in the top right corner shows the difference between the change in the district's Total Operating Expenditures (excluding capital) per student (blue bar) and California Per Capita Personal Income (green bar). [See the Methodology for a full description for how this is calculated]. Monson-Sultana Joint Union Elementary spent \$7,600 per student, which ranked 874 out of the 955 districts for which this information was available, with the top ranked district spending the most per student.

The graph in the middle left hand side of the page shows the annual savings if Total Operating Expenditures per student, excluding Certificated Teacher Salaries and Benefits, had only increased at the same rate as PCPI in FY 07-08. Note that for FY 08-09 the calculation shown is for the savings if the increase in such Operating Expenditures per student (i.e., excluding Certificated Teacher Salaries and Benefits) was held at zero, not decreased at the rate PCPI decreased. Below each year is the number of teachers that could have been employed by those savings.

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed. For FY 08-09, this district ranked 521 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In Monson-Sultana Joint Union Elementary Total Operating Expenditures per student (excluding capital), grew by 12% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In Monson-Sultana Joint Union Elementary, 6% of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated 0 additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 20% of Certificated Teacher Salary expenditures. This amount ranked 755 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 58%.

This district is in quadrant 4. (See Chart 3-6, pp. 104-105)

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

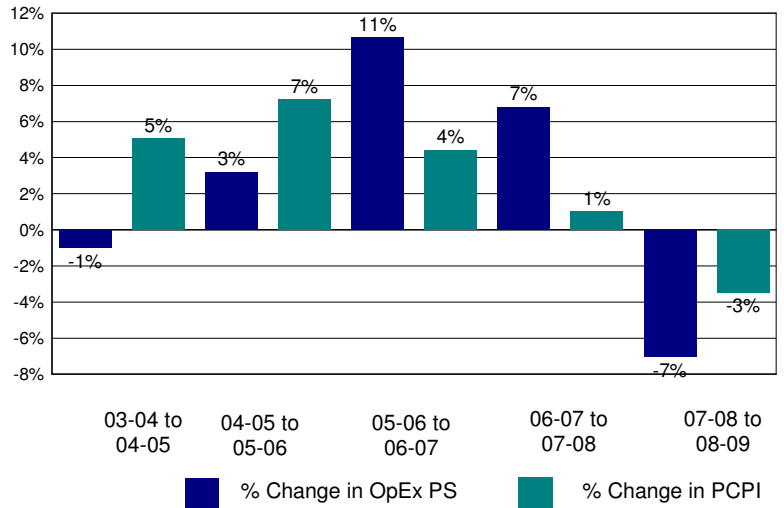

- Total Certificated Teacher Salaries (Object 1100) & Estimated Benefits
- Total Instructional Aide Salaries (Object 2100) & Estimated Benefits
- Approved Textbooks and Books (Objects 4100 & 4200)
- Materials and Supplies expenditures (Object 4300) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180 and 1190)
- Professional/Consulting Services/Subagreements for Services (Objects 5100 and 5800) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180, 1190)

District Profile: Montague Elementary

The graph in the top right corner shows the difference between the change in the district's Total Operating Expenditures (excluding capital) per student (blue bar) and California Per Capita Personal Income (green bar). [See the Methodology for a full description for how this is calculated]. Montague Elementary spent \$11,126 per student, which ranked 215 out of the 955 districts for which this information was available, with the top ranked district spending the most per student.

The graph in the middle left hand side of the page shows the annual savings if Total Operating Expenditures per student, excluding Certificated Teacher Salaries and Benefits, had only increased at the same rate as PCPI in FY 07-08. Note that for FY 08-09 the calculation shown is for the savings if the increase in such Operating Expenditures per student (i.e., excluding Certificated Teacher Salaries and Benefits) was held at zero, not decreased at the rate PCPI decreased. Below each year is the number of teachers that could have been employed by those savings.

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed. For FY 08-09, this district ranked 810 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In Montague Elementary Total Operating Expenditures per student (excluding capital), grew by 13% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In Montague Elementary, % of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 11% of Certificated Teacher Salary expenditures. This amount ranked 101 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 55%.

This district is in quadrant 1. (See Chart 3-6, pp. 104-105)

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

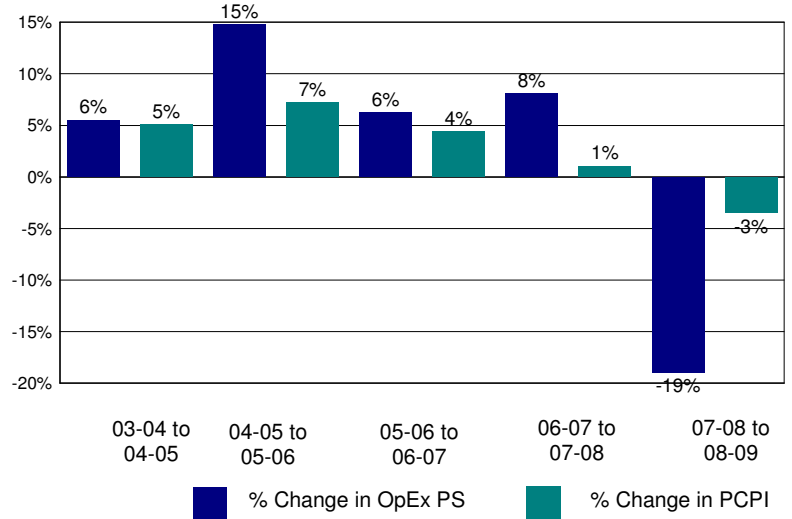

- Total Certificated Teacher Salaries (Object 1100) & Estimated Benefits
- Total Instructional Aide Salaries (Object 2100) & Estimated Benefits

District Profile: Monterey Peninsula Unified

The graph in the top right corner shows the difference between the change in the district's Total Operating Expenditures (excluding capital) per student (blue bar) and California Per Capita Personal Income (green bar). [See the Methodology for a full description for how this is calculated]. Monterey Peninsula Unified spent \$11,313 per student, which ranked 201 out of the 955 districts for which this information was available, with the top ranked district spending the most per student.

The graph in the middle left hand side of the page shows the annual savings if Total Operating Expenditures per student, excluding Certificated Teacher Salaries and Benefits, had only increased at the same rate as PCPI in FY 07-08. Note that for FY 08-09 the calculation shown is for the savings if the increase in such Operating Expenditures per student (i.e., excluding Certificated Teacher Salaries and Benefits) was held at zero, not decreased at the rate PCPI decreased. Below each year is the number of teachers that could have been employed by those savings.

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed. For FY 08-09, this district ranked 865 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In Monterey Peninsula Unified Total Operating Expenditures per student (excluding capital), grew by 55% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In Monterey Peninsula Unified, 29% of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated 104 additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 17% of Certificated Teacher Salary expenditures. This amount ranked 619 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 43%.

This district is in quadrant 4. (See Chart 3-6, pp. 104-105)

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

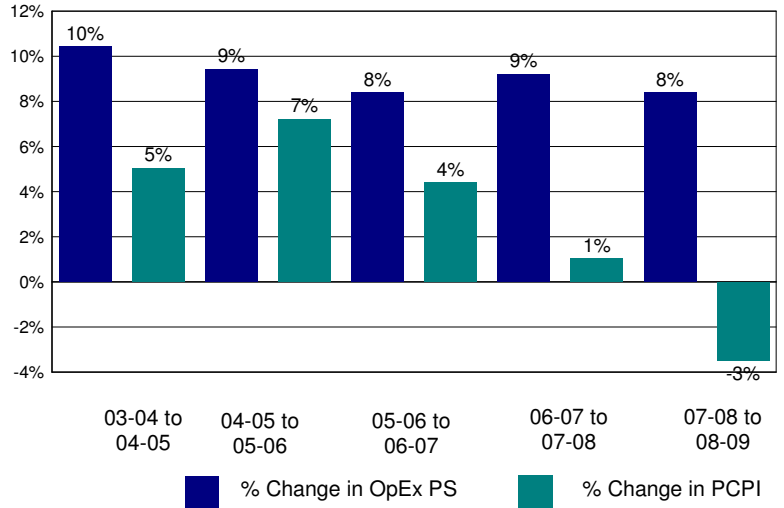

- Total Certificated Teacher Salaries (Object 1100) & Estimated Benefits
- Total Instructional Aide Salaries (Object 2100) & Estimated Benefits
- Approved Textbooks and Books (Objects 4100 & 4200)
- Materials and Supplies expenditures (Object 4300) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180 and 1190)
- Professional/Consulting Services/Subagreements for Services (Objects 5100 and 5800) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180, 1190)

District Profile: Montgomery Elementary

The graph in the top right corner shows the difference between the change in the district's Total Operating Expenditures (excluding capital) per student (blue bar) and California Per Capita Personal Income (green bar). [See the Methodology for a full description for how this is calculated]. Montgomery Elementary spent \$14,514 per student, which ranked 106 out of the 955 districts for which this information was available, with the top ranked district spending the most per student.

The graph in the middle left hand side of the page shows the annual savings if Total Operating Expenditures per student, excluding Certificated Teacher Salaries and Benefits, had only increased at the same rate as PCPI in FY 07-08. Note that for FY 08-09 the calculation shown is for the savings if the increase in such Operating Expenditures per student (i.e., excluding Certificated Teacher Salaries and Benefits) was held at zero, not decreased at the rate PCPI decreased. Below each year is the number of teachers that could have been employed by those savings.

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed. For FY 08-09, this district ranked 737 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In Montgomery Elementary Total Operating Expenditures per student (excluding capital), grew by 45% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In Montgomery Elementary, % of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 9% of Certificated Teacher Salary expenditures. This amount ranked 38 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 71%.

This district is in quadrant 2. (See Chart 3-6, pp. 104-105)

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

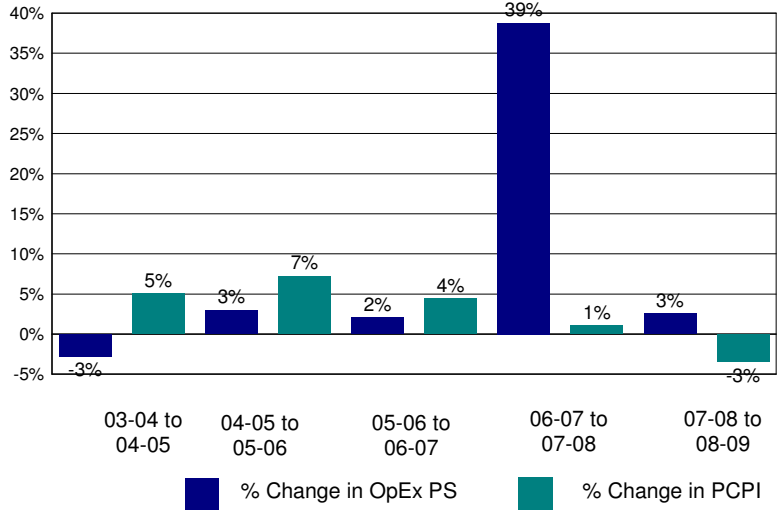

- Total Certificated Teacher Salaries (Object 1100) & Estimated Benefits
- Total Instructional Aide Salaries (Object 2100) & Estimated Benefits
- Approved Textbooks and Books (Objects 4100 & 4200)

District Profile: Morongo Unified

The graph in the top right corner shows the difference between the change in the district's Total Operating Expenditures (excluding capital) per student (blue bar) and California Per Capita Personal Income (green bar). [See the Methodology for a full description for how this is calculated]. Morongo Unified spent \$8,680 per student, which ranked 591 out of the 955 districts for which this information was available, with the top ranked district spending the most per student.

The graph in the middle left hand side of the page shows the annual savings if Total Operating Expenditures per student, excluding Certificated Teacher Salaries and Benefits, had only increased at the same rate as PCPI in FY 07-08. Note that for FY 08-09 the calculation shown is for the savings if the increase in such Operating Expenditures per student (i.e., excluding Certificated Teacher Salaries and Benefits) was held at zero, not decreased at the rate PCPI decreased. Below each year is the number of teachers that could have been employed by those savings.

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed. For FY 08-09, this district ranked 290 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In Morongo Unified Total Operating Expenditures per student (excluding capital), grew by 19% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In Morongo Unified, 25% of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated 0 additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 14% of Certificated Teacher Salary expenditures. This amount ranked 307 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 60%.

This district is in quadrant 3. (See Chart 3-6, pp. 104-105)

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

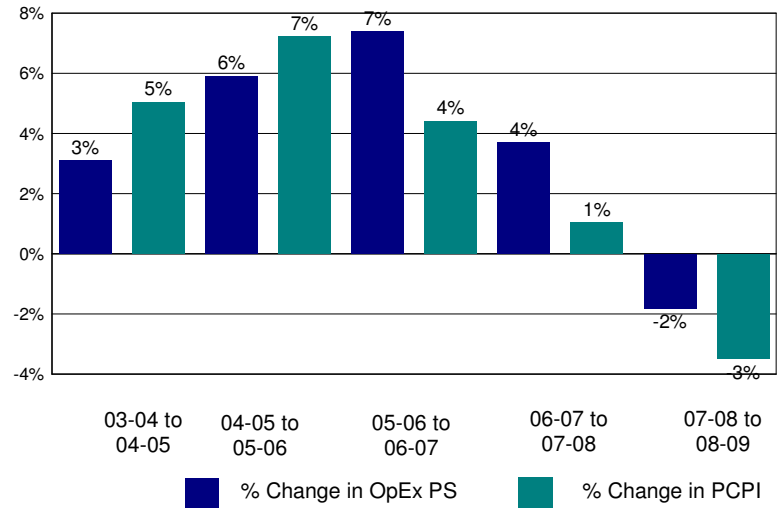

- Total Certificated Teacher Salaries (Object 1100) & Estimated Benefits
- Total Instructional Aide Salaries (Object 2100) & Estimated Benefits
- Approved Textbooks and Books (Objects 4100 & 4200)
- Materials and Supplies expenditures (Object 4300) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180 and 1190)
- Professional/Consulting Services/Subagreements for Services (Objects 5100 and 5800) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180, 1190)

Teacher Sal. & Ben. as a % of Total Operating Expenditure

District Profile: Mountain Valley Unified

The graph in the top right corner shows the difference between the change in the district's Total Operating Expenditures (excluding capital) per student (blue bar) and California Per Capita Personal Income (green bar). [See the Methodology for a full description for how this is calculated]. Mountain Valley Unified spent \$15,135 per student, which ranked 90 out of the 955 districts for which this information was available, with the top ranked district spending the most per student.

The graph in the middle left hand side of the page shows the annual savings if Total Operating Expenditures per student, excluding Certificated Teacher Salaries and Benefits, had only increased at the same rate as PCPI in FY 07-08. Note that for FY 08-09 the calculation shown is for the savings if the increase in such Operating Expenditures per student (i.e., excluding Certificated Teacher Salaries and Benefits) was held at zero, not decreased at the rate PCPI decreased. Below each year is the number of teachers that could have been employed by those savings.

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed. For FY 08-09, this district ranked 894 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In Mountain Valley Unified Total Operating Expenditures per student (excluding capital), grew by 30% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In Mountain Valley Unified, % of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated 1 additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 18% of Certificated Teacher Salary expenditures. This amount ranked 633 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 45%.

This district is in quadrant 1. (See Chart 3-6, pp. 104-105)

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

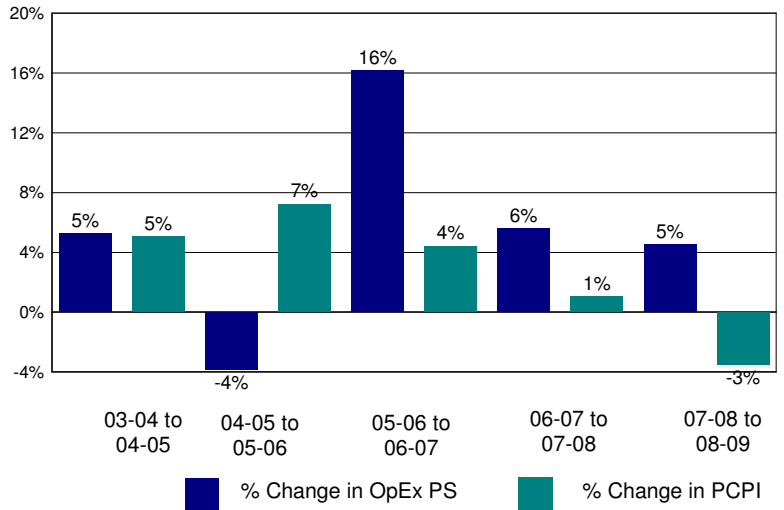

- Total Certificated Teacher Salaries (Object 1100) & Estimated Benefits
- Total Instructional Aide Salaries (Object 2100) & Estimated Benefits
- Approved Textbooks and Books (Objects 4100 & 4200)
- Materials and Supplies expenditures (Object 4300) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180 and 1190)
- Professional/Consulting Services/Subagreements for Services (Objects 5100 and 5800) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180, 1190)

District Profile: Mt. Pleasant Elementary

The graph in the top right corner shows the difference between the change in the district's Total Operating Expenditures (excluding capital) per student (blue bar) and California Per Capita Personal Income (green bar). [See the Methodology for a full description for how this is calculated]. Mt. Pleasant Elementary spent \$28,702 per student, which ranked 20 out of the 955 districts for which this information was available, with the top ranked district spending the most per student.

The graph in the middle left hand side of the page shows the annual savings if Total Operating Expenditures per student, excluding Certificated Teacher Salaries and Benefits, had only increased at the same rate as PCPI in FY 07-08. Note that for FY 08-09 the calculation shown is for the savings if the increase in such Operating Expenditures per student (i.e., excluding Certificated Teacher Salaries and Benefits) was held at zero, not decreased at the rate PCPI decreased. Below each year is the number of teachers that could have been employed by those savings.

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed. For FY 08-09, this district ranked 954 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In Mt. Pleasant Elementary Total Operating Expenditures per student (excluding capital), grew by 17% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In Mt. Pleasant Elementary, 34% of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated 31 additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 17% of Certificated Teacher Salary expenditures. This amount ranked 570 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 19%.

This district is in quadrant 2. (See Chart 3-6, pp. 104-105)

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

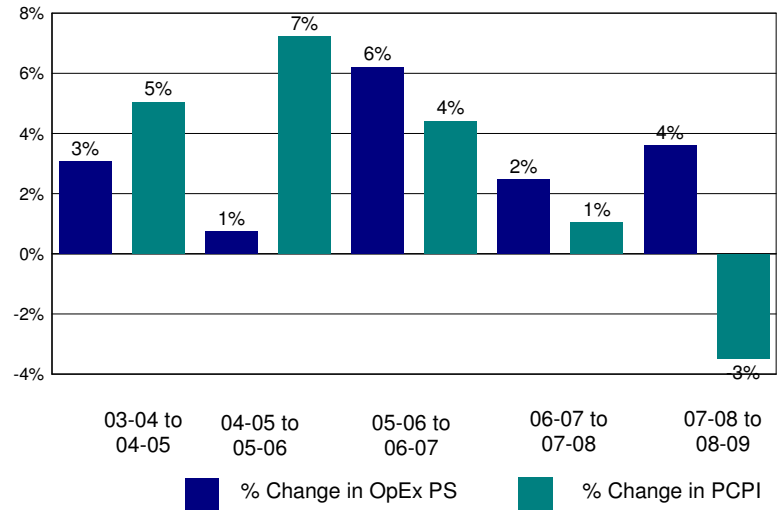

- Total Certificated Teacher Salaries (Object 1100) & Estimated Benefits
- Total Instructional Aide Salaries (Object 2100) & Estimated Benefits
- Approved Textbooks and Books (Objects 4100 & 4200)
- Materials and Supplies expenditures (Object 4300) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180 and 1190)
- Professional/Consulting Services/Subagreements for Services (Objects 5100 and 5800) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180, 1190)

District Profile: Napa Valley Unified

The graph in the top right corner shows the difference between the change in the district's Total Operating Expenditures (excluding capital) per student (blue bar) and California Per Capita Personal Income (green bar). [See the Methodology for a full description for how this is calculated]. Napa Valley Unified spent \$8,387 per student, which ranked 692 out of the 955 districts for which this information was available, with the top ranked district spending the most per student.

The graph in the middle left hand side of the page shows the annual savings if Total Operating Expenditures per student, excluding Certificated Teacher Salaries and Benefits, had only increased at the same rate as PCPI in FY 07-08. Note that for FY 08-09 the calculation shown is for the savings if the increase in such Operating Expenditures per student (i.e., excluding Certificated Teacher Salaries and Benefits) was held at zero, not decreased at the rate PCPI decreased. Below each year is the number of teachers that could have been employed by those savings.

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed. For FY 08-09, this district ranked 106 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In Napa Valley Unified Total Operating Expenditures per student (excluding capital), grew by 20% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In Napa Valley Unified, 28% of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated 0 additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 12% of Certificated Teacher Salary expenditures. This amount ranked 153 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 66%.

This district is in quadrant 2. (See Chart 3-6, pp. 104-105)

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

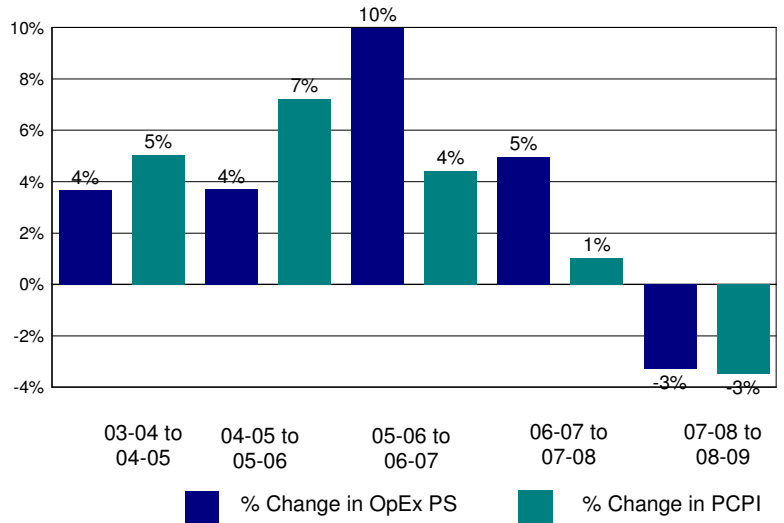

- Total Certificated Teacher Salaries (Object 1100) & Estimated Benefits
- Total Instructional Aide Salaries (Object 2100) & Estimated Benefits
- Approved Textbooks and Books (Objects 4100 & 4200)
- Materials and Supplies expenditures (Object 4300) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180 and 1190)
- Professional/Consulting Services/Subagreements for Services (Objects 5100 and 5800) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180, 1190)

District Profile: New Haven Unified

The graph in the top right corner shows the difference between the change in the district's Total Operating Expenditures (excluding capital) per student (blue bar) and California Per Capita Personal Income (green bar). [See the Methodology for a full description for how this is calculated]. New Haven Unified spent \$8,913 per student, which ranked 524 out of the 955 districts for which this information was available, with the top ranked district spending the most per student.

The graph in the middle left hand side of the page shows the annual savings if Total Operating Expenditures per student, excluding Certificated Teacher Salaries and Benefits, had only increased at the same rate as PCPI in FY 07-08. Note that for FY 08-09 the calculation shown is for the savings if the increase in such Operating Expenditures per student (i.e., excluding Certificated Teacher Salaries and Benefits) was held at zero, not decreased at the rate PCPI decreased. Below each year is the number of teachers that could have been employed by those savings.

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed. For FY 08-09, this district ranked 14 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In New Haven Unified Total Operating Expenditures per student (excluding capital), grew by 26% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In New Haven Unified, 43% of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated 0 additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 12% of Certificated Teacher Salary expenditures. This amount ranked 182 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 70%.

This district is in quadrant 2. (See Chart 3-6, pp. 104-105)

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

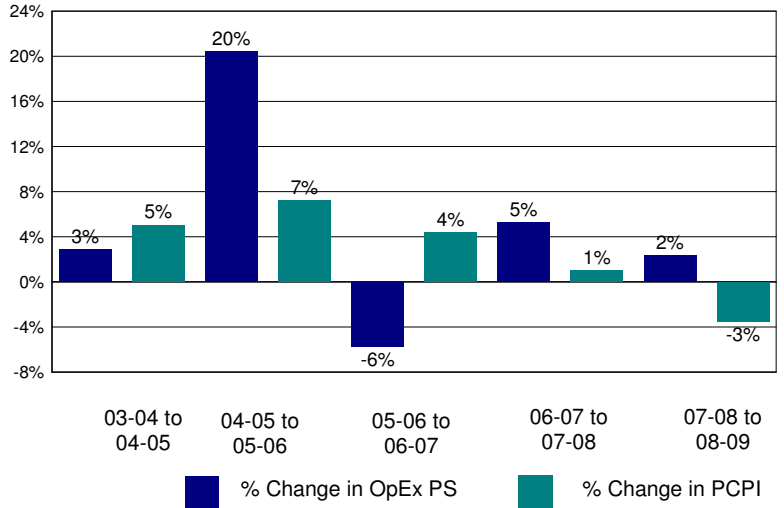

- Total Certificated Teacher Salaries (Object 1100) & Estimated Benefits
- Total Instructional Aide Salaries (Object 2100) & Estimated Benefits
- Approved Textbooks and Books (Objects 4100 & 4200)
- Materials and Supplies expenditures (Object 4300) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180 and 1190)
- Professional/Consulting Services/Subagreements for Services (Objects 5100 and 5800) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180, 1190)

The graph in the top right corner shows the difference between the change in the district's Total Operating Expenditures (excluding capital) per student (blue bar) and California Per Capita Personal Income (green bar). [See the Methodology for a full description for how this is calculated]. Newman-Crows Landing Unified spent \$8,254 per student, which ranked 733 out of the 955 districts for which this information was available, with the top ranked district spending the most per student.

The graph in the middle left hand side of the page shows the annual savings if Total Operating Expenditures per student, excluding Certificated Teacher Salaries and Benefits, had only increased at the same rate as PCPI in FY 07-08. Note that for FY 08-09 the calculation shown is for the savings if the increase in such Operating Expenditures per student (i.e., excluding Certificated Teacher Salaries and Benefits) was held at zero, not decreased at the rate PCPI decreased. Below each year is the number of teachers that could have been employed by those savings.

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed. For FY 08-09, this district ranked 420 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In Newman-Crows Landing Unified Total Operating Expenditures per student (excluding capital), grew by 12% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In Newman-Crows Landing Unified, 14% of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated 0 additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 16% of Certificated Teacher Salary expenditures. This amount ranked 487 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 67%.

This district is in quadrant 4. (See Chart 3-6, pp. 104-105)

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

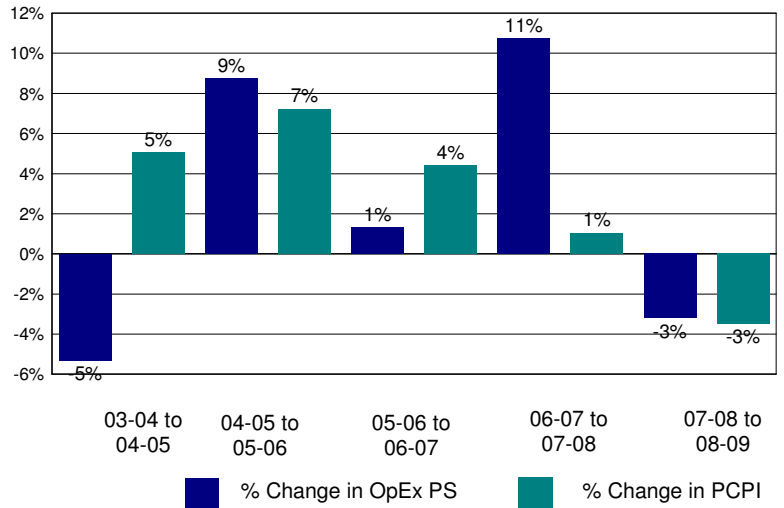

- Total Certificated Teacher Salaries (Object 1100) & Estimated Benefits
- Total Instructional Aide Salaries (Object 2100) & Estimated Benefits
- Approved Textbooks and Books (Objects 4100 & 4200)
- Materials and Supplies expenditures (Object 4300) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180 and 1190)
- Professional/Consulting Services/Subagreements for Services (Objects 5100 and 5800) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180, 1190)

District Profile: North Monterey County Unified

The graph in the top right corner shows the difference between the change in the district's Total Operating Expenditures (excluding capital) per student (blue bar) and California Per Capita Personal Income (green bar). [See the Methodology for a full description for how this is calculated]. North Monterey County Unified spent \$9,463 per student, which ranked 396 out of the 955 districts for which this information was available, with the top ranked district spending the most per student.

The graph in the middle left hand side of the page shows the annual savings if Total Operating Expenditures per student, excluding Certificated Teacher Salaries and Benefits, had only increased at the same rate as PCPI in FY 07-08. Note that for FY 08-09 the calculation shown is for the savings if the increase in such Operating Expenditures per student (i.e., excluding Certificated Teacher Salaries and Benefits) was held at zero, not decreased at the rate PCPI decreased. Below each year is the number of teachers that could have been employed by those savings.

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed. For FY 08-09, this district ranked 609 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In North Monterey County Unified Total Operating Expenditures per student (excluding capital), grew by 24% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In North Monterey County Unified, % of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 17% of Certificated Teacher Salary expenditures. This amount ranked 610 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 51%.

This district is in quadrant 3. (See Chart 3-6, pp. 104-105)

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

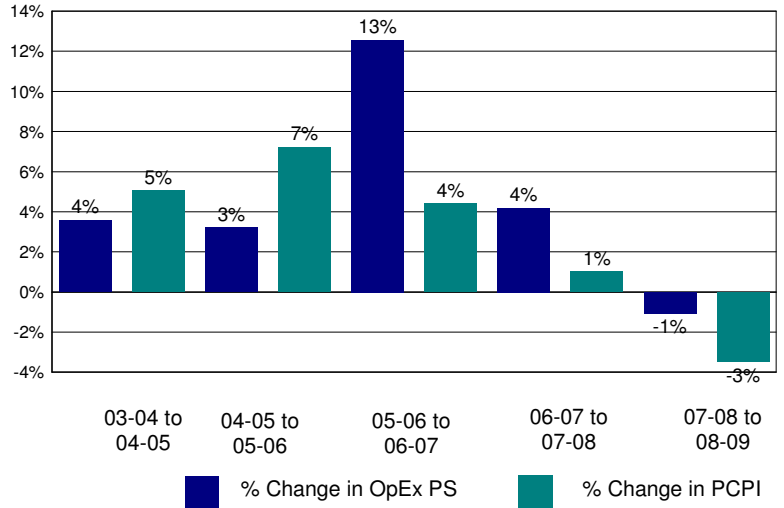

- Total Certificated Teacher Salaries (Object 1100) & Estimated Benefits
- Total Instructional Aide Salaries (Object 2100) & Estimated Benefits
- Approved Textbooks and Books (Objects 4100 & 4200)
- Materials and Supplies expenditures (Object 4300) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180 and 1190)
- Professional/Consulting Services/Subagreements for Services (Objects 5100 and 5800) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180, 1190)

District Profile: Oak Grove Elementary

The graph in the top right corner shows the difference between the change in the district's Total Operating Expenditures (excluding capital) per student (blue bar) and California Per Capita Personal Income (green bar). [See the Methodology for a full description for how this is calculated]. Oak Grove Elementary spent \$8,668 per student, which ranked 597 out of the 955 districts for which this information was available, with the top ranked district spending the most per student.

The graph in the middle left hand side of the page shows the annual savings if Total Operating Expenditures per student, excluding Certificated Teacher Salaries and Benefits, had only increased at the same rate as PCPI in FY 07-08. Note that for FY 08-09 the calculation shown is for the savings if the increase in such Operating Expenditures per student (i.e., excluding Certificated Teacher Salaries and Benefits) was held at zero, not decreased at the rate PCPI decreased. Below each year is the number of teachers that could have been employed by those savings.

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed. For FY 08-09, this district ranked 217 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In Oak Grove Elementary Total Operating Expenditures per student (excluding capital), grew by 17% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In Oak Grove Elementary, 22% of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated 0 additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 13% of Certificated Teacher Salary expenditures. This amount ranked 211 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 60%.

This district is in quadrant 4. (See Chart 3-6, pp. 104-105)

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

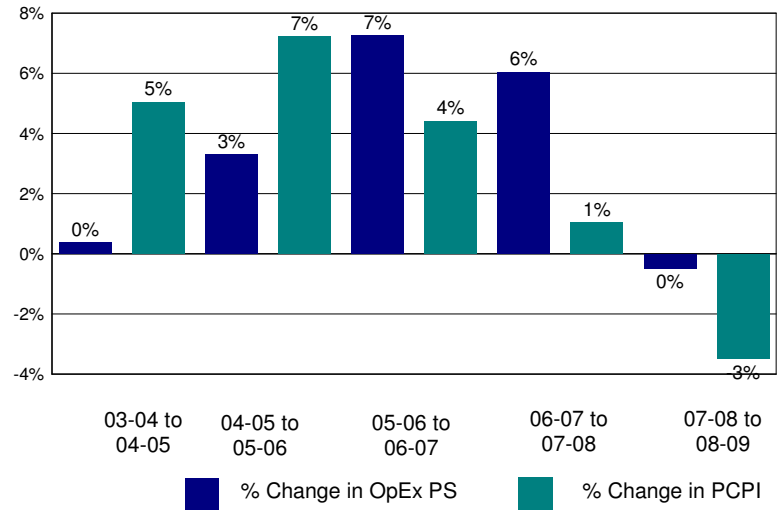

- Total Certificated Teacher Salaries (Object 1100) & Estimated Benefits
- Total Instructional Aide Salaries (Object 2100) & Estimated Benefits
- Approved Textbooks and Books (Objects 4100 & 4200)
- Materials and Supplies expenditures (Object 4300) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180 and 1190)
- Professional/Consulting Services/Subagreements for Services (Objects 5100 and 5800) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180, 1190)

District Profile: Oakdale Joint Unified

The graph in the top right corner shows the difference between the change in the district's Total Operating Expenditures (excluding capital) per student (blue bar) and California Per Capita Personal Income (green bar). [See the Methodology for a full description for how this is calculated]. Oakdale Joint Unified spent \$8,123 per student, which ranked 778 out of the 955 districts for which this information was available, with the top ranked district spending the most per student.

The graph in the middle left hand side of the page shows the annual savings if Total Operating Expenditures per student, excluding Certificated Teacher Salaries and Benefits, had only increased at the same rate as PCPI in FY 07-08. Note that for FY 08-09 the calculation shown is for the savings if the increase in such Operating Expenditures per student (i.e., excluding Certificated Teacher Salaries and Benefits) was held at zero, not decreased at the rate PCPI decreased. Below each year is the number of teachers that could have been employed by those savings.

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed. For FY 08-09, this district ranked 252 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In Oakdale Joint Unified Total Operating Expenditures per student (excluding capital), grew by 19% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In Oakdale Joint Unified, 22% of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated 0 additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 15% of Certificated Teacher Salary expenditures. This amount ranked 468 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 63%.

This district is in quadrant 3. (See Chart 3-6, pp. 104-105)

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

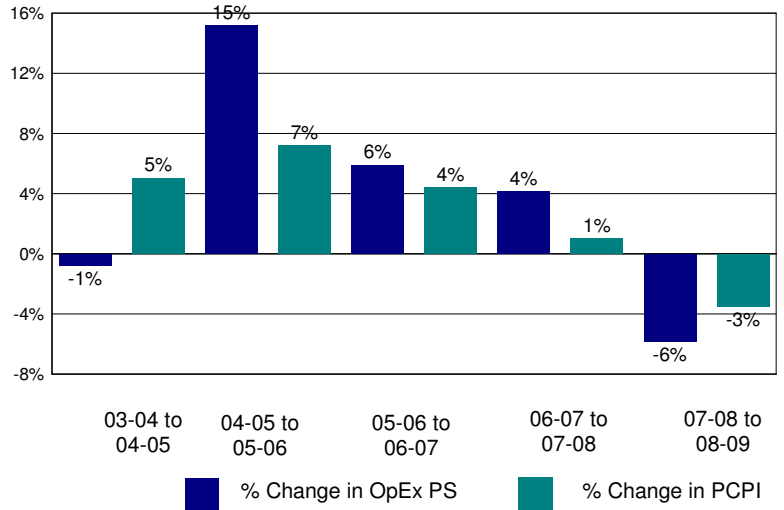

- Total Certificated Teacher Salaries (Object 1100) & Estimated Benefits
- Total Instructional Aide Salaries (Object 2100) & Estimated Benefits
- Approved Textbooks and Books (Objects 4100 & 4200)
- Materials and Supplies expenditures (Object 4300) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180 and 1190)
- Professional/Consulting Services/Subagreements for Services (Objects 5100 and 5800) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180, 1190)

District Profile: Oakland Unified

The graph in the top right corner shows the difference between the change in the district's Total Operating Expenditures (excluding capital) per student (blue bar) and California Per Capita Personal Income (green bar). [See the Methodology for a full description for how this is calculated]. Oakland Unified spent \$12,946 per student, which ranked 143 out of the 955 districts for which this information was available, with the top ranked district spending the most per student.

The graph in the middle left hand side of the page shows the annual savings if Total Operating Expenditures per student, excluding Certificated Teacher Salaries and Benefits, had only increased at the same rate as PCPI in FY 07-08. Note that for FY 08-09 the calculation shown is for the savings if the increase in such Operating Expenditures per student (i.e., excluding Certificated Teacher Salaries and Benefits) was held at zero, not decreased at the rate PCPI decreased. Below each year is the number of teachers that could have been employed by those savings.

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed. For FY 08-09, this district ranked 870 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In Oakland Unified Total Operating Expenditures per student (excluding capital), grew by 34% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In Oakland Unified, 27% of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated 0 additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 24% of Certificated Teacher Salary expenditures. This amount ranked 842 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 49%.

This district is in quadrant 4. (See Chart 3-6, pp. 104-105)

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed. For FY 08-09, this district ranked 394 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In Old Adobe Union Elementary Total Operating Expenditures per student (excluding capital), grew by 25% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In Old Adobe Union Elementary, 7% of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated 6 additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 17% of Certificated Teacher Salary expenditures. This amount ranked 589 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 67%.

This district is in quadrant 4. (See Chart 3-6, pp. 104-105)

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

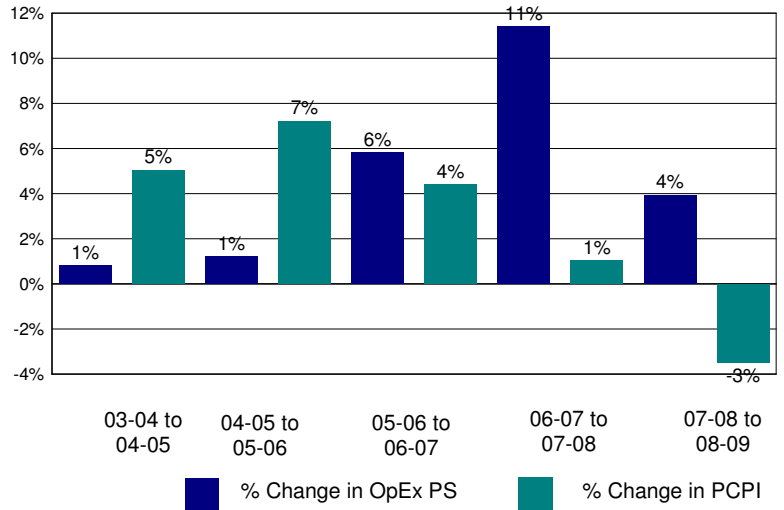

- Total Certificated Teacher Salaries (Object 1100) & Estimated Benefits
- Total Instructional Aide Salaries (Object 2100) & Estimated Benefits
- Approved Textbooks and Books (Objects 4100 & 4200)
- Materials and Supplies expenditures (Object 4300) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180 and 1190)
- Professional/Consulting Services/Subagreements for Services (Objects 5100 and 5800) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180, 1190)

District Profile: Ontario-Montclair Elementary

The graph in the top right corner shows the difference between the change in the district's Total Operating Expenditures (excluding capital) per student (blue bar) and California Per Capita Personal Income (green bar). [See the Methodology for a full description for how this is calculated]. Ontario-Montclair Elementary spent \$9,624 per student, which ranked 365 out of the 955 districts for which this information was available, with the top ranked district spending the most per student.

The graph in the middle left hand side of the page shows the annual savings if Total Operating Expenditures per student, excluding Certificated Teacher Salaries and Benefits, had only increased at the same rate as PCPI in FY 07-08. Note that for FY 08-09 the calculation shown is for the savings if the increase in such Operating Expenditures per student (i.e., excluding Certificated Teacher Salaries and Benefits) was held at zero, not decreased at the rate PCPI decreased. Below each year is the number of teachers that could have been employed by those savings.

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed. For FY 08-09, this district ranked 335 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In Ontario-Montclair Elementary Total Operating Expenditures per student (excluding capital), grew by 33% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In Ontario-Montclair Elementary, 22% of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated 142 additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 13% of Certificated Teacher Salary expenditures. This amount ranked 247 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 64%.

This district is in quadrant 3. (See Chart 3-6, pp. 104-105)

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

For FY 08-09, this district ranked 890 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In Orick Elementary Total Operating Expenditures per student (excluding capital), grew by 37% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In Orick Elementary, % of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 28% of Certificated Teacher Salary expenditures. This amount ranked 881 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 51%.

This district is in quadrant 2. (See Chart 3-6, pp. 104-105)

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

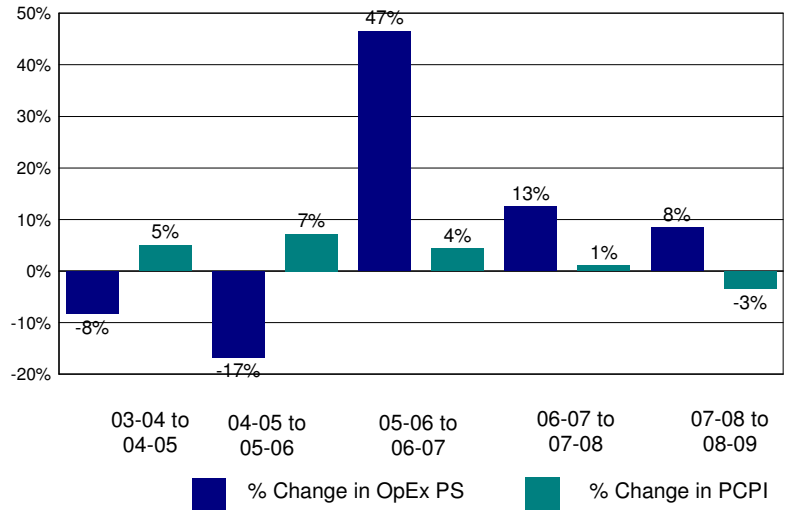

- Total Certificated Teacher Salaries (Object 1100) & Estimated Benefits
- Total Instructional Aide Salaries (Object 2100) & Estimated Benefits
- Approved Textbooks and Books (Objects 4100 & 4200)
- Materials and Supplies expenditures (Object 4300) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180 and 1190)
- Professional/Consulting Services/Subagreements for Services (Objects 5100 and 5800) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180, 1190)

District Profile: Orinda Union Elementary

The graph in the top right corner shows the difference between the change in the district's Total Operating Expenditures (excluding capital) per student (blue bar) and California Per Capita Personal Income (green bar). [See the Methodology for a full description for how this is calculated]. Orinda Union Elementary spent \$10,226 per student, which ranked 289 out of the 955 districts for which this information was available, with the top ranked district spending the most per student.

The graph in the middle left hand side of the page shows the annual savings if Total Operating Expenditures per student, excluding Certificated Teacher Salaries and Benefits, had only increased at the same rate as PCPI in FY 07-08. Note that for FY 08-09 the calculation shown is for the savings if the increase in such Operating Expenditures per student (i.e., excluding Certificated Teacher Salaries and Benefits) was held at zero, not decreased at the rate PCPI decreased. Below each year is the number of teachers that could have been employed by those savings.

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed. For FY 08-09, this district ranked 288 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In Orinda Union Elementary Total Operating Expenditures per student (excluding capital), grew by 34% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In Orinda Union Elementary, 30% of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated 5 additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 19% of Certificated Teacher Salary expenditures. This amount ranked 720 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 62%.

This district is in quadrant 3. (See Chart 3-6, pp. 104-105)

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

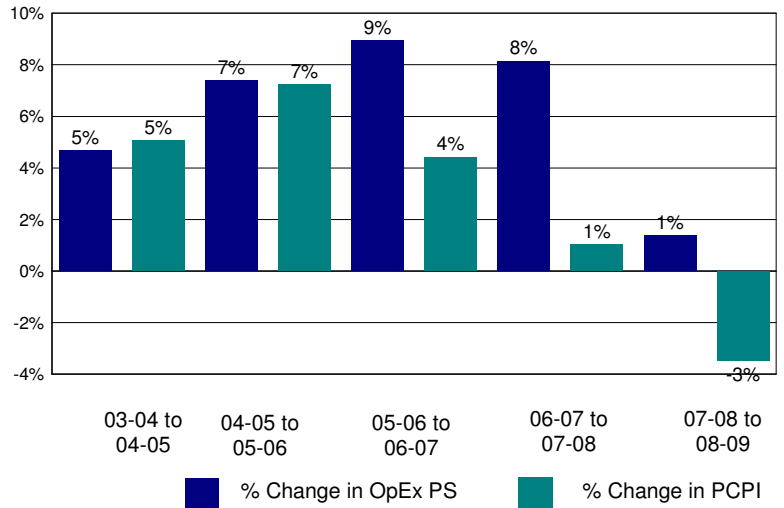

- Total Certificated Teacher Salaries (Object 1100) & Estimated Benefits
- Total Instructional Aide Salaries (Object 2100) & Estimated Benefits

District Profile: Outside Creek Elementary

The graph in the top right corner shows the difference between the change in the district's Total Operating Expenditures (excluding capital) per student (blue bar) and California Per Capita Personal Income (green bar). [See the Methodology for a full description for how this is calculated]. Outside Creek Elementary spent \$6,770 per student, which ranked 952 out of the 955 districts for which this information was available, with the top ranked district spending the most per student.

The graph in the middle left hand side of the page shows the annual savings if Total Operating Expenditures per student, excluding Certificated Teacher Salaries and Benefits, had only increased at the same rate as PCPI in FY 07-08. Note that for FY 08-09 the calculation shown is for the savings if the increase in such Operating Expenditures per student (i.e., excluding Certificated Teacher Salaries and Benefits) was held at zero, not decreased at the rate PCPI decreased. Below each year is the number of teachers that could have been employed by those savings.

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed. For FY 08-09, this district ranked 764 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In Outside Creek Elementary Total Operating Expenditures per student (excluding capital), grew by 31% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In Outside Creek Elementary, % of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 16% of Certificated Teacher Salary expenditures. This amount ranked 547 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 54%.

This district is in quadrant 2. (See Chart 3-6, pp. 104-105)

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

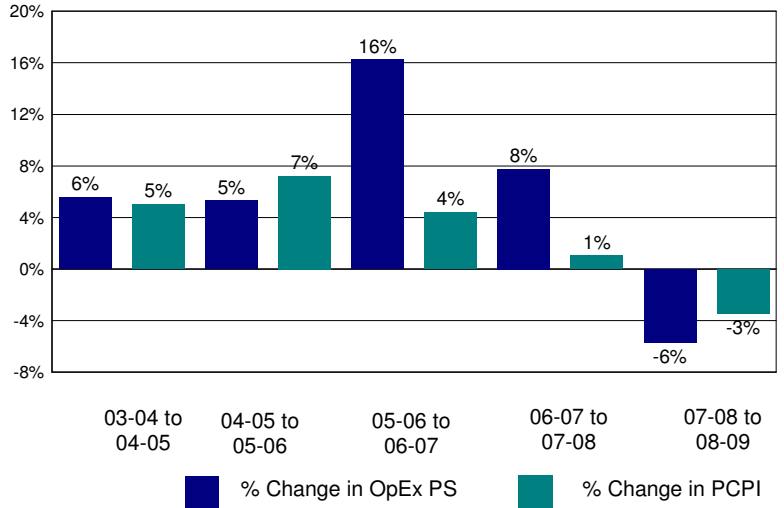

- Total Certificated Teacher Salaries (Object 1100) & Estimated Benefits
- Total Instructional Aide Salaries (Object 2100) & Estimated Benefits
- Approved Textbooks and Books (Objects 4100 & 4200)
- Materials and Supplies expenditures (Object 4300) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180 and 1190)
- Professional/Consulting Services/Subagreements for Services (Objects 5100 and 5800) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180, 1190)

District Profile: Owens Valley Unified

The graph in the top right corner shows the difference between the change in the district's Total Operating Expenditures (excluding capital) per student (blue bar) and California Per Capita Personal Income (green bar). [See the Methodology for a full description for how this is calculated]. Owens Valley Unified spent \$30,624 per student, which ranked 12 out of the 955 districts for which this information was available, with the top ranked district spending the most per student.

The graph in the middle left hand side of the page shows the annual savings if Total Operating Expenditures per student, excluding Certificated Teacher Salaries and Benefits, had only increased at the same rate as PCPI in FY 07-08. Note that for FY 08-09 the calculation shown is for the savings if the increase in such Operating Expenditures per student (i.e., excluding Certificated Teacher Salaries and Benefits) was held at zero, not decreased at the rate PCPI decreased. Below each year is the number of teachers that could have been employed by those savings.

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed. For FY 08-09, this district ranked 131 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In Owens Valley Unified Total Operating Expenditures per student (excluding capital), grew by 80% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In Owens Valley Unified, 32% of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated 1 additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 10% of Certificated Teacher Salary expenditures. This amount ranked 56 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 61%.

This district is in quadrant 3. (See Chart 3-6, pp. 104-105)

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

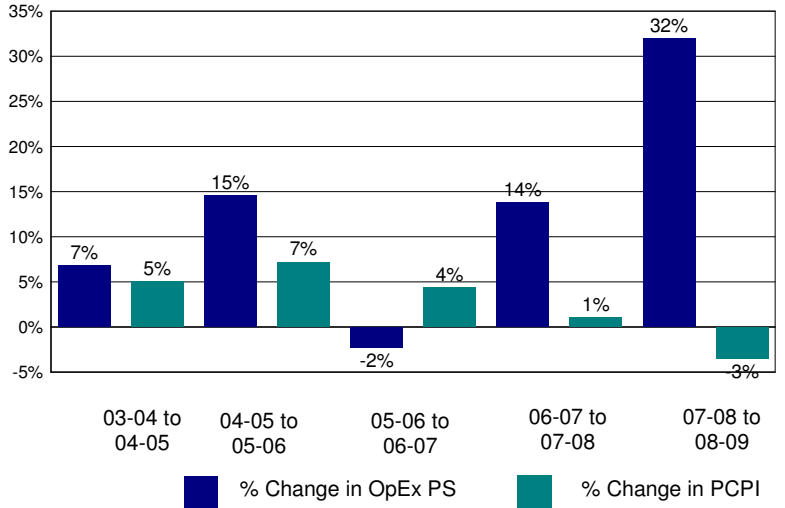

- Total Certificated Teacher Salaries (Object 1100) & Estimated Benefits
- Total Instructional Aide Salaries (Object 2100) & Estimated Benefits

District Profile: Pacific Grove Unified

The graph in the top right corner shows the difference between the change in the district's Total Operating Expenditures (excluding capital) per student (blue bar) and California Per Capita Personal Income (green bar). [See the Methodology for a full description for how this is calculated]. Pacific Grove Unified spent \$14,562 per student, which ranked 104 out of the 955 districts for which this information was available, with the top ranked district spending the most per student.

The graph in the middle left hand side of the page shows the annual savings if Total Operating Expenditures per student, excluding Certificated Teacher Salaries and Benefits, had only increased at the same rate as PCPI in FY 07-08. Note that for FY 08-09 the calculation shown is for the savings if the increase in such Operating Expenditures per student (i.e., excluding Certificated Teacher Salaries and Benefits) was held at zero, not decreased at the rate PCPI decreased. Below each year is the number of teachers that could have been employed by those savings.

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed. For FY 08-09, this district ranked 445 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In Pacific Grove Unified Total Operating Expenditures per student (excluding capital), grew by 62% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In Pacific Grove Unified, 32% of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated 14 additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 18% of Certificated Teacher Salary expenditures. This amount ranked 655 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 61%.

This district is in quadrant 3. (See Chart 3-6, pp. 104-105)

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

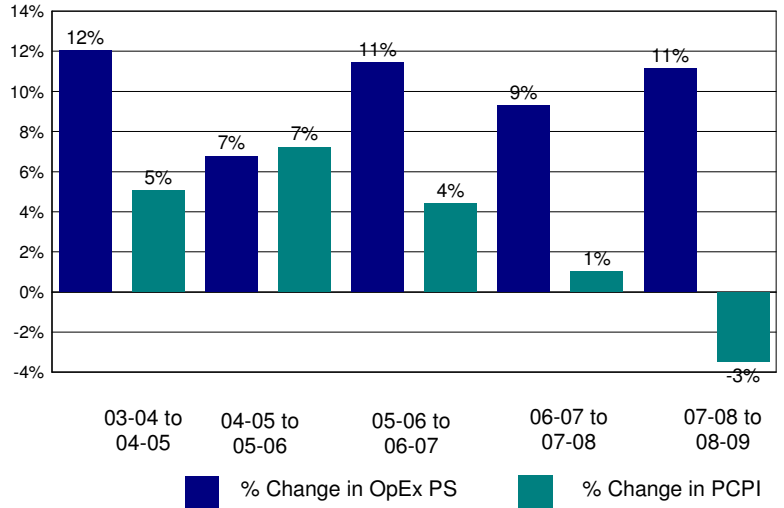

- Total Certificated Teacher Salaries (Object 1100) & Estimated Benefits
- Total Instructional Aide Salaries (Object 2100) & Estimated Benefits
- Approved Textbooks and Books (Objects 4100 & 4200)
- Materials and Supplies expenditures (Object 4300) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180 and 1190)
- Professional/Consulting Services/Subagreements for Services (Objects 5100 and 5800) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180, 1190)

District Profile: Pacific Unified

The graph in the top right corner shows the difference between the change in the district's Total Operating Expenditures (excluding capital) per student (blue bar) and California Per Capita Personal Income (green bar). [See the Methodology for a full description for how this is calculated]. Pacific Unified spent \$29,417 per student, which ranked 16 out of the 955 districts for which this information was available, with the top ranked district spending the most per student.

The graph in the middle left hand side of the page shows the annual savings if Total Operating Expenditures per student, excluding Certificated Teacher Salaries and Benefits, had only increased at the same rate as PCPI in FY 07-08. Note that for FY 08-09 the calculation shown is for the savings if the increase in such Operating Expenditures per student (i.e., excluding Certificated Teacher Salaries and Benefits) was held at zero, not decreased at the rate PCPI decreased. Below each year is the number of teachers that could have been employed by those savings.

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed. For FY 08-09, this district ranked 658 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In Pacific Unified Total Operating Expenditures per student (excluding capital), grew by -16% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In Pacific Unified, % of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 14% of Certificated Teacher Salary expenditures. This amount ranked 310 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 52%.

This district is in quadrant 1. (See Chart 3-6, pp. 104-105)

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

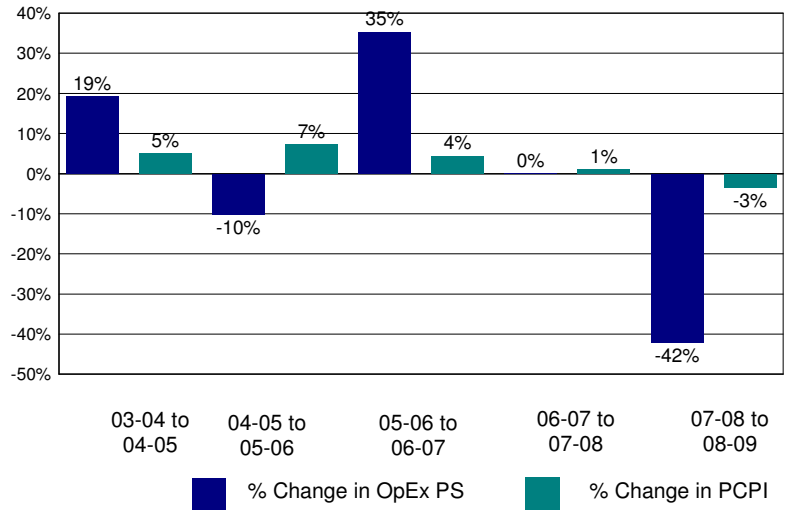

- Total Certificated Teacher Salaries (Object 1100) & Estimated Benefits

District Profile: Palm Springs Unified

The graph in the top right corner shows the difference between the change in the district's Total Operating Expenditures (excluding capital) per student (blue bar) and California Per Capita Personal Income (green bar). [See the Methodology for a full description for how this is calculated]. Palm Springs Unified spent \$9,086 per student, which ranked 482 out of the 955 districts for which this information was available, with the top ranked district spending the most per student.

The graph in the middle left hand side of the page shows the annual savings if Total Operating Expenditures per student, excluding Certificated Teacher Salaries and Benefits, had only increased at the same rate as PCPI in FY 07-08. Note that for FY 08-09 the calculation shown is for the savings if the increase in such Operating Expenditures per student (i.e., excluding Certificated Teacher Salaries and Benefits) was held at zero, not decreased at the rate PCPI decreased. Below each year is the number of teachers that could have been employed by those savings.

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed. For FY 08-09, this district ranked 401 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In Palm Springs Unified Total Operating Expenditures per student (excluding capital), grew by 28% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In Palm Springs Unified, 30% of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated 0 additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 13% of Certificated Teacher Salary expenditures. This amount ranked 276 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 58%.

This district is in quadrant 3. (See Chart 3-6, pp. 104-105)

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

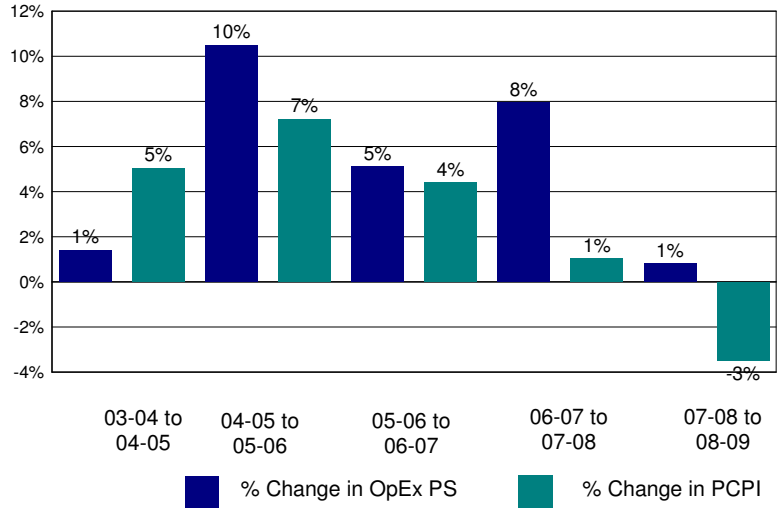

- Total Certificated Teacher Salaries (Object 1100) & Estimated Benefits
- Total Instructional Aide Salaries (Object 2100) & Estimated Benefits
- Approved Textbooks and Books (Objects 4100 & 4200)
- Materials and Supplies expenditures (Object 4300) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180 and 1190)
- Professional/Consulting Services/Subagreements for Services (Objects 5100 and 5800) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180, 1190)

District Profile: Palmdale Elementary

The graph in the top right corner shows the difference between the change in the district's Total Operating Expenditures (excluding capital) per student (blue bar) and California Per Capita Personal Income (green bar). [See the Methodology for a full description for how this is calculated]. Palmdale Elementary spent \$11,005 per student, which ranked 222 out of the 955 districts for which this information was available, with the top ranked district spending the most per student.

The graph in the middle left hand side of the page shows the annual savings if Total Operating Expenditures per student, excluding Certificated Teacher Salaries and Benefits, had only increased at the same rate as PCPI in FY 07-08. Note that for FY 08-09 the calculation shown is for the savings if the increase in such Operating Expenditures per student (i.e., excluding Certificated Teacher Salaries and Benefits) was held at zero, not decreased at the rate PCPI decreased. Below each year is the number of teachers that could have been employed by those savings.

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed. For FY 08-09, this district ranked 835 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In Palmdale Elementary Total Operating Expenditures per student (excluding capital), grew by 34% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In Palmdale Elementary, 18% of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated 155 additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 15% of Certificated Teacher Salary expenditures. This amount ranked 432 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 43%.

This district is in quadrant 3. (See Chart 3-6, pp. 104-105)

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

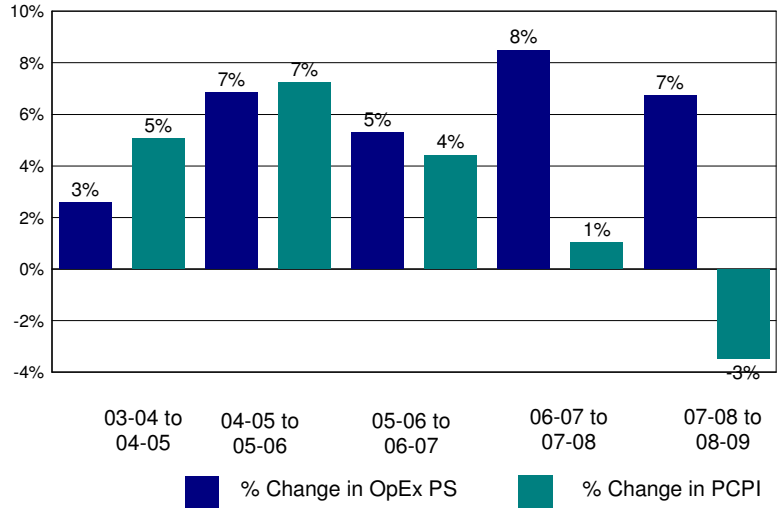

- Total Certificated Teacher Salaries (Object 1100) & Estimated Benefits

District Profile: Panama-Buena Vista Union Elementary

The graph in the top right corner shows the difference between the change in the district's Total Operating Expenditures (excluding capital) per student (blue bar) and California Per Capita Personal Income (green bar). [See the Methodology for a full description for how this is calculated]. Panama-Buena Vista Union Elementary spent \$8,737 per student, which ranked 574 out of the 955 districts for which this information was available, with the top ranked district spending the most per student.

The graph in the middle left hand side of the page shows the annual savings if Total Operating Expenditures per student, excluding Certificated Teacher Salaries and Benefits, had only increased at the same rate as PCPI in FY 07-08. Note that for FY 08-09 the calculation shown is for the savings if the increase in such Operating Expenditures per student (i.e., excluding Certificated Teacher Salaries and Benefits) was held at zero, not decreased at the rate PCPI decreased. Below each year is the number of teachers that could have been employed by those savings.

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed. For FY 08-09, this district ranked 402 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In Panama-Buena Vista Union Elementary Total Operating Expenditures per student (excluding capital), grew by 29% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In Panama-Buena Vista Union Elementary, 19% of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated 21 additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 11% of Certificated Teacher Salary expenditures. This amount ranked 132 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 56%.

This district is in quadrant 1. (See Chart 3-6, pp. 104-105)

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

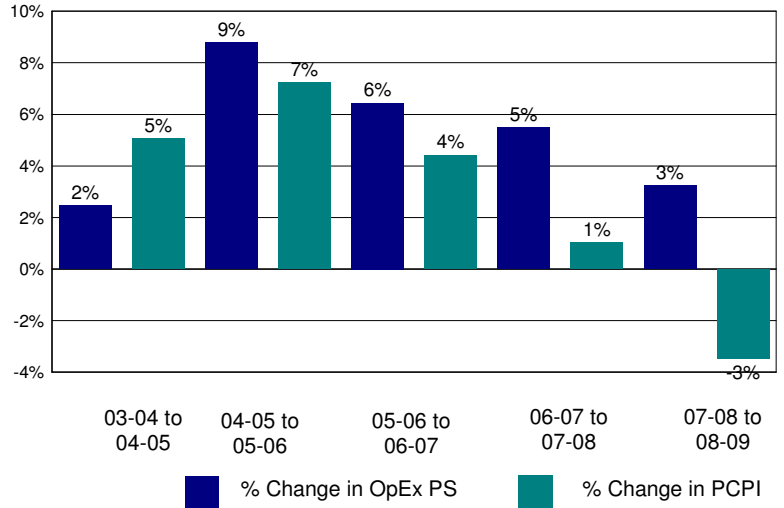

- Total Certificated Teacher Salaries (Object 1100) & Estimated Benefits
- Total Instructional Aide Salaries (Object 2100) & Estimated Benefits
- Approved Textbooks and Books (Objects 4100 & 4200)
- Materials and Supplies expenditures (Object 4300) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180 and 1190)
- Professional/Consulting Services/Subagreements for Services (Objects 5100 and 5800) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180, 1190)

District Profile: Panoche Elementary

The graph in the top right corner shows the difference between the change in the district's Total Operating Expenditures (excluding capital) per student (blue bar) and California Per Capita Personal Income (green bar). [See the Methodology for a full description for how this is calculated]. Panoche Elementary spent \$13,110 per student, which ranked 134 out of the 955 districts for which this information was available, with the top ranked district spending the most per student.

The graph in the middle left hand side of the page shows the annual savings if Total Operating Expenditures per student, excluding Certificated Teacher Salaries and Benefits, had only increased at the same rate as PCPI in FY 07-08. Note that for FY 08-09 the calculation shown is for the savings if the increase in such Operating Expenditures per student (i.e., excluding Certificated Teacher Salaries and Benefits) was held at zero, not decreased at the rate PCPI decreased. Below each year is the number of teachers that could have been employed by those savings.

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed. For FY 08-09, this district ranked 924 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In Panoche Elementary Total Operating Expenditures per student (excluding capital), grew by 34% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In Panoche Elementary, % of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 9% of Certificated Teacher Salary expenditures. This amount ranked 40 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 60%.

This district is in quadrant 1. (See Chart 3-6, pp. 104-105)

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

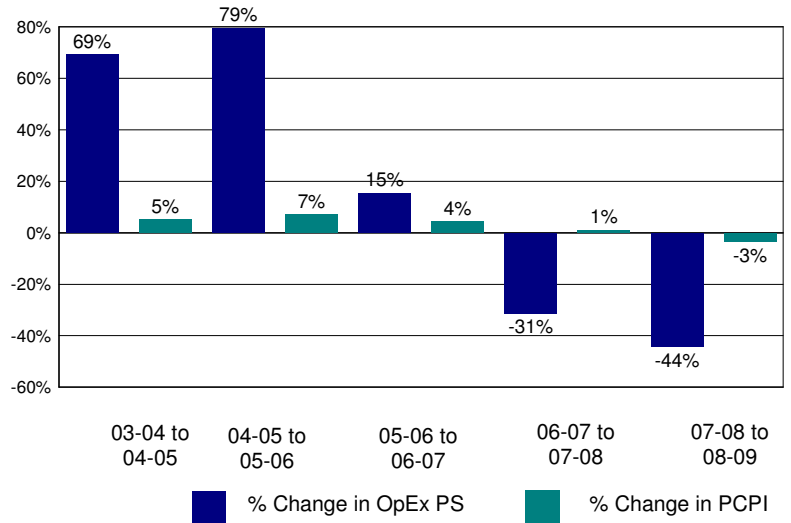

- Total Certificated Teacher Salaries (Object 1100) & Estimated Benefits
- Total Instructional Aide Salaries (Object 2100) & Estimated Benefits

District Profile: Pasadena Unified

The graph in the top right corner shows the difference between the change in the district's Total Operating Expenditures (excluding capital) per student (blue bar) and California Per Capita Personal Income (green bar). [See the Methodology for a full description for how this is calculated]. Pasadena Unified spent \$11,315 per student, which ranked 200 out of the 955 districts for which this information was available, with the top ranked district spending the most per student.

The graph in the middle left hand side of the page shows the annual savings if Total Operating Expenditures per student, excluding Certificated Teacher Salaries and Benefits, had only increased at the same rate as PCPI in FY 07-08. Note that for FY 08-09 the calculation shown is for the savings if the increase in such Operating Expenditures per student (i.e., excluding Certificated Teacher Salaries and Benefits) was held at zero, not decreased at the rate PCPI decreased. Below each year is the number of teachers that could have been employed by those savings.

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed. For FY 08-09, this district ranked 762 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In Pasadena Unified Total Operating Expenditures per student (excluding capital), grew by 18% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In Pasadena Unified, 20% of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated 0 additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 14% of Certificated Teacher Salary expenditures. This amount ranked 305 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 53%.

This district is in quadrant 3. (See Chart 3-6, pp. 104-105)

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

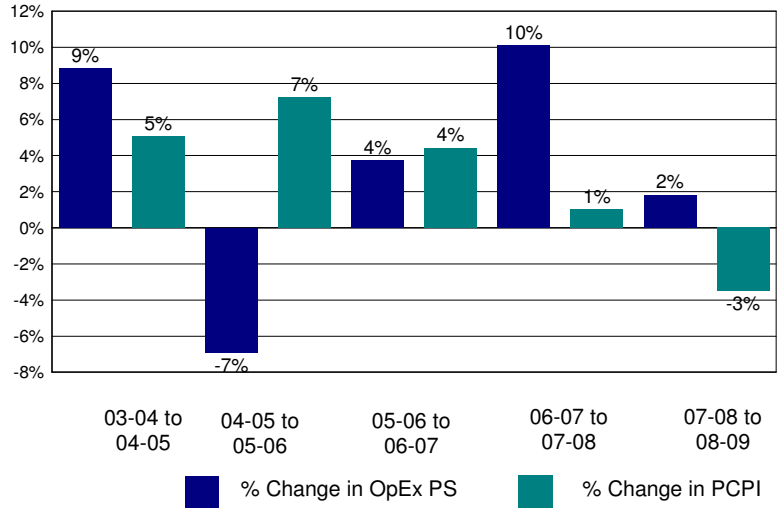

- Total Certificated Teacher Salaries (Object 1100) & Estimated Benefits
- Total Instructional Aide Salaries (Object 2100) & Estimated Benefits
- Approved Textbooks and Books (Objects 4100 & 4200)
- Materials and Supplies expenditures (Object 4300) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180 and 1190)
- Professional/Consulting Services/Subagreements for Services (Objects 5100 and 5800) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180, 1190)

District Profile: Paso Robles Joint Unified

The graph in the top right corner shows the difference between the change in the district's Total Operating Expenditures (excluding capital) per student (blue bar) and California Per Capita Personal Income (green bar). [See the Methodology for a full description for how this is calculated]. Paso Robles Joint Unified spent \$8,844 per student, which ranked 542 out of the 955 districts for which this information was available, with the top ranked district spending the most per student.

The graph in the middle left hand side of the page shows the annual savings if Total Operating Expenditures per student, excluding Certificated Teacher Salaries and Benefits, had only increased at the same rate as PCPI in FY 07-08. Note that for FY 08-09 the calculation shown is for the savings if the increase in such Operating Expenditures per student (i.e., excluding Certificated Teacher Salaries and Benefits) was held at zero, not decreased at the rate PCPI decreased. Below each year is the number of teachers that could have been employed by those savings.

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed. For FY 08-09, this district ranked 121 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In Paso Robles Joint Unified Total Operating Expenditures per student (excluding capital), grew by 20% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In Paso Robles Joint Unified, 19% of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated 0 additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 12% of Certificated Teacher Salary expenditures. This amount ranked 202 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 63%.

This district is in quadrant 3. (See Chart 3-6, pp. 104-105)

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

District Profile: Piedmont City Unified

The graph in the top right corner shows the difference between the change in the district's Total Operating Expenditures (excluding capital) per student (blue bar) and California Per Capita Personal Income (green bar). [See the Methodology for a full description for how this is calculated]. Piedmont City Unified spent \$11,794 per student, which ranked 176 out of the 955 districts for which this information was available, with the top ranked district spending the most per student.

The graph in the middle left hand side of the page shows the annual savings if Total Operating Expenditures per student, excluding Certificated Teacher Salaries and Benefits, had only increased at the same rate as PCPI in FY 07-08. Note that for FY 08-09 the calculation shown is for the savings if the increase in such Operating Expenditures per student (i.e., excluding Certificated Teacher Salaries and Benefits) was held at zero, not decreased at the rate PCPI decreased. Below each year is the number of teachers that could have been employed by those savings.

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed. For FY 08-09, this district ranked 265 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In Piedmont City Unified Total Operating Expenditures per student (excluding capital), grew by 33% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In Piedmont City Unified, 40% of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated 0 additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 16% of Certificated Teacher Salary expenditures. This amount ranked 509 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 65%.

This district is in quadrant 3. (See Chart 3-6, pp. 104-105)

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

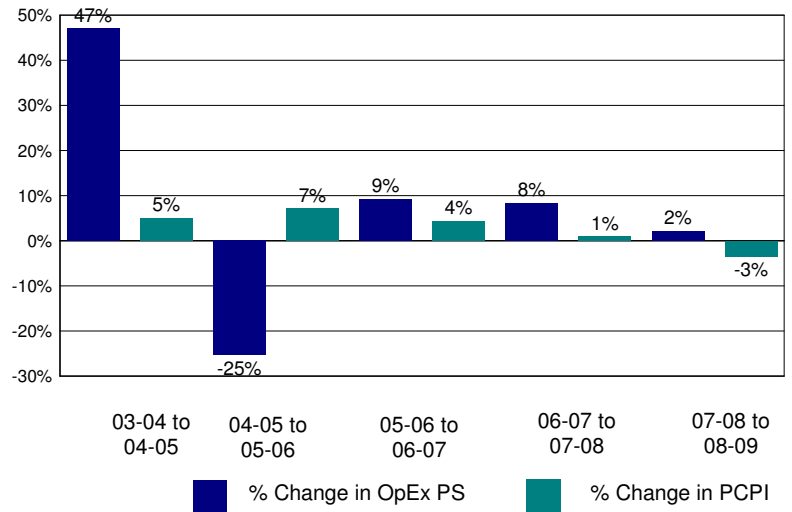

- Total Certificated Teacher Salaries (Object 1100) & Estimated Benefits
- Total Instructional Aide Salaries (Object 2100) & Estimated Benefits
- Approved Textbooks and Books (Objects 4100 & 4200)
- Materials and Supplies expenditures (Object 4300) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180 and 1190)
- Professional/Consulting Services/Subagreements for Services (Objects 5100 and 5800) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180, 1190)

District Profile: Pixley Union Elementary

The graph in the top right corner shows the difference between the change in the district's Total Operating Expenditures (excluding capital) per student (blue bar) and California Per Capita Personal Income (green bar). [See the Methodology for a full description for how this is calculated]. Pixley Union Elementary spent \$9,078 per student, which ranked 487 out of the 955 districts for which this information was available, with the top ranked district spending the most per student.

The graph in the middle left hand side of the page shows the annual savings if Total Operating Expenditures per student, excluding Certificated Teacher Salaries and Benefits, had only increased at the same rate as PCPI in FY 07-08. Note that for FY 08-09 the calculation shown is for the savings if the increase in such Operating Expenditures per student (i.e., excluding Certificated Teacher Salaries and Benefits) was held at zero, not decreased at the rate PCPI decreased. Below each year is the number of teachers that could have been employed by those savings.

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed. For FY 08-09, this district ranked 254 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In Pixley Union Elementary Total Operating Expenditures per student (excluding capital), grew by 3% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In Pixley Union Elementary, 16% of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated 5 additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 11% of Certificated Teacher Salary expenditures. This amount ranked 95 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 62%.

This district is in quadrant 1. (See Chart 3-6, pp. 104-105)

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

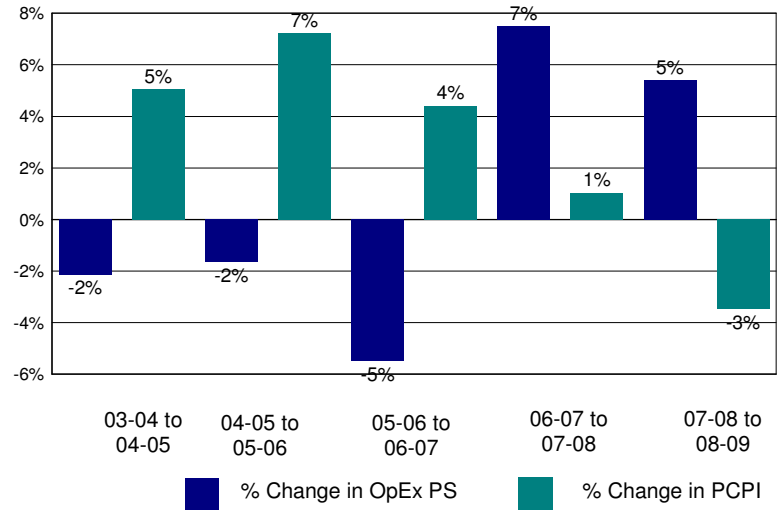

- Total Certificated Teacher Salaries (Object 1100) & Estimated Benefits
- Total Instructional Aide Salaries (Object 2100) & Estimated Benefits
- Approved Textbooks and Books (Objects 4100 & 4200)
- Materials and Supplies expenditures (Object 4300) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180 and 1190)
- Professional/Consulting Services/Subagreements for Services (Objects 5100 and 5800) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180, 1190)

District Profile: Planada Elementary

The graph in the top right corner shows the difference between the change in the district's Total Operating Expenditures (excluding capital) per student (blue bar) and California Per Capita Personal Income (green bar). [See the Methodology for a full description for how this is calculated]. Planada Elementary spent \$9,544 per student, which ranked 377 out of the 955 districts for which this information was available, with the top ranked district spending the most per student.

The graph in the middle left hand side of the page shows the annual savings if Total Operating Expenditures per student, excluding Certificated Teacher Salaries and Benefits, had only increased at the same rate as PCPI in FY 07-08. Note that for FY 08-09 the calculation shown is for the savings if the increase in such Operating Expenditures per student (i.e., excluding Certificated Teacher Salaries and Benefits) was held at zero, not decreased at the rate PCPI decreased. Below each year is the number of teachers that could have been employed by those savings.

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed. For FY 08-09, this district ranked 498 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In Planada Elementary Total Operating Expenditures per student (excluding capital), grew by 23% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In Planada Elementary, 24% of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated 0 additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 18% of Certificated Teacher Salary expenditures. This amount ranked 646 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 56%.

This district is in quadrant 4. (See Chart 3-6, pp. 104-105)

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

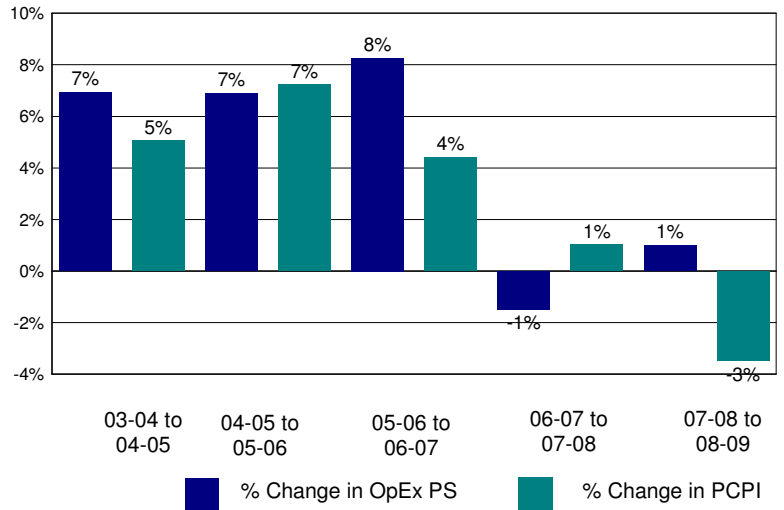

- Total Certificated Teacher Salaries (Object 1100) & Estimated Benefits
- Total Instructional Aide Salaries (Object 2100) & Estimated Benefits
- Approved Textbooks and Books (Objects 4100 & 4200)
- Materials and Supplies expenditures (Object 4300) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180 and 1190)
- Professional/Consulting Services/Subagreements for Services (Objects 5100 and 5800) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180, 1190)

District Profile: Pleasant Valley School

The graph in the top right corner shows the difference between the change in the district's Total Operating Expenditures (excluding capital) per student (blue bar) and California Per Capita Personal Income (green bar). [See the Methodology for a full description for how this is calculated]. Pleasant Valley School spent \$7,885 per student, which ranked 833 out of the 955 districts for which this information was available, with the top ranked district spending the most per student.

The graph in the middle left hand side of the page shows the annual savings if Total Operating Expenditures per student, excluding Certificated Teacher Salaries and Benefits, had only increased at the same rate as PCPI in FY 07-08. Note that for FY 08-09 the calculation shown is for the savings if the increase in such Operating Expenditures per student (i.e., excluding Certificated Teacher Salaries and Benefits) was held at zero, not decreased at the rate PCPI decreased. Below each year is the number of teachers that could have been employed by those savings.

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed. For FY 08-09, this district ranked 166 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In Pleasant Valley School Total Operating Expenditures per student (excluding capital), grew by 25% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In Pleasant Valley School, 24% of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated 0 additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 14% of Certificated Teacher Salary expenditures. This amount ranked 334 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 65%.

This district is in quadrant 3. (See Chart 3-6, pp. 104-105)

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

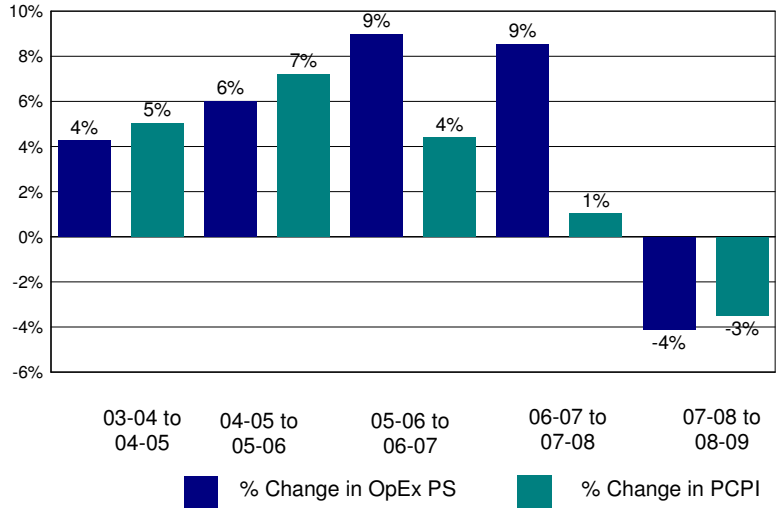

- Total Certificated Teacher Salaries (Object 1100) & Estimated Benefits
- Total Instructional Aide Salaries (Object 2100) & Estimated Benefits
- Approved Textbooks and Books (Objects 4100 & 4200)
- Materials and Supplies expenditures (Object 4300) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180 and 1190)
- Professional/Consulting Services/Subagreements for Services (Objects 5100 and 5800) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180, 1190)

District Profile: Pollock Pines Elementary

The graph in the top right corner shows the difference between the change in the district's Total Operating Expenditures (excluding capital) per student (blue bar) and California Per Capita Personal Income (green bar). [See the Methodology for a full description for how this is calculated]. Pollock Pines Elementary spent \$8,628 per student, which ranked 611 out of the 955 districts for which this information was available, with the top ranked district spending the most per student.

The graph in the middle left hand side of the page shows the annual savings if Total Operating Expenditures per student, excluding Certificated Teacher Salaries and Benefits, had only increased at the same rate as PCPI in FY 07-08. Note that for FY 08-09 the calculation shown is for the savings if the increase in such Operating Expenditures per student (i.e., excluding Certificated Teacher Salaries and Benefits) was held at zero, not decreased at the rate PCPI decreased. Below each year is the number of teachers that could have been employed by those savings.

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed. For FY 08-09, this district ranked 407 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In Pollock Pines Elementary Total Operating Expenditures per student (excluding capital), grew by 10% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In Pollock Pines Elementary, 30% of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated 1 additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 26% of Certificated Teacher Salary expenditures. This amount ranked 860 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 57%.

This district is in quadrant 4. (See Chart 3-6, pp. 104-105)

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

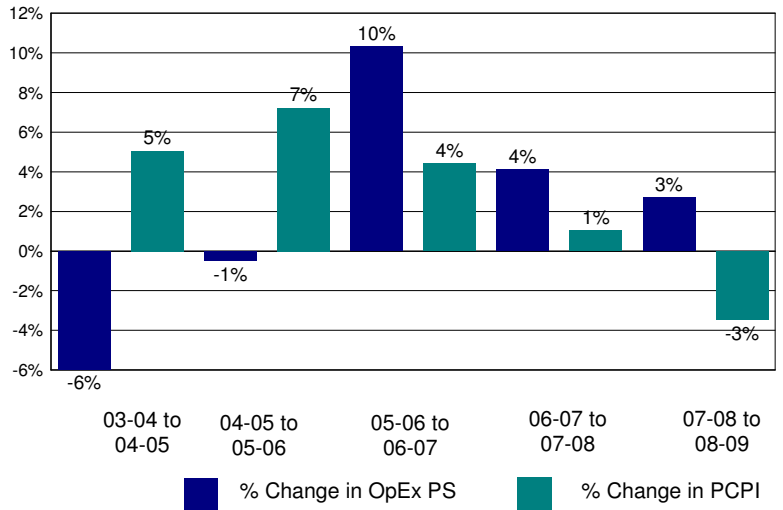

- Total Certificated Teacher Salaries (Object 1100) & Estimated Benefits
- Total Instructional Aide Salaries (Object 2100) & Estimated Benefits
- Approved Textbooks and Books (Objects 4100 & 4200)
- Materials and Supplies expenditures (Object 4300) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180 and 1190)
- Professional/Consulting Services/Subagreements for Services (Objects 5100 and 5800) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180, 1190)

The graph in the top right corner shows the difference between the change in the district's Total Operating Expenditures (excluding capital) per student (blue bar) and California Per Capita Personal Income (green bar). [See the Methodology for a full description for how this is calculated]. Potter Valley Community Unified spent \$15,089 per student, which ranked 91 out of the 955 districts for which this information was available, with the top ranked district spending the most per student.

The graph in the middle left hand side of the page shows the annual savings if Total Operating Expenditures per student, excluding Certificated Teacher Salaries and Benefits, had only increased at the same rate as PCPI in FY 07-08. Note that for FY 08-09 the calculation shown is for the savings if the increase in such Operating Expenditures per student (i.e., excluding Certificated Teacher Salaries and Benefits) was held at zero, not decreased at the rate PCPI decreased. Below each year is the number of teachers that could have been employed by those savings.

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed. For FY 08-09, this district ranked 817 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In Potter Valley Community Unified Total Operating Expenditures per student (excluding capital), grew by 23% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In Potter Valley Community Unified, 10% of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated 2 additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 19% of Certificated Teacher Salary expenditures. This amount ranked 716 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 55%.

This district is in quadrant 1. (See Chart 3-6, pp. 104-105)

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

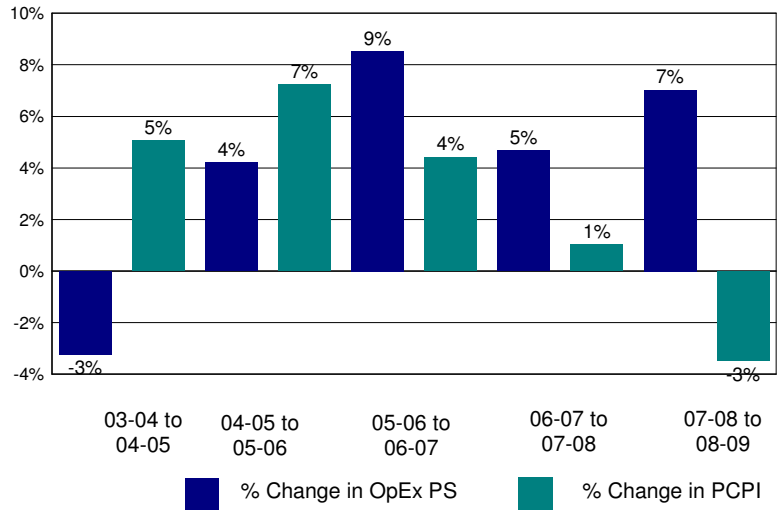

- Total Certificated Teacher Salaries (Object 1100) & Estimated Benefits
- Total Instructional Aide Salaries (Object 2100) & Estimated Benefits
- Approved Textbooks and Books (Objects 4100 & 4200)
- Materials and Supplies expenditures (Object 4300) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180 and 1190)
- Professional/Consulting Services/Subagreements for Services (Objects 5100 and 5800) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180, 1190)

District Profile: Ravendale-Termo Elementary

The graph in the top right corner shows the difference between the change in the district's Total Operating Expenditures (excluding capital) per student (blue bar) and California Per Capita Personal Income (green bar). [See the Methodology for a full description for how this is calculated]. Ravendale-Termo Elementary spent \$25,738 per student, which ranked 23 out of the 955 districts for which this information was available, with the top ranked district spending the most per student.

The graph in the middle left hand side of the page shows the annual savings if Total Operating Expenditures per student, excluding Certificated Teacher Salaries and Benefits, had only increased at the same rate as PCPI in FY 07-08. Note that for FY 08-09 the calculation shown is for the savings if the increase in such Operating Expenditures per student (i.e., excluding Certificated Teacher Salaries and Benefits) was held at zero, not decreased at the rate PCPI decreased. Below each year is the number of teachers that could have been employed by those savings.

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed. For FY 08-09, this district ranked 937 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In Ravendale-Termo Elementary Total Operating Expenditures per student (excluding capital), grew by 98% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In Ravendale-Termo Elementary, % of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 10% of Certificated Teacher Salary expenditures. This amount ranked 57 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 34%.

This district is in quadrant 2. (See Chart 3-6, pp. 104-105)

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

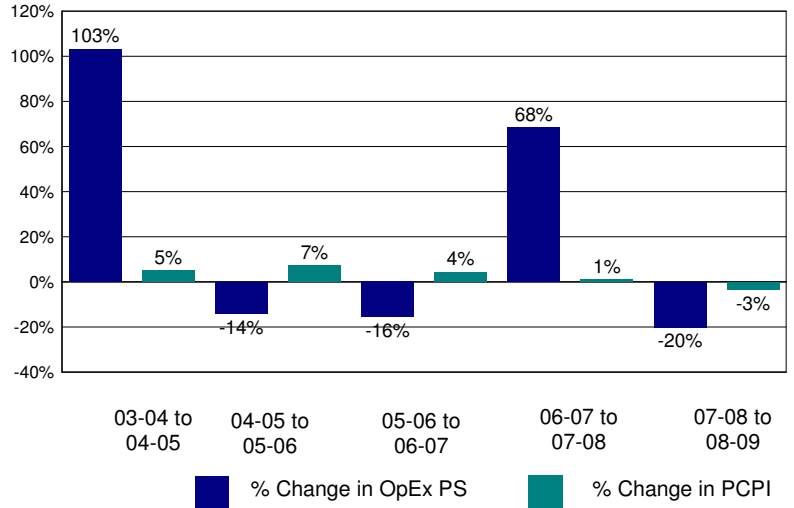

- Total Certificated Teacher Salaries (Object 1100) & Estimated Benefits
- Total Instructional Aide Salaries (Object 2100) & Estimated Benefits
- Approved Textbooks and Books (Objects 4100 & 4200)
- Materials and Supplies expenditures (Object 4300) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180 and 1190)
- Professional/Consulting Services/Subagreements for Services (Objects 5100 and 5800) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180, 1190)

District Profile: Redding Elementary

The graph in the top right corner shows the difference between the change in the district's Total Operating Expenditures (excluding capital) per student (blue bar) and California Per Capita Personal Income (green bar). [See the Methodology for a full description for how this is calculated]. Redding Elementary spent \$8,951 per student, which ranked 514 out of the 955 districts for which this information was available, with the top ranked district spending the most per student.

The graph in the middle left hand side of the page shows the annual savings if Total Operating Expenditures per student, excluding Certificated Teacher Salaries and Benefits, had only increased at the same rate as PCPI in FY 07-08. Note that for FY 08-09 the calculation shown is for the savings if the increase in such Operating Expenditures per student (i.e., excluding Certificated Teacher Salaries and Benefits) was held at zero, not decreased at the rate PCPI decreased. Below each year is the number of teachers that could have been employed by those savings.

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed. For FY 08-09, this district ranked 429 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In Redding Elementary Total Operating Expenditures per student (excluding capital), grew by 31% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In Redding Elementary, 22% of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated 0 additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 15% of Certificated Teacher Salary expenditures. This amount ranked 442 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 61%.

This district is in quadrant 3. (See Chart 3-6, pp. 104-105)

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

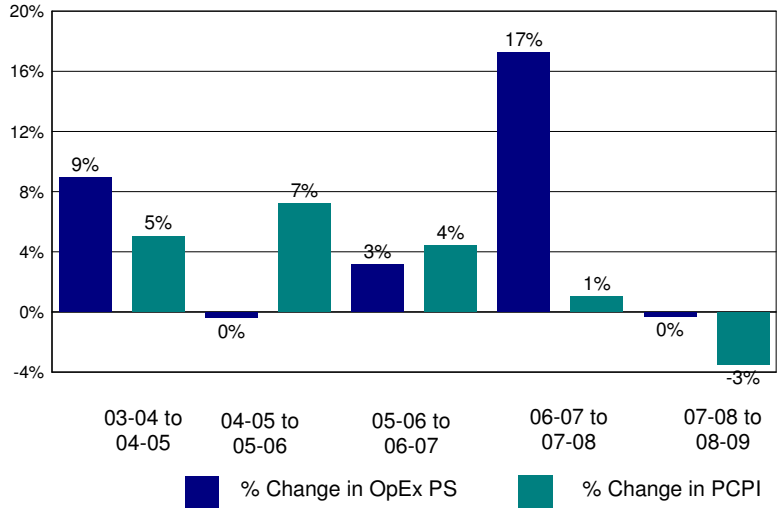

- Total Certificated Teacher Salaries (Object 1100) & Estimated Benefits
- Total Instructional Aide Salaries (Object 2100) & Estimated Benefits
- Approved Textbooks and Books (Objects 4100 & 4200)
- Materials and Supplies expenditures (Object 4300) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180 and 1190)
- Professional/Consulting Services/Subagreements for Services (Objects 5100 and 5800) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180, 1190)

The graph in the top right corner shows the difference between the change in the district's Total Operating Expenditures (excluding capital) per student (blue bar) and California Per Capita Personal Income (green bar). [See the Methodology for a full description for how this is calculated]. Reef-Sunset Unified spent \$9,103 per student, which ranked 475 out of the 955 districts for which this information was available, with the top ranked district spending the most per student.

The graph in the middle left hand side of the page shows the annual savings if Total Operating Expenditures per student, excluding Certificated Teacher Salaries and Benefits, had only increased at the same rate as PCPI in FY 07-08. Note that for FY 08-09 the calculation shown is for the savings if the increase in such Operating Expenditures per student (i.e., excluding Certificated Teacher Salaries and Benefits) was held at zero, not decreased at the rate PCPI decreased. Below each year is the number of teachers that could have been employed by those savings.

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed. For FY 08-09, this district ranked 565 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In Reef-Sunset Unified Total Operating Expenditures per student (excluding capital), grew by 24% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In Reef-Sunset Unified, 29% of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated 0 additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 14% of Certificated Teacher Salary expenditures. This amount ranked 315 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 58%.

This district is in quadrant 3. (See Chart 3-6, pp. 104-105)

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

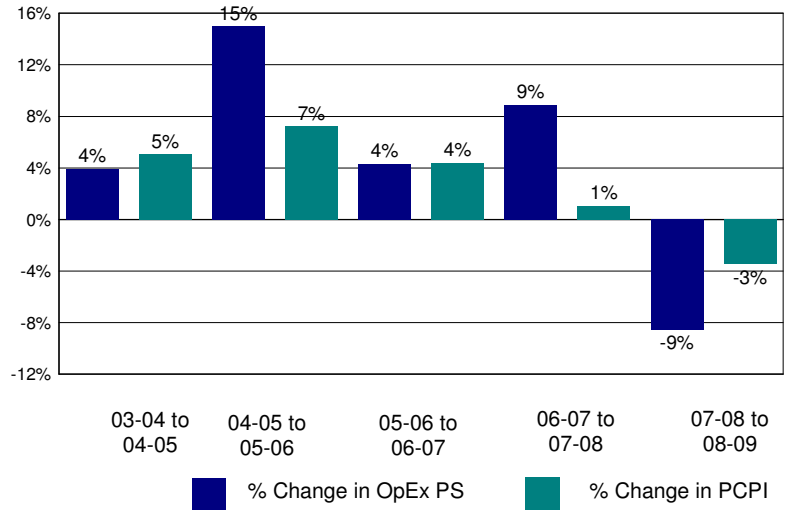

- Total Certificated Teacher Salaries (Object 1100) & Estimated Benefits
- Total Instructional Aide Salaries (Object 2100) & Estimated Benefits
- Approved Textbooks and Books (Objects 4100 & 4200)
- Materials and Supplies expenditures (Object 4300) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180 and 1190)
- Professional/Consulting Services/Subagreements for Services (Objects 5100 and 5800) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180, 1190)

District Profile: Richmond Elementary

The graph in the top right corner shows the difference between the change in the district's Total Operating Expenditures (excluding capital) per student (blue bar) and California Per Capita Personal Income (green bar). [See the Methodology for a full description for how this is calculated]. Richmond Elementary spent \$6,876 per student, which ranked 946 out of the 955 districts for which this information was available, with the top ranked district spending the most per student.

The graph in the middle left hand side of the page shows the annual savings if Total Operating Expenditures per student, excluding Certificated Teacher Salaries and Benefits, had only increased at the same rate as PCPI in FY 07-08. Note that for FY 08-09 the calculation shown is for the savings if the increase in such Operating Expenditures per student (i.e., excluding Certificated Teacher Salaries and Benefits) was held at zero, not decreased at the rate PCPI decreased. Below each year is the number of teachers that could have been employed by those savings.

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed. For FY 08-09, this district ranked 640 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In Richmond Elementary Total Operating Expenditures per student (excluding capital), grew by 17% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In Richmond Elementary, % of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 50% of Certificated Teacher Salary expenditures. This amount ranked 940 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 57%.

This district is in quadrant 3. (See Chart 3-6, pp. 104-105)

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

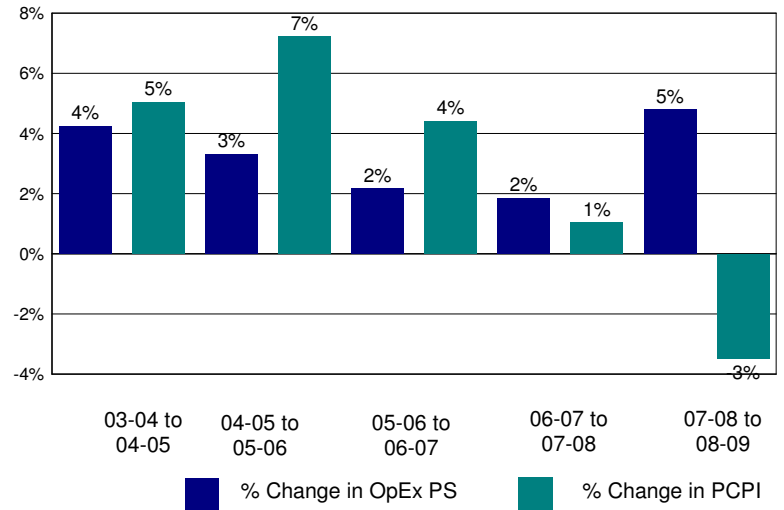

- Total Certificated Teacher Salaries (Object 1100) & Estimated Benefits
- Total Instructional Aide Salaries (Object 2100) & Estimated Benefits
- Approved Textbooks and Books (Objects 4100 & 4200)
- Materials and Supplies expenditures (Object 4300) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180 and 1190)
- Professional/Consulting Services/Subagreements for Services (Objects 5100 and 5800) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180, 1190)

District Profile: Rim of The World Unified

The graph in the top right corner shows the difference between the change in the district's Total Operating Expenditures (excluding capital) per student (blue bar) and California Per Capita Personal Income (green bar). [See the Methodology for a full description for how this is calculated]. Rim of The World Unified spent \$8,479 per student, which ranked 661 out of the 955 districts for which this information was available, with the top ranked district spending the most per student.

The graph in the middle left hand side of the page shows the annual savings if Total Operating Expenditures per student, excluding Certificated Teacher Salaries and Benefits, had only increased at the same rate as PCPI in FY 07-08. Note that for FY 08-09 the calculation shown is for the savings if the increase in such Operating Expenditures per student (i.e., excluding Certificated Teacher Salaries and Benefits) was held at zero, not decreased at the rate PCPI decreased. Below each year is the number of teachers that could have been employed by those savings.

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed. For FY 08-09, this district ranked 393 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In Rim of The World Unified Total Operating Expenditures per student (excluding capital), grew by 20% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In Rim of The World Unified, 30% of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated 8 additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 12% of Certificated Teacher Salary expenditures. This amount ranked 151 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 58%.

This district is in quadrant 1. (See Chart 3-6, pp. 104-105)

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

District Profile: Ripon Unified

The graph in the top right corner shows the difference between the change in the district's Total Operating Expenditures (excluding capital) per student (blue bar) and California Per Capita Personal Income (green bar). [See the Methodology for a full description for how this is calculated]. Ripon Unified spent \$8,092 per student, which ranked 788 out of the 955 districts for which this information was available, with the top ranked district spending the most per student.

The graph in the middle left hand side of the page shows the annual savings if Total Operating Expenditures per student, excluding Certificated Teacher Salaries and Benefits, had only increased at the same rate as PCPI in FY 07-08. Note that for FY 08-09 the calculation shown is for the savings if the increase in such Operating Expenditures per student (i.e., excluding Certificated Teacher Salaries and Benefits) was held at zero, not decreased at the rate PCPI decreased. Below each year is the number of teachers that could have been employed by those savings.

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed. For FY 08-09, this district ranked 205 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In Ripon Unified Total Operating Expenditures per student (excluding capital), grew by 31% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In Ripon Unified, 21% of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated 21 additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 14% of Certificated Teacher Salary expenditures. This amount ranked 370 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 60%.

This district is in quadrant 4. (See Chart 3-6, pp. 104-105)

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

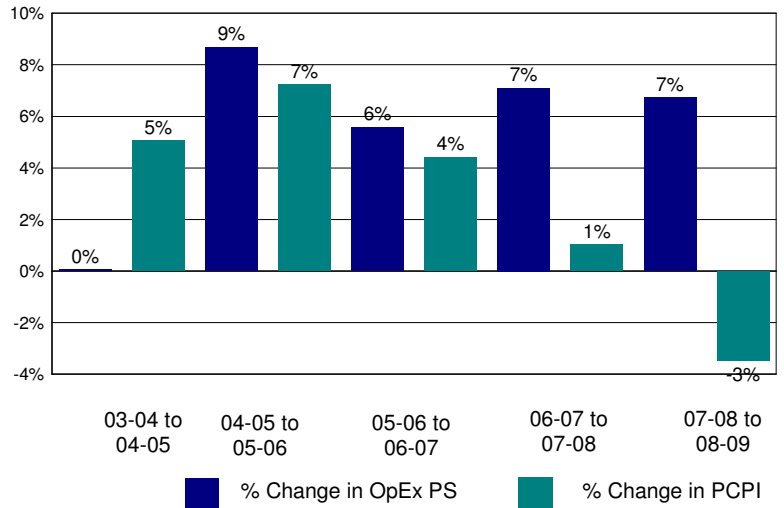

- Total Certificated Teacher Salaries (Object 1100) & Estimated Benefits
- Total Instructional Aide Salaries (Object 2100) & Estimated Benefits
- Approved Textbooks and Books (Objects 4100 & 4200)
- Materials and Supplies expenditures (Object 4300) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180 and 1190)
- Professional/Consulting Services/Subagreements for Services (Objects 5100 and 5800) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180, 1190)

District Profile: River Delta Joint Unified

The graph in the top right corner shows the difference between the change in the district's Total Operating Expenditures (excluding capital) per student (blue bar) and California Per Capita Personal Income (green bar). [See the Methodology for a full description for how this is calculated]. River Delta Joint Unified spent \$9,979 per student, which ranked 318 out of the 955 districts for which this information was available, with the top ranked district spending the most per student.

The graph in the middle left hand side of the page shows the annual savings if Total Operating Expenditures per student, excluding Certificated Teacher Salaries and Benefits, had only increased at the same rate as PCPI in FY 07-08. Note that for FY 08-09 the calculation shown is for the savings if the increase in such Operating Expenditures per student (i.e., excluding Certificated Teacher Salaries and Benefits) was held at zero, not decreased at the rate PCPI decreased. Below each year is the number of teachers that could have been employed by those savings.

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed. For FY 08-09, this district ranked 721 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In River Delta Joint Unified Total Operating Expenditures per student (excluding capital), grew by 33% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In River Delta Joint Unified, 25% of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated 0 additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 21% of Certificated Teacher Salary expenditures. This amount ranked 794 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 61%.

This district is in quadrant 3. (See Chart 3-6, pp. 104-105)

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

District Profile: Robla Elementary

The graph in the top right corner shows the difference between the change in the district's Total Operating Expenditures (excluding capital) per student (blue bar) and California Per Capita Personal Income (green bar). [See the Methodology for a full description for how this is calculated]. Robla Elementary spent \$10,056 per student, which ranked 302 out of the 955 districts for which this information was available, with the top ranked district spending the most per student.

The graph in the middle left hand side of the page shows the annual savings if Total Operating Expenditures per student, excluding Certificated Teacher Salaries and Benefits, had only increased at the same rate as PCPI in FY 07-08. Note that for FY 08-09 the calculation shown is for the savings if the increase in such Operating Expenditures per student (i.e., excluding Certificated Teacher Salaries and Benefits) was held at zero, not decreased at the rate PCPI decreased. Below each year is the number of teachers that could have been employed by those savings.

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed. For FY 08-09, this district ranked 58 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In Robla Elementary Total Operating Expenditures per student (excluding capital), grew by 25% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In Robla Elementary, 29% of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated 0 additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 11% of Certificated Teacher Salary expenditures. This amount ranked 94 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 68%.

This district is in quadrant 3. (See Chart 3-6, pp. 104-105)

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

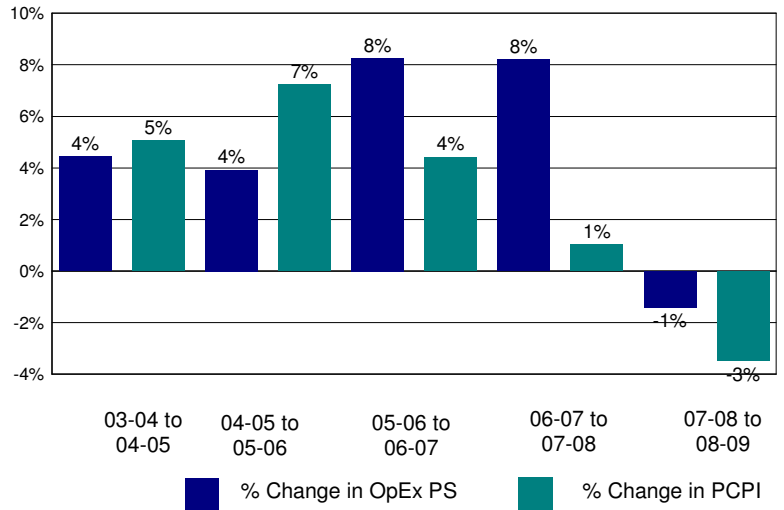

- Total Certificated Teacher Salaries (Object 1100) & Estimated Benefits
- Total Instructional Aide Salaries (Object 2100) & Estimated Benefits
- Approved Textbooks and Books (Objects 4100 & 4200)
- Materials and Supplies expenditures (Object 4300) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180 and 1190)
- Professional/Consulting Services/Subagreements for Services (Objects 5100 and 5800) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180, 1190)

District Profile: Rockford Elementary

The graph in the top right corner shows the difference between the change in the district's Total Operating Expenditures (excluding capital) per student (blue bar) and California Per Capita Personal Income (green bar). [See the Methodology for a full description for how this is calculated]. Rockford Elementary spent \$7,304 per student, which ranked 908 out of the 955 districts for which this information was available, with the top ranked district spending the most per student.

The graph in the middle left hand side of the page shows the annual savings if Total Operating Expenditures per student, excluding Certificated Teacher Salaries and Benefits, had only increased at the same rate as PCPI in FY 07-08. Note that for FY 08-09 the calculation shown is for the savings if the increase in such Operating Expenditures per student (i.e., excluding Certificated Teacher Salaries and Benefits) was held at zero, not decreased at the rate PCPI decreased. Below each year is the number of teachers that could have been employed by those savings.

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed. For FY 08-09, this district ranked 117 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In Rockford Elementary Total Operating Expenditures per student (excluding capital), grew by 19% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In Rockford Elementary, 9% of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated 0 additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 22% of Certificated Teacher Salary expenditures. This amount ranked 808 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 64%.

This district is in quadrant 2. (See Chart 3-6, pp. 104-105)

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

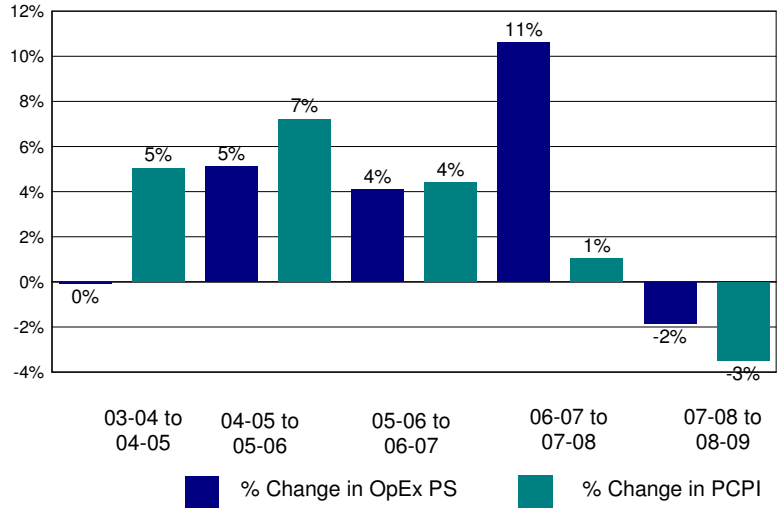

- Total Certificated Teacher Salaries (Object 1100) & Estimated Benefits

District Profile: Roseland Elementary

The graph in the top right corner shows the difference between the change in the district's Total Operating Expenditures (excluding capital) per student (blue bar) and California Per Capita Personal Income (green bar). [See the Methodology for a full description for how this is calculated]. Roseland Elementary spent \$10,908 per student, which ranked 225 out of the 955 districts for which this information was available, with the top ranked district spending the most per student.

The graph in the middle left hand side of the page shows the annual savings if Total Operating Expenditures per student, excluding Certificated Teacher Salaries and Benefits, had only increased at the same rate as PCPI in FY 07-08. Note that for FY 08-09 the calculation shown is for the savings if the increase in such Operating Expenditures per student (i.e., excluding Certificated Teacher Salaries and Benefits) was held at zero, not decreased at the rate PCPI decreased. Below each year is the number of teachers that could have been employed by those savings.

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed. For FY 08-09, this district ranked 875 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In Roseland Elementary Total Operating Expenditures per student (excluding capital), grew by 32% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In Roseland Elementary, 23% of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated 0 additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 22% of Certificated Teacher Salary expenditures. This amount ranked 797 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 62%.

This district is in quadrant 4. (See Chart 3-6, pp. 104-105)

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

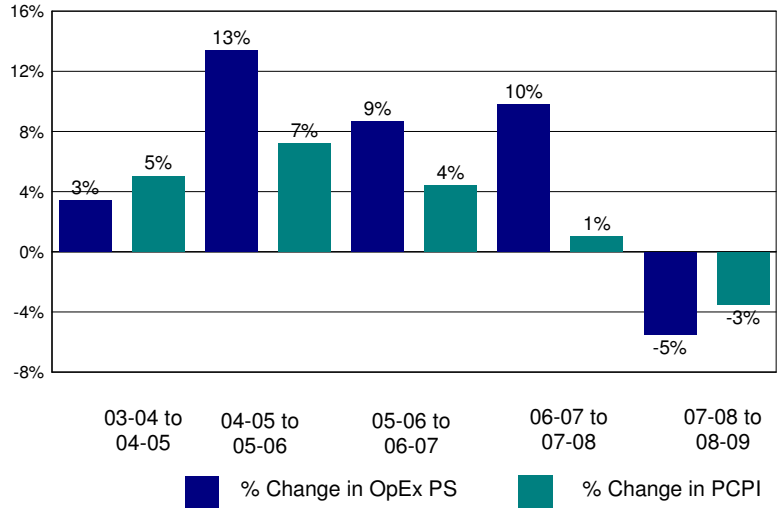

- Total Certificated Teacher Salaries (Object 1100) & Estimated Benefits
- Total Instructional Aide Salaries (Object 2100) & Estimated Benefits
- Approved Textbooks and Books (Objects 4100 & 4200)
- Materials and Supplies expenditures (Object 4300) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180 and 1190)
- Professional/Consulting Services/Subagreements for Services (Objects 5100 and 5800) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180, 1190)

District Profile: Rosemead Elementary

The graph in the top right corner shows the difference between the change in the district's Total Operating Expenditures (excluding capital) per student (blue bar) and California Per Capita Personal Income (green bar). [See the Methodology for a full description for how this is calculated]. Rosemead Elementary spent \$8,777 per student, which ranked 562 out of the 955 districts for which this information was available, with the top ranked district spending the most per student.

The graph in the middle left hand side of the page shows the annual savings if Total Operating Expenditures per student, excluding Certificated Teacher Salaries and Benefits, had only increased at the same rate as PCPI in FY 07-08. Note that for FY 08-09 the calculation shown is for the savings if the increase in such Operating Expenditures per student (i.e., excluding Certificated Teacher Salaries and Benefits) was held at zero, not decreased at the rate PCPI decreased. Below each year is the number of teachers that could have been employed by those savings.

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed. For FY 08-09, this district ranked 326 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In Rosemead Elementary Total Operating Expenditures per student (excluding capital), grew by 22% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In Rosemead Elementary, 19% of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated 0 additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 16% of Certificated Teacher Salary expenditures. This amount ranked 488 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 59%.

This district is in quadrant 2. (See Chart 3-6, pp. 104-105)

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

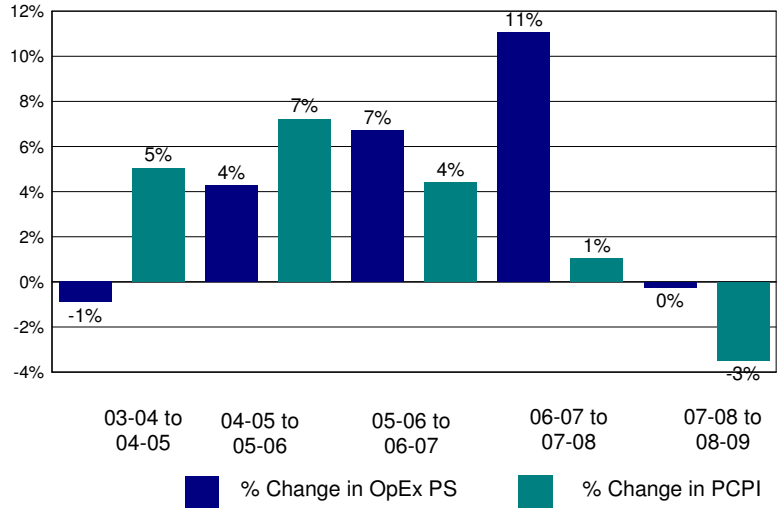

- Total Certificated Teacher Salaries (Object 1100) & Estimated Benefits
- Total Instructional Aide Salaries (Object 2100) & Estimated Benefits

District Profile: Round Valley Joint Elementary

The graph in the top right corner shows the difference between the change in the district's Total Operating Expenditures (excluding capital) per student (blue bar) and California Per Capita Personal Income (green bar). [See the Methodology for a full description for how this is calculated]. Round Valley Joint Elementary spent \$9,654 per student, which ranked 360 out of the 955 districts for which this information was available, with the top ranked district spending the most per student.

The graph in the middle left hand side of the page shows the annual savings if Total Operating Expenditures per student, excluding Certificated Teacher Salaries and Benefits, had only increased at the same rate as PCPI in FY 07-08. Note that for FY 08-09 the calculation shown is for the savings if the increase in such Operating Expenditures per student (i.e., excluding Certificated Teacher Salaries and Benefits) was held at zero, not decreased at the rate PCPI decreased. Below each year is the number of teachers that could have been employed by those savings.

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed. For FY 08-09, this district ranked 746 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In Round Valley Joint Elementary Total Operating Expenditures per student (excluding capital), grew by 30% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In Round Valley Joint Elementary, % of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 19% of Certificated Teacher Salary expenditures. This amount ranked 719 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 52%.

This district is in quadrant 1. (See Chart 3-6, pp. 104-105)

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

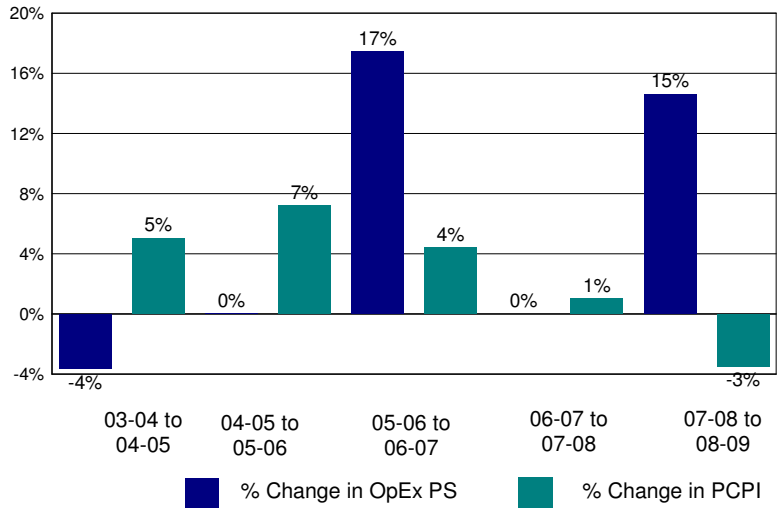

- Total Certificated Teacher Salaries (Object 1100) & Estimated Benefits
- Total Instructional Aide Salaries (Object 2100) & Estimated Benefits
- Approved Textbooks and Books (Objects 4100 & 4200)
- Materials and Supplies expenditures (Object 4300) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180 and 1190)
- Professional/Consulting Services/Subagreements for Services (Objects 5100 and 5800) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180, 1190)

District Profile: Round Valley Unified

The graph in the top right corner shows the difference between the change in the district's Total Operating Expenditures (excluding capital) per student (blue bar) and California Per Capita Personal Income (green bar). [See the Methodology for a full description for how this is calculated]. Round Valley Unified spent \$20,812 per student, which ranked 43 out of the 955 districts for which this information was available, with the top ranked district spending the most per student.

The graph in the middle left hand side of the page shows the annual savings if Total Operating Expenditures per student, excluding Certificated Teacher Salaries and Benefits, had only increased at the same rate as PCPI in FY 07-08. Note that for FY 08-09 the calculation shown is for the savings if the increase in such Operating Expenditures per student (i.e., excluding Certificated Teacher Salaries and Benefits) was held at zero, not decreased at the rate PCPI decreased. Below each year is the number of teachers that could have been employed by those savings.

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed. For FY 08-09, this district ranked 904 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In Round Valley Unified Total Operating Expenditures per student (excluding capital), grew by 39% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In Round Valley Unified, 19% of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated 0 additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 15% of Certificated Teacher Salary expenditures. This amount ranked 464 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 45%.

This district is in quadrant 2. (See Chart 3-6, pp. 104-105)

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

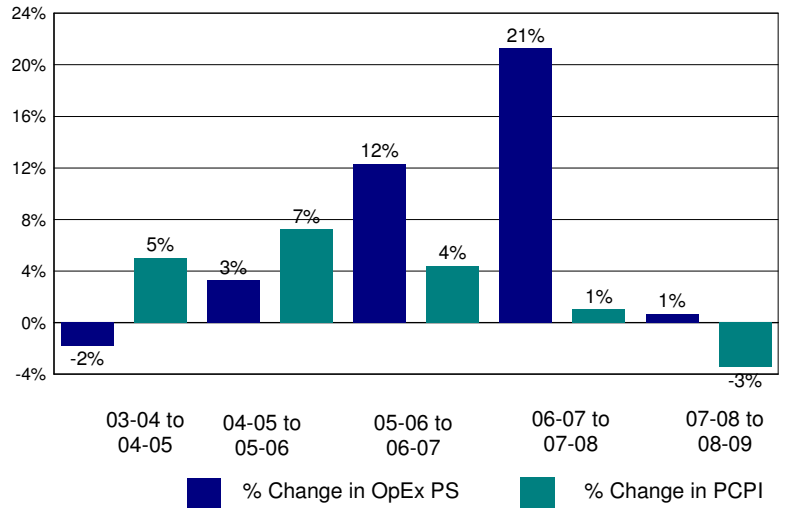

- Total Certificated Teacher Salaries (Object 1100) & Estimated Benefits

District Profile: Salida Union Elementary

The graph in the top right corner shows the difference between the change in the district's Total Operating Expenditures (excluding capital) per student (blue bar) and California Per Capita Personal Income (green bar). [See the Methodology for a full description for how this is calculated]. Salida Union Elementary spent \$8,626 per student, which ranked 613 out of the 955 districts for which this information was available, with the top ranked district spending the most per student.

The graph in the middle left hand side of the page shows the annual savings if Total Operating Expenditures per student, excluding Certificated Teacher Salaries and Benefits, had only increased at the same rate as PCPI in FY 07-08. Note that for FY 08-09 the calculation shown is for the savings if the increase in such Operating Expenditures per student (i.e., excluding Certificated Teacher Salaries and Benefits) was held at zero, not decreased at the rate PCPI decreased. Below each year is the number of teachers that could have been employed by those savings.

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed. For FY 08-09, this district ranked 154 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In Salida Union Elementary Total Operating Expenditures per student (excluding capital), grew by 32% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In Salida Union Elementary, 22% of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated 0 additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 16% of Certificated Teacher Salary expenditures. This amount ranked 524 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 67%.

This district is in quadrant 3. (See Chart 3-6, pp. 104-105)

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

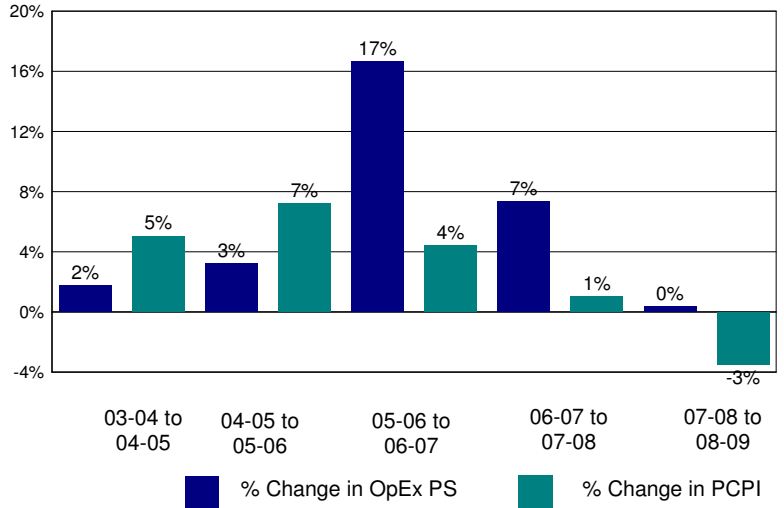

- Total Certificated Teacher Salaries (Object 1100) & Estimated Benefits
- Total Instructional Aide Salaries (Object 2100) & Estimated Benefits
- Approved Textbooks and Books (Objects 4100 & 4200)
- Materials and Supplies expenditures (Object 4300) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180 and 1190)
- Professional/Consulting Services/Subagreements for Services (Objects 5100 and 5800) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180, 1190)

District Profile: Salinas City Elementary

The graph in the top right corner shows the difference between the change in the district's Total Operating Expenditures (excluding capital) per student (blue bar) and California Per Capita Personal Income (green bar). [See the Methodology for a full description for how this is calculated]. Salinas City Elementary spent \$9,259 per student, which ranked 430 out of the 955 districts for which this information was available, with the top ranked district spending the most per student.

The graph in the middle left hand side of the page shows the annual savings if Total Operating Expenditures per student, excluding Certificated Teacher Salaries and Benefits, had only increased at the same rate as PCPI in FY 07-08. Note that for FY 08-09 the calculation shown is for the savings if the increase in such Operating Expenditures per student (i.e., excluding Certificated Teacher Salaries and Benefits) was held at zero, not decreased at the rate PCPI decreased. Below each year is the number of teachers that could have been employed by those savings.

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed. For FY 08-09, this district ranked 532 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In Salinas City Elementary Total Operating Expenditures per student (excluding capital), grew by 23% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In Salinas City Elementary, 1% of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated 0 additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 13% of Certificated Teacher Salary expenditures. This amount ranked 215 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 55%.

This district is in quadrant 4. (See Chart 3-6, pp. 104-105)

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

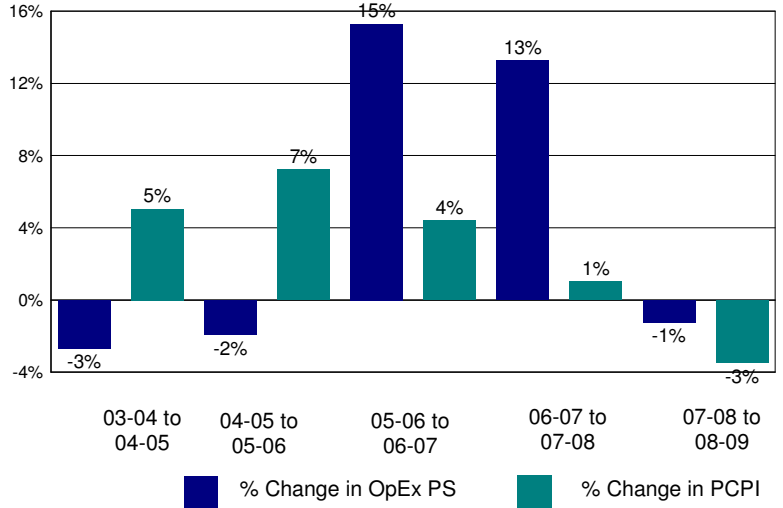

- Total Certificated Teacher Salaries (Object 1100) & Estimated Benefits

District Profile: San Bernardino City Unified

The graph in the top right corner shows the difference between the change in the district's Total Operating Expenditures (excluding capital) per student (blue bar) and California Per Capita Personal Income (green bar). [See the Methodology for a full description for how this is calculated]. San Bernardino City Unified spent \$10,578 per student, which ranked 254 out of the 955 districts for which this information was available, with the top ranked district spending the most per student.

The graph in the middle left hand side of the page shows the annual savings if Total Operating Expenditures per student, excluding Certificated Teacher Salaries and Benefits, had only increased at the same rate as PCPI in FY 07-08. Note that for FY 08-09 the calculation shown is for the savings if the increase in such Operating Expenditures per student (i.e., excluding Certificated Teacher Salaries and Benefits) was held at zero, not decreased at the rate PCPI decreased. Below each year is the number of teachers that could have been employed by those savings.

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed. For FY 08-09, this district ranked 537 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In San Bernardino City Unified Total Operating Expenditures per student (excluding capital), grew by 38% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In San Bernardino City Unified, 38% of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated 0 additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 14% of Certificated Teacher Salary expenditures. This amount ranked 340 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 57%.

This district is in quadrant 3. (See Chart 3-6, pp. 104-105)

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

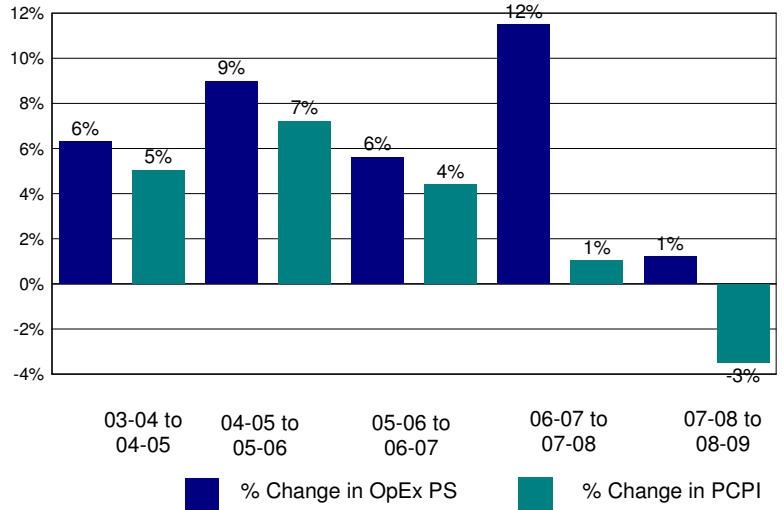

- Total Certificated Teacher Salaries (Object 1100) & Estimated Benefits
- Total Instructional Aide Salaries (Object 2100) & Estimated Benefits
- Approved Textbooks and Books (Objects 4100 & 4200)
- Materials and Supplies expenditures (Object 4300) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180 and 1190)
- Professional/Consulting Services/Subagreements for Services (Objects 5100 and 5800) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180, 1190)

District Profile: San Bruno Park Elementary

The graph in the top right corner shows the difference between the change in the district's Total Operating Expenditures (excluding capital) per student (blue bar) and California Per Capita Personal Income (green bar). [See the Methodology for a full description for how this is calculated]. San Bruno Park Elementary spent \$8,574 per student, which ranked 630 out of the 955 districts for which this information was available, with the top ranked district spending the most per student.

The graph in the middle left hand side of the page shows the annual savings if Total Operating Expenditures per student, excluding Certificated Teacher Salaries and Benefits, had only increased at the same rate as PCPI in FY 07-08. Note that for FY 08-09 the calculation shown is for the savings if the increase in such Operating Expenditures per student (i.e., excluding Certificated Teacher Salaries and Benefits) was held at zero, not decreased at the rate PCPI decreased. Below each year is the number of teachers that could have been employed by those savings.

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed. For FY 08-09, this district ranked 524 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In San Bruno Park Elementary Total Operating Expenditures per student (excluding capital), grew by 23% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In San Bruno Park Elementary, 15% of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated 0 additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 17% of Certificated Teacher Salary expenditures. This amount ranked 621 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 61%.

This district is in quadrant 3. (See Chart 3-6, pp. 104-105)

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

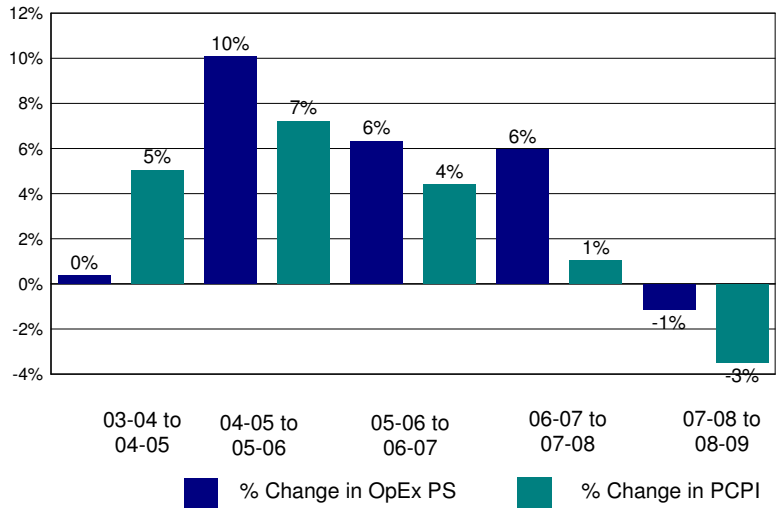

- Total Certificated Teacher Salaries (Object 1100) & Estimated Benefits

District Profile: San Gabriel Unified

The graph in the top right corner shows the difference between the change in the district's Total Operating Expenditures (excluding capital) per student (blue bar) and California Per Capita Personal Income (green bar). [See the Methodology for a full description for how this is calculated]. San Gabriel Unified spent \$8,835 per student, which ranked 544 out of the 955 districts for which this information was available, with the top ranked district spending the most per student.

The graph in the middle left hand side of the page shows the annual savings if Total Operating Expenditures per student, excluding Certificated Teacher Salaries and Benefits, had only increased at the same rate as PCPI in FY 07-08. Note that for FY 08-09 the calculation shown is for the savings if the increase in such Operating Expenditures per student (i.e., excluding Certificated Teacher Salaries and Benefits) was held at zero, not decreased at the rate PCPI decreased. Below each year is the number of teachers that could have been employed by those savings.

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed. For FY 08-09, this district ranked 441 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In San Gabriel Unified Total Operating Expenditures per student (excluding capital), grew by 20% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In San Gabriel Unified, 26% of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated 0 additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 16% of Certificated Teacher Salary expenditures. This amount ranked 541 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 58%.

This district is in quadrant 4. (See Chart 3-6, pp. 104-105)

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

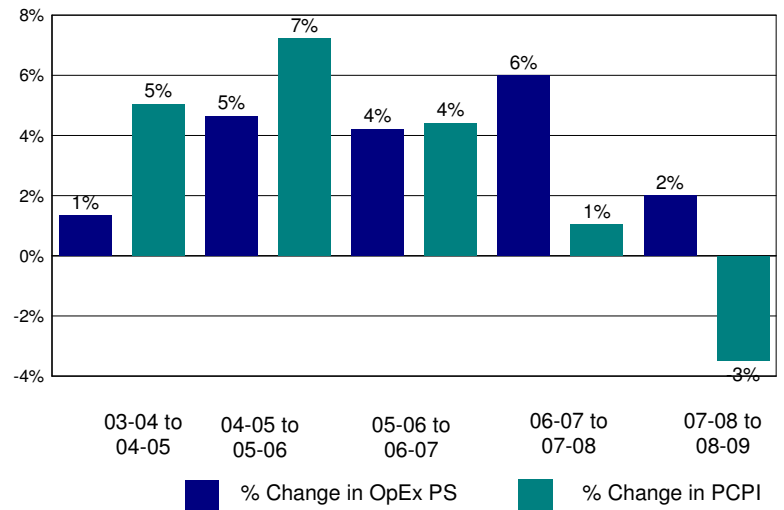

- Total Certificated Teacher Salaries (Object 1100) & Estimated Benefits
- Total Instructional Aide Salaries (Object 2100) & Estimated Benefits
- Approved Textbooks and Books (Objects 4100 & 4200)
- Materials and Supplies expenditures (Object 4300) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180 and 1190)
- Professional/Consulting Services/Subagreements for Services (Objects 5100 and 5800) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180, 1190)

District Profile: San Jacinto Unified

The graph in the top right corner shows the difference between the change in the district's Total Operating Expenditures (excluding capital) per student (blue bar) and California Per Capita Personal Income (green bar). [See the Methodology for a full description for how this is calculated]. San Jacinto Unified spent \$8,544 per student, which ranked 637 out of the 955 districts for which this information was available, with the top ranked district spending the most per student.

The graph in the middle left hand side of the page shows the annual savings if Total Operating Expenditures per student, excluding Certificated Teacher Salaries and Benefits, had only increased at the same rate as PCPI in FY 07-08. Note that for FY 08-09 the calculation shown is for the savings if the increase in such Operating Expenditures per student (i.e., excluding Certificated Teacher Salaries and Benefits) was held at zero, not decreased at the rate PCPI decreased. Below each year is the number of teachers that could have been employed by those savings.

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed. For FY 08-09, this district ranked 132 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In San Jacinto Unified Total Operating Expenditures per student (excluding capital), grew by 23% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In San Jacinto Unified, 26% of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated 0 additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 16% of Certificated Teacher Salary expenditures. This amount ranked 504 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 64%.

This district is in quadrant 3. (See Chart 3-6, pp. 104-105)

District Profile: San Lorenzo Valley Unified

The graph in the top right corner shows the difference between the change in the district's Total Operating Expenditures (excluding capital) per student (blue bar) and California Per Capita Personal Income (green bar). [See the Methodology for a full description for how this is calculated]. San Lorenzo Valley Unified spent \$8,439 per student, which ranked 671 out of the 955 districts for which this information was available, with the top ranked district spending the most per student.

The graph in the middle left hand side of the page shows the annual savings if Total Operating Expenditures per student, excluding Certificated Teacher Salaries and Benefits, had only increased at the same rate as PCPI in FY 07-08. Note that for FY 08-09 the calculation shown is for the savings if the increase in such Operating Expenditures per student (i.e., excluding Certificated Teacher Salaries and Benefits) was held at zero, not decreased at the rate PCPI decreased. Below each year is the number of teachers that could have been employed by those savings.

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed. For FY 08-09, this district ranked 414 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In San Lorenzo Valley Unified Total Operating Expenditures per student (excluding capital), grew by 22% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In San Lorenzo Valley Unified, 11% of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated 0 additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 17% of Certificated Teacher Salary expenditures. This amount ranked 602 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 60%.

This district is in quadrant 3. (See Chart 3-6, pp. 104-105)

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

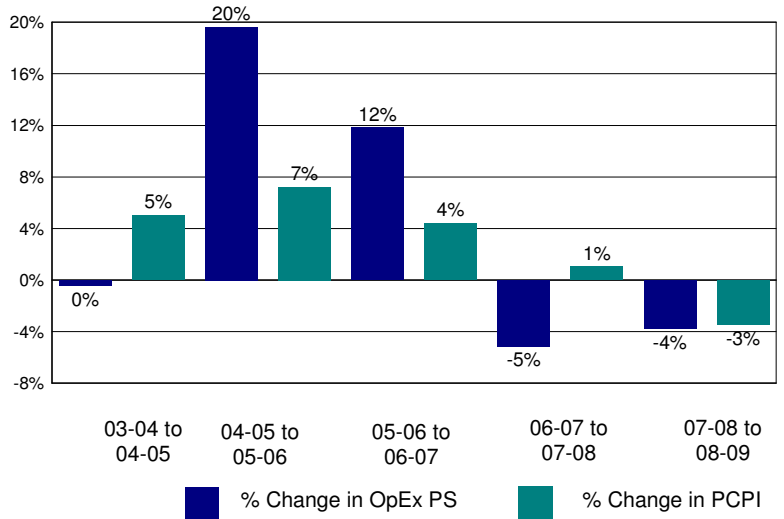

- Total Certificated Teacher Salaries (Object 1100) & Estimated Benefits
- Total Instructional Aide Salaries (Object 2100) & Estimated Benefits
- Approved Textbooks and Books (Objects 4100 & 4200)
- Materials and Supplies expenditures (Object 4300) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180 and 1190)
- Professional/Consulting Services/Subagreements for Services (Objects 5100 and 5800) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180, 1190)

District Profile: San Lucas Union Elementary

The graph in the top right corner shows the difference between the change in the district's Total Operating Expenditures (excluding capital) per student (blue bar) and California Per Capita Personal Income (green bar). [See the Methodology for a full description for how this is calculated]. San Lucas Union Elementary spent \$19,405 per student, which ranked 48 out of the 955 districts for which this information was available, with the top ranked district spending the most per student.

The graph in the middle left hand side of the page shows the annual savings if Total Operating Expenditures per student, excluding Certificated Teacher Salaries and Benefits, had only increased at the same rate as PCPI in FY 07-08. Note that for FY 08-09 the calculation shown is for the savings if the increase in such Operating Expenditures per student (i.e., excluding Certificated Teacher Salaries and Benefits) was held at zero, not decreased at the rate PCPI decreased. Below each year is the number of teachers that could have been employed by those savings.

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed. For FY 08-09, this district ranked 901 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In San Lucas Union Elementary Total Operating Expenditures per student (excluding capital), grew by 122% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In San Lucas Union Elementary, 18% of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated 0 additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 42% of Certificated Teacher Salary expenditures. This amount ranked 929 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 46%.

This district is in quadrant 3. (See Chart 3-6, pp. 104-105)

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

District Profile: San Mateo-Foster City Elementary

The graph in the top right corner shows the difference between the change in the district's Total Operating Expenditures (excluding capital) per student (blue bar) and California Per Capita Personal Income (green bar). [See the Methodology for a full description for how this is calculated]. San Mateo-Foster City Elementary spent \$9,310 per student, which ranked 426 out of the 955 districts for which this information was available, with the top ranked district spending the most per student.

The graph in the middle left hand side of the page shows the annual savings if Total Operating Expenditures per student, excluding Certificated Teacher Salaries and Benefits, had only increased at the same rate as PCPI in FY 07-08. Note that for FY 08-09 the calculation shown is for the savings if the increase in such Operating Expenditures per student (i.e., excluding Certificated Teacher Salaries and Benefits) was held at zero, not decreased at the rate PCPI decreased. Below each year is the number of teachers that could have been employed by those savings.

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed. For FY 08-09, this district ranked 510 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In San Mateo-Foster City Elementary Total Operating Expenditures per student (excluding capital), grew by 24% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In San Mateo-Foster City Elementary, 24% of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated 0 additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 13% of Certificated Teacher Salary expenditures. This amount ranked 262 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 65%.

This district is in quadrant 3. (See Chart 3-6, pp. 104-105)

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

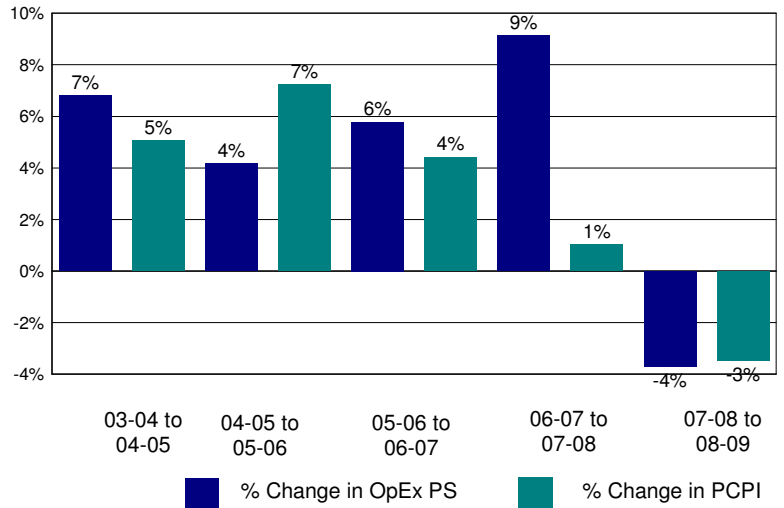

- Total Certificated Teacher Salaries (Object 1100) & Estimated Benefits
- Total Instructional Aide Salaries (Object 2100) & Estimated Benefits
- Approved Textbooks and Books (Objects 4100 & 4200)
- Materials and Supplies expenditures (Object 4300) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180 and 1190)
- Professional/Consulting Services/Subagreements for Services (Objects 5100 and 5800) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180, 1190)

District Profile: San Miguel Joint Union Elementary

The graph in the top right corner shows the difference between the change in the district's Total Operating Expenditures (excluding capital) per student (blue bar) and California Per Capita Personal Income (green bar). [See the Methodology for a full description for how this is calculated]. San Miguel Joint Union Elementary spent \$9,352 per student, which ranked 416 out of the 955 districts for which this information was available, with the top ranked district spending the most per student.

The graph in the middle left hand side of the page shows the annual savings if Total Operating Expenditures per student, excluding Certificated Teacher Salaries and Benefits, had only increased at the same rate as PCPI in FY 07-08. Note that for FY 08-09 the calculation shown is for the savings if the increase in such Operating Expenditures per student (i.e., excluding Certificated Teacher Salaries and Benefits) was held at zero, not decreased at the rate PCPI decreased. Below each year is the number of teachers that could have been employed by those savings.

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed. For FY 08-09, this district ranked 449 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In San Miguel Joint Union Elementary Total Operating Expenditures per student (excluding capital), grew by 17% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In San Miguel Joint Union Elementary, 20% of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated 2 additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 19% of Certificated Teacher Salary expenditures. This amount ranked 676 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 63%.

This district is in quadrant 4. (See Chart 3-6, pp. 104-105)

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

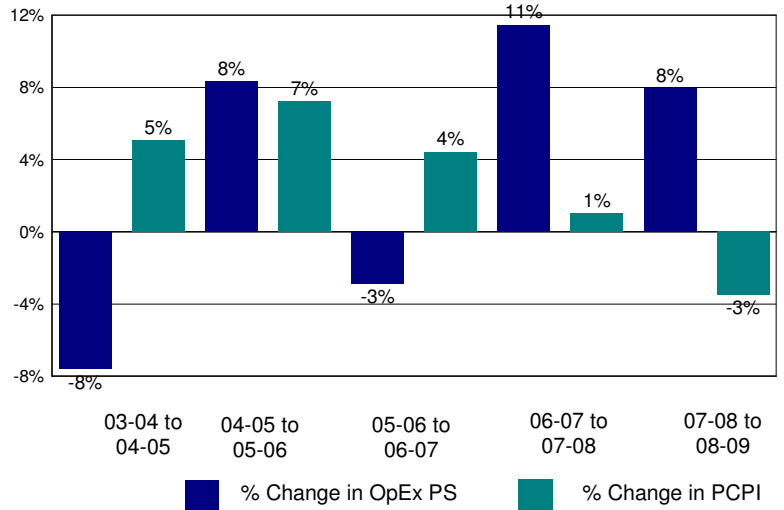

- Total Certificated Teacher Salaries (Object 1100) & Estimated Benefits
- Total Instructional Aide Salaries (Object 2100) & Estimated Benefits

District Profile: San Ramon Valley Unified

The graph in the top right corner shows the difference between the change in the district's Total Operating Expenditures (excluding capital) per student (blue bar) and California Per Capita Personal Income (green bar). [See the Methodology for a full description for how this is calculated]. San Ramon Valley Unified spent \$8,420 per student, which ranked 677 out of the 955 districts for which this information was available, with the top ranked district spending the most per student.

The graph in the middle left hand side of the page shows the annual savings if Total Operating Expenditures per student, excluding Certificated Teacher Salaries and Benefits, had only increased at the same rate as PCPI in FY 07-08. Note that for FY 08-09 the calculation shown is for the savings if the increase in such Operating Expenditures per student (i.e., excluding Certificated Teacher Salaries and Benefits) was held at zero, not decreased at the rate PCPI decreased. Below each year is the number of teachers that could have been employed by those savings.

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed. For FY 08-09, this district ranked 283 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In San Ramon Valley Unified Total Operating Expenditures per student (excluding capital), grew by 25% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In San Ramon Valley Unified, 21% of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated 0 additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 13% of Certificated Teacher Salary expenditures. This amount ranked 245 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 62%.

This district is in quadrant 3. (See Chart 3-6, pp. 104-105)

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

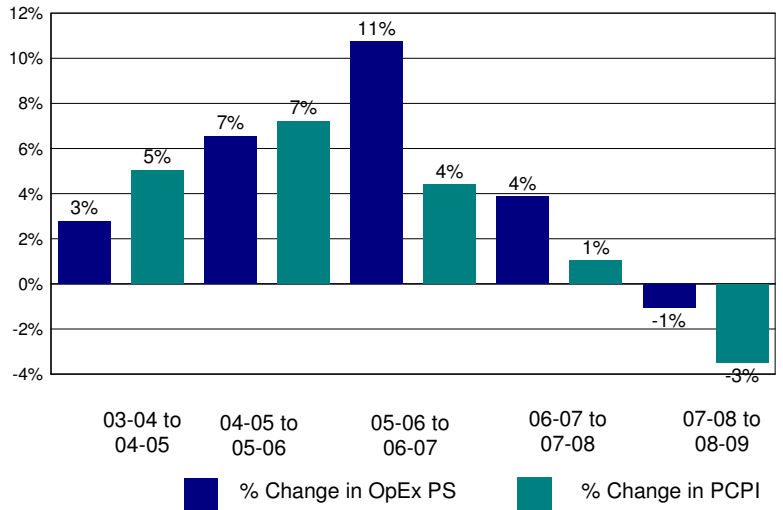

- Total Certificated Teacher Salaries (Object 1100) & Estimated Benefits
- Total Instructional Aide Salaries (Object 2100) & Estimated Benefits
- Approved Textbooks and Books (Objects 4100 & 4200)
- Materials and Supplies expenditures (Object 4300) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180 and 1190)
- Professional/Consulting Services/Subagreements for Services (Objects 5100 and 5800) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180, 1190)

District Profile: San Ysidro Elementary

The graph in the top right corner shows the difference between the change in the district's Total Operating Expenditures (excluding capital) per student (blue bar) and California Per Capita Personal Income (green bar). [See the Methodology for a full description for how this is calculated]. San Ysidro Elementary spent \$10,161 per student, which ranked 295 out of the 955 districts for which this information was available, with the top ranked district spending the most per student.

The graph in the middle left hand side of the page shows the annual savings if Total Operating Expenditures per student, excluding Certificated Teacher Salaries and Benefits, had only increased at the same rate as PCPI in FY 07-08. Note that for FY 08-09 the calculation shown is for the savings if the increase in such Operating Expenditures per student (i.e., excluding Certificated Teacher Salaries and Benefits) was held at zero, not decreased at the rate PCPI decreased. Below each year is the number of teachers that could have been employed by those savings.

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed. For FY 08-09, this district ranked 309 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In San Ysidro Elementary Total Operating Expenditures per student (excluding capital), grew by 28% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In San Ysidro Elementary, 25% of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated 0 additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 13% of Certificated Teacher Salary expenditures. This amount ranked 254 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 64%.

This district is in quadrant 3. (See Chart 3-6, pp. 104-105)

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

District Profile: Santa Maria Joint Union High

The graph in the top right corner shows the difference between the change in the district's Total Operating Expenditures (excluding capital) per student (blue bar) and California Per Capita Personal Income (green bar). [See the Methodology for a full description for how this is calculated]. Santa Maria Joint Union High spent \$8,735 per student, which ranked 575 out of the 955 districts for which this information was available, with the top ranked district spending the most per student.

The graph in the middle left hand side of the page shows the annual savings if Total Operating Expenditures per student, excluding Certificated Teacher Salaries and Benefits, had only increased at the same rate as PCPI in FY 07-08. Note that for FY 08-09 the calculation shown is for the savings if the increase in such Operating Expenditures per student (i.e., excluding Certificated Teacher Salaries and Benefits) was held at zero, not decreased at the rate PCPI decreased. Below each year is the number of teachers that could have been employed by those savings.

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed. For FY 08-09, this district ranked 508 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In Santa Maria Joint Union High Total Operating Expenditures per student (excluding capital), grew by 23% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In Santa Maria Joint Union High, 19% of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated 9 additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 15% of Certificated Teacher Salary expenditures. This amount ranked 417 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 52%.

This district is in quadrant 4. (See Chart 3-6, pp. 104-105)

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

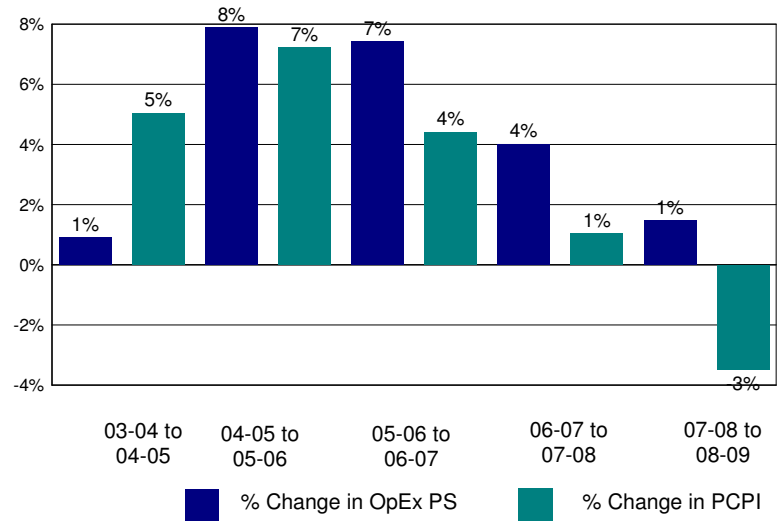

- Total Certificated Teacher Salaries (Object 1100) & Estimated Benefits
- Total Instructional Aide Salaries (Object 2100) & Estimated Benefits
- Approved Textbooks and Books (Objects 4100 & 4200)
- Materials and Supplies expenditures (Object 4300) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180 and 1190)
- Professional/Consulting Services/Subagreements for Services (Objects 5100 and 5800) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180, 1190)

District Profile: Santa Maria-Bonita Elementary

The graph in the top right corner shows the difference between the change in the district's Total Operating Expenditures (excluding capital) per student (blue bar) and California Per Capita Personal Income (green bar). [See the Methodology for a full description for how this is calculated]. Santa Maria-Bonita Elementary spent \$8,291 per student, which ranked 719 out of the 955 districts for which this information was available, with the top ranked district spending the most per student.

The graph in the middle left hand side of the page shows the annual savings if Total Operating Expenditures per student, excluding Certificated Teacher Salaries and Benefits, had only increased at the same rate as PCPI in FY 07-08. Note that for FY 08-09 the calculation shown is for the savings if the increase in such Operating Expenditures per student (i.e., excluding Certificated Teacher Salaries and Benefits) was held at zero, not decreased at the rate PCPI decreased. Below each year is the number of teachers that could have been employed by those savings.

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed. For FY 08-09, this district ranked 153 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In Santa Maria-Bonita Elementary Total Operating Expenditures per student (excluding capital), grew by 17% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In Santa Maria-Bonita Elementary, 21% of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated 0 additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 12% of Certificated Teacher Salary expenditures. This amount ranked 163 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 62%.

This district is in quadrant 2. (See Chart 3-6, pp. 104-105)

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

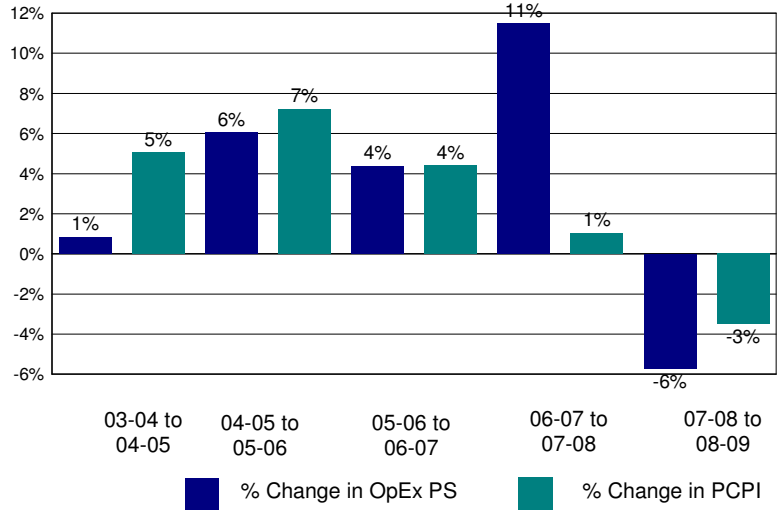

- Total Certificated Teacher Salaries (Object 1100) & Estimated Benefits
- Total Instructional Aide Salaries (Object 2100) & Estimated Benefits

District Profile: Santa Rosa Elementary

The graph in the top right corner shows the difference between the change in the district's Total Operating Expenditures (excluding capital) per student (blue bar) and California Per Capita Personal Income (green bar). [See the Methodology for a full description for how this is calculated]. Santa Rosa Elementary spent \$ per student, which ranked out of the 955 districts for which this information was available, with the top ranked district spending the most per student.

The graph in the middle left hand side of the page shows the annual savings if Total Operating Expenditures per student, excluding Certificated Teacher Salaries and Benefits, had only increased at the same rate as PCPI in FY 07-08. Note that for FY 08-09 the calculation shown is for the savings if the increase in such Operating Expenditures per student (i.e., excluding Certificated Teacher Salaries and Benefits) was held at zero, not decreased at the rate PCPI decreased. Below each year is the number of teachers that could have been employed by those savings.

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed. For FY 08-09, this district ranked out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In Santa Rosa Elementary Total Operating Expenditures per student (excluding capital), grew by % from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In Santa Rosa Elementary, % of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented % of Certificated Teacher Salary expenditures. This amount ranked out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 1%.

This district is in quadrant . (See Chart 3-6, pp. 104-105)

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

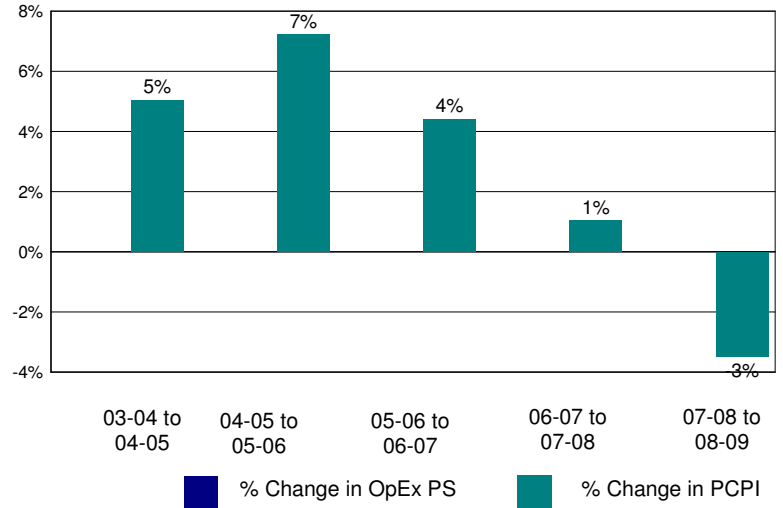

- Total Certificated Teacher Salaries (Object 1100) & Estimated Benefits
- Total Instructional Aide Salaries (Object 2100) & Estimated Benefits
- Approved Textbooks and Books (Objects 4100 & 4200)
- Materials and Supplies expenditures (Object 4300) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180 and 1190)
- Professional/Consulting Services/Subagreements for Services (Objects 5100 and 5800) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180, 1190)

District Profile: Santa Rosa High

The graph in the top right corner shows the difference between the change in the district's Total Operating Expenditures (excluding capital) per student (blue bar) and California Per Capita Personal Income (green bar). [See the Methodology for a full description for how this is calculated]. Santa Rosa High spent \$ per student, which ranked out of the 955 districts for which this information was available, with the top ranked district spending the most per student.

The graph in the middle left hand side of the page shows the annual savings if Total Operating Expenditures per student, excluding Certificated Teacher Salaries and Benefits, had only increased at the same rate as PCPI in FY 07-08. Note that for FY 08-09 the calculation shown is for the savings if the increase in such Operating Expenditures per student (i.e., excluding Certificated Teacher Salaries and Benefits) was held at zero, not decreased at the rate PCPI decreased. Below each year is the number of teachers that could have been employed by those savings.

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed. For FY 08-09, this district ranked out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In Santa Rosa High Total Operating Expenditures per student (excluding capital), grew by % from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In Santa Rosa High, % of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented % of Certificated Teacher Salary expenditures. This amount ranked out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 8%.

This district is in quadrant . (See Chart 3-6, pp. 104-105)

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

District Profile: Sausalito Marin City Elementary

The graph in the top right corner shows the difference between the change in the district's Total Operating Expenditures (excluding capital) per student (blue bar) and California Per Capita Personal Income (green bar). [See the Methodology for a full description for how this is calculated]. Sausalito Marin City Elementary spent \$22,462 per student, which ranked 36 out of the 955 districts for which this information was available, with the top ranked district spending the most per student.

The graph in the middle left hand side of the page shows the annual savings if Total Operating Expenditures per student, excluding Certificated Teacher Salaries and Benefits, had only increased at the same rate as PCPI in FY 07-08. Note that for FY 08-09 the calculation shown is for the savings if the increase in such Operating Expenditures per student (i.e., excluding Certificated Teacher Salaries and Benefits) was held at zero, not decreased at the rate PCPI decreased. Below each year is the number of teachers that could have been employed by those savings.

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed. For FY 08-09, this district ranked 831 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In Sausalito Marin City Elementary Total Operating Expenditures per student (excluding capital), grew by 12% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In Sausalito Marin City Elementary, % of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated 0 additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 29% of Certificated Teacher Salary expenditures. This amount ranked 887 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 57%.

This district is in quadrant 2. (See Chart 3-6, pp. 104-105)

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

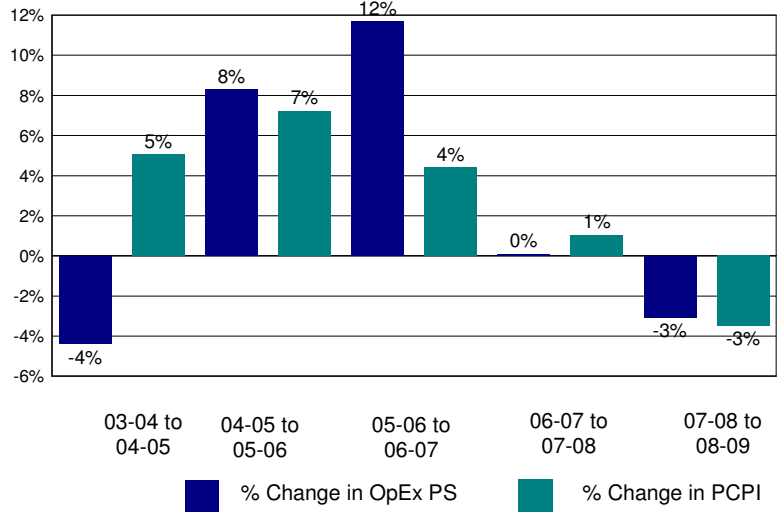

- Total Certificated Teacher Salaries (Object 1100) & Estimated Benefits
- Total Instructional Aide Salaries (Object 2100) & Estimated Benefits
- Approved Textbooks and Books (Objects 4100 & 4200)
- Materials and Supplies expenditures (Object 4300) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180 and 1190)
- Professional/Consulting Services/Subagreements for Services (Objects 5100 and 5800) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180, 1190)

District Profile: Scotts Valley Unified

The graph in the top right corner shows the difference between the change in the district's Total Operating Expenditures (excluding capital) per student (blue bar) and California Per Capita Personal Income (green bar). [See the Methodology for a full description for how this is calculated]. Scotts Valley Unified spent \$7,550 per student, which ranked 884 out of the 955 districts for which this information was available, with the top ranked district spending the most per student.

The graph in the middle left hand side of the page shows the annual savings if Total Operating Expenditures per student, excluding Certificated Teacher Salaries and Benefits, had only increased at the same rate as PCPI in FY 07-08. Note that for FY 08-09 the calculation shown is for the savings if the increase in such Operating Expenditures per student (i.e., excluding Certificated Teacher Salaries and Benefits) was held at zero, not decreased at the rate PCPI decreased. Below each year is the number of teachers that could have been employed by those savings.

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed. For FY 08-09, this district ranked 391 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In Scotts Valley Unified Total Operating Expenditures per student (excluding capital), grew by 25% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In Scotts Valley Unified, 24% of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated 0 additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 14% of Certificated Teacher Salary expenditures. This amount ranked 394 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 62%.

This district is in quadrant 3. (See Chart 3-6, pp. 104-105)

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

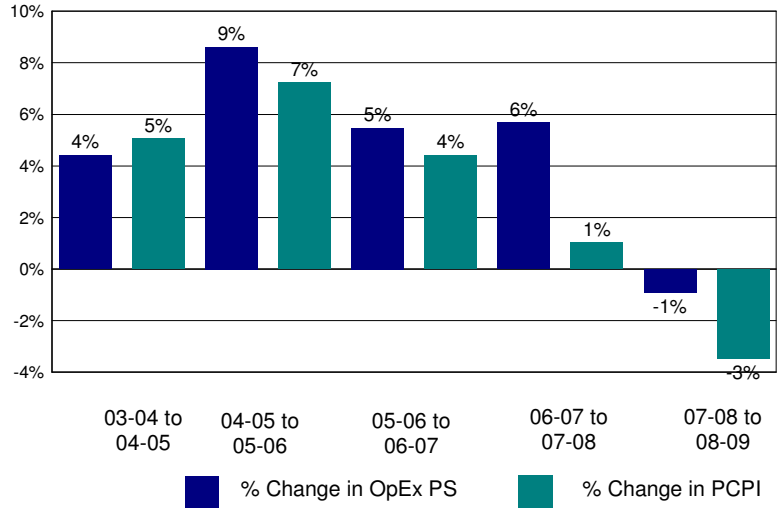

- Total Certificated Teacher Salaries (Object 1100) & Estimated Benefits
- Total Instructional Aide Salaries (Object 2100) & Estimated Benefits
- Approved Textbooks and Books (Objects 4100 & 4200)
- Materials and Supplies expenditures (Object 4300) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180 and 1190)
- Professional/Consulting Services/Subagreements for Services (Objects 5100 and 5800) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180, 1190)

District Profile: Sequoia Union Elementary

The graph in the top right corner shows the difference between the change in the district's Total Operating Expenditures (excluding capital) per student (blue bar) and California Per Capita Personal Income (green bar). [See the Methodology for a full description for how this is calculated]. Sequoia Union Elementary spent \$7,228 per student, which ranked 919 out of the 955 districts for which this information was available, with the top ranked district spending the most per student.

The graph in the middle left hand side of the page shows the annual savings if Total Operating Expenditures per student, excluding Certificated Teacher Salaries and Benefits, had only increased at the same rate as PCPI in FY 07-08. Note that for FY 08-09 the calculation shown is for the savings if the increase in such Operating Expenditures per student (i.e., excluding Certificated Teacher Salaries and Benefits) was held at zero, not decreased at the rate PCPI decreased. Below each year is the number of teachers that could have been employed by those savings.

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed. For FY 08-09, this district ranked 224 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In Sequoia Union Elementary Total Operating Expenditures per student (excluding capital), grew by 9% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In Sequoia Union Elementary, 3% of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated 0 additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 14% of Certificated Teacher Salary expenditures. This amount ranked 401 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 61%.

This district is in quadrant 1. (See Chart 3-6, pp. 104-105)

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

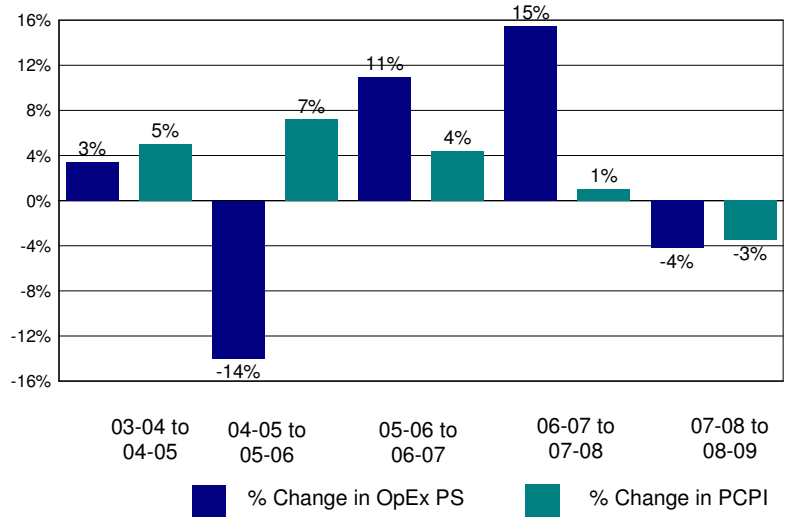

- Total Certificated Teacher Salaries (Object 1100) & Estimated Benefits
- Total Instructional Aide Salaries (Object 2100) & Estimated Benefits
- Approved Textbooks and Books (Objects 4100 & 4200)
- Materials and Supplies expenditures (Object 4300) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180 and 1190)
- Professional/Consulting Services/Subagreements for Services (Objects 5100 and 5800) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180, 1190)

Books & Textbooks	\$44	\$51	15%
Materials & Supplies	\$254	\$216	-15%
Travel & Conferences	\$36	\$48	34%
Consulting Services	\$303	\$504	66%

District Profile: Shiloh Elementary

The graph in the top right corner shows the difference between the change in the district's Total Operating Expenditures (excluding capital) per student (blue bar) and California Per Capita Personal Income (green bar). [See the Methodology for a full description for how this is calculated]. Shiloh Elementary spent \$9,765 per student, which ranked 346 out of the 955 districts for which this information was available, with the top ranked district spending the most per student.

The graph in the middle left hand side of the page shows the annual savings if Total Operating Expenditures per student, excluding Certificated Teacher Salaries and Benefits, had only increased at the same rate as PCPI in FY 07-08. Note that for FY 08-09 the calculation shown is for the savings if the increase in such Operating Expenditures per student (i.e., excluding Certificated Teacher Salaries and Benefits) was held at zero, not decreased at the rate PCPI decreased. Below each year is the number of teachers that could have been employed by those savings.

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed. For FY 08-09, this district ranked 859 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In Shiloh Elementary Total Operating Expenditures per student (excluding capital), grew by 37% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In Shiloh Elementary, 4% of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated 0 additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 30% of Certificated Teacher Salary expenditures. This amount ranked 891 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 60%.

This district is in quadrant 3. (See Chart 3-6, pp. 104-105)

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

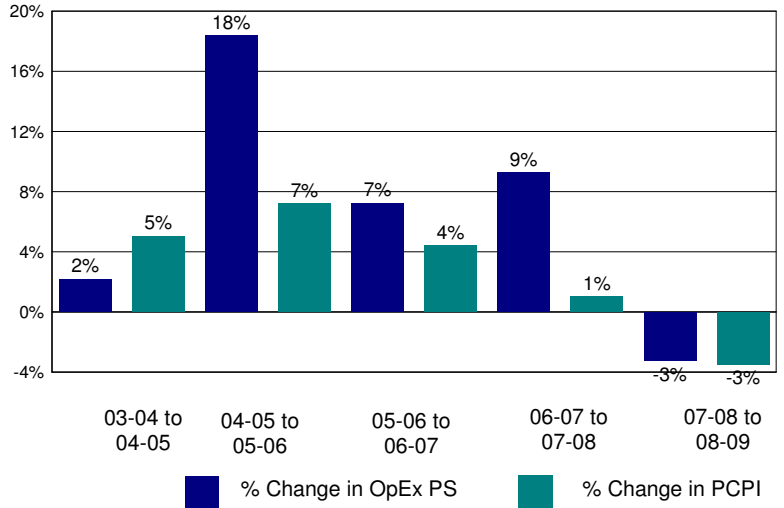

- Total Certificated Teacher Salaries (Object 1100) & Estimated Benefits
- Total Instructional Aide Salaries (Object 2100) & Estimated Benefits
- Approved Textbooks and Books (Objects 4100 & 4200)
- Materials and Supplies expenditures (Object 4300) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180 and 1190)
- Professional/Consulting Services/Subagreements for Services (Objects 5100 and 5800) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180, 1190)

The graph in the top right corner shows the difference between the change in the district's Total Operating Expenditures (excluding capital) per student (blue bar) and California Per Capita Personal Income (green bar). [See the Methodology for a full description for how this is calculated]. Silver Valley Unified spent \$10,985 per student, which ranked 223 out of the 955 districts for which this information was available, with the top ranked district spending the most per student.

The graph in the middle left hand side of the page shows the annual savings if Total Operating Expenditures per student, excluding Certificated Teacher Salaries and Benefits, had only increased at the same rate as PCPI in FY 07-08. Note that for FY 08-09 the calculation shown is for the savings if the increase in such Operating Expenditures per student (i.e., excluding Certificated Teacher Salaries and Benefits) was held at zero, not decreased at the rate PCPI decreased. Below each year is the number of teachers that could have been employed by those savings.

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed. For FY 08-09, this district ranked 775 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In Silver Valley Unified Total Operating Expenditures per student (excluding capital), grew by 21% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In Silver Valley Unified, 33% of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated 0 additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 23% of Certificated Teacher Salary expenditures. This amount ranked 826 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 51%.

This district is in quadrant 3. (See Chart 3-6, pp. 104-105)

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

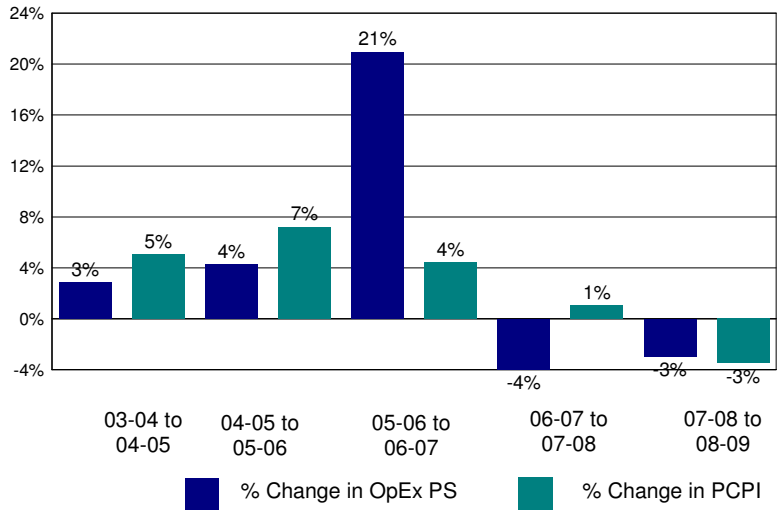

- Total Certificated Teacher Salaries (Object 1100) & Estimated Benefits
- Total Instructional Aide Salaries (Object 2100) & Estimated Benefits
- Approved Textbooks and Books (Objects 4100 & 4200)
- Materials and Supplies expenditures (Object 4300) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180 and 1190)
- Professional/Consulting Services/Subagreements for Services (Objects 5100 and 5800) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180, 1190)

The graph in the top right corner shows the difference between the change in the district's Total Operating Expenditures (excluding capital) per student (blue bar) and California Per Capita Personal Income (green bar). [See the Methodology for a full description for how this is calculated]. Soledad Unified spent \$9,109 per student, which ranked 474 out of the 955 districts for which this information was available, with the top ranked district spending the most per student.

The graph in the middle left hand side of the page shows the annual savings if Total Operating Expenditures per student, excluding Certificated Teacher Salaries and Benefits, had only increased at the same rate as PCPI in FY 07-08. Note that for FY 08-09 the calculation shown is for the savings if the increase in such Operating Expenditures per student (i.e., excluding Certificated Teacher Salaries and Benefits) was held at zero, not decreased at the rate PCPI decreased. Below each year is the number of teachers that could have been employed by those savings.

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed. For FY 08-09, this district ranked 621 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In Soledad Unified Total Operating Expenditures per student (excluding capital), grew by 24% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In Soledad Unified, 24% of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated 6 additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 14% of Certificated Teacher Salary expenditures. This amount ranked 296 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 54%.

This district is in quadrant 4. (See Chart 3-6, pp. 104-105)

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

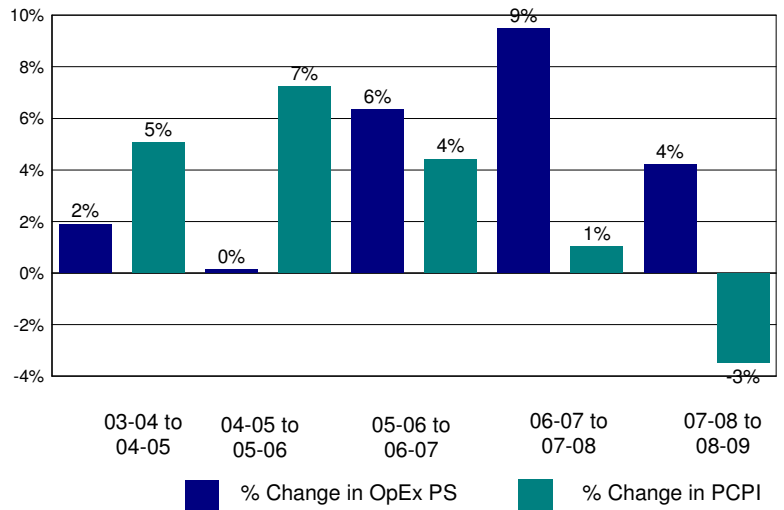

- Total Certificated Teacher Salaries (Object 1100) & Estimated Benefits
- Total Instructional Aide Salaries (Object 2100) & Estimated Benefits
- Approved Textbooks and Books (Objects 4100 & 4200)
- Materials and Supplies expenditures (Object 4300) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180 and 1190)
- Professional/Consulting Services/Subagreements for Services (Objects 5100 and 5800) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180, 1190)

District Profile: Soquel Union Elementary

The graph in the top right corner shows the difference between the change in the district's Total Operating Expenditures (excluding capital) per student (blue bar) and California Per Capita Personal Income (green bar). [See the Methodology for a full description for how this is calculated]. Soquel Union Elementary spent \$8,138 per student, which ranked 770 out of the 955 districts for which this information was available, with the top ranked district spending the most per student.

The graph in the middle left hand side of the page shows the annual savings if Total Operating Expenditures per student, excluding Certificated Teacher Salaries and Benefits, had only increased at the same rate as PCPI in FY 07-08. Note that for FY 08-09 the calculation shown is for the savings if the increase in such Operating Expenditures per student (i.e., excluding Certificated Teacher Salaries and Benefits) was held at zero, not decreased at the rate PCPI decreased. Below each year is the number of teachers that could have been employed by those savings.

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed. For FY 08-09, this district ranked 337 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In Soquel Union Elementary Total Operating Expenditures per student (excluding capital), grew by 16% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In Soquel Union Elementary, 33% of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated 0 additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 17% of Certificated Teacher Salary expenditures. This amount ranked 624 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 59%.

This district is in quadrant 4. (See Chart 3-6, pp. 104-105)

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

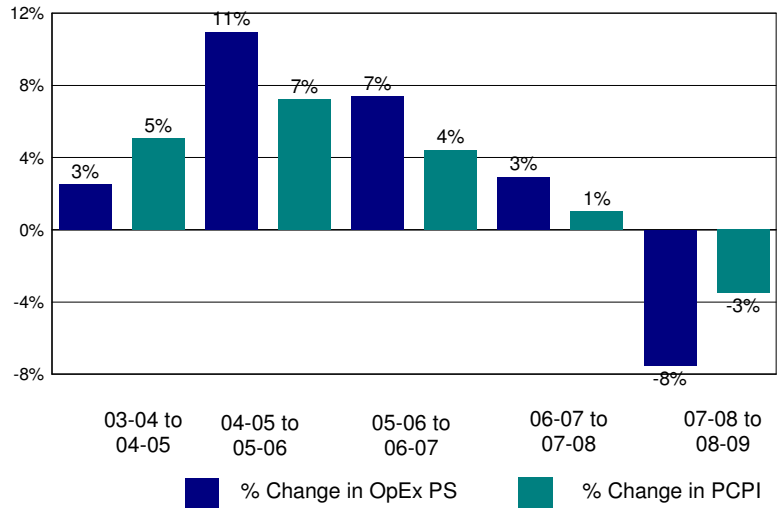

- Total Certificated Teacher Salaries (Object 1100) & Estimated Benefits
- Total Instructional Aide Salaries (Object 2100) & Estimated Benefits
- Approved Textbooks and Books (Objects 4100 & 4200)
- Materials and Supplies expenditures (Object 4300) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180 and 1190)
- Professional/Consulting Services/Subagreements for Services (Objects 5100 and 5800) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180, 1190)

District Profile: South Whittier Elementary

The graph in the top right corner shows the difference between the change in the district's Total Operating Expenditures (excluding capital) per student (blue bar) and California Per Capita Personal Income (green bar). [See the Methodology for a full description for how this is calculated]. South Whittier Elementary spent \$9,085 per student, which ranked 484 out of the 955 districts for which this information was available, with the top ranked district spending the most per student.

The graph in the middle left hand side of the page shows the annual savings if Total Operating Expenditures per student, excluding Certificated Teacher Salaries and Benefits, had only increased at the same rate as PCPI in FY 07-08. Note that for FY 08-09 the calculation shown is for the savings if the increase in such Operating Expenditures per student (i.e., excluding Certificated Teacher Salaries and Benefits) was held at zero, not decreased at the rate PCPI decreased. Below each year is the number of teachers that could have been employed by those savings.

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed. For FY 08-09, this district ranked 86 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In South Whittier Elementary Total Operating Expenditures per student (excluding capital), grew by 37% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In South Whittier Elementary, 25% of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated 0 additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 16% of Certificated Teacher Salary expenditures. This amount ranked 534 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 67%.

This district is in quadrant 3. (See Chart 3-6, pp. 104-105)

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

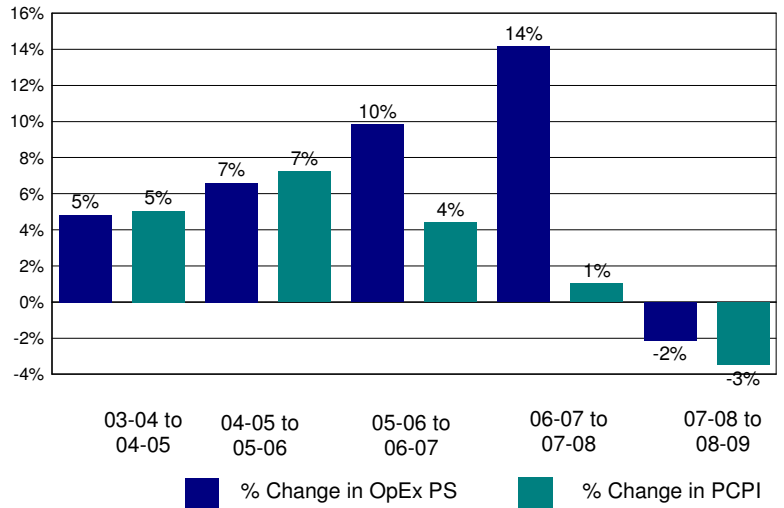

- Total Certificated Teacher Salaries (Object 1100) & Estimated Benefits
- Total Instructional Aide Salaries (Object 2100) & Estimated Benefits
- Approved Textbooks and Books (Objects 4100 & 4200)
- Materials and Supplies expenditures (Object 4300) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180 and 1190)
- Professional/Consulting Services/Subagreements for Services (Objects 5100 and 5800) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180, 1190)

District Profile: Spencer Valley Elementary

The graph in the top right corner shows the difference between the change in the district's Total Operating Expenditures (excluding capital) per student (blue bar) and California Per Capita Personal Income (green bar). [See the Methodology for a full description for how this is calculated]. Spencer Valley Elementary spent \$40,338 per student, which ranked 5 out of the 955 districts for which this information was available, with the top ranked district spending the most per student.

The graph in the middle left hand side of the page shows the annual savings if Total Operating Expenditures per student, excluding Certificated Teacher Salaries and Benefits, had only increased at the same rate as PCPI in FY 07-08. Note that for FY 08-09 the calculation shown is for the savings if the increase in such Operating Expenditures per student (i.e., excluding Certificated Teacher Salaries and Benefits) was held at zero, not decreased at the rate PCPI decreased. Below each year is the number of teachers that could have been employed by those savings.

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed. For FY 08-09, this district ranked 948 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In Spencer Valley Elementary Total Operating Expenditures per student (excluding capital), grew by 474% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In Spencer Valley Elementary, % of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 6% of Certificated Teacher Salary expenditures. This amount ranked 10 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 79%.

This district is in quadrant 3. (See Chart 3-6, pp. 104-105)

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

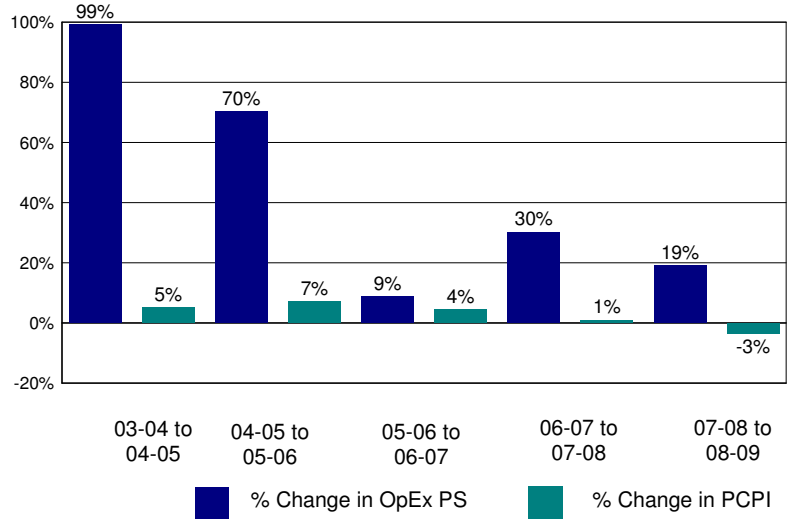

- Total Certificated Teacher Salaries (Object 1100) & Estimated Benefits
- Total Instructional Aide Salaries (Object 2100) & Estimated Benefits
- Approved Textbooks and Books (Objects 4100 & 4200)

District Profile: Spreckels Union Elementary

The graph in the top right corner shows the difference between the change in the district's Total Operating Expenditures (excluding capital) per student (blue bar) and California Per Capita Personal Income (green bar). [See the Methodology for a full description for how this is calculated]. Spreckels Union Elementary spent \$7,182 per student, which ranked 922 out of the 955 districts for which this information was available, with the top ranked district spending the most per student.

The graph in the middle left hand side of the page shows the annual savings if Total Operating Expenditures per student, excluding Certificated Teacher Salaries and Benefits, had only increased at the same rate as PCPI in FY 07-08. Note that for FY 08-09 the calculation shown is for the savings if the increase in such Operating Expenditures per student (i.e., excluding Certificated Teacher Salaries and Benefits) was held at zero, not decreased at the rate PCPI decreased. Below each year is the number of teachers that could have been employed by those savings.

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed. For FY 08-09, this district ranked 610 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In Spreckels Union Elementary Total Operating Expenditures per student (excluding capital), grew by 10% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In Spreckels Union Elementary, 14% of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated 0 additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 20% of Certificated Teacher Salary expenditures. This amount ranked 745 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 55%.

This district is in quadrant 1. (See Chart 3-6, pp. 104-105)

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

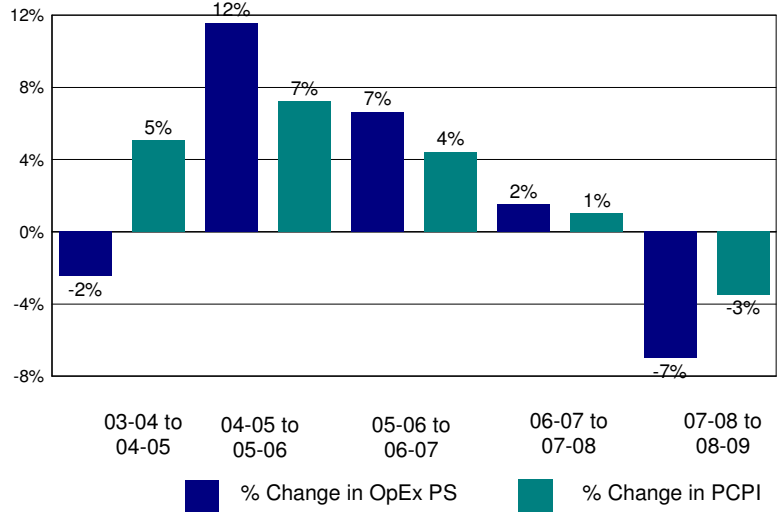

- Total Certificated Teacher Salaries (Object 1100) & Estimated Benefits
- Total Instructional Aide Salaries (Object 2100) & Estimated Benefits
- Approved Textbooks and Books (Objects 4100 & 4200)
- Materials and Supplies expenditures (Object 4300) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180 and 1190)
- Professional/Consulting Services/Subagreements for Services (Objects 5100 and 5800) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180, 1190)

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed. For FY 08-09, this district ranked 778 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In Stony Creek Joint Unified Total Operating Expenditures per student (excluding capital), grew by 71% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In Stony Creek Joint Unified, % of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 26% of Certificated Teacher Salary expenditures. This amount ranked 858 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 48%.

This district is in quadrant 3. (See Chart 3-6, pp. 104-105)

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

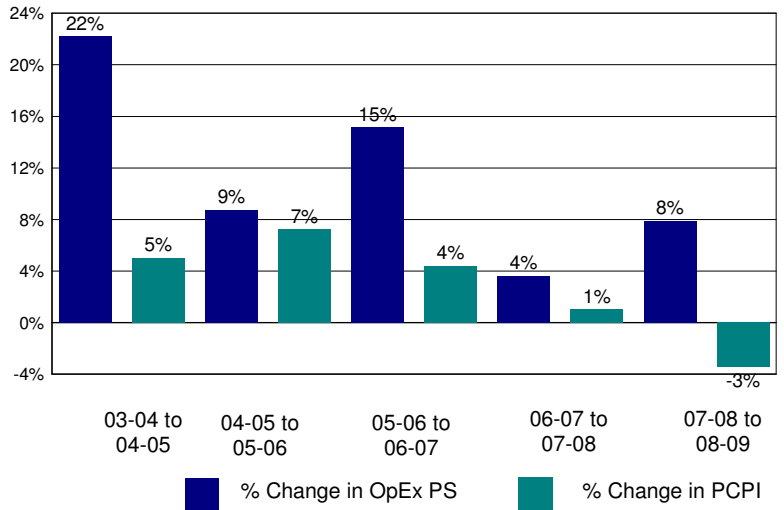

- Total Certificated Teacher Salaries (Object 1100) & Estimated Benefits
- Total Instructional Aide Salaries (Object 2100) & Estimated Benefits
- Approved Textbooks and Books (Objects 4100 & 4200)
- Materials and Supplies expenditures (Object 4300) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180 and 1190)
- Professional/Consulting Services/Subagreements for Services (Objects 5100 and 5800) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180, 1190)

District Profile: Strathmore Union Elementary

The graph in the top right corner shows the difference between the change in the district's Total Operating Expenditures (excluding capital) per student (blue bar) and California Per Capita Personal Income (green bar). [See the Methodology for a full description for how this is calculated]. Strathmore Union Elementary spent \$8,400 per student, which ranked 686 out of the 955 districts for which this information was available, with the top ranked district spending the most per student.

The graph in the middle left hand side of the page shows the annual savings if Total Operating Expenditures per student, excluding Certificated Teacher Salaries and Benefits, had only increased at the same rate as PCPI in FY 07-08. Note that for FY 08-09 the calculation shown is for the savings if the increase in such Operating Expenditures per student (i.e., excluding Certificated Teacher Salaries and Benefits) was held at zero, not decreased at the rate PCPI decreased. Below each year is the number of teachers that could have been employed by those savings.

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed. For FY 08-09, this district ranked 629 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In Strathmore Union Elementary Total Operating Expenditures per student (excluding capital), grew by 22% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In Strathmore Union Elementary, 18% of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated 0 additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 23% of Certificated Teacher Salary expenditures. This amount ranked 822 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 58%.

This district is in quadrant 3. (See Chart 3-6, pp. 104-105)

For FY 08-09, this district ranked 566 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In Sunnyside Union Elementary Total Operating Expenditures per student (excluding capital), grew by 1% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In Sunnyside Union Elementary, 17% of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated 1 additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 14% of Certificated Teacher Salary expenditures. This amount ranked 299 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 61%.

This district is in quadrant 4. (See Chart 3-6, pp. 104-105)

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

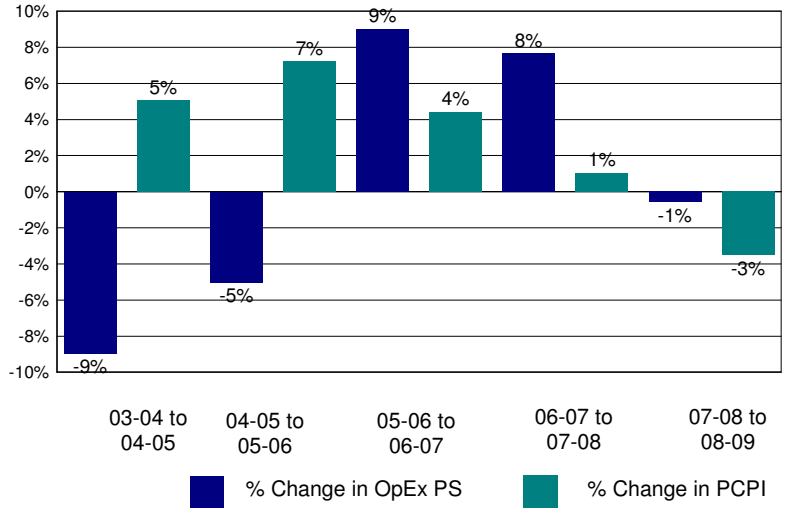

- Total Certificated Teacher Salaries (Object 1100) & Estimated Benefits
- Total Instructional Aide Salaries (Object 2100) & Estimated Benefits
- Approved Textbooks and Books (Objects 4100 & 4200)
- Materials and Supplies expenditures (Object 4300) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180 and 1190)
- Professional/Consulting Services/Subagreements for Services (Objects 5100 and 5800) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180, 1190)

District Profile: Sunnyvale Elementary

The graph in the top right corner shows the difference between the change in the district's Total Operating Expenditures (excluding capital) per student (blue bar) and California Per Capita Personal Income (green bar). [See the Methodology for a full description for how this is calculated]. Sunnyvale Elementary spent \$9,467 per student, which ranked 394 out of the 955 districts for which this information was available, with the top ranked district spending the most per student.

The graph in the middle left hand side of the page shows the annual savings if Total Operating Expenditures per student, excluding Certificated Teacher Salaries and Benefits, had only increased at the same rate as PCPI in FY 07-08. Note that for FY 08-09 the calculation shown is for the savings if the increase in such Operating Expenditures per student (i.e., excluding Certificated Teacher Salaries and Benefits) was held at zero, not decreased at the rate PCPI decreased. Below each year is the number of teachers that could have been employed by those savings.

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed. For FY 08-09, this district ranked 212 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In Sunnyvale Elementary Total Operating Expenditures per student (excluding capital), grew by 20% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In Sunnyvale Elementary, 29% of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated 0 additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 14% of Certificated Teacher Salary expenditures. This amount ranked 367 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 67%.

This district is in quadrant 2. (See Chart 3-6, pp. 104-105)

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

District Profile: Sweetwater Union High

The graph in the top right corner shows the difference between the change in the district's Total Operating Expenditures (excluding capital) per student (blue bar) and California Per Capita Personal Income (green bar). [See the Methodology for a full description for how this is calculated]. Sweetwater Union High spent \$9,252 per student, which ranked 434 out of the 955 districts for which this information was available, with the top ranked district spending the most per student.

The graph in the middle left hand side of the page shows the annual savings if Total Operating Expenditures per student, excluding Certificated Teacher Salaries and Benefits, had only increased at the same rate as PCPI in FY 07-08. Note that for FY 08-09 the calculation shown is for the savings if the increase in such Operating Expenditures per student (i.e., excluding Certificated Teacher Salaries and Benefits) was held at zero, not decreased at the rate PCPI decreased. Below each year is the number of teachers that could have been employed by those savings.

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed. For FY 08-09, this district ranked 392 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In Sweetwater Union High Total Operating Expenditures per student (excluding capital), grew by 21% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In Sweetwater Union High, 21% of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated 0 additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 12% of Certificated Teacher Salary expenditures. This amount ranked 200 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 59%.

This district is in quadrant 3. (See Chart 3-6, pp. 104-105)

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

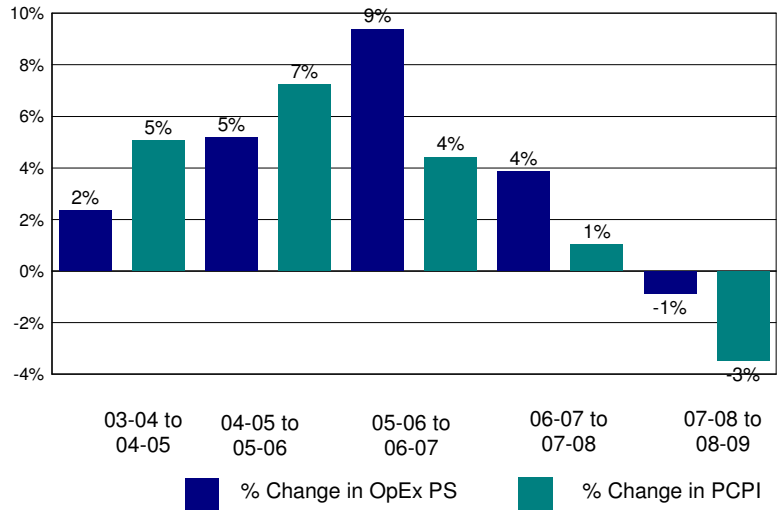

- Total Certificated Teacher Salaries (Object 1100) & Estimated Benefits
- Total Instructional Aide Salaries (Object 2100) & Estimated Benefits
- Approved Textbooks and Books (Objects 4100 & 4200)
- Materials and Supplies expenditures (Object 4300) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180 and 1190)
- Professional/Consulting Services/Subagreements for Services (Objects 5100 and 5800) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180, 1190)

District Profile: Sylvan Union Elementary

The graph in the top right corner shows the difference between the change in the district's Total Operating Expenditures (excluding capital) per student (blue bar) and California Per Capita Personal Income (green bar). [See the Methodology for a full description for how this is calculated]. Sylvan Union Elementary spent \$7,844 per student, which ranked 839 out of the 955 districts for which this information was available, with the top ranked district spending the most per student.

The graph in the middle left hand side of the page shows the annual savings if Total Operating Expenditures per student, excluding Certificated Teacher Salaries and Benefits, had only increased at the same rate as PCPI in FY 07-08. Note that for FY 08-09 the calculation shown is for the savings if the increase in such Operating Expenditures per student (i.e., excluding Certificated Teacher Salaries and Benefits) was held at zero, not decreased at the rate PCPI decreased. Below each year is the number of teachers that could have been employed by those savings.

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed. For FY 08-09, this district ranked 103 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In Sylvan Union Elementary Total Operating Expenditures per student (excluding capital), grew by 22% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In Sylvan Union Elementary, 30% of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated 0 additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 12% of Certificated Teacher Salary expenditures. This amount ranked 178 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 69%.

This district is in quadrant 3. (See Chart 3-6, pp. 104-105)

District Profile: Tehachapi Unified

The graph in the top right corner shows the difference between the change in the district's Total Operating Expenditures (excluding capital) per student (blue bar) and California Per Capita Personal Income (green bar). [See the Methodology for a full description for how this is calculated]. Tehachapi Unified spent \$8,018 per student, which ranked 808 out of the 955 districts for which this information was available, with the top ranked district spending the most per student.

The graph in the middle left hand side of the page shows the annual savings if Total Operating Expenditures per student, excluding Certificated Teacher Salaries and Benefits, had only increased at the same rate as PCPI in FY 07-08. Note that for FY 08-09 the calculation shown is for the savings if the increase in such Operating Expenditures per student (i.e., excluding Certificated Teacher Salaries and Benefits) was held at zero, not decreased at the rate PCPI decreased. Below each year is the number of teachers that could have been employed by those savings.

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed. For FY 08-09, this district ranked 415 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In Tehachapi Unified Total Operating Expenditures per student (excluding capital), grew by 22% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In Tehachapi Unified, 24% of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated 2 additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 12% of Certificated Teacher Salary expenditures. This amount ranked 177 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 57%.

This district is in quadrant 3. (See Chart 3-6, pp. 104-105)

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

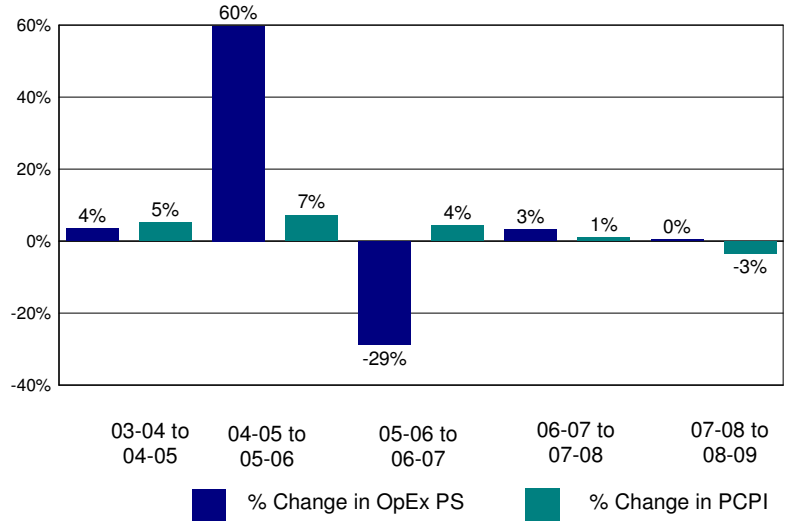

- Total Certificated Teacher Salaries (Object 1100) & Estimated Benefits
- Total Instructional Aide Salaries (Object 2100) & Estimated Benefits
- Approved Textbooks and Books (Objects 4100 & 4200)
- Materials and Supplies expenditures (Object 4300) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180 and 1190)
- Professional/Consulting Services/Subagreements for Services (Objects 5100 and 5800) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180, 1190)

District Profile: Temecula Valley Unified

The graph in the top right corner shows the difference between the change in the district's Total Operating Expenditures (excluding capital) per student (blue bar) and California Per Capita Personal Income (green bar). [See the Methodology for a full description for how this is calculated]. Temecula Valley Unified spent \$7,665 per student, which ranked 860 out of the 955 districts for which this information was available, with the top ranked district spending the most per student.

The graph in the middle left hand side of the page shows the annual savings if Total Operating Expenditures per student, excluding Certificated Teacher Salaries and Benefits, had only increased at the same rate as PCPI in FY 07-08. Note that for FY 08-09 the calculation shown is for the savings if the increase in such Operating Expenditures per student (i.e., excluding Certificated Teacher Salaries and Benefits) was held at zero, not decreased at the rate PCPI decreased. Below each year is the number of teachers that could have been employed by those savings.

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed. For FY 08-09, this district ranked 5 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In Temecula Valley Unified Total Operating Expenditures per student (excluding capital), grew by 18% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In Temecula Valley Unified, 28% of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated 0 additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 8% of Certificated Teacher Salary expenditures. This amount ranked 27 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 70%.

This district is in quadrant 3. (See Chart 3-6, pp. 104-105)

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

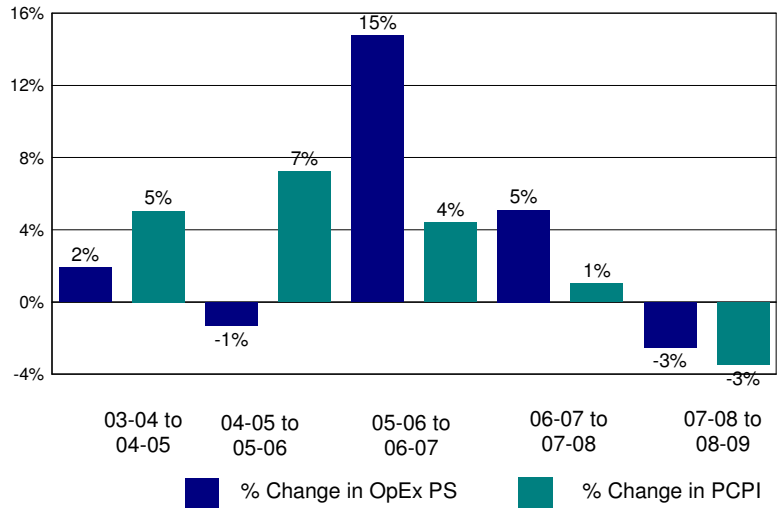

- Total Certificated Teacher Salaries (Object 1100) & Estimated Benefits

District Profile: Three Rivers Union Elementary

The graph in the top right corner shows the difference between the change in the district's Total Operating Expenditures (excluding capital) per student (blue bar) and California Per Capita Personal Income (green bar). [See the Methodology for a full description for how this is calculated]. Three Rivers Union Elementary spent \$7,112 per student, which ranked 926 out of the 955 districts for which this information was available, with the top ranked district spending the most per student.

The graph in the middle left hand side of the page shows the annual savings if Total Operating Expenditures per student, excluding Certificated Teacher Salaries and Benefits, had only increased at the same rate as PCPI in FY 07-08. Note that for FY 08-09 the calculation shown is for the savings if the increase in such Operating Expenditures per student (i.e., excluding Certificated Teacher Salaries and Benefits) was held at zero, not decreased at the rate PCPI decreased. Below each year is the number of teachers that could have been employed by those savings.

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed. For FY 08-09, this district ranked 742 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In Three Rivers Union Elementary Total Operating Expenditures per student (excluding capital), grew by -10% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In Three Rivers Union Elementary, 4% of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated 0 additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 23% of Certificated Teacher Salary expenditures. This amount ranked 825 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 55%.

This district is in quadrant 1. (See Chart 3-6, pp. 104-105)

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

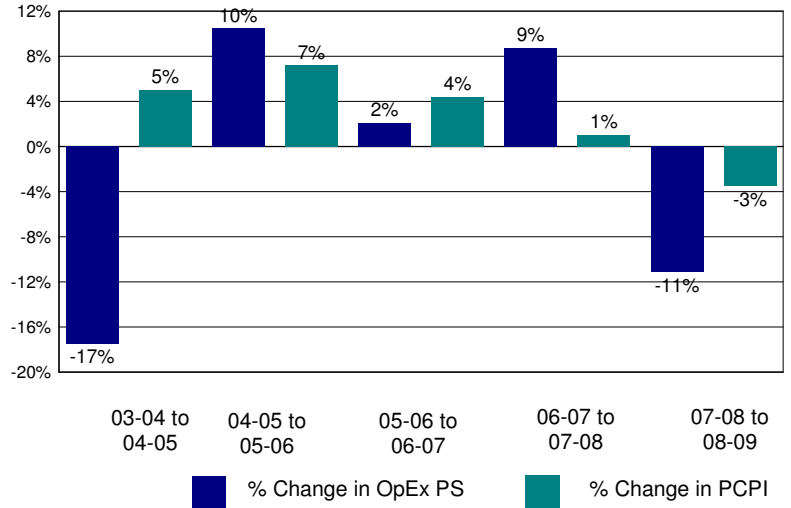

- Total Certificated Teacher Salaries (Object 1100) & Estimated Benefits
- Total Instructional Aide Salaries (Object 2100) & Estimated Benefits
- Approved Textbooks and Books (Objects 4100 & 4200)
- Materials and Supplies expenditures (Object 4300) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180 and 1190)
- Professional/Consulting Services/Subagreements for Services (Objects 5100 and 5800) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180, 1190)

District Profile: Tipton Elementary

The graph in the top right corner shows the difference between the change in the district's Total Operating Expenditures (excluding capital) per student (blue bar) and California Per Capita Personal Income (green bar). [See the Methodology for a full description for how this is calculated]. Tipton Elementary spent \$8,302 per student, which ranked 714 out of the 955 districts for which this information was available, with the top ranked district spending the most per student.

The graph in the middle left hand side of the page shows the annual savings if Total Operating Expenditures per student, excluding Certificated Teacher Salaries and Benefits, had only increased at the same rate as PCPI in FY 07-08. Note that for FY 08-09 the calculation shown is for the savings if the increase in such Operating Expenditures per student (i.e., excluding Certificated Teacher Salaries and Benefits) was held at zero, not decreased at the rate PCPI decreased. Below each year is the number of teachers that could have been employed by those savings.

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed. For FY 08-09, this district ranked 412 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In Tipton Elementary Total Operating Expenditures per student (excluding capital), grew by 29% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In Tipton Elementary, 5% of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated 0 additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 19% of Certificated Teacher Salary expenditures. This amount ranked 727 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 62%.

This district is in quadrant 3. (See Chart 3-6, pp. 104-105)

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

District Profile: Tres Pinos Union Elementary

The graph in the top right corner shows the difference between the change in the district's Total Operating Expenditures (excluding capital) per student (blue bar) and California Per Capita Personal Income (green bar). [See the Methodology for a full description for how this is calculated]. Tres Pinos Union Elementary spent \$8,060 per student, which ranked 798 out of the 955 districts for which this information was available, with the top ranked district spending the most per student.

The graph in the middle left hand side of the page shows the annual savings if Total Operating Expenditures per student, excluding Certificated Teacher Salaries and Benefits, had only increased at the same rate as PCPI in FY 07-08. Note that for FY 08-09 the calculation shown is for the savings if the increase in such Operating Expenditures per student (i.e., excluding Certificated Teacher Salaries and Benefits) was held at zero, not decreased at the rate PCPI decreased. Below each year is the number of teachers that could have been employed by those savings.

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed. For FY 08-09, this district ranked 418 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In Tres Pinos Union Elementary Total Operating Expenditures per student (excluding capital), grew by 49% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In Tres Pinos Union Elementary, % of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 22% of Certificated Teacher Salary expenditures. This amount ranked 807 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 63%.

This district is in quadrant 2. (See Chart 3-6, pp. 104-105)

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

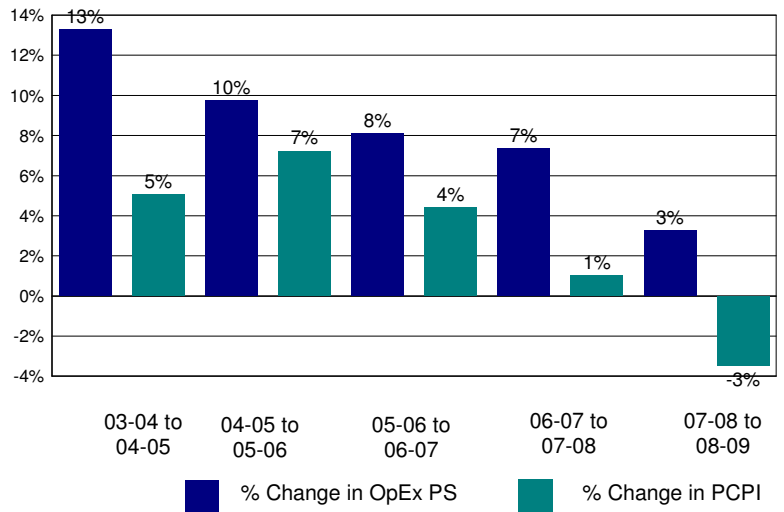

- Total Certificated Teacher Salaries (Object 1100) & Estimated Benefits
- Total Instructional Aide Salaries (Object 2100) & Estimated Benefits
- Approved Textbooks and Books (Objects 4100 & 4200)
- Materials and Supplies expenditures (Object 4300) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180 and 1190)
- Professional/Consulting Services/Subagreements for Services (Objects 5100 and 5800) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180, 1190)

District Profile: Trinidad Union Elementary

The graph in the top right corner shows the difference between the change in the district's Total Operating Expenditures (excluding capital) per student (blue bar) and California Per Capita Personal Income (green bar). [See the Methodology for a full description for how this is calculated]. Trinidad Union Elementary spent \$9,745 per student, which ranked 349 out of the 955 districts for which this information was available, with the top ranked district spending the most per student.

The graph in the middle left hand side of the page shows the annual savings if Total Operating Expenditures per student, excluding Certificated Teacher Salaries and Benefits, had only increased at the same rate as PCPI in FY 07-08. Note that for FY 08-09 the calculation shown is for the savings if the increase in such Operating Expenditures per student (i.e., excluding Certificated Teacher Salaries and Benefits) was held at zero, not decreased at the rate PCPI decreased. Below each year is the number of teachers that could have been employed by those savings.

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed. For FY 08-09, this district ranked 680 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In Trinidad Union Elementary Total Operating Expenditures per student (excluding capital), grew by 5% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In Trinidad Union Elementary, % of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 20% of Certificated Teacher Salary expenditures. This amount ranked 766 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 58%.

This district is in quadrant 1. (See Chart 3-6, pp. 104-105)

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

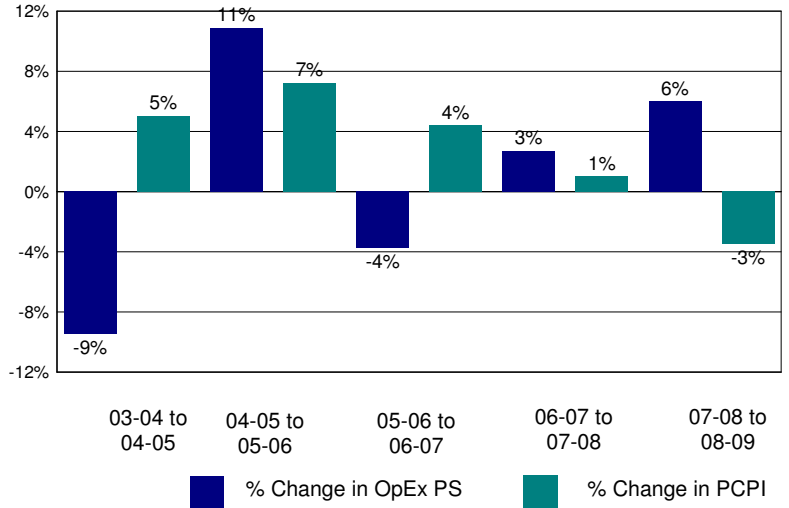

- Total Certificated Teacher Salaries (Object 1100) & Estimated Benefits
- Total Instructional Aide Salaries (Object 2100) & Estimated Benefits
- Approved Textbooks and Books (Objects 4100 & 4200)

District Profile: Tulare Joint Union High

The graph in the top right corner shows the difference between the change in the district's Total Operating Expenditures (excluding capital) per student (blue bar) and California Per Capita Personal Income (green bar). [See the Methodology for a full description for how this is calculated]. Tulare Joint Union High spent \$10,670 per student, which ranked 245 out of the 955 districts for which this information was available, with the top ranked district spending the most per student.

The graph in the middle left hand side of the page shows the annual savings if Total Operating Expenditures per student, excluding Certificated Teacher Salaries and Benefits, had only increased at the same rate as PCPI in FY 07-08. Note that for FY 08-09 the calculation shown is for the savings if the increase in such Operating Expenditures per student (i.e., excluding Certificated Teacher Salaries and Benefits) was held at zero, not decreased at the rate PCPI decreased. Below each year is the number of teachers that could have been employed by those savings.

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed. For FY 08-09, this district ranked 732 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In Tulare Joint Union High Total Operating Expenditures per student (excluding capital), grew by 27% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In Tulare Joint Union High, 21% of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated 33 additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 13% of Certificated Teacher Salary expenditures. This amount ranked 280 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 49%.

This district is in quadrant 2. (See Chart 3-6, pp. 104-105)

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

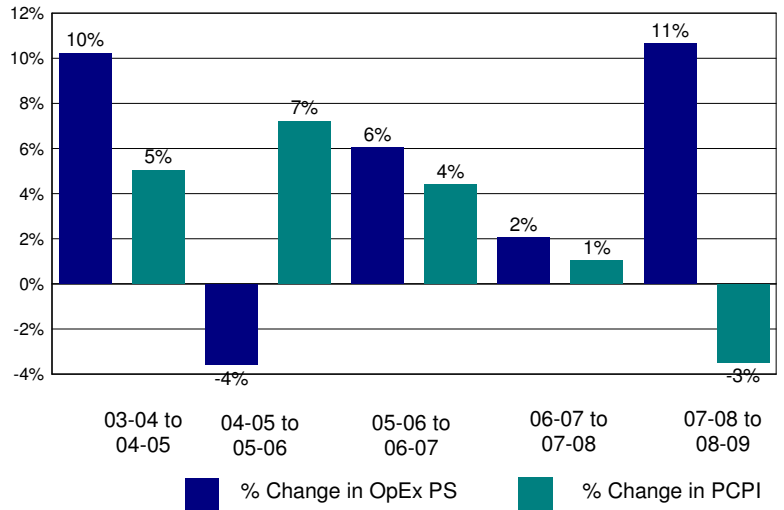

- Total Certificated Teacher Salaries (Object 1100) & Estimated Benefits
- Total Instructional Aide Salaries (Object 2100) & Estimated Benefits
- Approved Textbooks and Books (Objects 4100 & 4200)
- Materials and Supplies expenditures (Object 4300) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180 and 1190)
- Professional/Consulting Services/Subagreements for Services (Objects 5100 and 5800) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180, 1190)

District Profile: Tulelake Basin Joint Unified

The graph in the top right corner shows the difference between the change in the district's Total Operating Expenditures (excluding capital) per student (blue bar) and California Per Capita Personal Income (green bar). [See the Methodology for a full description for how this is calculated]. Tulelake Basin Joint Unified spent \$12,676 per student, which ranked 149 out of the 955 districts for which this information was available, with the top ranked district spending the most per student.

The graph in the middle left hand side of the page shows the annual savings if Total Operating Expenditures per student, excluding Certificated Teacher Salaries and Benefits, had only increased at the same rate as PCPI in FY 07-08. Note that for FY 08-09 the calculation shown is for the savings if the increase in such Operating Expenditures per student (i.e., excluding Certificated Teacher Salaries and Benefits) was held at zero, not decreased at the rate PCPI decreased. Below each year is the number of teachers that could have been employed by those savings.

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed. For FY 08-09, this district ranked 410 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In Tulelake Basin Joint Unified Total Operating Expenditures per student (excluding capital), grew by 18% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In Tulelake Basin Joint Unified, 15% of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated 0 additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 11% of Certificated Teacher Salary expenditures. This amount ranked 110 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 57%.

This district is in quadrant 2. (See Chart 3-6, pp. 104-105)

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

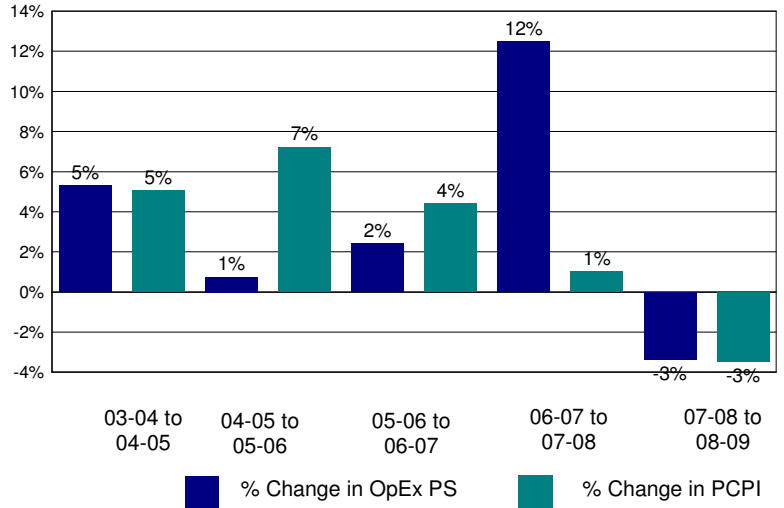

- Total Certificated Teacher Salaries (Object 1100) & Estimated Benefits

District Profile: Twin Ridges Elementary

The graph in the top right corner shows the difference between the change in the district's Total Operating Expenditures (excluding capital) per student (blue bar) and California Per Capita Personal Income (green bar). [See the Methodology for a full description for how this is calculated]. Twin Ridges Elementary spent \$17,672 per student, which ranked 63 out of the 955 districts for which this information was available, with the top ranked district spending the most per student.

The graph in the middle left hand side of the page shows the annual savings if Total Operating Expenditures per student, excluding Certificated Teacher Salaries and Benefits, had only increased at the same rate as PCPI in FY 07-08. Note that for FY 08-09 the calculation shown is for the savings if the increase in such Operating Expenditures per student (i.e., excluding Certificated Teacher Salaries and Benefits) was held at zero, not decreased at the rate PCPI decreased. Below each year is the number of teachers that could have been employed by those savings.

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed. For FY 08-09, this district ranked 923 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In Twin Ridges Elementary Total Operating Expenditures per student (excluding capital), grew by 165% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In Twin Ridges Elementary, % of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 43% of Certificated Teacher Salary expenditures. This amount ranked 930 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 44%.

This district is in quadrant 3. (See Chart 3-6, pp. 104-105)

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

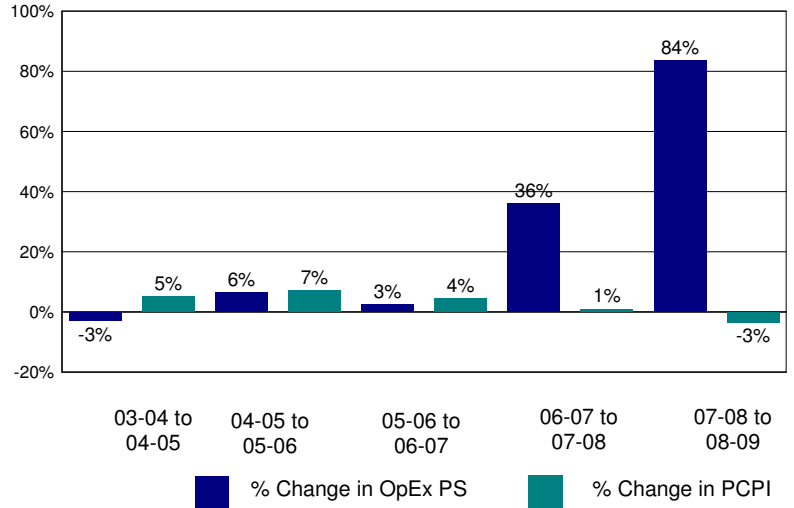

- Total Certificated Teacher Salaries (Object 1100) & Estimated Benefits
- Total Instructional Aide Salaries (Object 2100) & Estimated Benefits
- Approved Textbooks and Books (Objects 4100 & 4200)
- Materials and Supplies expenditures (Object 4300) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180 and 1190)
- Professional/Consulting Services/Subagreements for Services (Objects 5100 and 5800) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180, 1190)

District Profile: Twin Rivers Unified

The graph in the top right corner shows the difference between the change in the district's Total Operating Expenditures (excluding capital) per student (blue bar) and California Per Capita Personal Income (green bar). [See the Methodology for a full description for how this is calculated]. Twin Rivers Unified spent \$9,825 per student, which ranked 338 out of the 955 districts for which this information was available, with the top ranked district spending the most per student.

The graph in the middle left hand side of the page shows the annual savings if Total Operating Expenditures per student, excluding Certificated Teacher Salaries and Benefits, had only increased at the same rate as PCPI in FY 07-08. Note that for FY 08-09 the calculation shown is for the savings if the increase in such Operating Expenditures per student (i.e., excluding Certificated Teacher Salaries and Benefits) was held at zero, not decreased at the rate PCPI decreased. Below each year is the number of teachers that could have been employed by those savings.

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed. For FY 08-09, this district ranked 459 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In Twin Rivers Unified Total Operating Expenditures per student (excluding capital), grew by % from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In Twin Rivers Unified, 25% of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 18% of Certificated Teacher Salary expenditures. This amount ranked 653 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 58%.

This district is in quadrant . (See Chart 3-6, pp. 104-105)

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

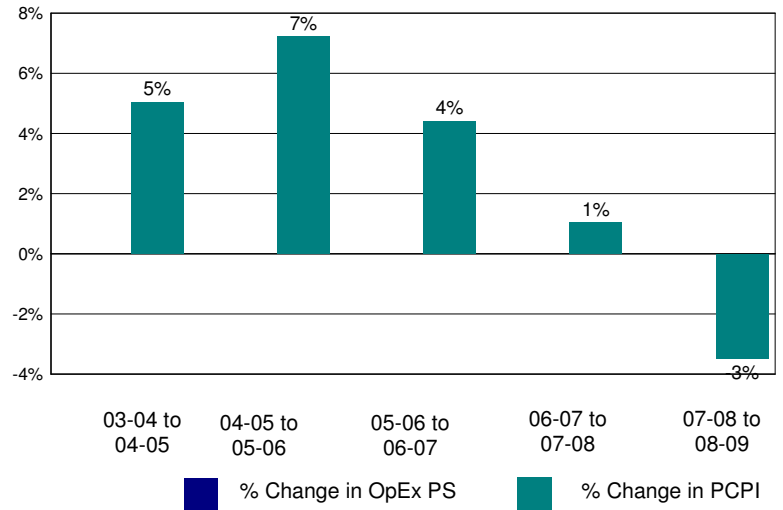

- Total Certificated Teacher Salaries (Object 1100) & Estimated Benefits
- Total Instructional Aide Salaries (Object 2100) & Estimated Benefits

District Profile: Union Joint Elementary

The graph in the top right corner shows the difference between the change in the district's Total Operating Expenditures (excluding capital) per student (blue bar) and California Per Capita Personal Income (green bar). [See the Methodology for a full description for how this is calculated]. Union Joint Elementary spent \$16,851 per student, which ranked 72 out of the 955 districts for which this information was available, with the top ranked district spending the most per student.

The graph in the middle left hand side of the page shows the annual savings if Total Operating Expenditures per student, excluding Certificated Teacher Salaries and Benefits, had only increased at the same rate as PCPI in FY 07-08. Note that for FY 08-09 the calculation shown is for the savings if the increase in such Operating Expenditures per student (i.e., excluding Certificated Teacher Salaries and Benefits) was held at zero, not decreased at the rate PCPI decreased. Below each year is the number of teachers that could have been employed by those savings.

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed. For FY 08-09, this district ranked 905 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In Union Joint Elementary Total Operating Expenditures per student (excluding capital), grew by 37% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In Union Joint Elementary, 9% of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated 0 additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 14% of Certificated Teacher Salary expenditures. This amount ranked 302 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 63%.

This district is in quadrant 4. (See Chart 3-6, pp. 104-105)

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

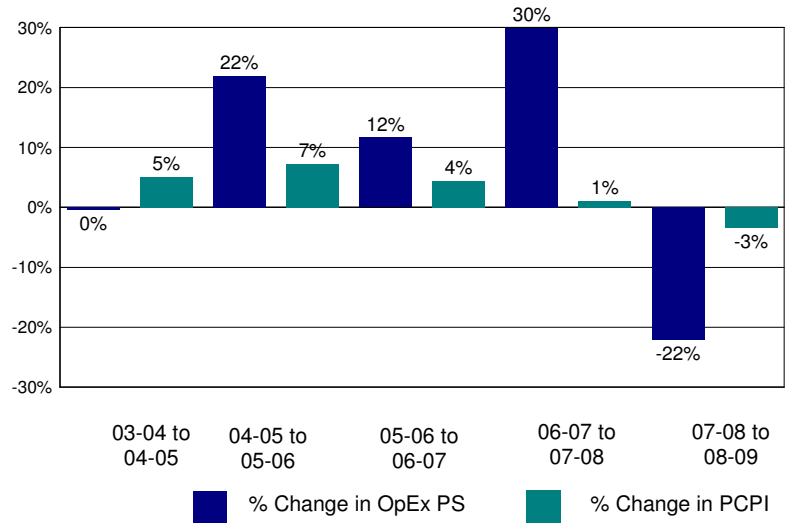

- Total Certificated Teacher Salaries (Object 1100) & Estimated Benefits
- Total Instructional Aide Salaries (Object 2100) & Estimated Benefits
- Approved Textbooks and Books (Objects 4100 & 4200)
- Materials and Supplies expenditures (Object 4300) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180 and 1190)
- Professional/Consulting Services/Subagreements for Services (Objects 5100 and 5800) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180, 1190)

District Profile: Upland Unified

The graph in the top right corner shows the difference between the change in the district's Total Operating Expenditures (excluding capital) per student (blue bar) and California Per Capita Personal Income (green bar). [See the Methodology for a full description for how this is calculated]. Upland Unified spent \$7,700 per student, which ranked 858 out of the 955 districts for which this information was available, with the top ranked district spending the most per student.

The graph in the middle left hand side of the page shows the annual savings if Total Operating Expenditures per student, excluding Certificated Teacher Salaries and Benefits, had only increased at the same rate as PCPI in FY 07-08. Note that for FY 08-09 the calculation shown is for the savings if the increase in such Operating Expenditures per student (i.e., excluding Certificated Teacher Salaries and Benefits) was held at zero, not decreased at the rate PCPI decreased. Below each year is the number of teachers that could have been employed by those savings.

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed. For FY 08-09, this district ranked 22 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In Upland Unified Total Operating Expenditures per student (excluding capital), grew by 28% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In Upland Unified, 26% of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated 0 additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 10% of Certificated Teacher Salary expenditures. This amount ranked 59 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 67%.

This district is in quadrant 3. (See Chart 3-6, pp. 104-105)

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

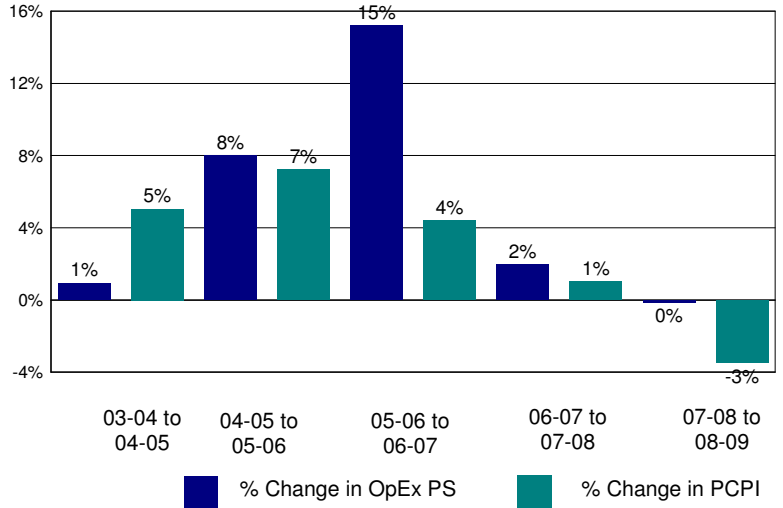

- Total Certificated Teacher Salaries (Object 1100) & Estimated Benefits
- Total Instructional Aide Salaries (Object 2100) & Estimated Benefits

District Profile: Valle Lindo Elementary

The graph in the top right corner shows the difference between the change in the district's Total Operating Expenditures (excluding capital) per student (blue bar) and California Per Capita Personal Income (green bar). [See the Methodology for a full description for how this is calculated]. Valle Lindo Elementary spent \$7,501 per student, which ranked 890 out of the 955 districts for which this information was available, with the top ranked district spending the most per student.

The graph in the middle left hand side of the page shows the annual savings if Total Operating Expenditures per student, excluding Certificated Teacher Salaries and Benefits, had only increased at the same rate as PCPI in FY 07-08. Note that for FY 08-09 the calculation shown is for the savings if the increase in such Operating Expenditures per student (i.e., excluding Certificated Teacher Salaries and Benefits) was held at zero, not decreased at the rate PCPI decreased. Below each year is the number of teachers that could have been employed by those savings.

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed. For FY 08-09, this district ranked 57 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In Valle Lindo Elementary Total Operating Expenditures per student (excluding capital), grew by 32% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In Valle Lindo Elementary, 14% of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated 0 additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 13% of Certificated Teacher Salary expenditures. This amount ranked 205 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 70%.

This district is in quadrant 2. (See Chart 3-6, pp. 104-105)

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

District Profile: Vallecito Union Elementary

The graph in the top right corner shows the difference between the change in the district's Total Operating Expenditures (excluding capital) per student (blue bar) and California Per Capita Personal Income (green bar). [See the Methodology for a full description for how this is calculated]. Vallecito Union Elementary spent \$9,975 per student, which ranked 319 out of the 955 districts for which this information was available, with the top ranked district spending the most per student.

The graph in the middle left hand side of the page shows the annual savings if Total Operating Expenditures per student, excluding Certificated Teacher Salaries and Benefits, had only increased at the same rate as PCPI in FY 07-08. Note that for FY 08-09 the calculation shown is for the savings if the increase in such Operating Expenditures per student (i.e., excluding Certificated Teacher Salaries and Benefits) was held at zero, not decreased at the rate PCPI decreased. Below each year is the number of teachers that could have been employed by those savings.

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed. For FY 08-09, this district ranked 444 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In Vallecito Union Elementary Total Operating Expenditures per student (excluding capital), grew by 38% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In Vallecito Union Elementary, 17% of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated 2 additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 18% of Certificated Teacher Salary expenditures. This amount ranked 626 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 60%.

This district is in quadrant 3. (See Chart 3-6, pp. 104-105)

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

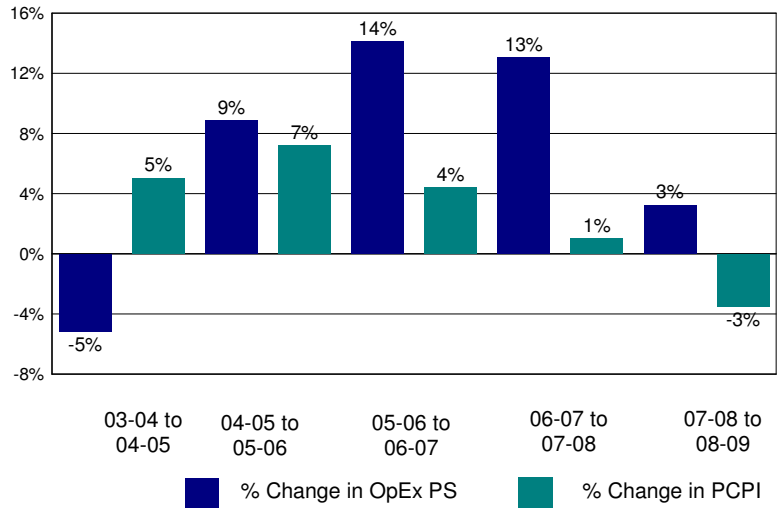

- Total Certificated Teacher Salaries (Object 1100) & Estimated Benefits
- Total Instructional Aide Salaries (Object 2100) & Estimated Benefits
- Approved Textbooks and Books (Objects 4100 & 4200)
- Materials and Supplies expenditures (Object 4300) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180 and 1190)
- Professional/Consulting Services/Subagreements for Services (Objects 5100 and 5800) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180, 1190)

District Profile: Ventura Unified

The graph in the top right corner shows the difference between the change in the district's Total Operating Expenditures (excluding capital) per student (blue bar) and California Per Capita Personal Income (green bar). [See the Methodology for a full description for how this is calculated]. Ventura Unified spent \$8,505 per student, which ranked 653 out of the 955 districts for which this information was available, with the top ranked district spending the most per student.

The graph in the middle left hand side of the page shows the annual savings if Total Operating Expenditures per student, excluding Certificated Teacher Salaries and Benefits, had only increased at the same rate as PCPI in FY 07-08. Note that for FY 08-09 the calculation shown is for the savings if the increase in such Operating Expenditures per student (i.e., excluding Certificated Teacher Salaries and Benefits) was held at zero, not decreased at the rate PCPI decreased. Below each year is the number of teachers that could have been employed by those savings.

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed. For FY 08-09, this district ranked 422 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In Ventura Unified Total Operating Expenditures per student (excluding capital), grew by 19% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In Ventura Unified, 28% of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated 0 additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 13% of Certificated Teacher Salary expenditures. This amount ranked 277 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 57%.

This district is in quadrant 3. (See Chart 3-6, pp. 104-105)

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

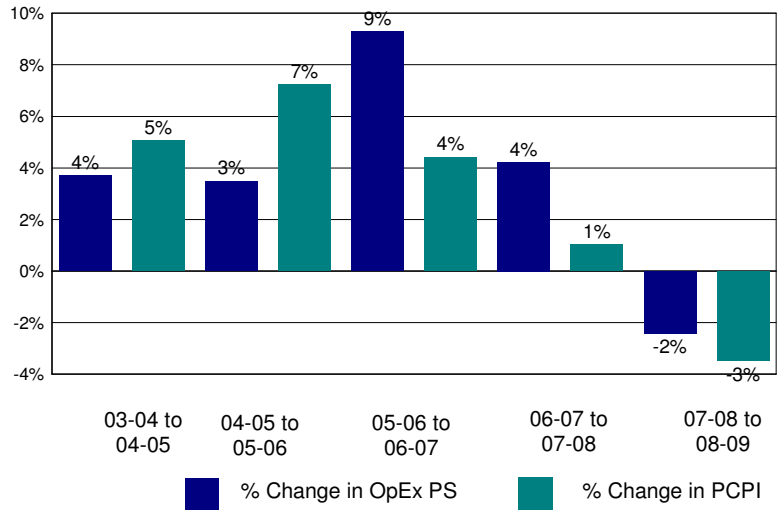

- Total Certificated Teacher Salaries (Object 1100) & Estimated Benefits
- Total Instructional Aide Salaries (Object 2100) & Estimated Benefits

District Profile: Victor Elementary

The graph in the top right corner shows the difference between the change in the district's Total Operating Expenditures (excluding capital) per student (blue bar) and California Per Capita Personal Income (green bar). [See the Methodology for a full description for how this is calculated]. Victor Elementary spent \$7,020 per student, which ranked 935 out of the 955 districts for which this information was available, with the top ranked district spending the most per student.

The graph in the middle left hand side of the page shows the annual savings if Total Operating Expenditures per student, excluding Certificated Teacher Salaries and Benefits, had only increased at the same rate as PCPI in FY 07-08. Note that for FY 08-09 the calculation shown is for the savings if the increase in such Operating Expenditures per student (i.e., excluding Certificated Teacher Salaries and Benefits) was held at zero, not decreased at the rate PCPI decreased. Below each year is the number of teachers that could have been employed by those savings.

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed. For FY 08-09, this district ranked 110 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In Victor Elementary Total Operating Expenditures per student (excluding capital), grew by 24% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In Victor Elementary, 15% of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated 0 additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 10% of Certificated Teacher Salary expenditures. This amount ranked 75 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 62%.

This district is in quadrant 4. (See Chart 3-6, pp. 104-105)

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

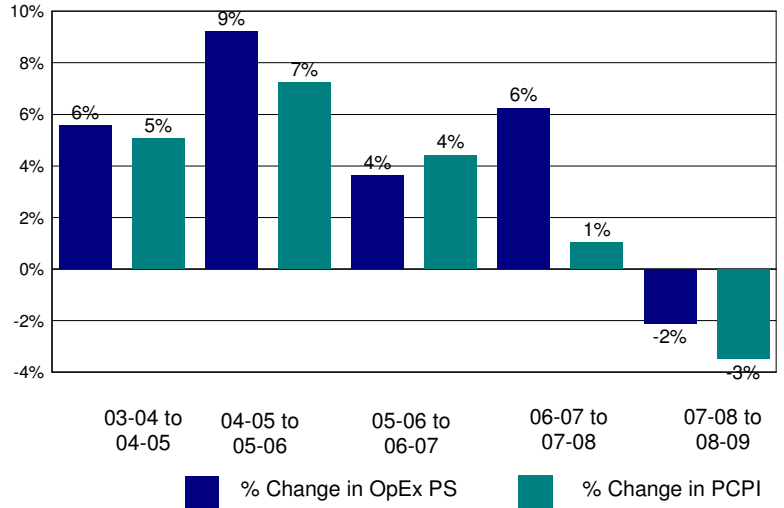

- Total Certificated Teacher Salaries (Object 1100) & Estimated Benefits
- Total Instructional Aide Salaries (Object 2100) & Estimated Benefits
- Approved Textbooks and Books (Objects 4100 & 4200)
- Materials and Supplies expenditures (Object 4300) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180 and 1190)
- Professional/Consulting Services/Subagreements for Services (Objects 5100 and 5800) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180, 1190)

District Profile: Vista Unified

The graph in the top right corner shows the difference between the change in the district's Total Operating Expenditures (excluding capital) per student (blue bar) and California Per Capita Personal Income (green bar). [See the Methodology for a full description for how this is calculated]. Vista Unified spent \$8,914 per student, which ranked 522 out of the 955 districts for which this information was available, with the top ranked district spending the most per student.

The graph in the middle left hand side of the page shows the annual savings if Total Operating Expenditures per student, excluding Certificated Teacher Salaries and Benefits, had only increased at the same rate as PCPI in FY 07-08. Note that for FY 08-09 the calculation shown is for the savings if the increase in such Operating Expenditures per student (i.e., excluding Certificated Teacher Salaries and Benefits) was held at zero, not decreased at the rate PCPI decreased. Below each year is the number of teachers that could have been employed by those savings.

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed. For FY 08-09, this district ranked 330 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In Vista Unified Total Operating Expenditures per student (excluding capital), grew by 27% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In Vista Unified, 26% of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated 0 additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 8% of Certificated Teacher Salary expenditures. This amount ranked 30 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 64%.

This district is in quadrant 2. (See Chart 3-6, pp. 104-105)

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

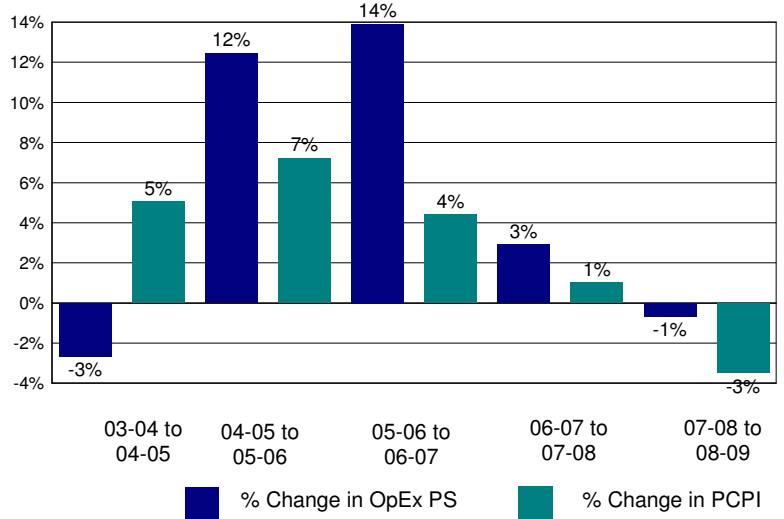

- Total Certificated Teacher Salaries (Object 1100) & Estimated Benefits
- Total Instructional Aide Salaries (Object 2100) & Estimated Benefits

District Profile: Walnut Creek Elementary

The graph in the top right corner shows the difference between the change in the district's Total Operating Expenditures (excluding capital) per student (blue bar) and California Per Capita Personal Income (green bar). [See the Methodology for a full description for how this is calculated]. Walnut Creek Elementary spent \$7,606 per student, which ranked 871 out of the 955 districts for which this information was available, with the top ranked district spending the most per student.

The graph in the middle left hand side of the page shows the annual savings if Total Operating Expenditures per student, excluding Certificated Teacher Salaries and Benefits, had only increased at the same rate as PCPI in FY 07-08. Note that for FY 08-09 the calculation shown is for the savings if the increase in such Operating Expenditures per student (i.e., excluding Certificated Teacher Salaries and Benefits) was held at zero, not decreased at the rate PCPI decreased. Below each year is the number of teachers that could have been employed by those savings.

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed. For FY 08-09, this district ranked 49 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In Walnut Creek Elementary Total Operating Expenditures per student (excluding capital), grew by 14% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In Walnut Creek Elementary, 21% of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated 0 additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 12% of Certificated Teacher Salary expenditures. This amount ranked 192 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 71%.

This district is in quadrant 2. (See Chart 3-6, pp. 104-105)

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

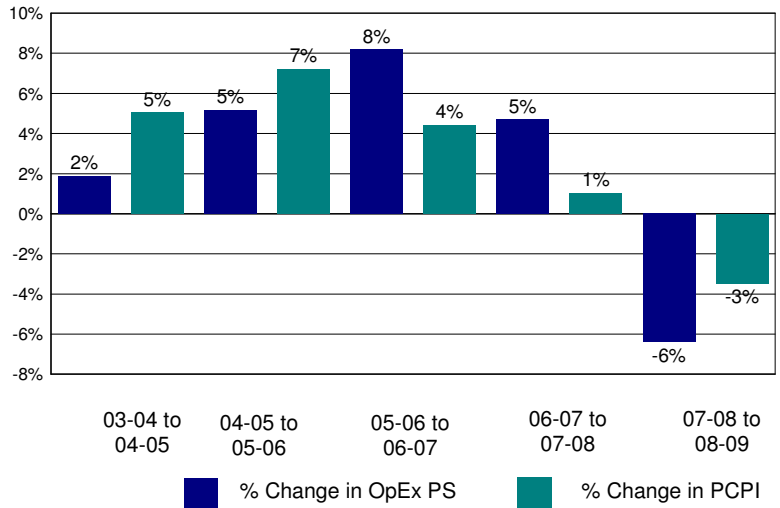

- Total Certificated Teacher Salaries (Object 1100) & Estimated Benefits
- Total Instructional Aide Salaries (Object 2100) & Estimated Benefits
- Approved Textbooks and Books (Objects 4100 & 4200)
- Materials and Supplies expenditures (Object 4300) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180 and 1190)
- Professional/Consulting Services/Subagreements for Services (Objects 5100 and 5800) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180, 1190)

District Profile: Washington Unified

The graph in the top right corner shows the difference between the change in the district's Total Operating Expenditures (excluding capital) per student (blue bar) and California Per Capita Personal Income (green bar). [See the Methodology for a full description for how this is calculated]. Washington Unified spent \$8,407 per student, which ranked 683 out of the 955 districts for which this information was available, with the top ranked district spending the most per student.

The graph in the middle left hand side of the page shows the annual savings if Total Operating Expenditures per student, excluding Certificated Teacher Salaries and Benefits, had only increased at the same rate as PCPI in FY 07-08. Note that for FY 08-09 the calculation shown is for the savings if the increase in such Operating Expenditures per student (i.e., excluding Certificated Teacher Salaries and Benefits) was held at zero, not decreased at the rate PCPI decreased. Below each year is the number of teachers that could have been employed by those savings.

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed. For FY 08-09, this district ranked 543 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In Washington Unified Total Operating Expenditures per student (excluding capital), grew by 8% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In Washington Unified, 31% of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated 0 additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 16% of Certificated Teacher Salary expenditures. This amount ranked 498 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 59%.

This district is in quadrant 4. (See Chart 3-6, pp. 104-105)

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

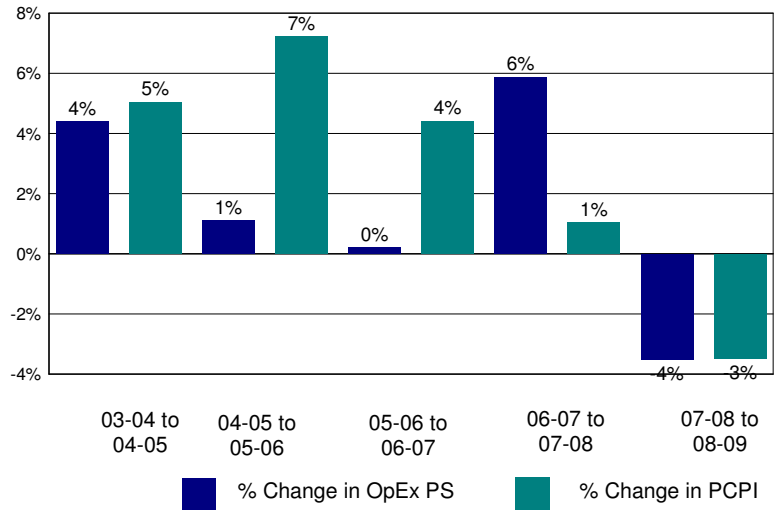

- Total Certificated Teacher Salaries (Object 1100) & Estimated Benefits
- Total Instructional Aide Salaries (Object 2100) & Estimated Benefits
- Approved Textbooks and Books (Objects 4100 & 4200)
- Materials and Supplies expenditures (Object 4300) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180 and 1190)
- Professional/Consulting Services/Subagreements for Services (Objects 5100 and 5800) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180, 1190)

District Profile: Weaver Union Elementary

The graph in the top right corner shows the difference between the change in the district's Total Operating Expenditures (excluding capital) per student (blue bar) and California Per Capita Personal Income (green bar). [See the Methodology for a full description for how this is calculated]. Weaver Union Elementary spent \$7,694 per student, which ranked 859 out of the 955 districts for which this information was available, with the top ranked district spending the most per student.

The graph in the middle left hand side of the page shows the annual savings if Total Operating Expenditures per student, excluding Certificated Teacher Salaries and Benefits, had only increased at the same rate as PCPI in FY 07-08. Note that for FY 08-09 the calculation shown is for the savings if the increase in such Operating Expenditures per student (i.e., excluding Certificated Teacher Salaries and Benefits) was held at zero, not decreased at the rate PCPI decreased. Below each year is the number of teachers that could have been employed by those savings.

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed. For FY 08-09, this district ranked 31 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In Weaver Union Elementary Total Operating Expenditures per student (excluding capital), grew by 14% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In Weaver Union Elementary, 28% of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated 0 additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 13% of Certificated Teacher Salary expenditures. This amount ranked 230 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 69%.

This district is in quadrant 4. (See Chart 3-6, pp. 104-105)

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

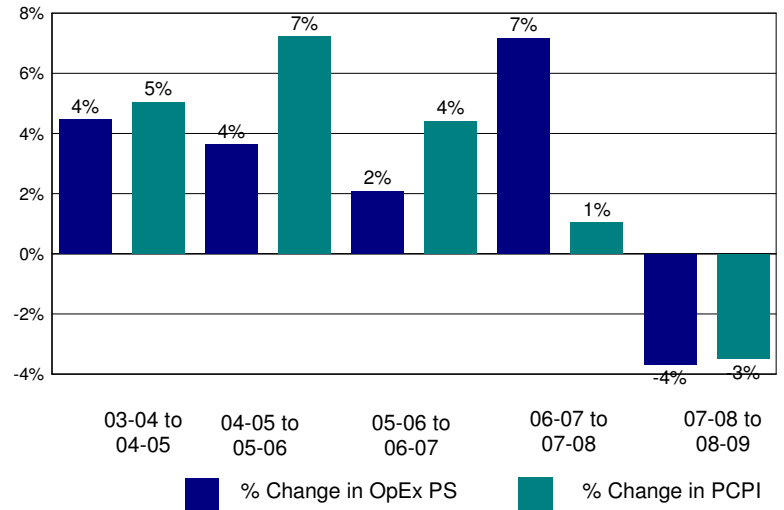

- Total Certificated Teacher Salaries (Object 1100) & Estimated Benefits
- Total Instructional Aide Salaries (Object 2100) & Estimated Benefits
- Approved Textbooks and Books (Objects 4100 & 4200)
- Materials and Supplies expenditures (Object 4300) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180 and 1190)
- Professional/Consulting Services/Subagreements for Services (Objects 5100 and 5800) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180, 1190)

District Profile: West Side Union Elementary

The graph in the top right corner shows the difference between the change in the district's Total Operating Expenditures (excluding capital) per student (blue bar) and California Per Capita Personal Income (green bar). [See the Methodology for a full description for how this is calculated]. West Side Union Elementary spent \$8,499 per student, which ranked 655 out of the 955 districts for which this information was available, with the top ranked district spending the most per student.

The graph in the middle left hand side of the page shows the annual savings if Total Operating Expenditures per student, excluding Certificated Teacher Salaries and Benefits, had only increased at the same rate as PCPI in FY 07-08. Note that for FY 08-09 the calculation shown is for the savings if the increase in such Operating Expenditures per student (i.e., excluding Certificated Teacher Salaries and Benefits) was held at zero, not decreased at the rate PCPI decreased. Below each year is the number of teachers that could have been employed by those savings.

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed. For FY 08-09, this district ranked 798 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In West Side Union Elementary Total Operating Expenditures per student (excluding capital), grew by 27% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In West Side Union Elementary, % of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 22% of Certificated Teacher Salary expenditures. This amount ranked 812 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 57%.

This district is in quadrant 4. (See Chart 3-6, pp. 104-105)

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

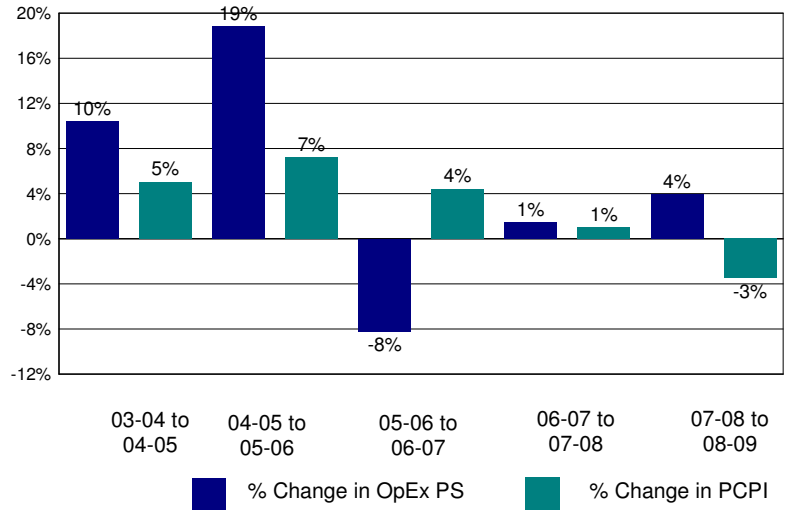

- Total Certificated Teacher Salaries (Object 1100) & Estimated Benefits
- Total Instructional Aide Salaries (Object 2100) & Estimated Benefits
- Approved Textbooks and Books (Objects 4100 & 4200)
- Materials and Supplies expenditures (Object 4300) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180 and 1190)
- Professional/Consulting Services/Subagreements for Services (Objects 5100 and 5800) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180, 1190)

District Profile: Westside Union Elementary

The graph in the top right corner shows the difference between the change in the district's Total Operating Expenditures (excluding capital) per student (blue bar) and California Per Capita Personal Income (green bar). [See the Methodology for a full description for how this is calculated]. Westside Union Elementary spent \$6,891 per student, which ranked 943 out of the 955 districts for which this information was available, with the top ranked district spending the most per student.

The graph in the middle left hand side of the page shows the annual savings if Total Operating Expenditures per student, excluding Certificated Teacher Salaries and Benefits, had only increased at the same rate as PCPI in FY 07-08. Note that for FY 08-09 the calculation shown is for the savings if the increase in such Operating Expenditures per student (i.e., excluding Certificated Teacher Salaries and Benefits) was held at zero, not decreased at the rate PCPI decreased. Below each year is the number of teachers that could have been employed by those savings.

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed. For FY 08-09, this district ranked 201 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In Westside Union Elementary Total Operating Expenditures per student (excluding capital), grew by 10% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In Westside Union Elementary, 14% of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated 0 additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 12% of Certificated Teacher Salary expenditures. This amount ranked 164 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 62%.

This district is in quadrant 4. (See Chart 3-6, pp. 104-105)

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

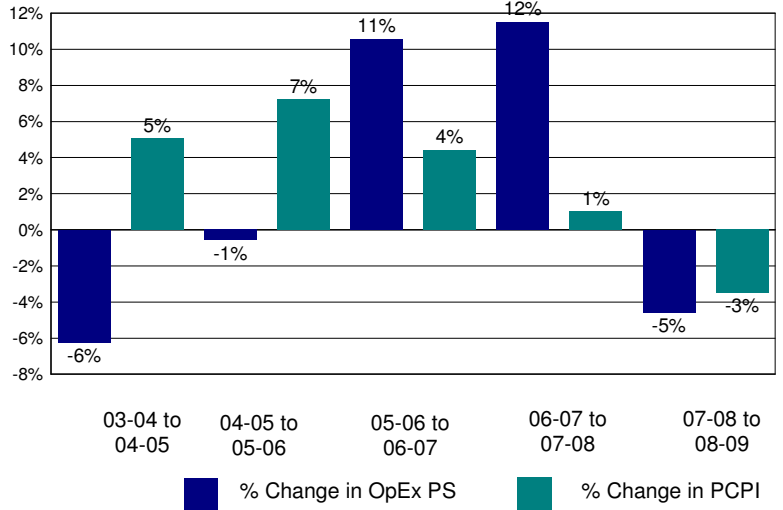

- Total Certificated Teacher Salaries (Object 1100) & Estimated Benefits
- Total Instructional Aide Salaries (Object 2100) & Estimated Benefits
- Approved Textbooks and Books (Objects 4100 & 4200)
- Materials and Supplies expenditures (Object 4300) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180 and 1190)
- Professional/Consulting Services/Subagreements for Services (Objects 5100 and 5800) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180, 1190)

District Profile: Whittier Union High

The graph in the top right corner shows the difference between the change in the district's Total Operating Expenditures (excluding capital) per student (blue bar) and California Per Capita Personal Income (green bar). [See the Methodology for a full description for how this is calculated]. Whittier Union High spent \$12,643 per student, which ranked 151 out of the 955 districts for which this information was available, with the top ranked district spending the most per student.

The graph in the middle left hand side of the page shows the annual savings if Total Operating Expenditures per student, excluding Certificated Teacher Salaries and Benefits, had only increased at the same rate as PCPI in FY 07-08. Note that for FY 08-09 the calculation shown is for the savings if the increase in such Operating Expenditures per student (i.e., excluding Certificated Teacher Salaries and Benefits) was held at zero, not decreased at the rate PCPI decreased. Below each year is the number of teachers that could have been employed by those savings.

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed. For FY 08-09, this district ranked 862 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In Whittier Union High Total Operating Expenditures per student (excluding capital), grew by 32% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In Whittier Union High, 19% of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated 117 additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 11% of Certificated Teacher Salary expenditures. This amount ranked 107 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 44%.

This district is in quadrant 3. (See Chart 3-6, pp. 104-105)

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

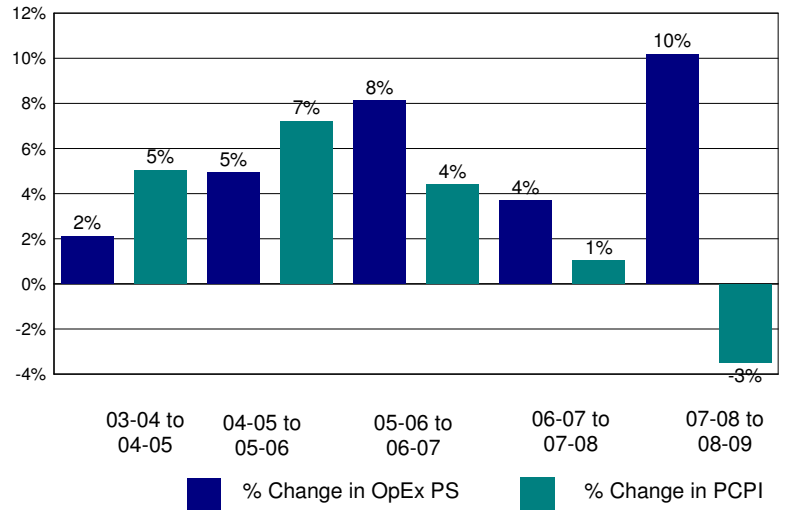

- Total Certificated Teacher Salaries (Object 1100) & Estimated Benefits
- Total Instructional Aide Salaries (Object 2100) & Estimated Benefits
- Approved Textbooks and Books (Objects 4100 & 4200)
- Materials and Supplies expenditures (Object 4300) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180 and 1190)
- Professional/Consulting Services/Subagreements for Services (Objects 5100 and 5800) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180, 1190)

The graph in the top right corner shows the difference between the change in the district's Total Operating Expenditures (excluding capital) per student (blue bar) and California Per Capita Personal Income (green bar). [See the Methodology for a full description for how this is calculated]. Willows Unified spent \$8,650 per student, which ranked 602 out of the 955 districts for which this information was available, with the top ranked district spending the most per student.

The graph in the middle left hand side of the page shows the annual savings if Total Operating Expenditures per student, excluding Certificated Teacher Salaries and Benefits, had only increased at the same rate as PCPI in FY 07-08. Note that for FY 08-09 the calculation shown is for the savings if the increase in such Operating Expenditures per student (i.e., excluding Certificated Teacher Salaries and Benefits) was held at zero, not decreased at the rate PCPI decreased. Below each year is the number of teachers that could have been employed by those savings.

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed. For FY 08-09, this district ranked 33 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In Willows Unified Total Operating Expenditures per student (excluding capital), grew by 23% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In Willows Unified, 22% of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated 0 additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 14% of Certificated Teacher Salary expenditures. This amount ranked 395 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 63%.

This district is in quadrant 3. (See Chart 3-6, pp. 104-105)

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

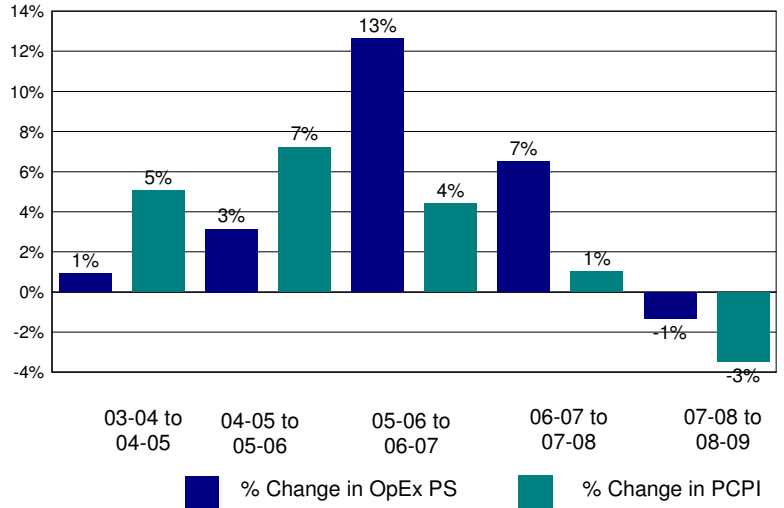

- Total Certificated Teacher Salaries (Object 1100) & Estimated Benefits
- Total Instructional Aide Salaries (Object 2100) & Estimated Benefits
- Approved Textbooks and Books (Objects 4100 & 4200)
- Materials and Supplies expenditures (Object 4300) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180 and 1190)
- Professional/Consulting Services/Subagreements for Services (Objects 5100 and 5800) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180, 1190)

The graph in the top right corner shows the difference between the change in the district's Total Operating Expenditures (excluding capital) per student (blue bar) and California Per Capita Personal Income (green bar). [See the Methodology for a full description for how this is calculated]. Winton Elementary spent \$9,229 per student, which ranked 438 out of the 955 districts for which this information was available, with the top ranked district spending the most per student.

The graph in the middle left hand side of the page shows the annual savings if Total Operating Expenditures per student, excluding Certificated Teacher Salaries and Benefits, had only increased at the same rate as PCPI in FY 07-08. Note that for FY 08-09 the calculation shown is for the savings if the increase in such Operating Expenditures per student (i.e., excluding Certificated Teacher Salaries and Benefits) was held at zero, not decreased at the rate PCPI decreased. Below each year is the number of teachers that could have been employed by those savings.

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed. For FY 08-09, this district ranked 371 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In Winton Elementary Total Operating Expenditures per student (excluding capital), grew by 26% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In Winton Elementary, 22% of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated 0 additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 19% of Certificated Teacher Salary expenditures. This amount ranked 722 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 59%.

This district is in quadrant 3. (See Chart 3-6, pp. 104-105)

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

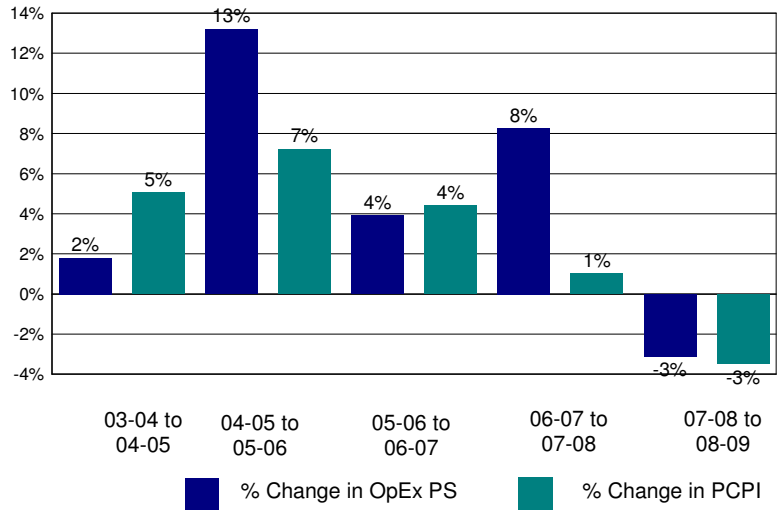

- Total Certificated Teacher Salaries (Object 1100) & Estimated Benefits
- Total Instructional Aide Salaries (Object 2100) & Estimated Benefits
- Approved Textbooks and Books (Objects 4100 & 4200)
- Materials and Supplies expenditures (Object 4300) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180 and 1190)
- Professional/Consulting Services/Subagreements for Services (Objects 5100 and 5800) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180, 1190)

District Profile: Woodville Union Elementary

The graph in the top right corner shows the difference between the change in the district's Total Operating Expenditures (excluding capital) per student (blue bar) and California Per Capita Personal Income (green bar). [See the Methodology for a full description for how this is calculated]. Woodville Union Elementary spent \$8,590 per student, which ranked 623 out of the 955 districts for which this information was available, with the top ranked district spending the most per student.

The graph in the middle left hand side of the page shows the annual savings if Total Operating Expenditures per student, excluding Certificated Teacher Salaries and Benefits, had only increased at the same rate as PCPI in FY 07-08. Note that for FY 08-09 the calculation shown is for the savings if the increase in such Operating Expenditures per student (i.e., excluding Certificated Teacher Salaries and Benefits) was held at zero, not decreased at the rate PCPI decreased. Below each year is the number of teachers that could have been employed by those savings.

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed. For FY 08-09, this district ranked 37 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In Woodville Union Elementary Total Operating Expenditures per student (excluding capital), grew by 20% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In Woodville Union Elementary, 17% of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated 0 additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 17% of Certificated Teacher Salary expenditures. This amount ranked 585 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 64%.

This district is in quadrant 3. (See Chart 3-6, pp. 104-105)

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

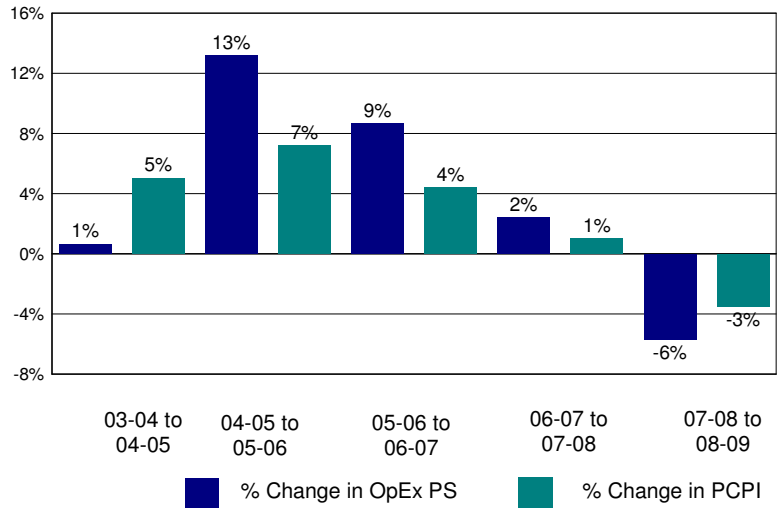

- Total Certificated Teacher Salaries (Object 1100) & Estimated Benefits
- Total Instructional Aide Salaries (Object 2100) & Estimated Benefits
- Approved Textbooks and Books (Objects 4100 & 4200)
- Materials and Supplies expenditures (Object 4300) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180 and 1190)
- Professional/Consulting Services/Subagreements for Services (Objects 5100 and 5800) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180, 1190)

Yucaipa-Calimesa Joint Unified spent \$8,186 per student, which ranked 752 out of the 955 districts for which this information was available, with the top ranked district spending the most per student.

The graph in the middle left hand side of the page shows the annual savings if Total Operating Expenditures per student, excluding Certificated Teacher Salaries and Benefits, had only increased at the same rate as PCPI in FY 07-08. Note that for FY 08-09 the calculation shown is for the savings if the increase in such Operating Expenditures per student (i.e., excluding Certificated Teacher Salaries and Benefits) was held at zero, not decreased at the rate PCPI decreased. Below each year is the number of teachers that could have been employed by those savings.

The graph in the lower right hand corner shows Teacher Salary and Benefit Expenditures as a percent of Total Operating Expenditures for each fiscal year listed. For FY 08-09, this district ranked 302 out of the 955 districts for which this data was available, with the top ranked district having the largest percentage in this regard.

In Yucaipa-Calimesa Joint Unified Total Operating Expenditures per student (excluding capital), grew by 21% from FY 03-04 to FY 08-09, which compares to the 15% growth in Statewide per capita personal income over the same time period.

In each district for which data was available the reported average class size was compared to the pupil-teacher ratio. In Yucaipa-Calimesa Joint Unified, 28% of the FTE teacher positions are in excess of the number necessary to meet the reported average class size.

By restricting growth in expenditures for all operating costs except teacher salaries and benefits to the rate of change in PCPI, an estimated 0 additional teachers could have been hired in FY 08-09.

In FY 08-09 Administrator/Supervisor Salary expenditures represented 11% of Certificated Teacher Salary expenditures. This amount ranked 116 out of the 955 districts for which this data was available, with the top ranked district having the smallest percentage in this regard.

In FY 08-09 the percentage of Total Operating Expenditures (excluding capital) spent "In the Classroom," was 59%.

This district is in quadrant 3. (See Chart 3-6, pp. 104-105)

In order to estimate the percentage of expenditures being spent "In the Classroom," the following objects/categories or expenditure were aggregated and juxtaposed with the Total Expenditures (excluding capital):

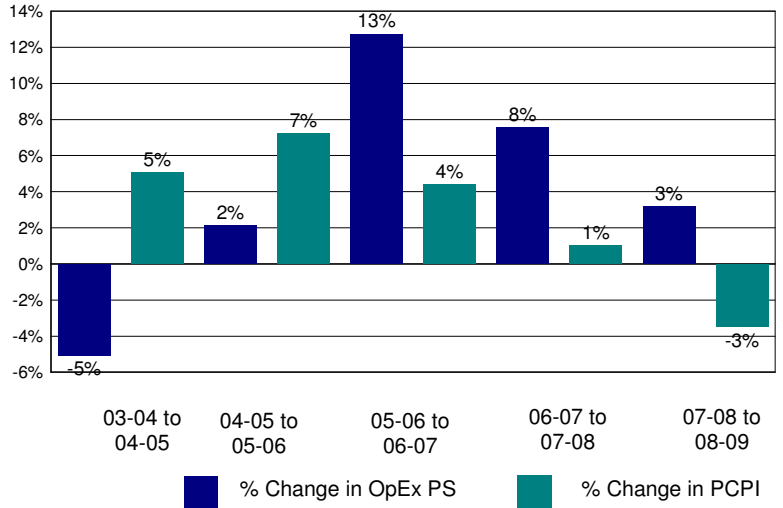

- Total Certificated Teacher Salaries (Object 1100) & Estimated Benefits
- Total Instructional Aide Salaries (Object 2100) & Estimated Benefits
- Approved Textbooks and Books (Objects 4100 & 4200)
- Materials and Supplies expenditures (Object 4300) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180 and 1190)
- Professional/Consulting Services/Subagreements for Services (Objects 5100 and 5800) that pertain to Instructional or Special Education Functions (Functions 1000, 1110, 1120, 1130, 1180, 1190)
